

# MIDST CONFERENCE TABLE W. CENTER POWER CUT-OUT 330 CM

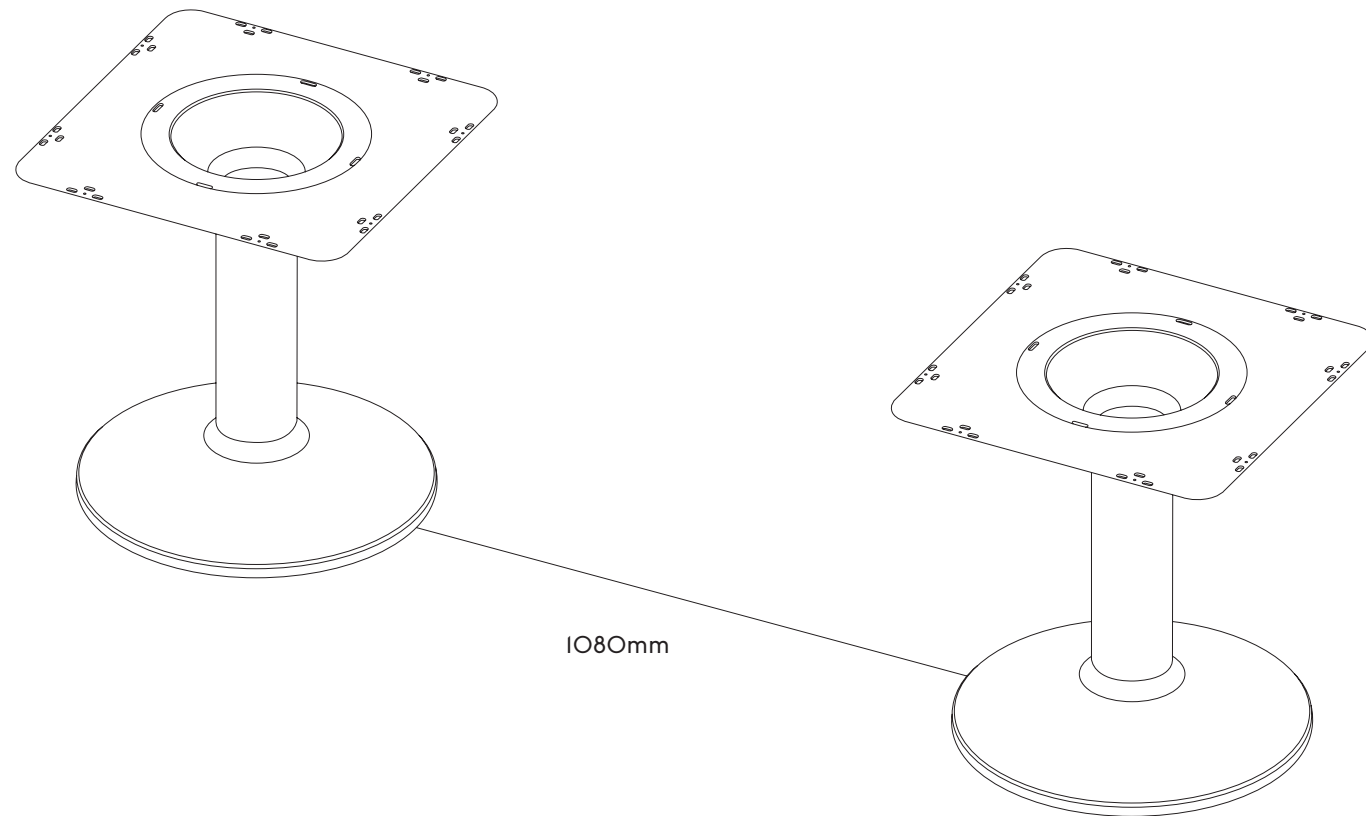

— TAF Studio

 If the cables are damaged, the items must not be used and destroyed. Handle the cables with care during assembly.

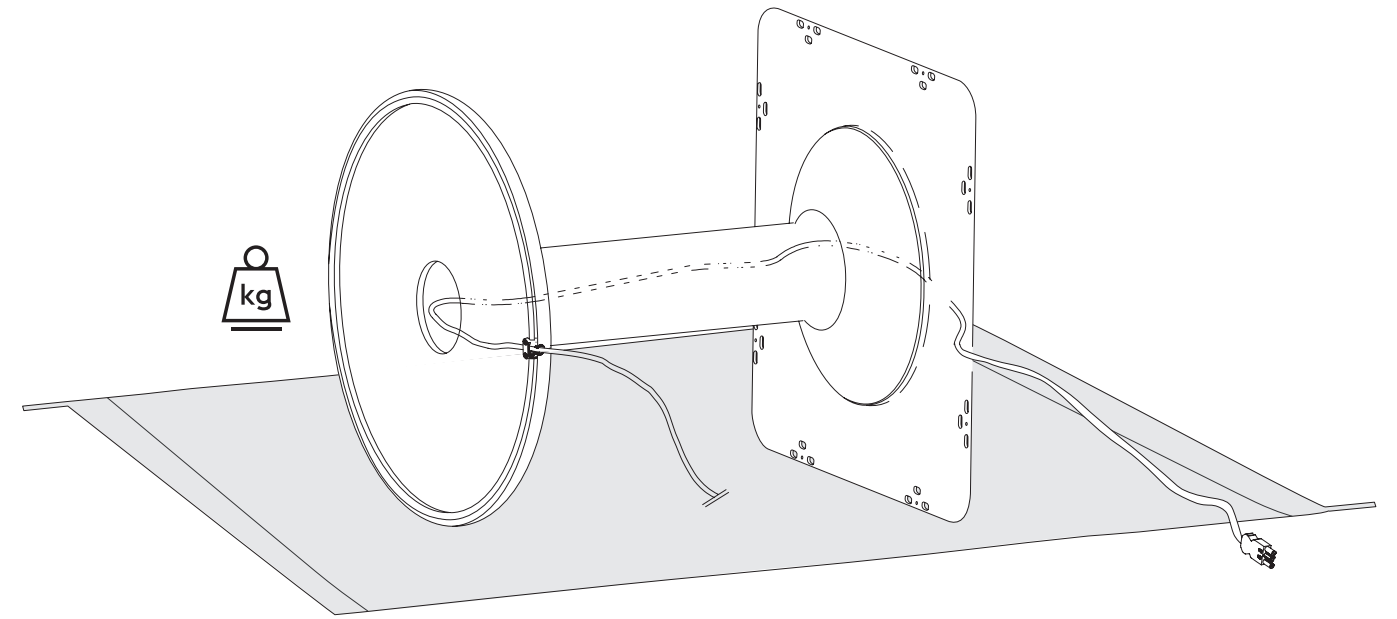

1

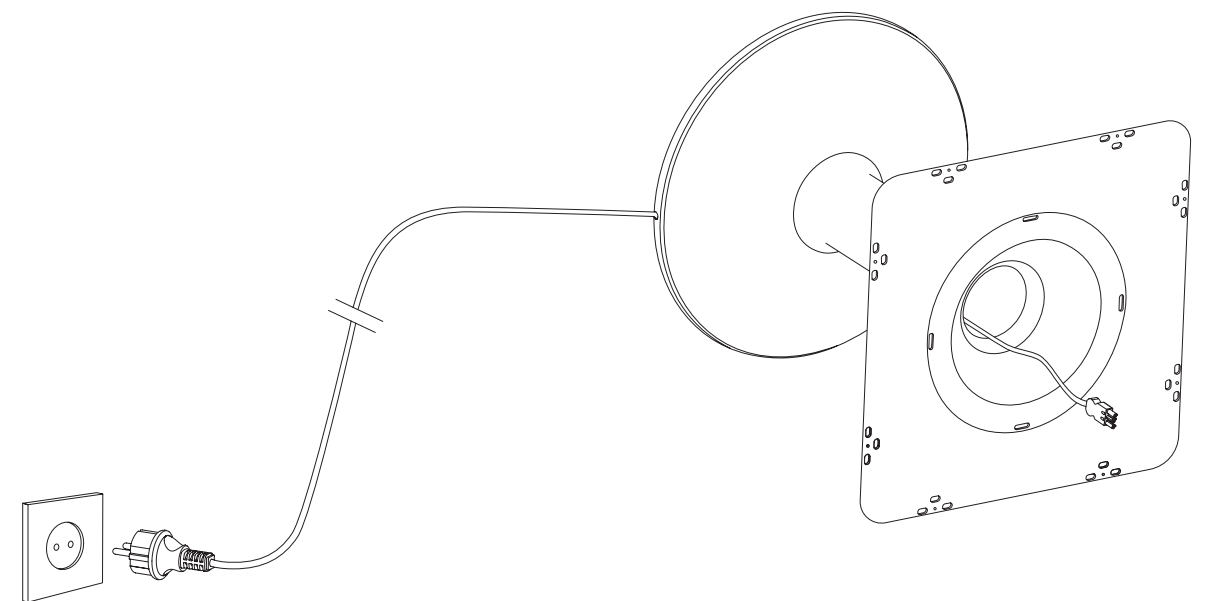

2

Place one base on it's side and carefully run the power cable through from the bottom. Leave at least one meter length of cable sticking out the top of the base.

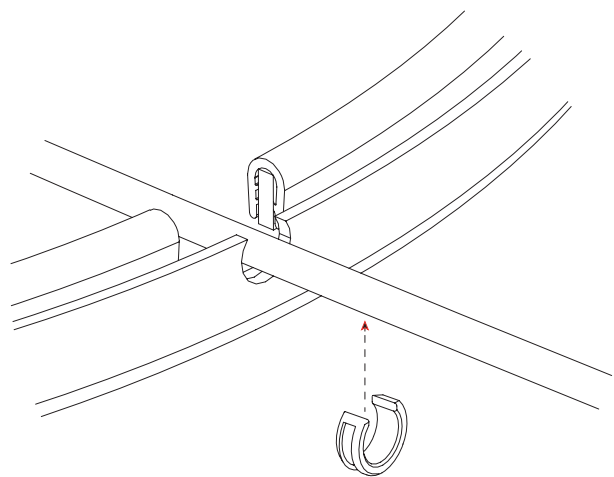

3

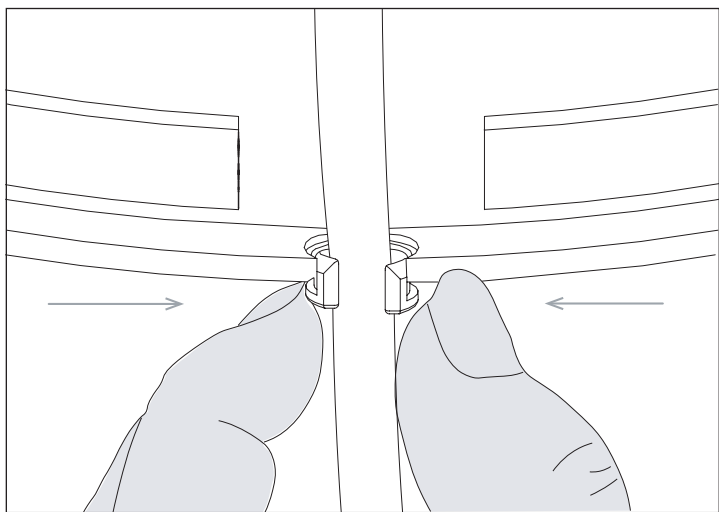

Ensure there is enough length in the cable to reach the desired outlet.  
Max Cable Length from base exit = 1.6m

