Caper®

The colourful, casual way
to pull up a chair

Caper
Designed by Jeff Weber

The perfectly portable chair, Caper is designed to be moved. Pull up a couple of Capers for collaborative work. Push a cluster of Capers together and transform a classroom. Take a whole Caper Cart of stacking chairs from the conference room to the cafeteria. Lightweight, durable, and easy to deploy, Caper is ideal for informal, flexible spaces where rearranging is encouraged.

The Caper chair, in all its variations—multipurpose chairs and stools, chairs and stools that stack, as well as Caper stacking chair with tablet arm—were designed to create comfortable, mobile seating that’s also affordable. “Too much good design seems expensive,” designer Jeff Weber says, “I wanted to break that cliché.”

Performance

Caper's glass-filled nylon seat and back are contoured for comfort, flexible for give, and colourful enough to brighten up any room. Holes in the material allow your body to breathe, dissipating moisture and heat so you remain cool. An optional FLEXNET™ seat uses advanced suspension materials to minimize pressure points, which keeps you comfortable longer.

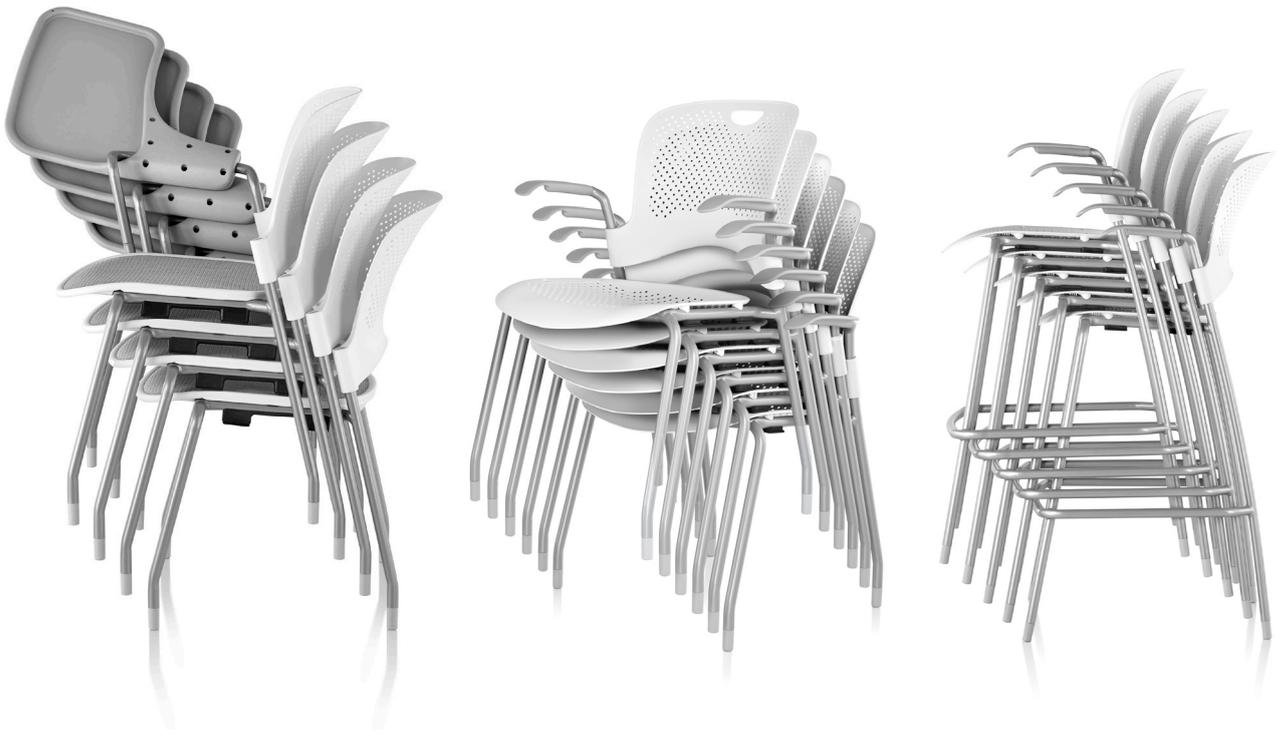

Caper Multipurpose chairs and stools feature swivel, tilt, and seat-height adjustment to support a broad range of activities. Caper stacking chairs can be stacked up to six-high on the floor or 15-high on the Caper Cart. With optional ganging connectors, they make a tidy presentation space. The stacking chair with tablet arm also stacks up to three-high on the floor; the stacking stool stacks five-high on the floor, thanks to its clever leg and footring design.

An optional storage basket adds a convenient place to keep personal items off the floor and safely out of walkways. The basket's shape and wire mesh design prevent items from falling or sliding back.

The Caper Stacking Chair with Tablet Arm features a generous work surface to accommodate today's technology, a fully enclosed pivot mechanism to eliminate pinch points, and a built-in dampener to prevent slamming when lowered.

All stacking versions – with or without arms, with casters or glides – can be stacked for space-efficient storage when not in use.

Design

Jeff Weber designed the Caper family of seating to accommodate a diversity of people, and, just as important, the variety of tasks they do.

As stylish as they are versatile, Caper chairs and stools are available in a palette of fresh, lively color choices. Sophisticated neutrals complement, while vibrant primary colors bring energy, adding practical function and a pop of color to any space.

About Jeff Weber

Jeff Weber's interest in furniture design began when he met the legendary Bill Stumpf. Together, they formed Stumpf, Weber + Associates in 1999, eventually collaborating on the breakthrough design of the Embody® chair. Today, Jeff is principal of Studio Weber + Associates, which employs a design philosophy based on empathy for the people who use their products. Jeff believes design is "the connective tissue between people and the world." He adds, "The quality of that design really dictates the quality of the user's experience and thus defines our existence."
