

**EXPLICACION DEL MODELO**

REW es el acrónimo de rest-eat-work (descansar-comer-trabajar).

Una versátil creación de Rafa García. El significado literal de esas palabras define a la perfección la funcionalidad del programa de asientos REW.

Rest. El descanso lo proporciona una familia de sillones, sofás y módulos tan ligeros como confortables en los que podremos elegir entre dos diseños diferentes para los brazos: uno tan alto y delgado como el respaldo y otro más bajo y mullido como la base del asiento.

Eat. La parte "nutritiva" se corresponde con un amplio abanico de bancos y bancadas para acompañar todo tipo de mesas de comedor. Los bancos pueden ir solos o en compañía de paneles de pared tapizados. Las bancadas están disponibles con dos fondos (57 y 72 centímetros). El fondo más corto encaja con el prototipo tradicional de bancada y proporciona una sentada más firme y recta. Además, la terminación en esquina de los brazos altos permite realizar composiciones con ángulos rectos. El fondo más largo tiene una medida ideal para llenarlo de cojines de decoración y generar una sentada más informal, perfecta para largas sobremesas. Asimismo, Rafa propone dos alturas de respaldo (L y XL). El respaldo bajo potencia la ligereza del diseño. El respaldo alto proporciona intimidad.

Work. La productividad en el trabajo está directamente relacionada con nuestra concentración y bienestar. La versión de sillones, sofás y módulos con respaldo alto permite gozar de cierto aislamiento en medio de una gran oficina o el hall de hotel.

Rafa también ha diseñado dos cojines para completar el programa.

Las patas son de acero epoxi negro y madera de fresno, las cuales se pueden solicitar en todos los colores de nuestra carta de tintes.

IMPORTANTE

Las solicitudes de composiciones modulares deben adjuntar un plano en planta al realizar el pedido. La mano (derecha/izquierda) se interpreta siempre viendo el dibujo de frente.

Por favor, no olvide indicar en el pedido el tipo de acabado deseado para las patas.

Las patas requieren montaje. Consulte las instrucciones adjuntas al producto.

Los pedidos de paneles de pared deberán ir acompañados de un dibujo que indique cómo van a ser colocados.

DESCRIPTION

REW is an acronym for rest-eat-work.

This creation by Rafa García is tremendously versatile, and can be used for a variety of diverse projects that require pieces for resting, eating or working.

Rest. An entire family of chairs, sofas and modules, as light as they are comfortable, can be used with two different types of arm: one is high and thin like the back and the other is low and soft, like the base of the design.

Eat. The "nutritious" part corresponds to an ample number of benches which can be used with a dining table. The benches can be used alone, or together with upholstered wall pieces. The benches are available in two depths. The shallow version is the archetypal dining bench, providing a firm, upright sitting position. Moreover, the finish of the arms in a corner permits compositions with angles to be made. The deep version is ideal to fill with scatter cushions and create an informal environment, perfect for long postprandial conversations.

Rafa's piece provides two back heights, denominated "L" and "XL". The L-size back creates a light design, while the XL-size back provides some privacy.

Work. The productivity at work is directly related to our concentration and feeling of wellbeing. These versions of the sofas, modules, and chairs enable a certain degree of privacy in an office setting, or the hall of a hotel.

Rafa has also designed a couple of cushions to complete the programme.

The feet are black epoxy coated steel and ash, which can be stained to any of the colours in our collection.

IMPORTANT

Modular compositions should be ordered with a plan view. Left/right are interpreted when looking at the front of the sofa.

Please remember to indicate the desired type of finish for the legs on the order.

The feet require fitting, as per the instructions that are included with the piece.

The orders that require wall panels should come with a diagram that explains how they will be fitted.

CARACTERISTIQUES

REW signifie rest-eat-work (se reposer-manger-travailler).

La versatile création de Rafa García. La signification littérale de ces mots définit à la perfection la fonctionnalité du programme REW.