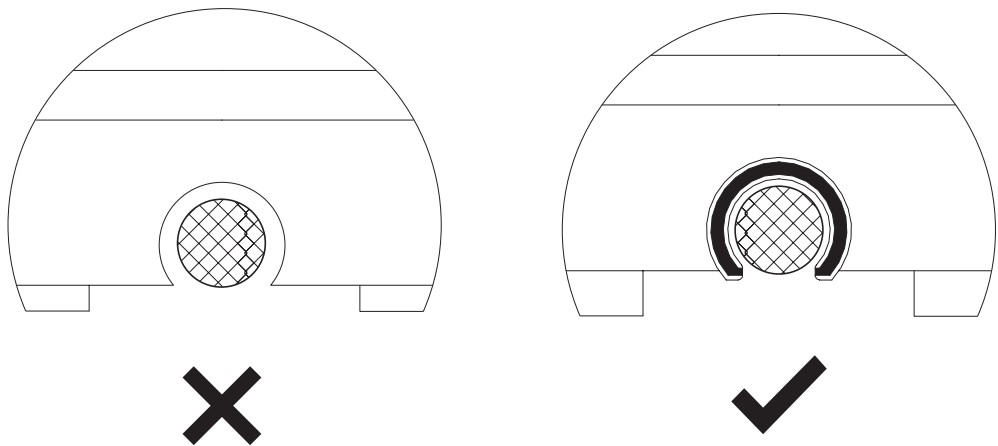

4 Place the cable protection onto the cable.

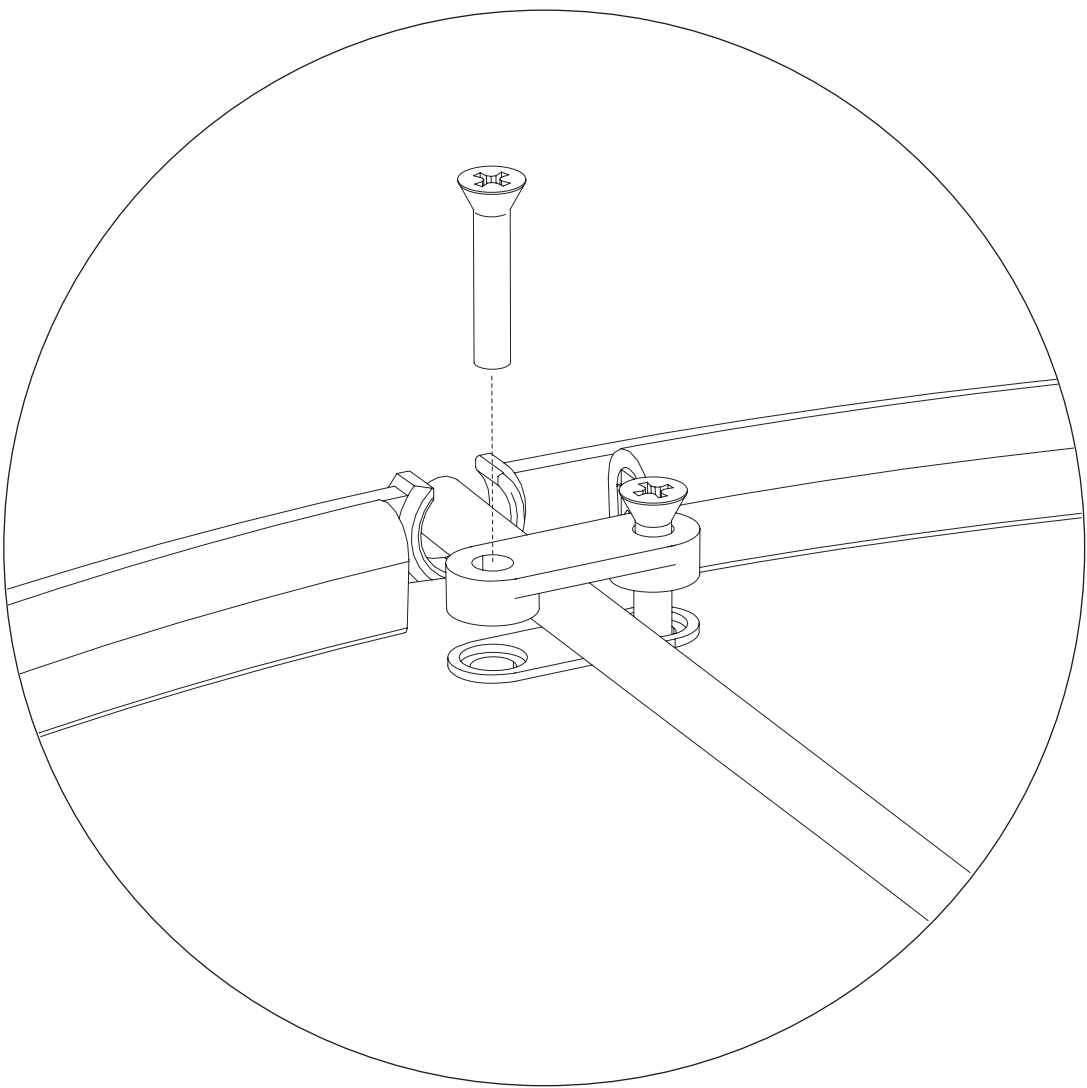

Gently press the inner sides of the plastic so it fits in the gap.  
Press the cable protection into position so it is fixed within the gap.

The cable protection must always be fixed to the outer edge of the base.  
An extra one is included with the screws.

5 Fix the cable into the wire lock under the base by unscrewing one screw. If too tight, loosen the opposite screw as well.

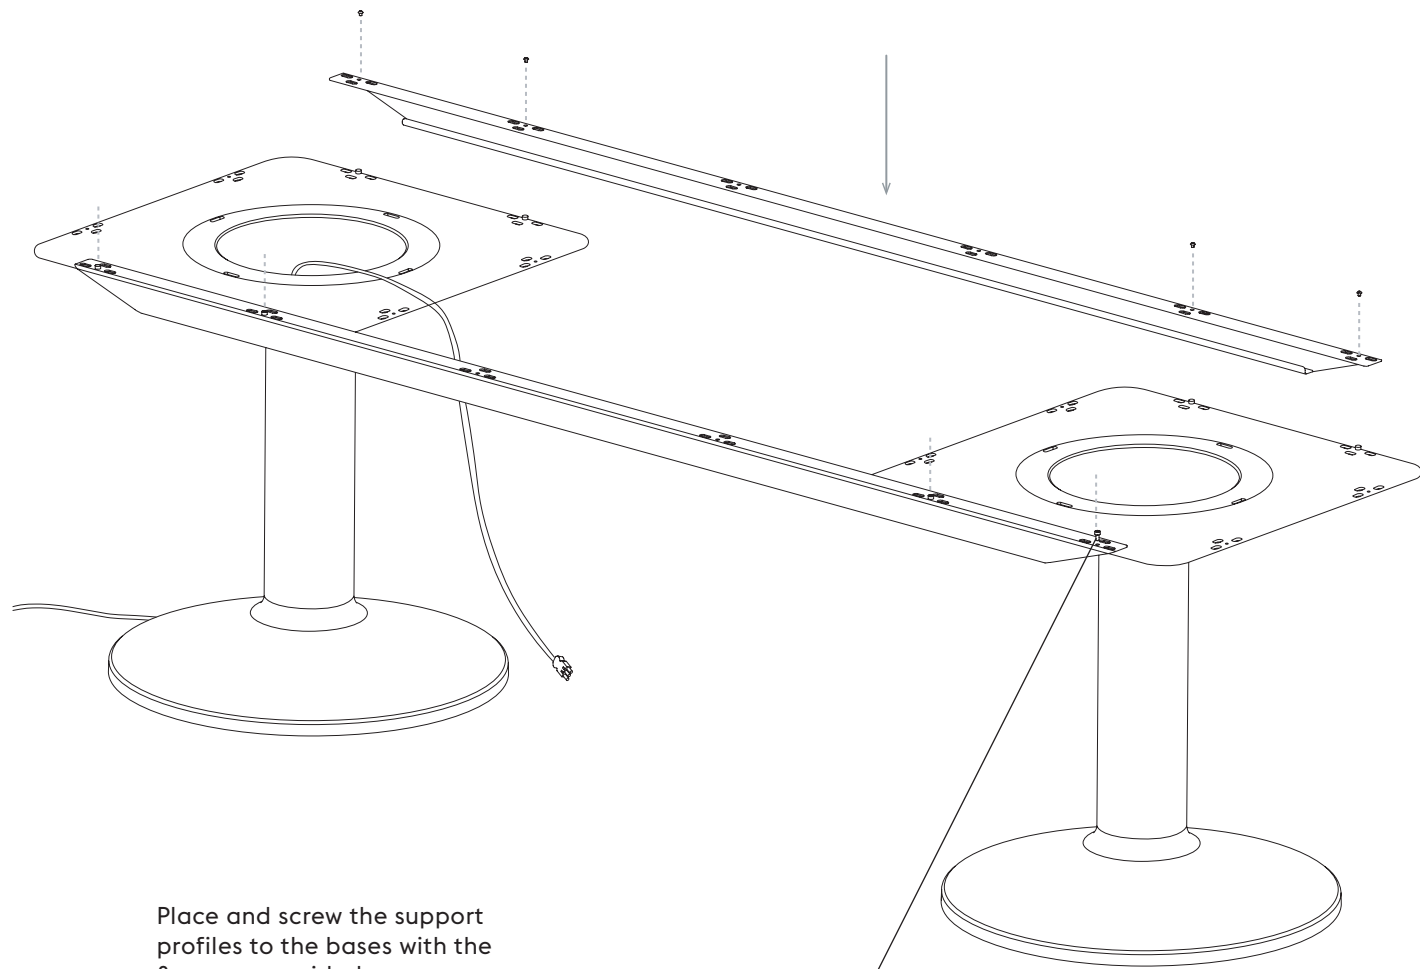

Ensure the cable is fixed securely before turning the base over.

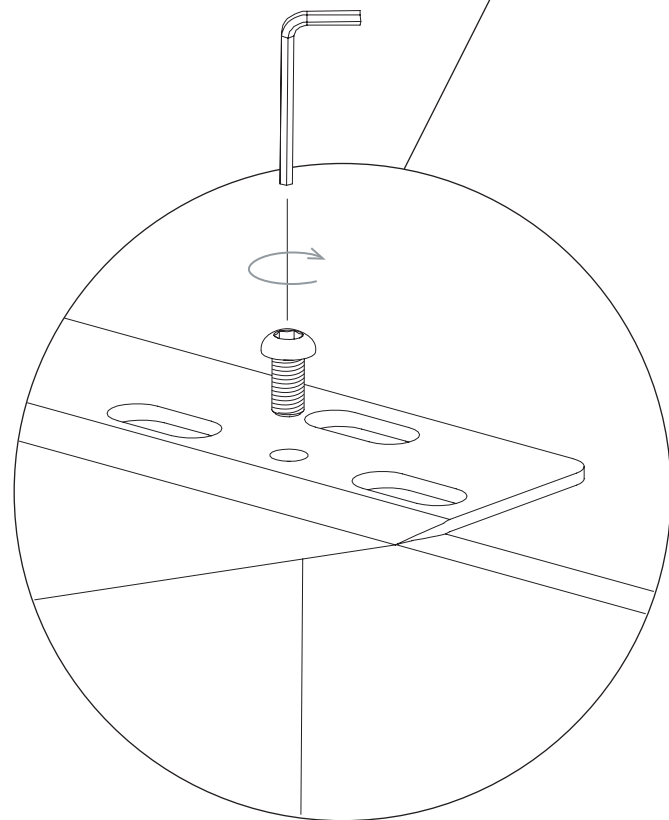

Ensure the bases sit flat on the rubber foot. Excess cable within the base will affect the table's stability.

