

Knoll Office

# Storage Colourfold

Storage for home, studio and office.  
Blocks of colour combine with neutrals and woods.  
Refined and precise (like the folds of an envelope).

## Colourfold Storage & Stacking Boxes

Colourfold hinged door cabinets in 2high, 3high, 4high, 5high and 6high dimensions as well as stacking elements.

Colourfold has a super slim profile which is both elegant and highly space efficient, with a footprint depth of only 40cm.

The stacking box offers desk level storage that can be retro-fitted, reversed, even double stacked.

Colourfold connects to both Antenna and Scope tables, acting as a spine and reducing the clutter of legs, producing a cleaner, space sensitive workstation.

Two levels of binders are accommodated below workstation height.

Back panels are seamless and as elegant as the front. Space is defined without visual clutter.

soft close hinges as standard

Levelling adjustment is accessed from inside the cabinet rather than underneath.

Considerable door finish options; painted steel, melamine, laminate, Techgrain and veneer.

Colourfold stacking boxes are a great way to bring colour to the workplace. Colour can be used on the stacking boxes to define areas, or simply a way to play with colour in an interior scheme.

## Stacking Top Boxes & Planters

Colourfold Top Boxes offer an open section of storage for personal items. A stackable item that can face in either direction to give workstation users more storage or alternatively the boxes can face a corridor for more communal or team use.

The planter boxes are another way to offer a pop of colour to the storage as well as a solution to add Biophilia to a scheme.

Knoll planters come with a specifically designed liner to support growth and longevity of the plants.

## Colourframe

Stackable open frames for a lighter aesthetic that can be retro-fitted and customised with shelves, vertical panels and planter boxes.

Vertical panels can be used to bring colour and texture to the storage and control the level of light and privacy. While planter boxes bring Biophillic to the workplace.

All items can be reconfigured quickly, without the use of tools. Planters are accessed by planting teams via removable side panels.

As with Colourfold, Colourframe can be used as bulk perimeter storage, as lockers for personal storage away from a workplace, as credenzas to support a meeting room, as a way to divide spaces, to create privacy at the end of a bench or as a spine to support perpendicular planning.

### Multi-plane Space division

Colourframes of 40cm wide can be used to connect multiple Colourframes in multiple directions to create space division in more than one plane. Allowing complete 360 degree control of light, sound and function of the storage surrounding and dividing workspaces.

## Lockers

A place for personal items.

In all environments, especially with “hotel-desking” or “free-address working” it is essential that there is somewhere to store personal items.

Lock options ranging from a simple key to an RFID control pad.

Doors can be specified with or without post slots.

All doors have soft-close hinges, preventing noisy door slams.

## Creative Panels

A place to capture ideas, suspended between neighbouring Colourframe units, the Creative Panels are the perfect place to capture ideas in a team or collaborative space.

Available as dual-sided whiteboards or tackable fabric panels, teams can capture ideas from either side of the storage.

## Floor-up Frames

Colourframes from the floor-up, to create a lighter space divider, with heights from 2-high to 5-high to control the horizon lines and level of privacy across a space.

## Planters

Colourframe planter kits with removable recycled plastic planter liners. Can be relocated without the use of tools. Available in wood or metal.

## Lockerbox

For personal storage close at hand. The lockerbox can be installed in any Colourframe in any position. Lockerboxes can be moved to other Colourframes as teams evolve and move.

## Coat Frames

For the storage of personal coats.

## 40 Frames

For the connecting of floor-up Colourframes in more than one direction.

## Storage Islands

For the connecting of a run of storage units into a single, cohesive and organised Storage Island. Storage Islands can be used to divide space or support team benching with corridor storage.

## Florence Knoll Handles

An alternative and more residential-looking handle option. The classic Florence Knoll handle is minimal and elegant in its detailing.

## SPECIFICATIONS

**Hinged Door Cabinet**  
2, 3, 4, 5 & 6 high cabinets  
Soft Close Hinges  
80 & 100cm wide  
40cm deep
