## CORNET BAR STOOL

Jonas Trampdach's Cornet barstool is a classic barstool using an innovative steel tube technique inspired by bicycle racks. The round solid oak seat rests on a slender steel base, creating an interesting balance of proportions and profiles. The stools come in two different heights, with choice of wood finishes for the seat and chrome or powder coated colour options for the legs. The stools are suitable for bars, islands and worktops in a number of private and public settings.