Do not use excessive force when moving or adjusting the cable within the base

6 Carefully turn the bases over ensuring the cables do not get caught underneath.

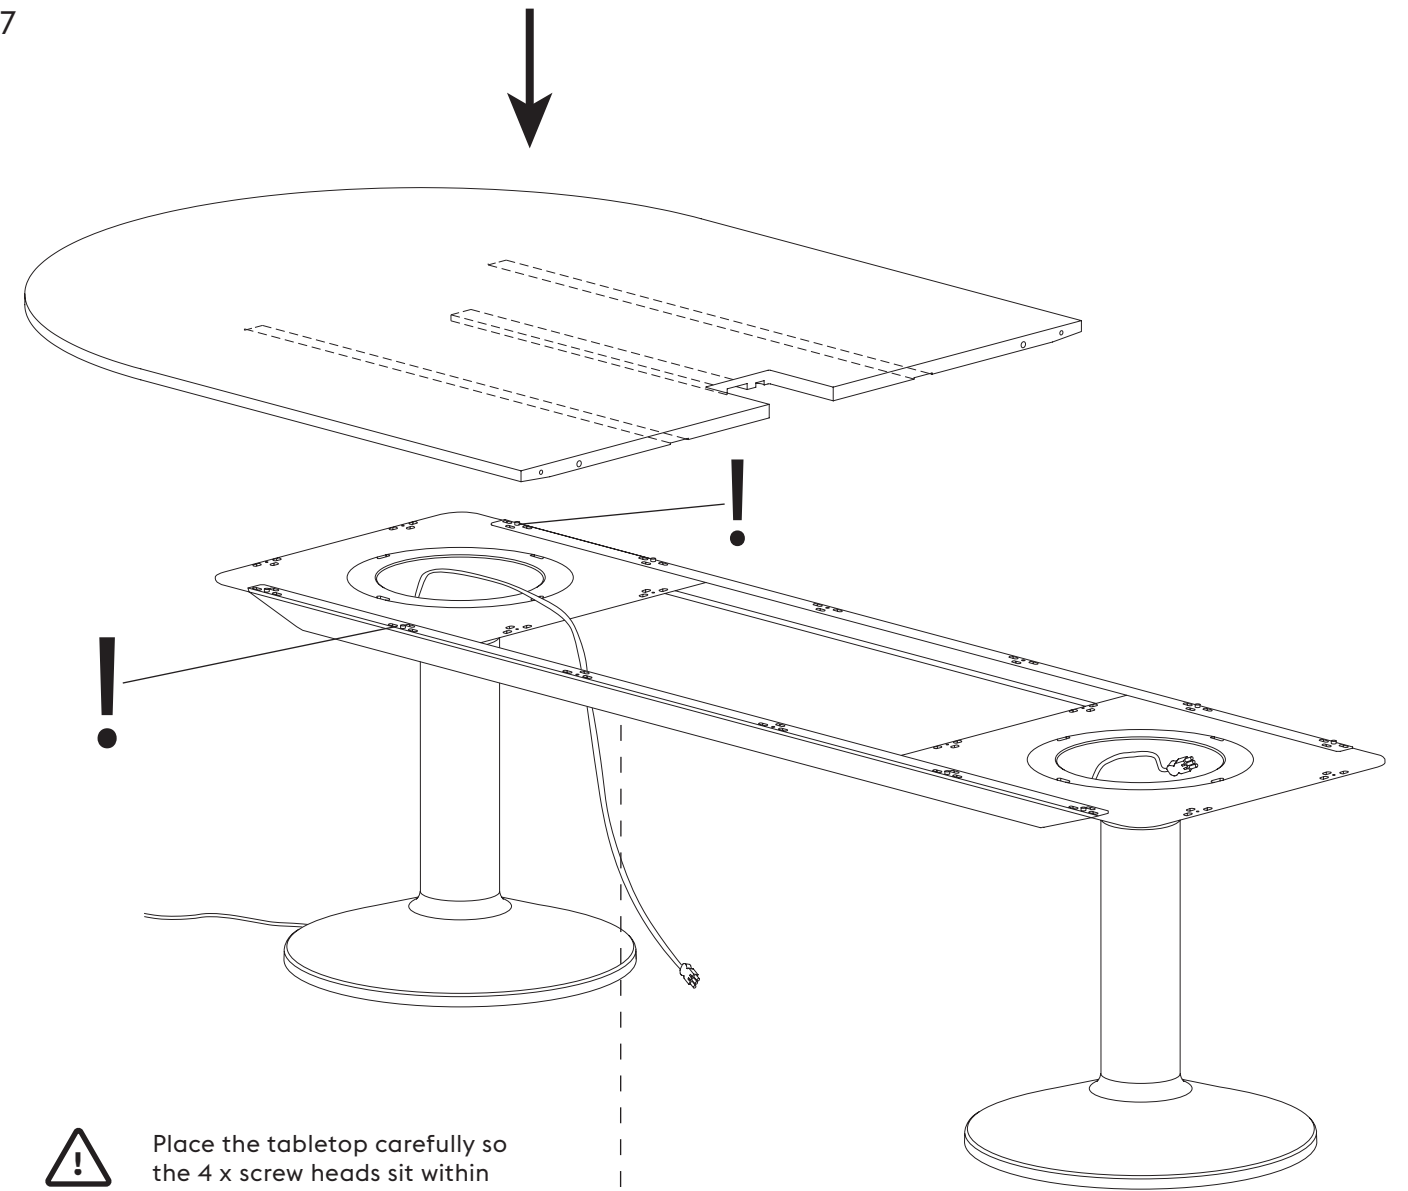

Place and screw the support profiles to the bases with the 8 screws provided.

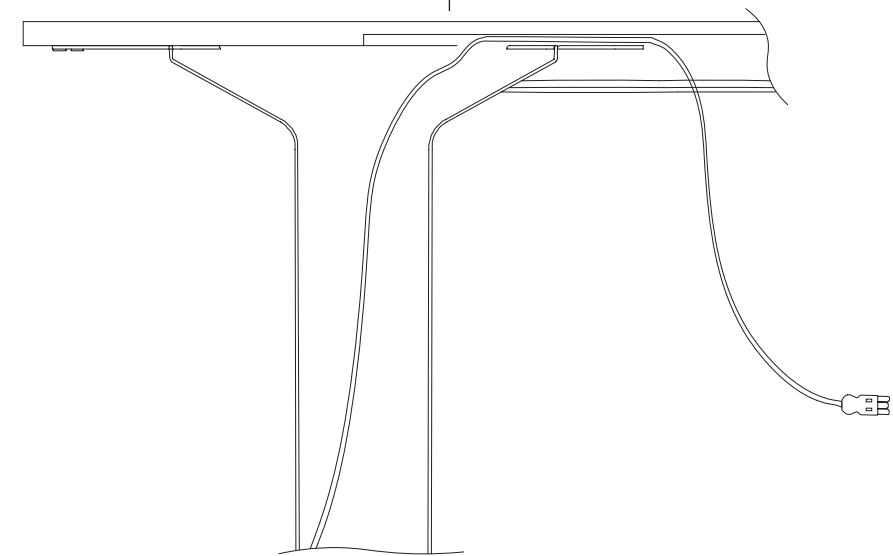

(B)  
8pcs  
M5 x 6mm

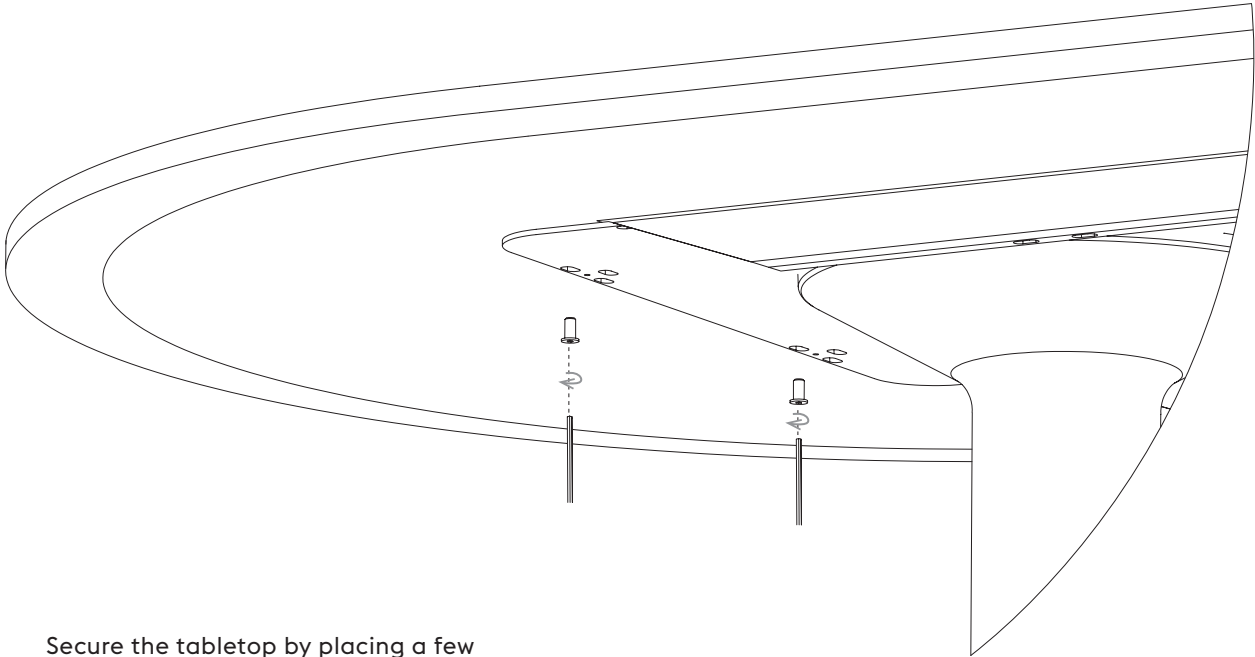

7

Place the tabletop carefully so the 4 x screw heads sit within the holes of the tabletop. Dragging the tabletop will scratch the underside.

The cable should sit within the gap on the centre of the tabletop.  
The tabletop must sit securely on the support brackets.

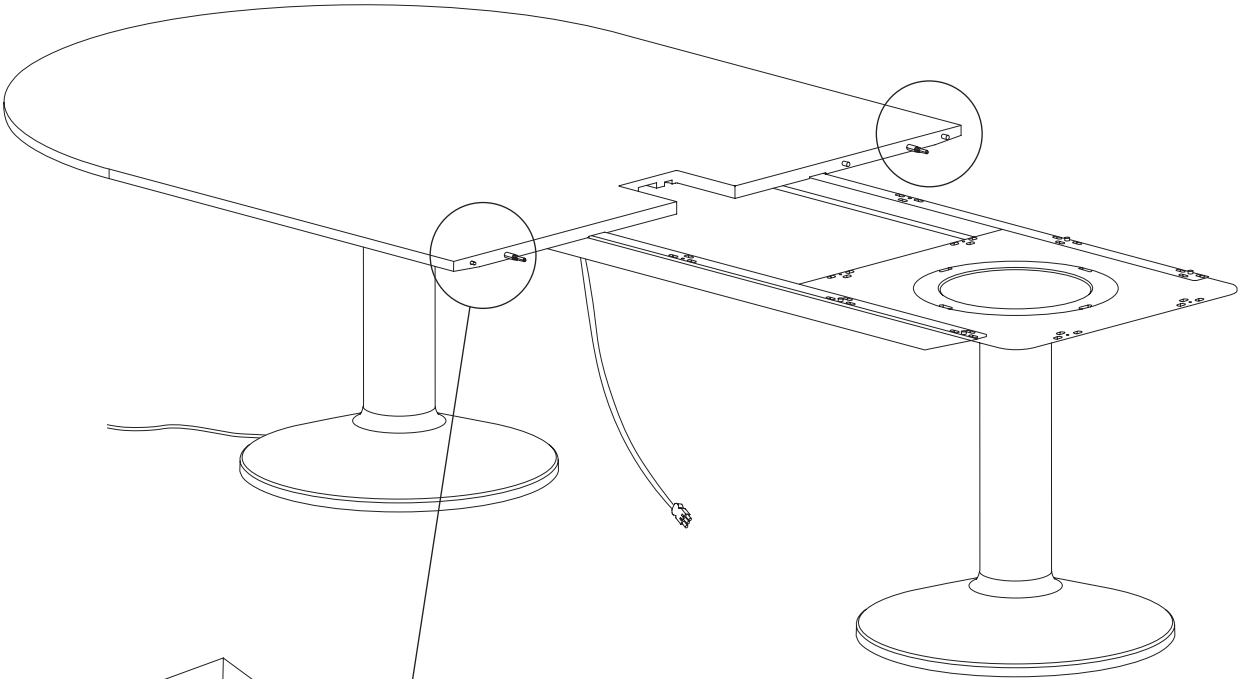

Secure the tabletop by placing a few tabletop screws. Do not over tighten.