Rest. Le repos est représenté par une famille de fauteuils, de canapés et de modules aussi légers que confortables, dans lesquels nous pourrions choisir entre 2 designs différents pour les bras : un aussi haut et étroit que le dossier et un autre plus bas et plus moelleux comme la base de l'assise.

Eat. La partie nutritive est composée par un grand choix de bancs et banquettes pour accompagner tout type de tables repas. Les bancs peuvent être seuls ou accompagnés de panneaux muraux tapissés. Les banquettes sont disponibles en 2 profondeurs (57 et 72 centimètres). La profondeur la plus courte sert à obtenir une banquette plus traditionnelle et donne une assise plus ferme et droite. De plus la finition en angle des bras hauts permet de réaliser des compositions en angles droits. La profondeur la plus large a une dimension idéale pour être garnie de coussins de décoration et générer ainsi une assise plus informelle.

Rafa nous propose 2 hauteurs de dossier (L et XL). Le dossier bas donne de la légèreté au design. Le dossier haut donne de l'intimité.

Work. La productivité au travail est en relation directe avec notre concentration et notre bien-être. La version des fauteuils, canapés et modules avec dossier haut permet de jouir d'un certain isolement au milieu d'un grand bureau ou dans un hall d'hôtel.

Rafa a aussi dessiné quelques coussins pour compléter le programme.

Les pieds sont en acier époxy noir et en frêne disponible dans toutes les teintes.

IMPORTANT

Les commandes de compositions modulaires doivent être accompagnées d'un plan avec les dessins toujours vue de face.

Ne pas oublier non plus d'indiquer le type de finition désiré pour les pieds.

Les pieds sont livrés démontés. Voir instructions de montage.

Les commandes de panneaux muraux doivent être accompagnées d'un schéma montrant le détail de l'implantation.

