

M923.TM

The wall is yours

M923.TM
The wall is yours

“The whole point of an open office is to keep it open. But a truly open office comes with a high price. Workers get distracted, the space can seem cavernous and impersonal, and the workplace becomes a fishbowl. Striking a balance between open, collaborative spaces and the exhausting noise and lack of privacy that ill-designed open spaces create is a difficult task. The right tools certainly help. That’s where the M923. comes into its own.”

Specifications

Maximum wall height with extended profile	4.000 mm (13 ft 1.5”)
Maximum wall height with standard profile	3.420 mm (11 ft 2”)
Module width	1.230 mm (4 ft 0.44”)
Vertical placement points	375 mm (1 ft 2.8”)
Frame capacity	maximum of 4 panels high per module back to back
Half height	minimum of 2 panels high and maximum of 2 modules wide

Grid

- Vertical studs packaged and priced in quantities of 3 pieces per bundle
- Cross profiles packaged and priced in quantities of 3 pieces per bundle

Materials

Grid	Steel
Panels	Sheetmetal with coating and/or special finish (cork, moss, marker board, textile and perforated panel) and black steel backing

Mobile and flexible

- You determine the look and layout
- Colorful, natural, and functional panels
- Easy to adjust by hand
- Designed with ergonomics in mind

Unique possibilities

- Durable and environmentally friendly
- Endless configurations possible
- Framework can easily be customized
- For offices, shops, schools, flexible workspaces and restaurants

Framework

- Available in various configurations
- Can be used in any room up to maximum profile height
- Option for straight wall, L-wall or T-wall
- Height-adjustable

Installation

- Easy to move
- Install without drilling by using leveling feet
- Several solutions for attachment to the ceiling
- Solutions for the most commonly used ceiling and floor situations

M923. panel options triple module

Corner 90°

This simple-to-use, hackable product is designed for workers to create their own privacy in open-office structures and personalize their own workplaces.

M923. is a modular panel system. It creates a flexible and versatile system. The concept combines modern wall decoration, functional office furniture and movable walls.

The result is a complete system that provides privacy in what Maars calls 'an aesthetic and ergonomically responsible manner'.

The panels are available in different colors and materials (including moss, cork, absorption panels, marker boards and textiles). Users can easily change the panels and design the wall themselves. Because the panels are easy to change, it's possible to adjust the appearance of a room very quickly and inexpensively.

Application and installation M923.

The M923. is a relocatable floor-to-ceiling, non-load-bearing, non-fire-resistant, interior screening system. It is not a wall partition system and has no sound isolating capacities, nor can it support a door or other wall elements outside the design of the system itself. This product is not designed to hang objects on, other than the Maars supplied panels and accessories. Use of this system to support furniture loads, and in corporation with door components or electrical wiring have not been evaluated and are beyond the scope of this product. The product is designed for interior purposes only. It is not safe to play with or climb in. The product is designed to be installed between stable floor and ceiling constructions of a building*. For stability reasons the product is limited in length up to 5 modules.

M923. app

Users and architects can discover the possibilities of M923. with an augmented reality app that's available on the App Store and on Google Play. The AR app allows a customized M923. wall with all available panels to be placed virtually in a room. The self-assembled wall with accessories can then easily be forwarded to order with all selected options. The ordering process is done through Maars 4D. Get yours now!