Tabletop Screws

2/5x  
M8 x 16mm

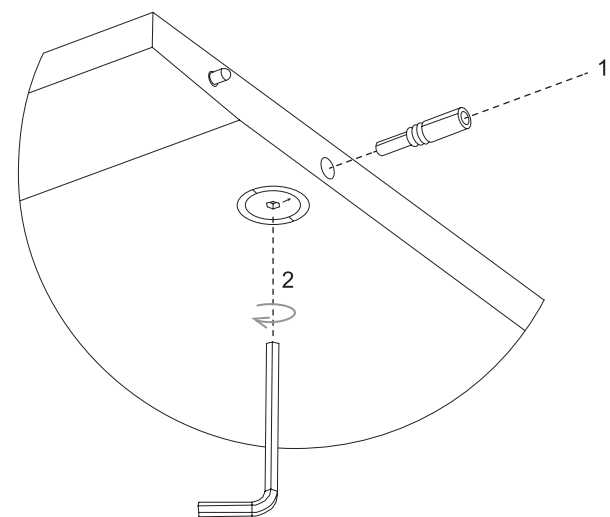

9.1

Place the round fitting into the circular cutout under the table so the arrow and larger hole are facing in the same direction and towards the centre of the tabletop.

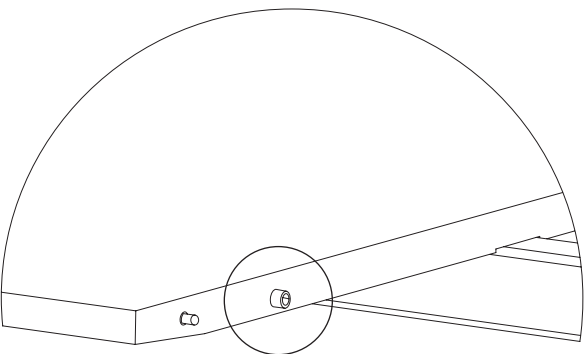

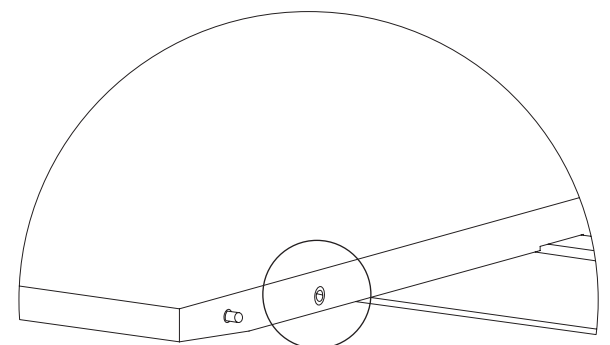

9.2

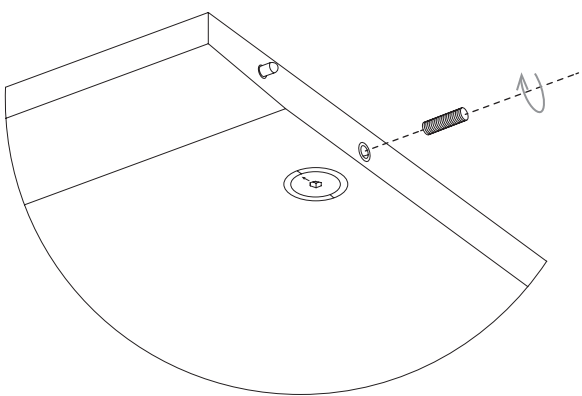

Place one of the metal dowel pins through the tabletop into the round fitting. Use the key provided to tighten the dowel pin. It should retract into the tabletop with each turn. Keep turning until tight and until the pin head is flush with the tabletop edge.

If stuck or unable to retract until flush, the round fitting may need to be re-inserted so it's flat or more force used.

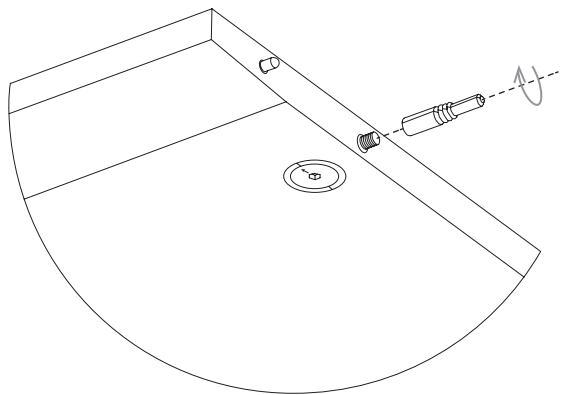

9.3

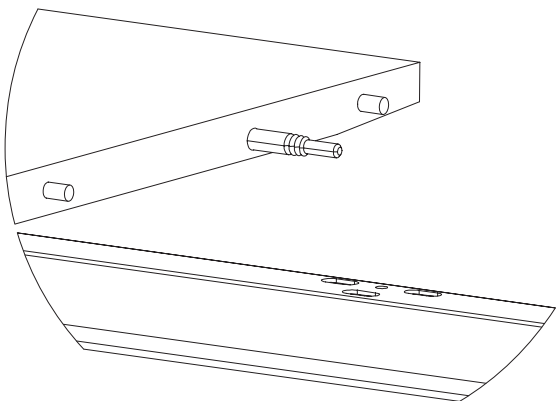

Connect the threaded pin to the dowel in the tabletop. Turn completely until tight.

9.4

Connect the next dowel pin to the thread. Turn until tight.