CARACTERISTICAS TECNICAS**TELA Y PIEL**

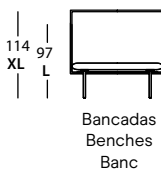

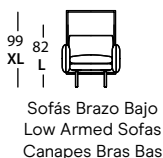

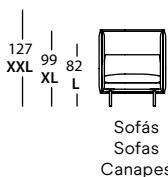

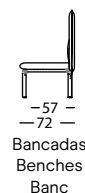

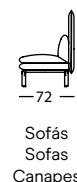

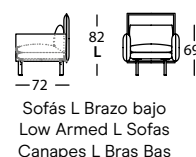

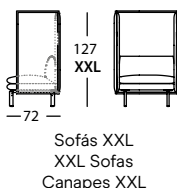

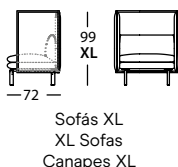

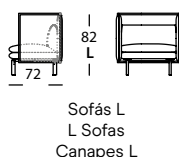

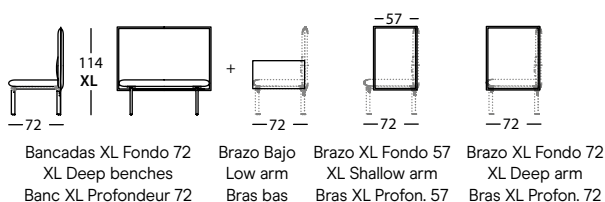

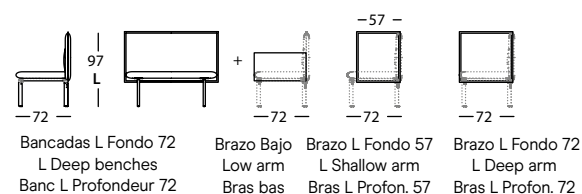

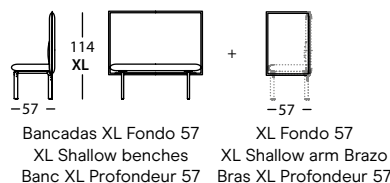

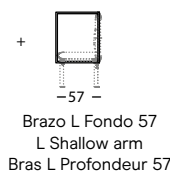

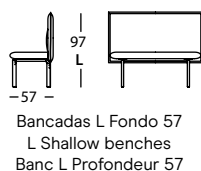

- Estructura y almohadas totalmente desenfundables, excepto el panel de pared que es fijo.
- Asiento: tubo de acero F1 pintado epoxi negro con tablero de partículas, recubierto de espuma CMHR 35kg y funda con velour.
- Respaldos y brazos altos: estructura de tablero de partículas, recubierto de espuma CMHR 30 kg y funda con velour, fijado mediante pletinas de acero F1 imprimado pintado epoxi negro.
- Brazo bajo: estructura de pino y tablero de partículas, recubierto de espuma CMHR 30kg y funda con velour, fijado mediante pletinas de acero F1 pintado epoxi negro.
- Panel respaldos pared: estructura de tablero de recubierto de espuma CMHR 30kg. La estructura se cuelga en unos tacos de DM que se fijan a la pared mediante tornillos.
- Patas: estructura de tubo de acero F1 pintado epoxi negro y recubiertas de madera de fresno.
- Almohada de asiento: espuma de densidad diferenciada, recubierto de fibra poliéster H150 gr termofusionada y funda interior de malla.
- Almohada de respaldo: espuma de CM 25kg, recubierto de fibra poliéster H150 gr termofusionada y funda interior de malla.
- Cojines de decoración: funda de algodón rellena FiberDream (microfibra tacto pluma).
- Juego de placas metálicas para unir dos módulos.

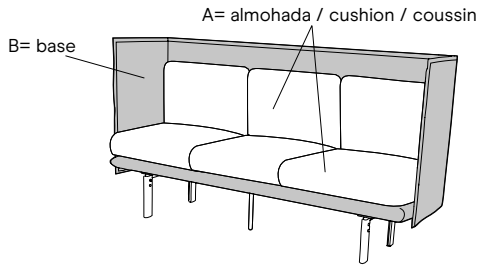

TECHNICAL CHARACTERISTICS**FABRIC AND LEATHER**

- Removable back and cushion covers, except for the wall panel.
- Seat: black epoxy coated F1 steel covered in pressed wood covered in 35kg CMHR foam and fibre.
- High back and arms: pressed wood covered in 30kg CMHR foam with black epoxy coated F1 steel fittings.
- Low arm: solid wooden structure with a pressed wood board covered in 30kg CMHR foam and felt with black epoxy coated F1 steel fittings.
- Wall panel: Superpan covered in 30kg CMHR foam mounted on MDF wall fittings.
- Feet: black epoxy F1 steel covered in solid ash.
- Seat cushion: multi-density foam covered in H150g thermofused fibre and polyester netting.
- Back cushion: 25kg CM foam covered in H150g thermofused fibre and polyester netting.
- Scatter cushions: FiberDream with a cotton cover.
- Set of metallic plates to join two modules.

CARACTERISTIQUES TECHNIQUES**TISSU ET CUIR**

- Structure et coussins 100% déhoussables, à l'exception du panneau mural qui est fixe, non déhoussable.
- Assise : structure tubulaire en acier F1 peint époxy noir et panneau de particules, recouvert de mousse CMHR 35kg avec velours.
- Dossiers et bras haut : panneau de particules, recouvert de mousse CMHR 30kg avec velours, le tout fixé sur platine en acier F1 imprimé peint époxy noir.
- Bras bas : structure en pin et panneau de particules, recouvert de mousse CMHR 30kg avec velours, le tout fixé sur platine en acier F1 imprimé peint époxy noir.
- Panneau de dossier mural : structure en panneau de particules recouvert de mousse CMHR 30kg. La structure s'accroche sur des taquets en medium qui se fixent au mur par visserie.
- Pieds : structure tubulaire en acier F1 peint époxy noir et recouverte de bois de frêne.
- Coussin d'assise : mousses de différentes densités, recouvertes d'une fibre polyester H150gr et tissu de finition.
- Coussins de dos : mousse CM de 25kg, recouvertes d'une fibre polyester H150gr et tissu de finition.
- Coussins de décoration : housse coton garnie de fibre FiberDream (microfibre toucher plume).
- Jeu de plaques métalliques pour attacher deux modules.
