1.

Place the crossbars **B** in the openings of the leg sections **A**.
Make sure the small tabs in the crossbar openings are aligned as illustrated.

Two people are required to carry out the table assembly.

2.

Slide the crossbars towards the middle of the leg sections, making sure they slide over the plastic insert.

3.

Rotate the crossbars away from the centre, so the small tabs lock into the plastic insert.

Make sure it is correctly locked into place at each ends.

- CABLING 220 / 280 CM TABLES -

220 CM	280 CM	350 CM	420 CM
--------	--------	--------	--------

Note : If you have a 350 cm table, go to step 6.

If you have a 420 cm table, go to step 8.

4.

Plug the supply cable **C** and the extension cables **A** **B** into the distributor **D**.

5.

Insert the extension cables **A** **B** by pushing the plug through the end of the leg. When you see the plug head, pull it out and insert it again into the crossbar through the hole.

TIP: Pull out the cable for easier handling, as shown in zoom 1.

Repeat this step on the other end of the crossbar.

Continue to step 10

- CABLING 350 CM TABLE -

220 CM	280 CM	350 CM	420 CM
--------	--------	--------	--------

Note: If you have a 420 cm table, go to step 8.

6.

Plug the supply cable **C** and the extension cables **A** **B** into the distributor **D**.

7.

Insert the extension cables **A** **B** by pushing the plug through the end of the leg. When you see the plug head, pull it out and insert it again into the crossbar through the hole.

TIP: Pull out the cable for easier handling, as shown in zoom 1.

Repeat this step on the other end of the crossbar.

Continue to step 10

- CABLING 420 CM TABLE -

220 CM	280 CM	350 CM	420 CM
--------	--------	--------	--------

8.

Plug the supply cable **C** and the extension cables **A** **B** into the distributor **D**.

9.

Insert the extension cables **A** **B** by pushing the plug through the end of the leg. Pull it out and insert it again into the crossbar through the hole. Make sure to insert it through the correct opening as shown in the close-up.

TIP: Pull out the cable for easier handling, as shown in zoom 1.
Repeat this step on the other end of the crossbar.

10.

Push the distributor and remaining extension cable into the leg before placing the feet.

11.

Place the feet and make sure the supply cable is correctly placed in the cut-out.

12.

Carefully bend the legs towards the centre.
Push down on the crossbars to keep them in place.

13.

Keep going until you hear a click.
This might require some extra force.

14.

Secure the legs with screws **C** with the washer **L** in between.
Carefully tighten it with the Allen key **D**. Avoid scratching the frame.

- MOUNTING PIX MODULE -

15.

Remove the two plastic rings from the module and insert the module into the receiver.

16.

Unscrew the two screws to release the locking tabs on the back of the module.

17.

Tighten the screws to fasten the module.

18.

Tighten the screw until the flaps (in dark grey) are fastened to the insert.

19.

Connect the module to the extension cable.

20.

Place and click the insert into the leg.

21.

Click the two rings back on the module.

22.

Done!

23.

If the floor is uneven, adjust the feet until the table is level.

24.

Place the connectors.

25.

Rotate the connectors towards the centre of the table so that they lock in place.
This might require some extra force.

26.

Insert the end caps. Make sure they are aligned with the holes as illustrated.

If you are adding a glass tabletop, continue to step 36.

27.

Place the tabletop on top.

If you are connecting two tabletops, continue to step 28 after this.

CONNECTING TWO TABLETOPS

Note : If your table only has one tabletop, continue to step 33.

28.

Align the tabletops, and push them together.
Make sure to insert the pins into the corresponding holes.

Mount the latches **H** with the screws **M**
over the pre-drilled holes.

Note : on the 110 cm width table, the latches are outside the crossbars,
next to the connectors.

30.

Connect the latches to the receivers.

31.

Push down the handle on the latches to lock their position.
Then mount the connector **K** with screws **N**. Do not fully tighten the screws.