9.5

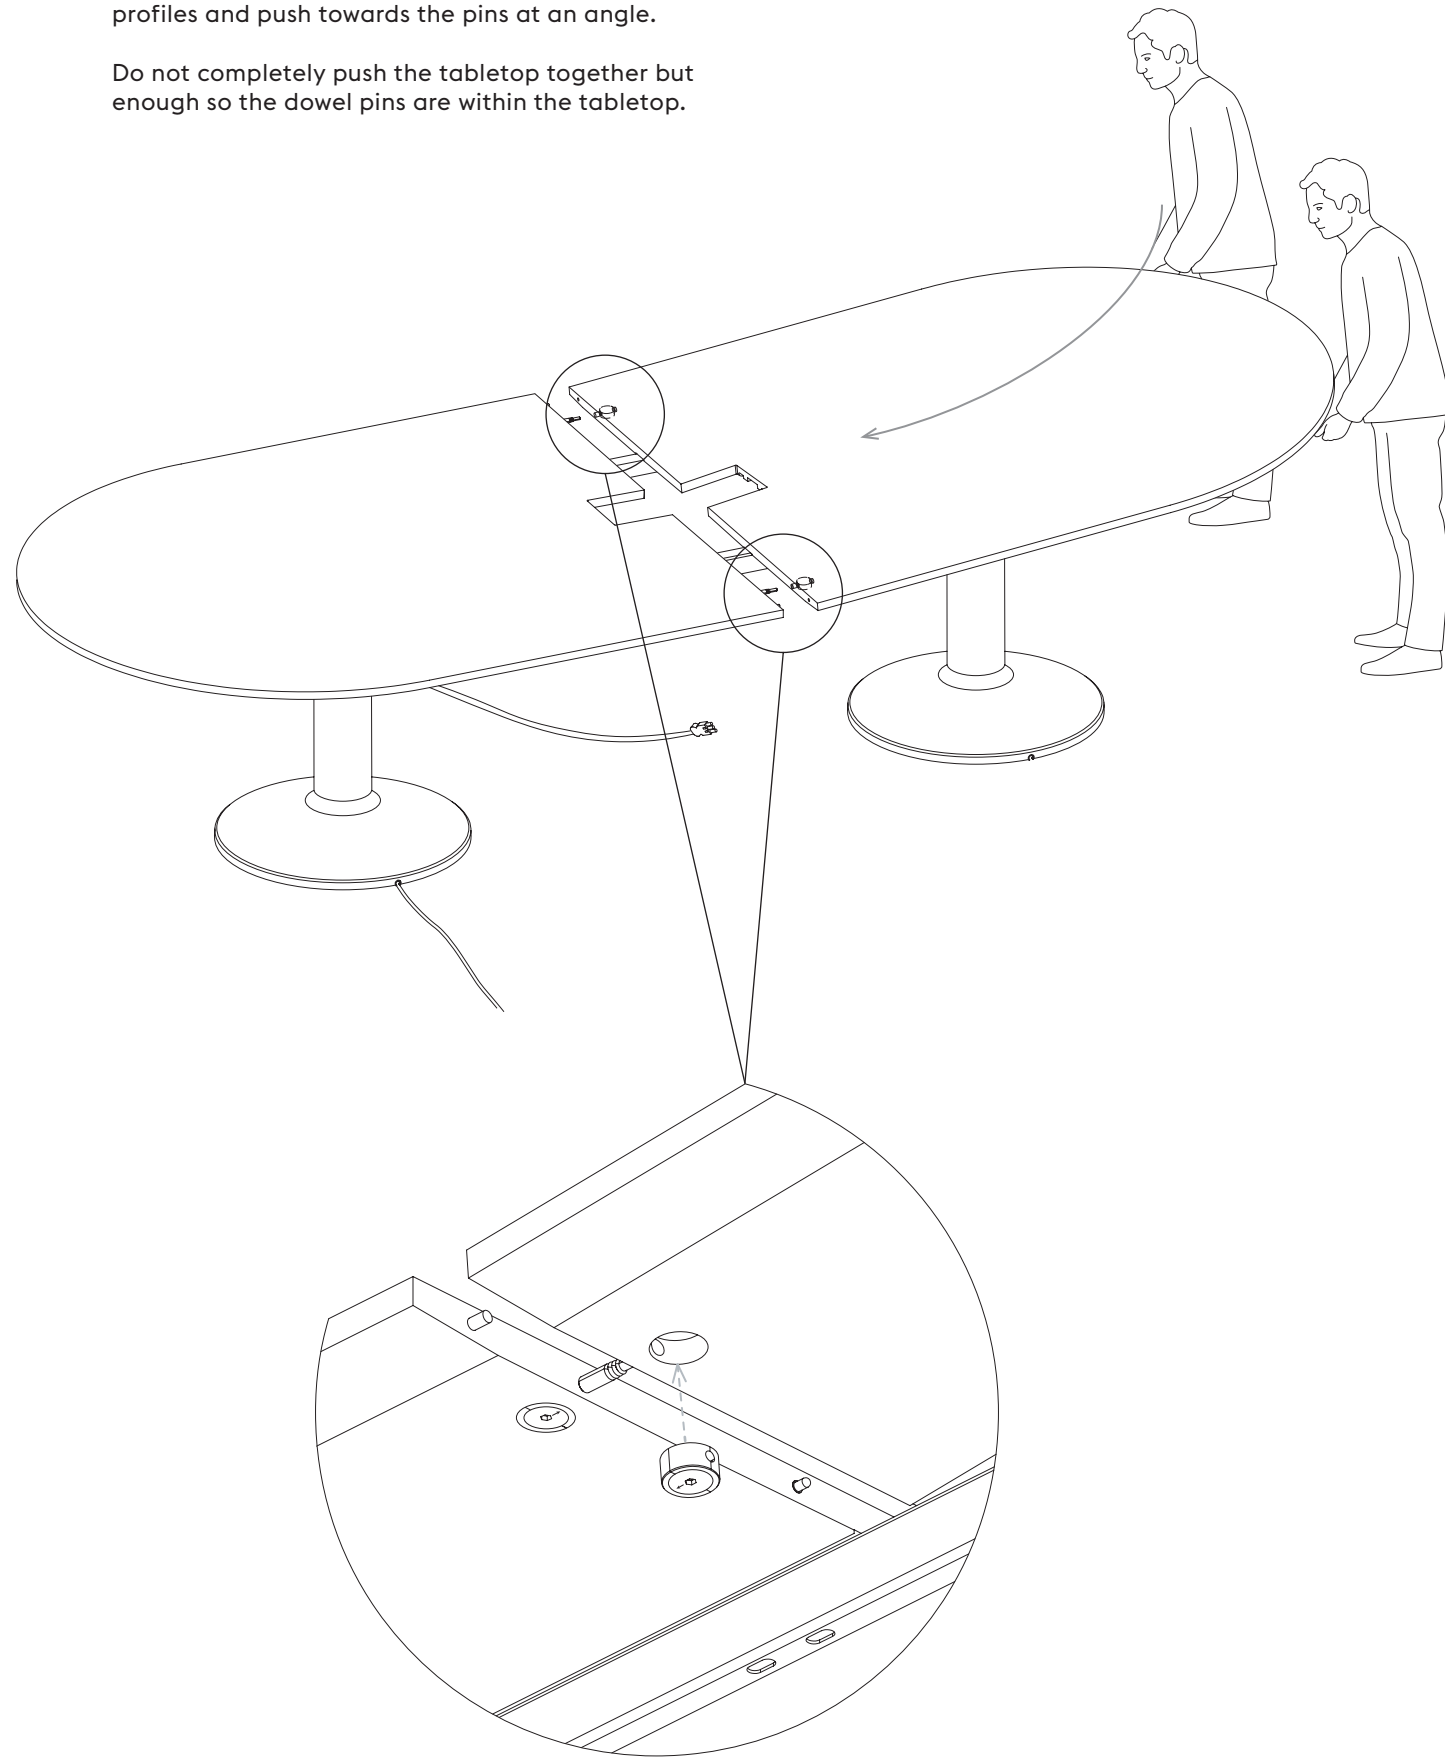

Repeat on the opposite side of the tabletop.

IO

Place the other half of the tabletop onto the support profiles and push towards the pins at an angle.

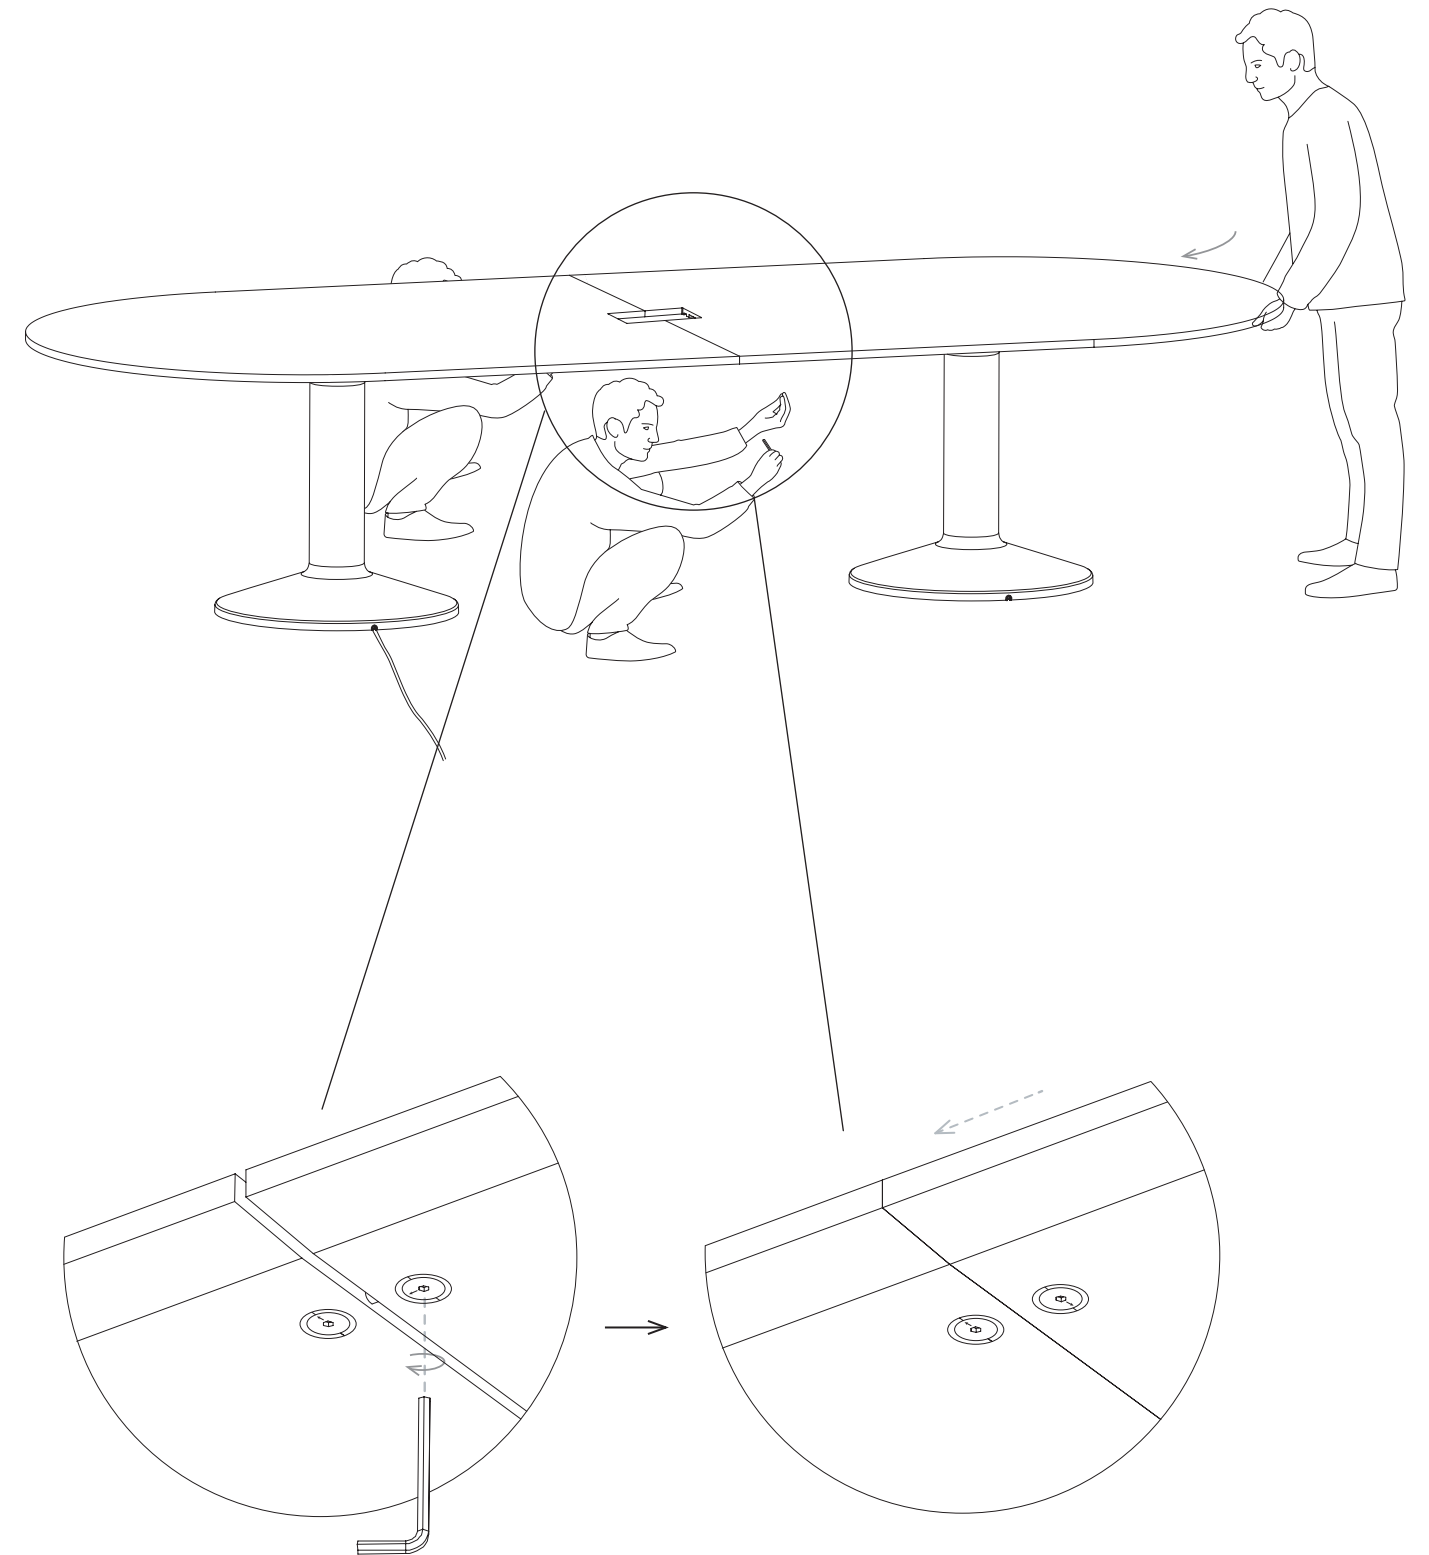

Do not completely push the tabletop together but enough so the dowel pins are within the tabletop.

While the tabletop half is lifted, place the round fitting into the circular cutout under the table so the arrow and larger hole are facing in the same direction and towards the pin on the opposite side.

II

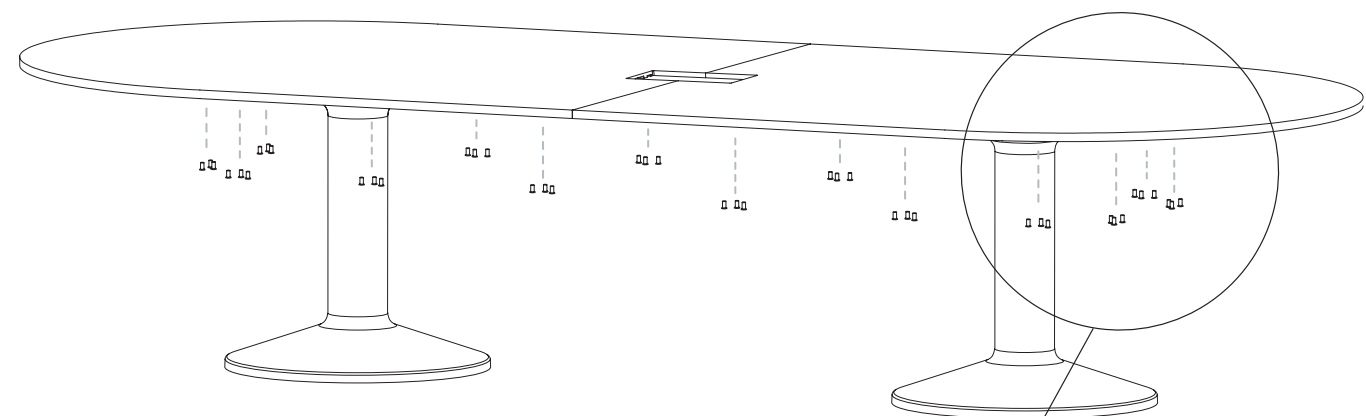

Now push the tabletop half together so they are as close as possible. Keep the tabletop half slightly elevated in the opposite end.

