

Universal Screens

A family of screens designed with a clean, neutral and refined aesthetic, Universal Screens work across Knoll's European Office systems; including Scope, Antenna, Plateau, Wa and Tone.

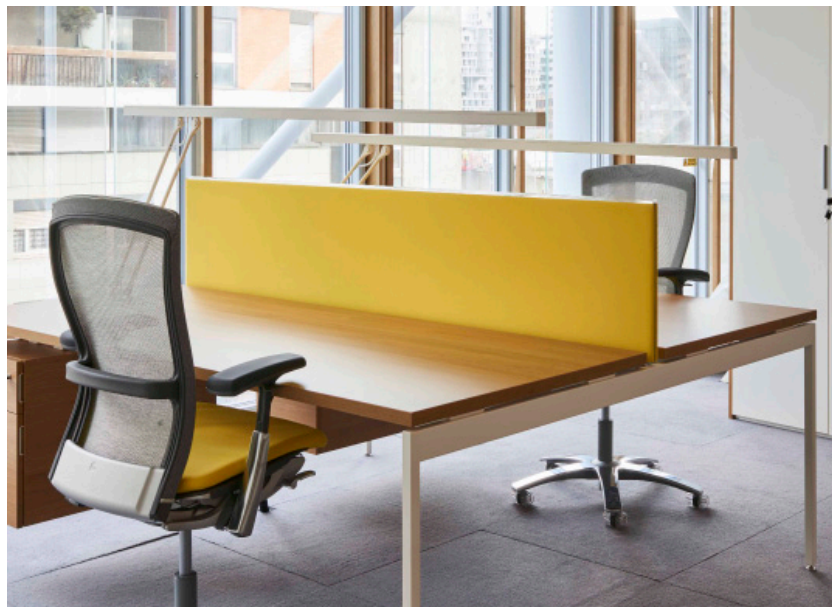

As a fabric-wrapped, frame-less panel, Universal Screens reduce the visual clutter of a workstation.

Universal Screens offer two distinct design details to suit a clients aesthetical choice and functional requirement. These are square corners or rounded corners.

Universal Screens with square corners also have an integral top cap for hanging accessories such as paper trays and pen pots.

The top cap is clear so that it is discrete and allows the eye to read the fabric below it. It also incorporates a clear connector clip, allowing two adjacent screens to be aligned, simply by sliding the connector into the adjacent slot.

Universal Screens are also available with rounded corners to offer a softer, more residential aesthetic and complement tables with rounded corners. Screens with rounded corners do not have a top cap.

Screens with rounded corners are also designed to sit on portable feet, making the screens more mobile so privacy can be changed immediately by the user.

An opening at the base of the rounded screens allows cables to pass underneath, allowing users on both sides of the screen to share power/charging points if needed.

Construction

Screens are constructed from a single, pinnable ply panel to increase strength, reduce waste material and reduce weight. A non-pinnable substrate is available upon request.

Panels are wrapped in either foam-backed or non foam-backed fabrics. Foam-backed fabrics offer a more tactile, softer screen.

Screen trim is in black as standard. White is available upon request.

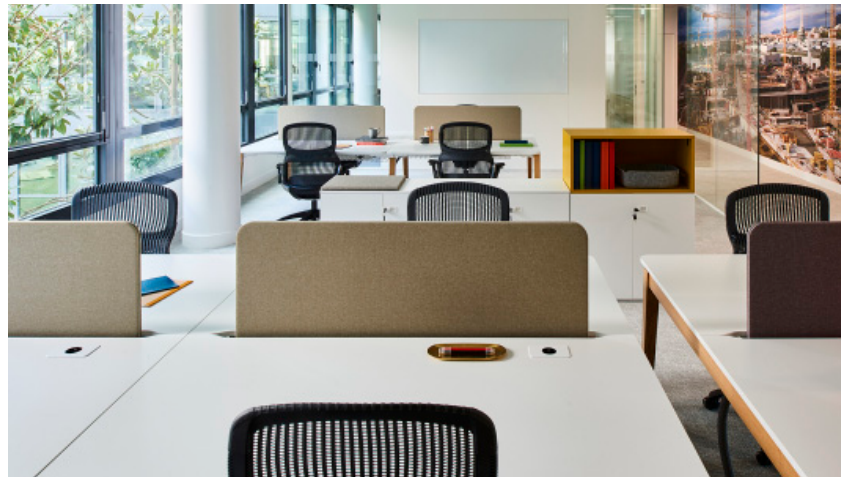

Installation

All screens are pre-drilled in multiple locations to allow the installation of a screen in a variety of positions and using a variety of screen brackets.

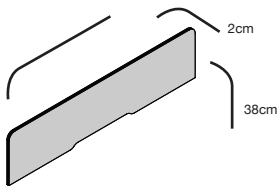

Screens can be specified to dimensionally match the table top width or be "off-module"/under sized.

Screen heights align with Colourfold storage as standard. Other datum heights are available upon request.

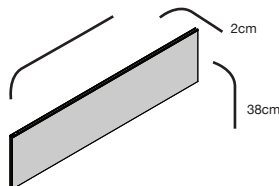

SPECIFICATIONS

80, 100, 120, 140, 150, 160 & 180cm

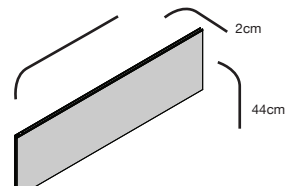

Scope, Antenna & Wa
Rounded upper corners (5cm radii)
Seven widths from 80 - 180cm
Screen height of 38cm (35cm above top)

120, 140, 150, 160 & 180cm

Scope, Antenna & Wa
Square upper corners and clear top cap
Five widths from 120 - 180cm
Screen height of 38cm (35cm above top)

120, 140, 150, 160, 180 & 200cm

Plateau
Square upper corners and clear top cap
Six widths from 120 - 200cm
Screen height of 44cm (35cm above top)

- + Round and square corner aesthetics
- + Clear top cap available for the management of accessories (square cornered screens)
- + Made from a single ply panel to reduce weight and waste
- + Screens are pre-drilled for multiple applications

FABRIC BANDS - F, Q & K

- + Available in four fabric bands
- + Available in foam-backed fabrics
- + Some white and light fabrics require an SQR to add foam
- + Other fabrics available upon request - subject to fabric testing
- + Black trims as standard. White available upon request