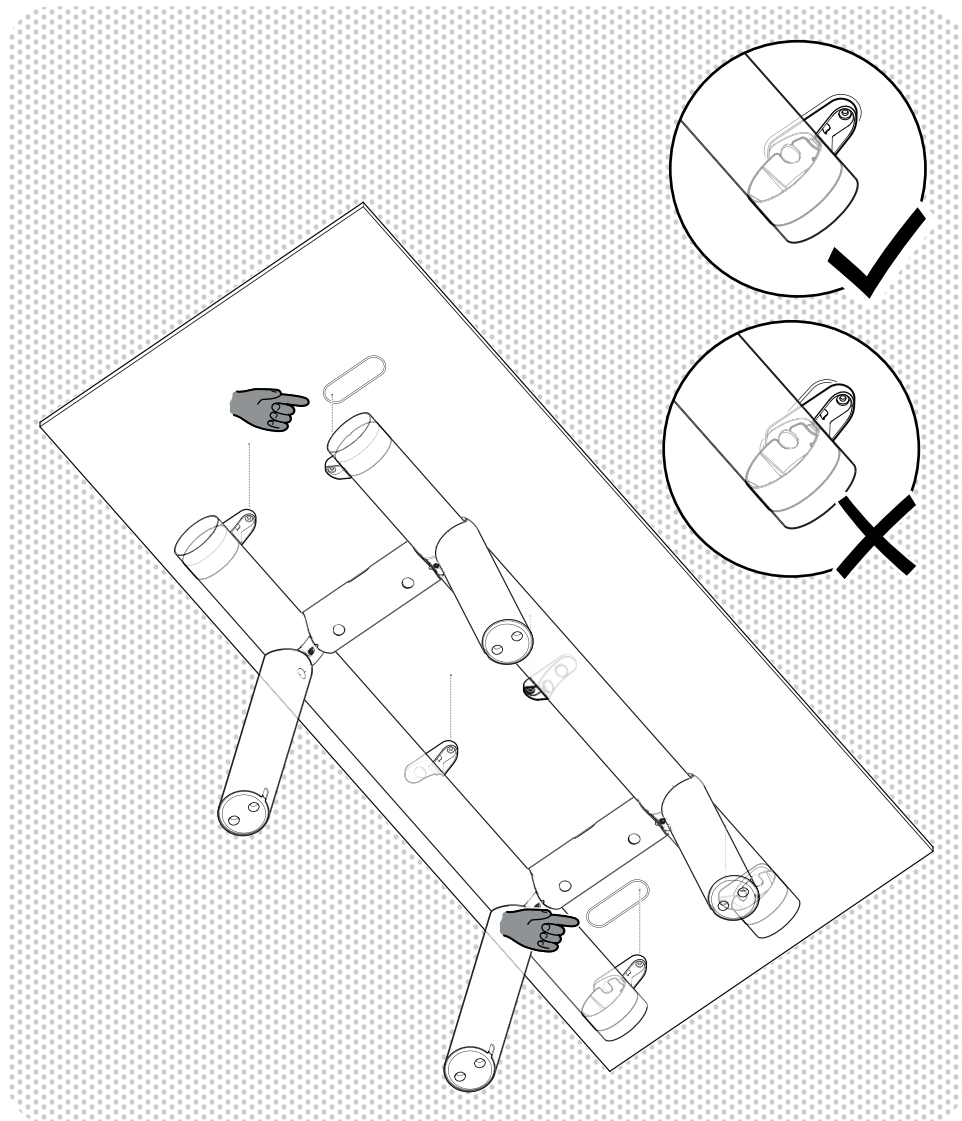

32.

Fully tighten the screws.