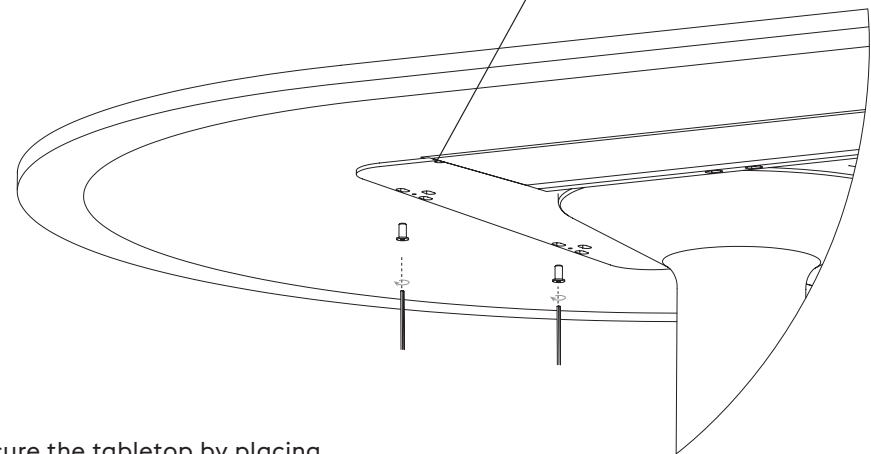

Simultaneously tighten the 2 round fittings on the 2nd half of the tabletop. The tabletops should slowly tighten together. Tighten until there is no gap.

Once tightened, ensure the 2nd half sits flush on the support profiles.

Screw the remaining screws into the tabletop.

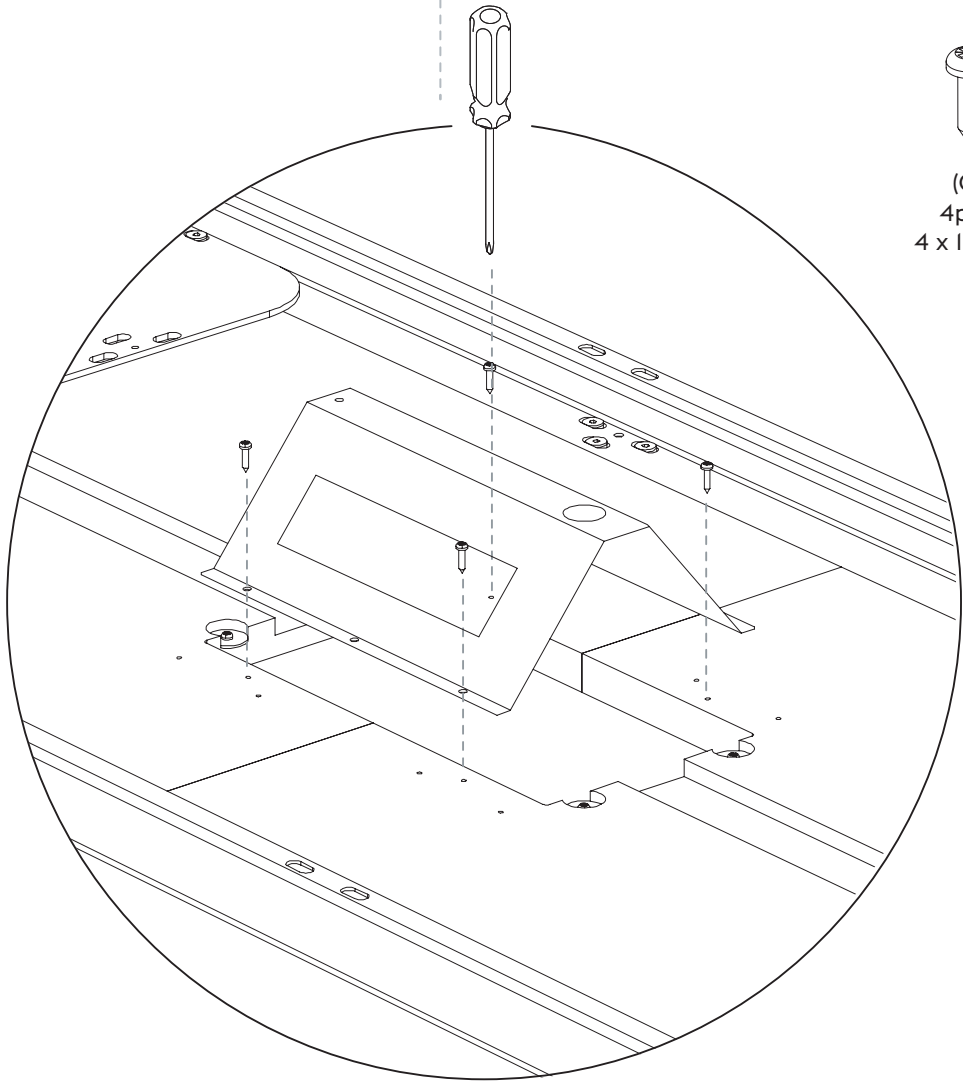

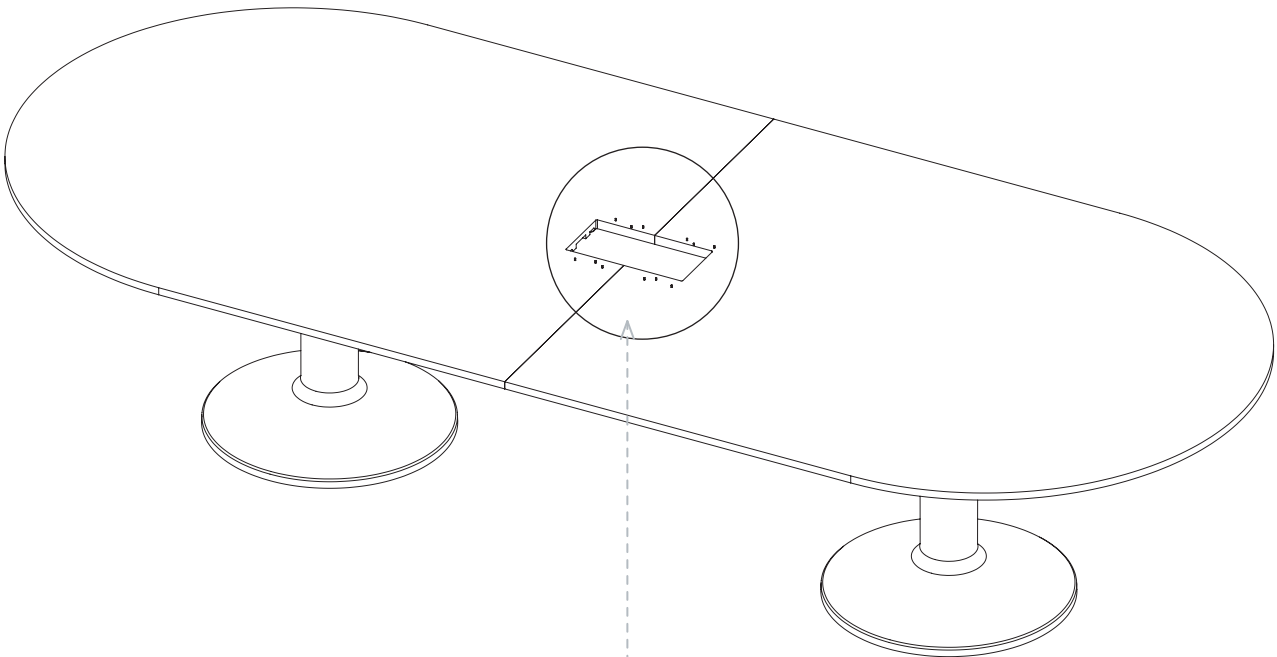

Secure the tabletop by placing a few tabletop screws  
Do not over tighten.

Tabletop Screws

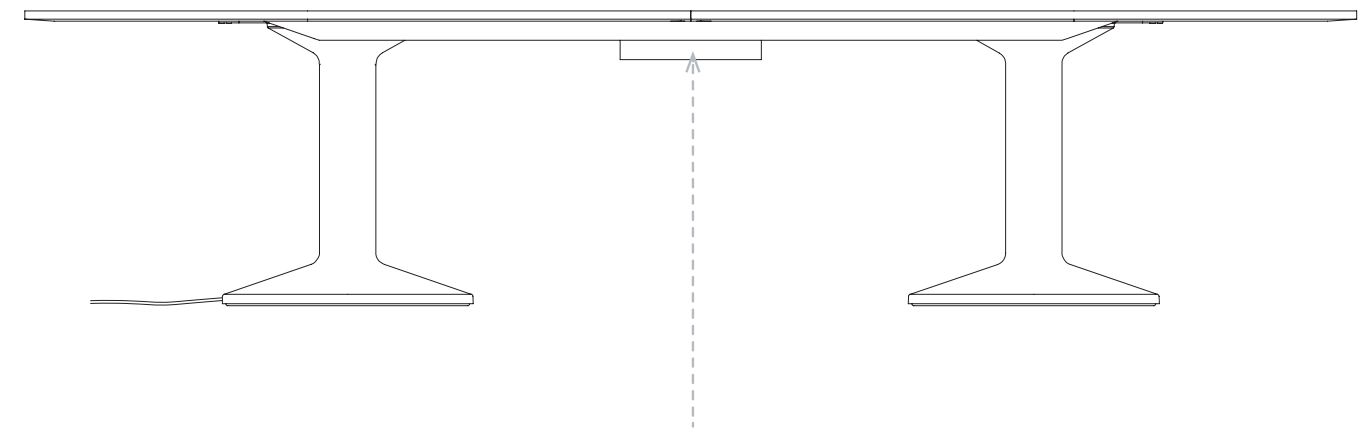

(A)  
48 pcs  
M8 x 16mm

Underneath the table, locate the holes in the center of the two tablespops.  
Use 4x wood screws to mount the central power unit to the inner line of holes.

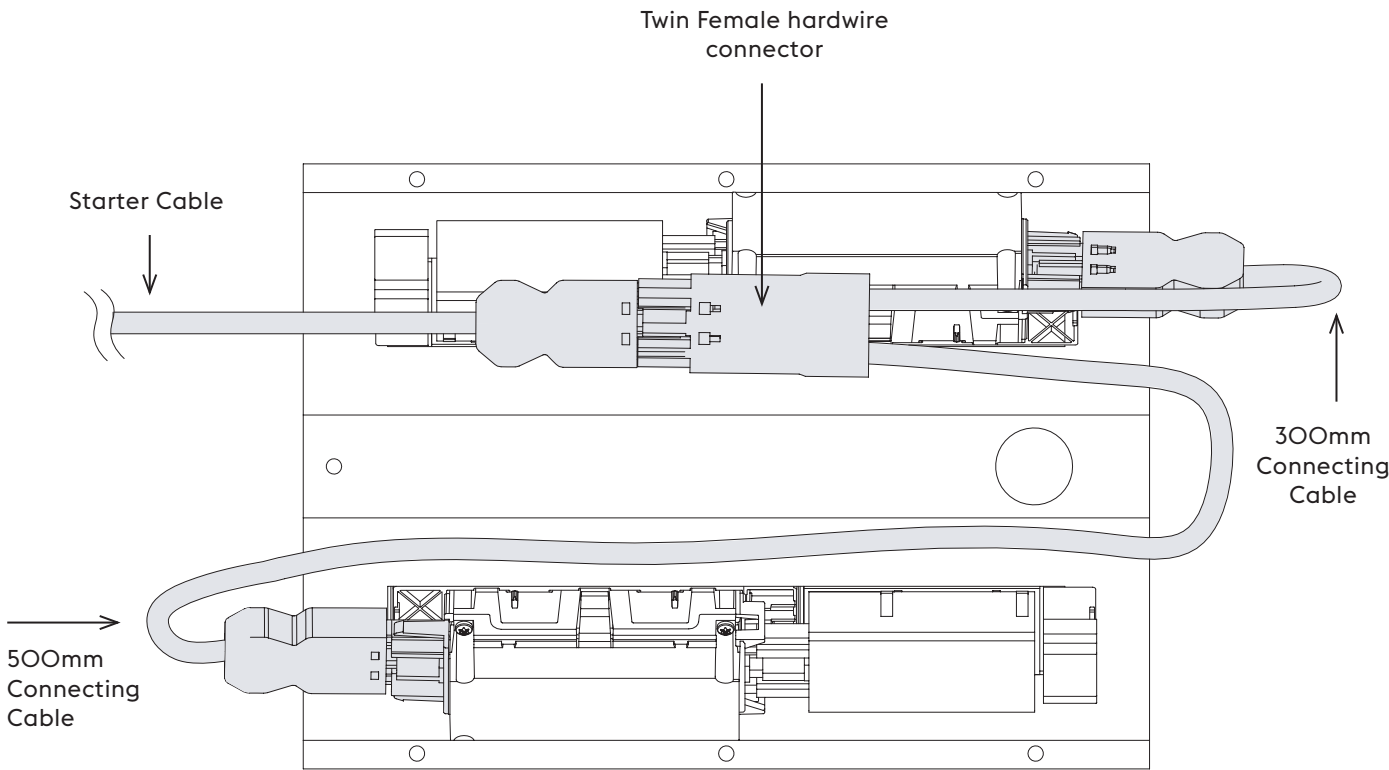

(C)  
4pcs  
4 x 15mm

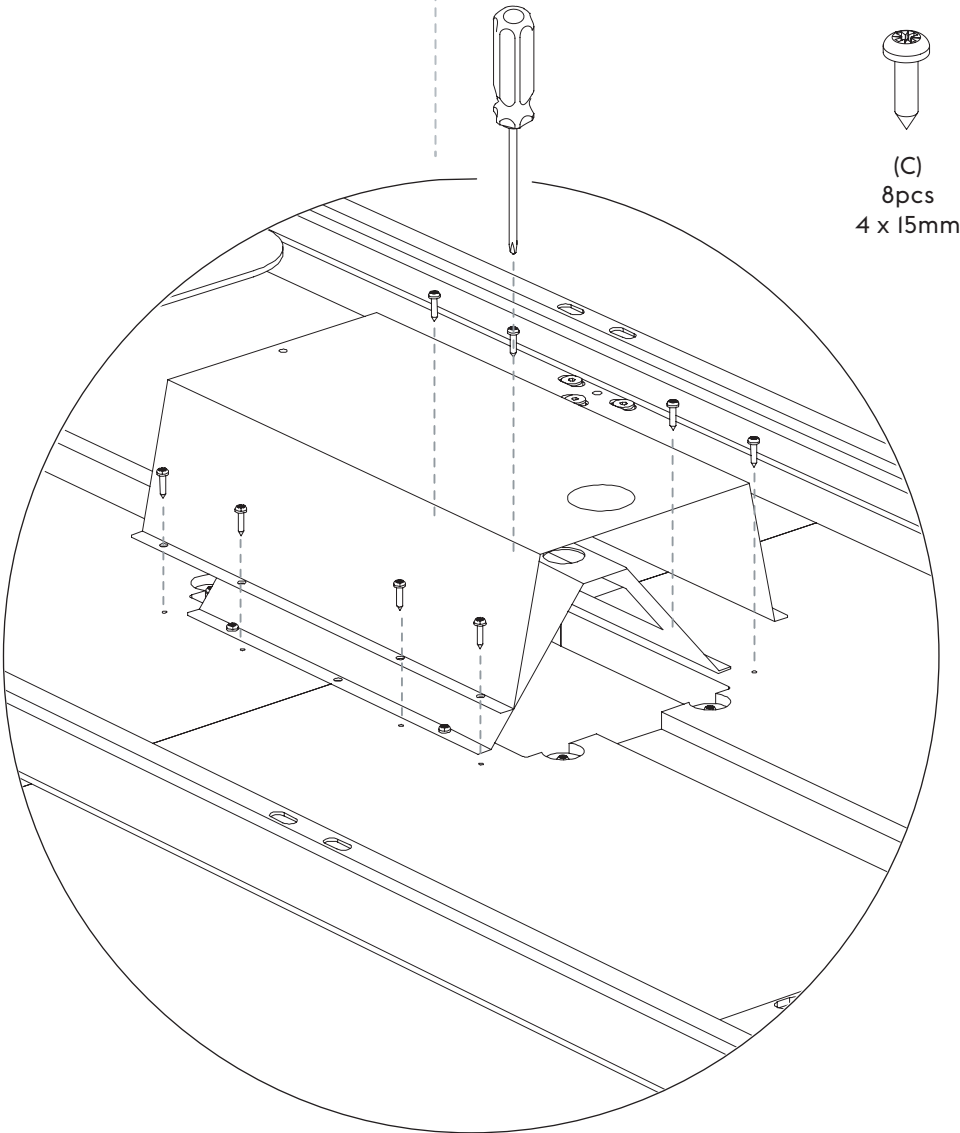

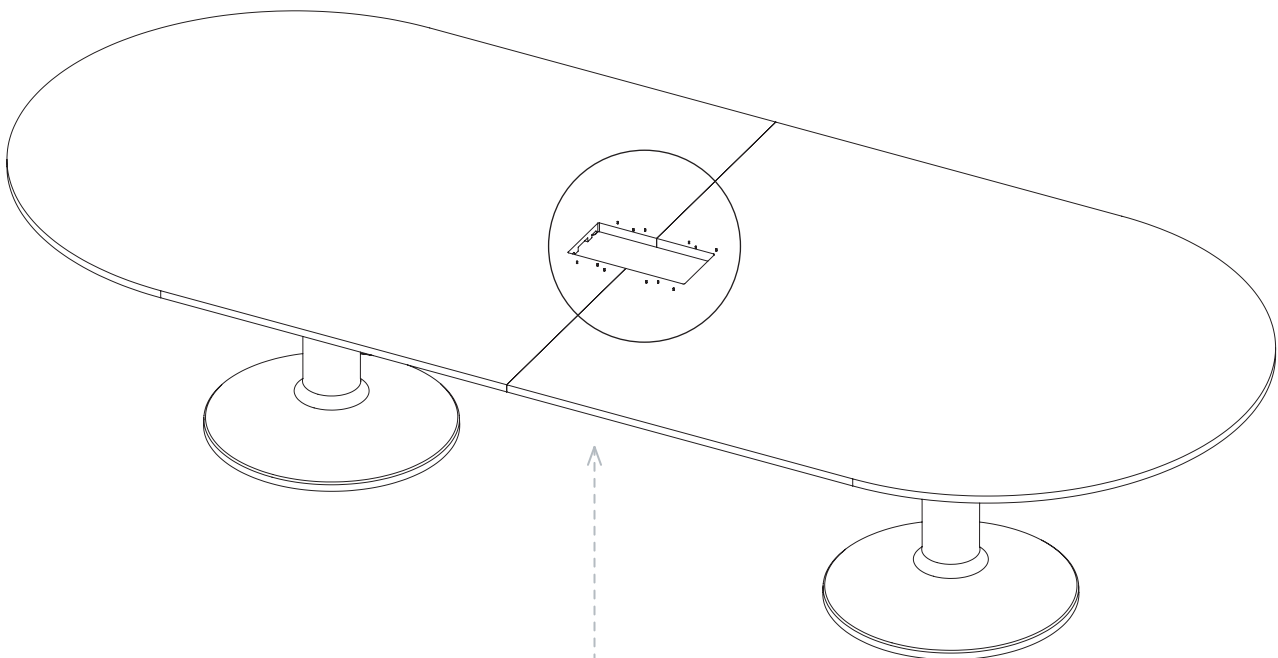

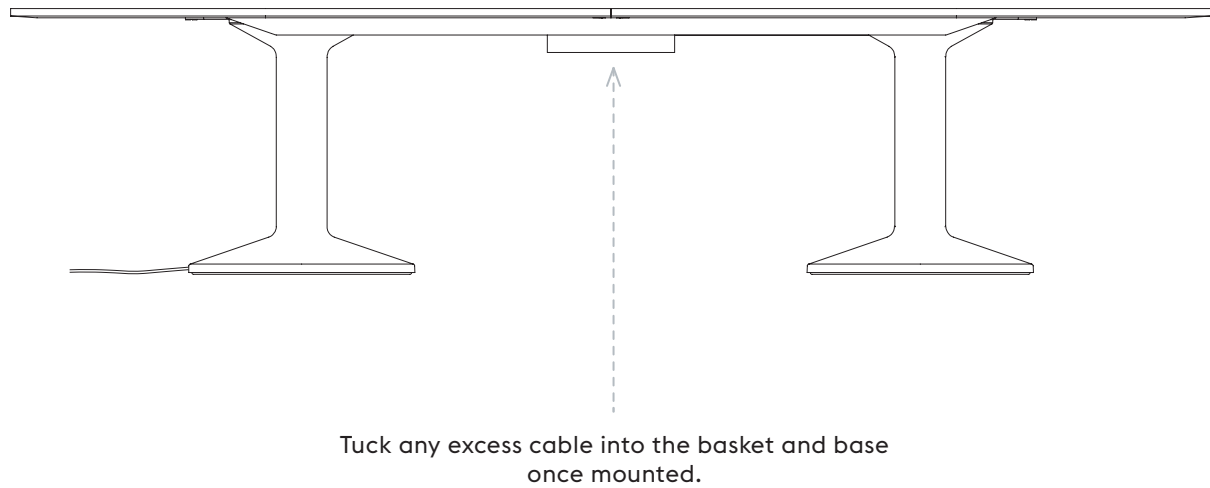

Connect the starter cable to the twin female adaptor block  
Attach the 300mm connecting cable to the nearest plug  
Attach the 500mm cable to the opposite plug entry.

Check that all connections have power.

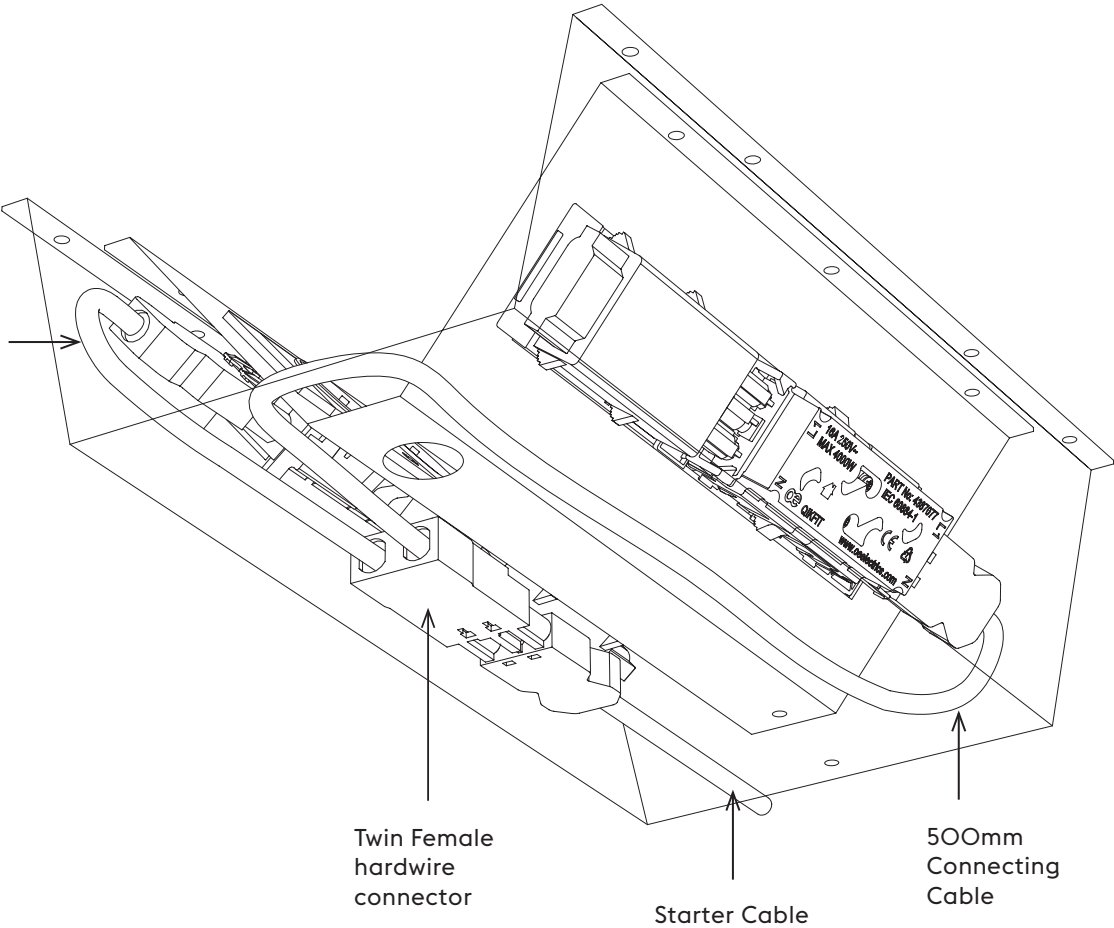

Use 8x wood screws to screw the cable basket into the remaining holes.