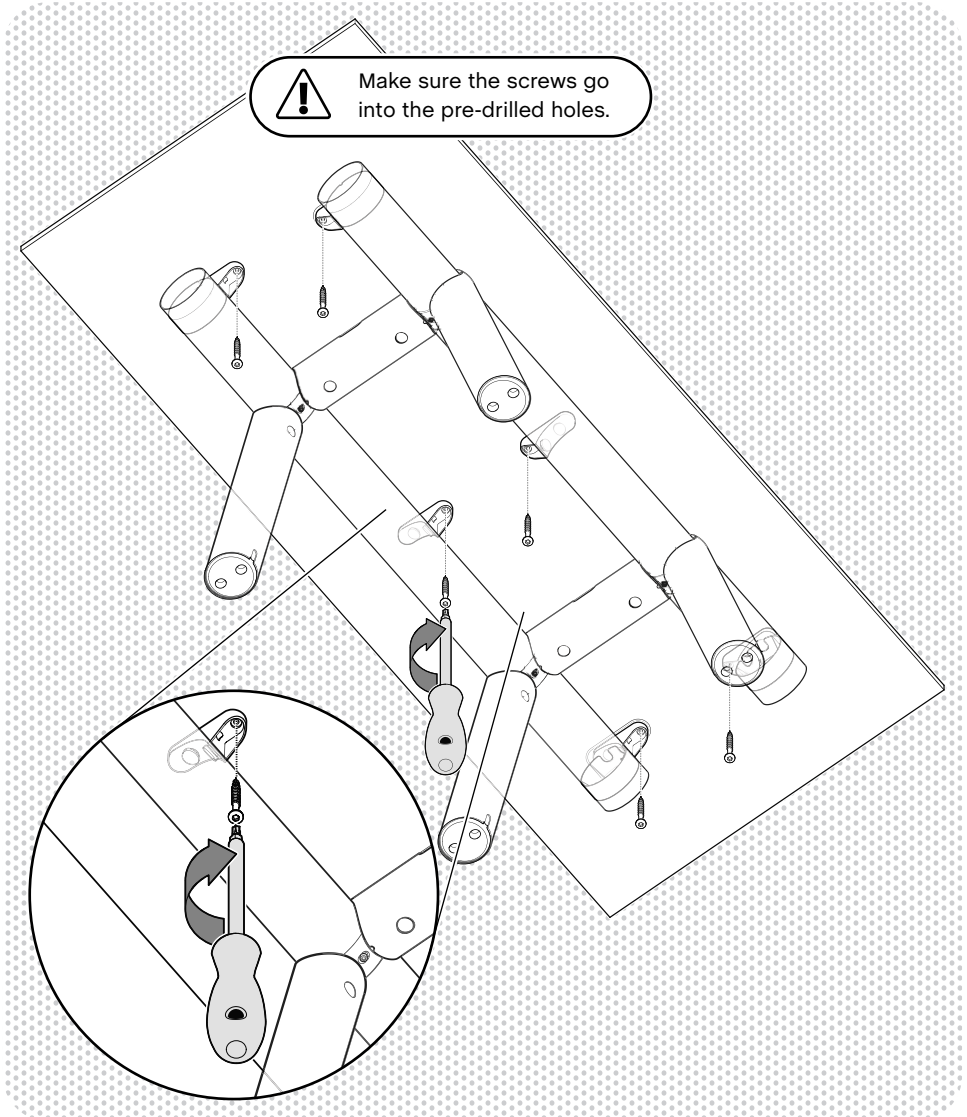

33.

Align the cut-out with the two connectors.

34.

Secure the table top with the screws **H**.
Make sure the screws go into the pre-drilled holes.

35.

Done!

- MOUNTING A GLASS TABLETOP -

36.

Place the glass-bumper inserts **P** on the connectors with the flat side facing upwards and the threaded hole inwards.

37.

Secure the glass bumpers with the screws **Q**.

38.

Clean the back of the glass tabletop of any dust and dirt. Then use a spray bottle to add a thin layer of water mixed with 1 or 2 drops of washing up liquid.

39.

Remove the protective tape from the bumper.
Be careful not to get dust or dirt on the adhesive surface!

40.

Carefully place the glass tabletop with the wet side facing downwards.

Tip : Mark out some guidelines on the top side with some masking tape or felt-marker before placing, to make centring easier.

41.

Use a ruler or your guidelines to adjust the glass to ensure it is centred.

42.

Let the table rest for 24 hours to allow the glue to set and the water to evaporate.

Done!

- CARE & MAINTENANCE -

Our Care & Maintenance offers guidance for optimal maintenance of your HAY product. It includes advice and instructions on cleaning and caring for specific materials to prolong the life of your furniture.