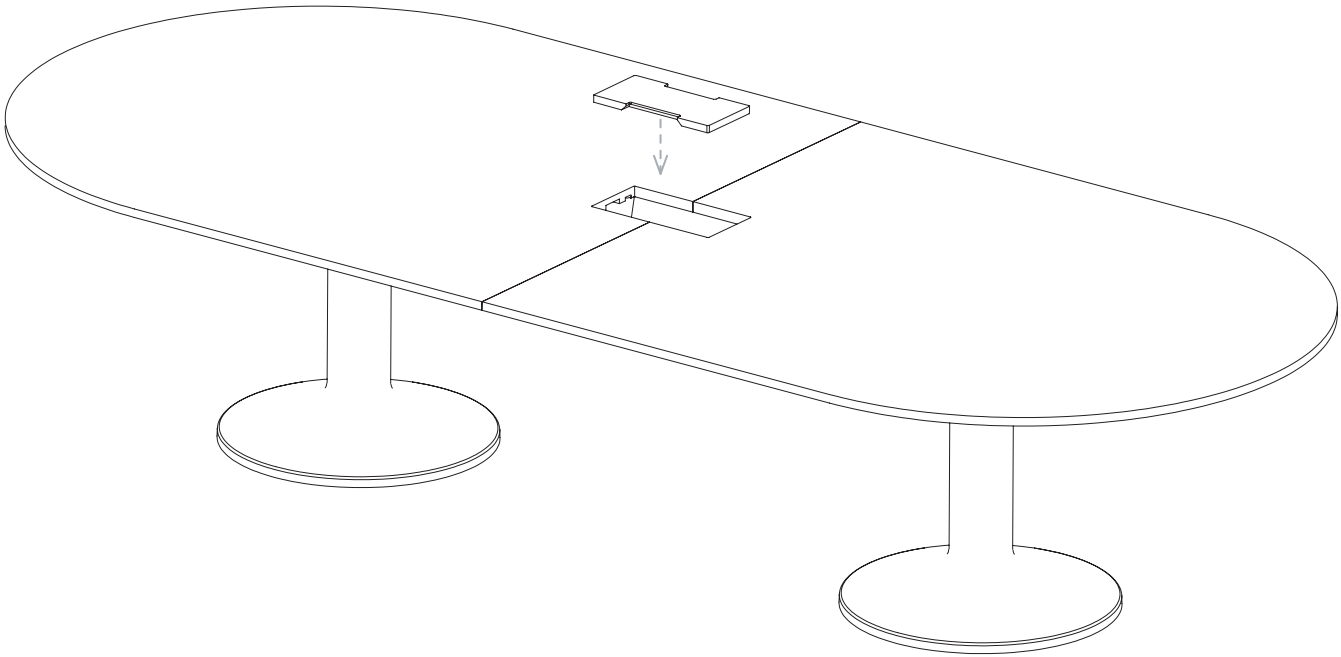

300mm  
Connecting  
Cable

Place the lid in the centre of the cut out

EN   **Metal Surfaces:** Clean with a moist micro fibre cloth to avoid scratching the high gloss paint. If necessary use a small amount of mild dish soap on the cloth.

**Electrical Parts:** Turn off electricity, before any cleaning. Clean with dry cloth near electrical parts

**Laminate & Linoleum:** Clean the table with a damp cloth. If necessary, only use a mild detergent or washing-up liquid, and not concentrate. Always wipe with a dry cloth afterward. Liquid, grease, etc., should be removed immediately to minimize the risk of stains and marks. For linoleum versions, linoleum care is recommended for optimal saturation of the natural material 2-3 times a year. It is recommended to clean linoleum versions with a damp cloth and a pH-neutral cleaner and wipe dry to remove any residues.

The product should not be exposed to excessive humidity, heat, or direct sunlight. Avoid placing the table in the immediate distance of a heat source. Do not place hot or wet objects directly on the table, as they can leave a mark on the tabletop. Metal objects can leave a mark if left on the table for a longer period of time. Any spill should immediately be removed to avoid discolouring. Clean the table top often and carefully with a soft and dry cloth following the wood's grain patterns.

\*Muuto recommends that you contact your local hardware store to get advice on tabletop oils for indoor use.

DK   **Metaloverflader:** Rengør med en fugtig mikrofiberklud for at undgå at ridse højglans-malingen. Brug om nødvendigt en lille mængde mildt opvaskemiddel på kluden.

**Elektriske dele:** Afbryd elektricitet, rengør med tør klud.

**Laminat & linoleum:** Rengør bordet med en fugtig klud. Brug om nødvendigt et mildt rengøringsmiddel eller opvaskemiddel og ikke koncentrat. Tør altid efter med en tør klud. Væske, fedt osv. bør fjernes med det samme for at minimere risikoen for pletter og mærker. For linoleumversioner anbefales linoleumpleje for optimal mætning af det naturlige materiale 2-3 gange om året. Det anbefales at rengøre linoleumversioner med en fugtig klud og et pH-neutral rengøringsmiddel og derefter tørre af for at fjerne eventuelle rester.

Aftør bordpladen ofte og omhyggeligt med en blød og tør klud ved at følge træets åreretning. Træet bør ikke udsættes for høj luftfugtighed, varme og direkte sollys. Undgå at placere bordet i umiddelbar nærhed af en varmekilde. Sæt ikke varme eller våde genstande direkte på bordet, da de kan efterlade et mærke på bordpladen. Metalgenstande kan efterlade et mærke, hvis de sættes på bordet i længere tid. Alt spild skal straks fjernes for at undgå misfarvning.

\*Muuto anbefaler, at du kontakter dit lokale byggemarked for at få rådgivning om bordpladeolier til indendørs brug.

DE   **Metalloberflächen:** Reinigen Sie mit einem feuchten Mikrofasertuch, um Kratzer auf dem Hochglanzlack zu vermeiden. Verwenden Sie bei Bedarf eine kleine Menge mildes Spülmittel auf dem Tuch.

**Elektrische Teile:** Strom abschalten, mit einem trockenen tuch reinigen.

**Laminat & Linoleum:** Reinigen Sie den Tisch mit einem feuchten Tuch. Bei Bedarf verwenden Sie nur ein mildes Reinigungsmittel oder Spülmittel, und kein Konzentrat. Wischen Sie anschließend immer mit einem trockenen Tuch nach. Flüssigkeiten, Fett usw. sollten sofort entfernt werden, um das Risiko von Flecken und Rückständen zu minimieren. Für Linoleum-Versionen wird eine spezielle Linoleum-Pflege empfohlen, um das natürliche Material 2-3 Mal im Jahr optimal zu sättigen. Es wird empfohlen, Linoleum-Versionen mit einem feuchten Tuch und einem pH-neutralen Reiniger zu reinigen und trocken zu wischen, um Rückstände zu entfernen.

Die Tischplatte häufig und sorgfältig mit einem weichen und trockenen Tuch entlang der Maserung reinigen. Das Produkt darf nicht übermäßiger Feuchtigkeit, Hitze oder direktem Sonnenlicht ausgesetzt ein. Bitte vermeiden, den Tisch in unmittelbarer Nähe einer Wärmequelle aufzustellen. Keine heißen oder nassen Gegenstände direkt auf den Tisch stellen, da sie Spuren auf der Tischplatte hinterlassen können. Metallgegenstände können Spuren hinterlassen, wenn sie längere Zeit auf dem Tisch liegen. Verschüttete Flüssigkeiten sollten sofort entfernt werden, um Verfärbungen zu vermeiden.

\*Muuto empfiehlt, dass Sie sich an Ihren örtlichen Baumarkt wenden, um Ratschläge zu Tischplattenölen für den Innenbereich zu erhalten.

FR   **Surfaces métalliques :** Nettoyez avec un chiffon en microfibre humide pour éviter de rayer la peinture brillante. Si nécessaire, utilisez une petite quantité de savon à vaisselle doux sur le chiffon.

**Pièces électriques:** Eteindre l'éctricité, nettoyer avec un chiffon humide.

**Stratifié & linoléum:** Nettoyez la table avec un chiffon humide. Si nécessaire, utilisez uniquement un détergent doux ou du liquide vaisselle, mais pas de produit concentré. Séchez toujours avec un chiffon sec par la suite. Les liquides et les graisses doivent être essuyés immédiatement pour éviter les taches et les marques. Pour les versions en linoléum, il est conseillé d'utiliser un soin spécifique pour le linoléum afin d'obtenir une saturation optimale du matériau naturel 2 à 3 fois par an. Nettoyez les versions en linoléum avec un chiffon humide et un nettoyeur pH neutre, puis essuyez pour éliminer les résidus.

Il convient de nettoyer régulièrement le plateau en utilisant un chiffon doux et sec en suivant le grain du bois. La table ne doit pas être exposée à une atmosphère trop humide, trop chaude ou à la lumière directe du soleil. Éviter de placer la table à proximité d'une source de chaleur. Ne pas poser d'objets chauds ou humides directement sur la table car ils peuvent laisser une marque sur le plateau. Les objets métalliques peuvent laisser une marque s'ils restent sur la table pendant une longue période. Toute substance renversée doit être immédiatement nettoyée pour éviter toute décoloration. Nettoyer régulièrement et soigneusement le plateau de la table avec un chiffon doux et sec en suivant les veines du bois.

\*Muuto recommande de contacter votre quincaillerie locale pour obtenir des conseils sur les huiles pour plateau de table destinées à une utilisation en intérieur.

ES   **Superficies metálicas:** Limpie con un paño de microfibra húmedo para evitar rayar la pintura de alto brillo. Si es necesario, use una pequeña cantidad de jabón para platos suave en el paño.

**Partes eléctricas:** Apague la electricidad, limpie con un paño seco.

**Laminado y linóleo:** Limpie la mesa con un paño húmedo. Si es necesario, use un detergente suave o líquido lavaplatos no concentrado. Seque siempre con un paño seco después. Los líquidos, grasas, etc., deben eliminarse de inmediato para minimizar el riesgo de manchas y marcas. Para las versiones de linóleo, se recomienda el cuidado del linóleo 2-3 veces al año para una saturación óptima del material natural. Se recomienda limpiar las versiones de linóleo con un paño húmedo y un limpiador de pH neutro y después secar para eliminar los residuos.

Limpie el tablero de la mesa con frecuencia y con cuidado con un paño suave y seco siguiendo los patrones de vetas de la madera. El producto no debe exponerse a la humedad excesiva, al calor ni a la luz solar directa. Evite colocar la mesa cerca de fuentes de calor. No ponga objetos calientes ni mojados directamente sobre la mesa, puede dejar marcas en el tablero. Si deja objetos de metal sobre la mesa durante un tiempo prolongado, puede manchar la superficie. Si se derrama algo sobre la mesa, límpielo de inmediato para evitar la decoloración. Limpie el tablero de la mesa con frecuencia y con cuidado con un paño suave y seco siguiendo los patrones de vetas de la madera.

\*Muuto recomienda que contacte a su ferretería local para obtener asesoramiento sobre aceites para mesas de interior.
