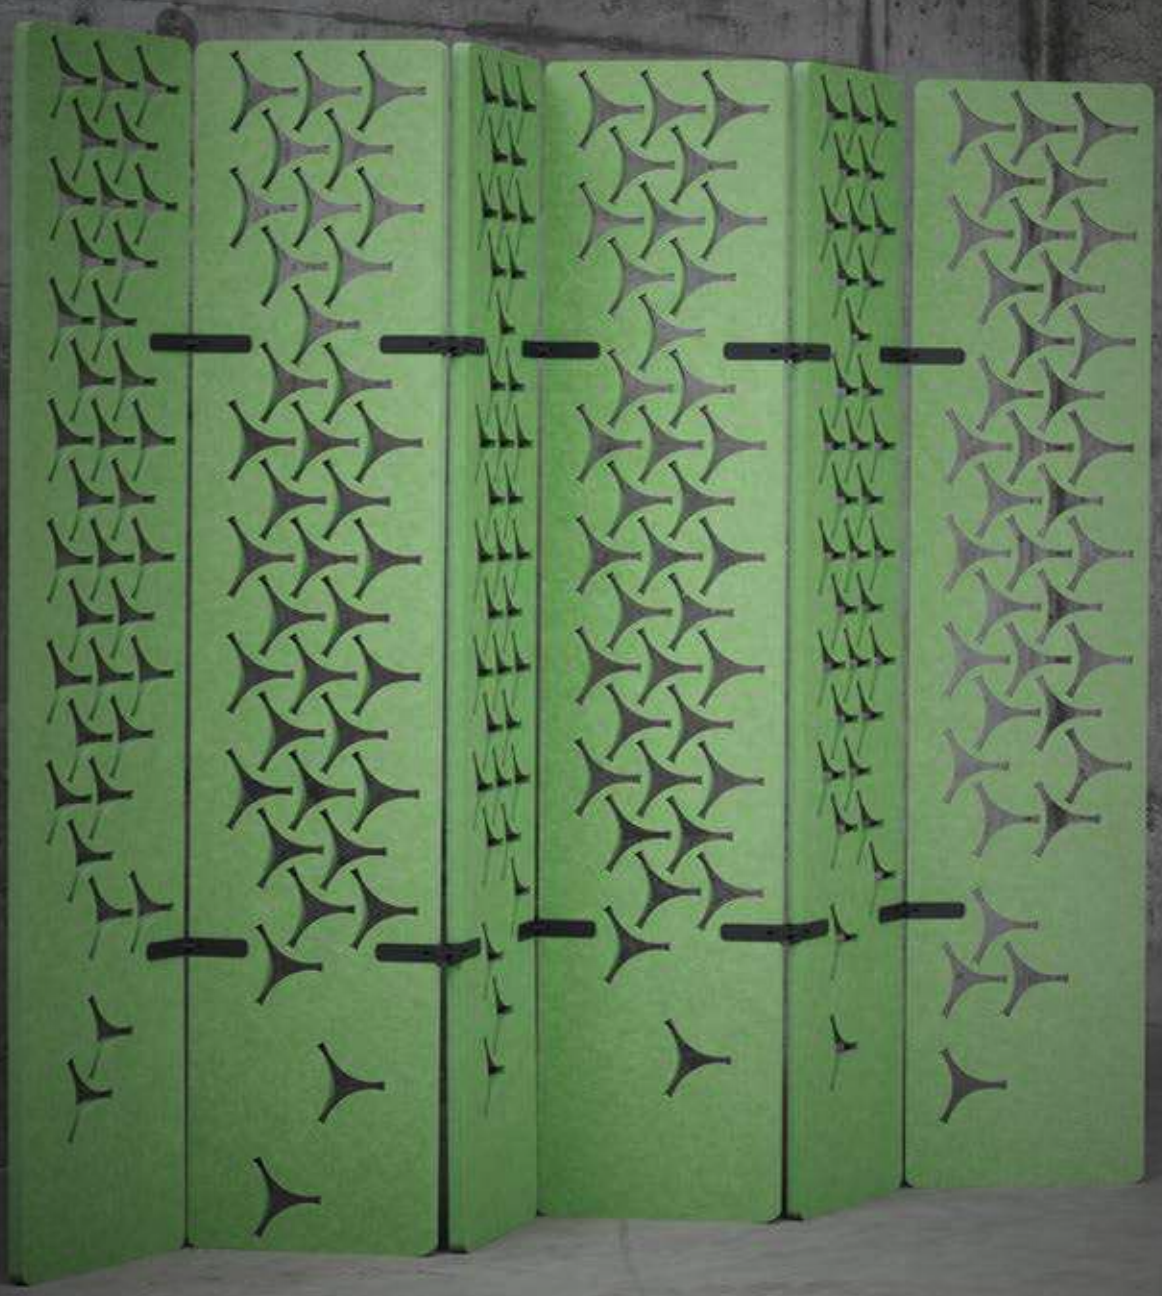
Customised high-performance sound absorbers for a noticeable improvement in well-being and room quality. ECHO**JAZZ** EchoBoards® are made from recycled PET bottles. 100% Swiss design, 100% zero waste.



COMPANY PROFILE

ACOUSTIC INSPIRATION

Ecological, robust and flexible high-performance sound absorbers made from recycled PET bottles, tailor-made for individual solutions to increase comfort and room quality in architecture, gastronomy, creative industries, open office spaces, school buildings, swimming pools, hotelery and your home. 100% Swiss design, 100% zero waste.

Made from 74 PET bottles per square metre, we process our ECHO**JAZZ** EchoBoards® into functional design elements. The soft, felt-like feel matches a wide range of natural materials such as stone, concrete, wood, metal and glass. ECHO**JAZZ** products are fire protection certified and available in up to 34 colours. Staged as a real eye-catcher or cleverly concealed - ECHO**JAZZ** improves the feeling of space in a noticeably pleasant way and with a lasting effect.

ECHO**CURTAIN®**

ECHO**COVE® DESK**

ECHO**TOWER®**

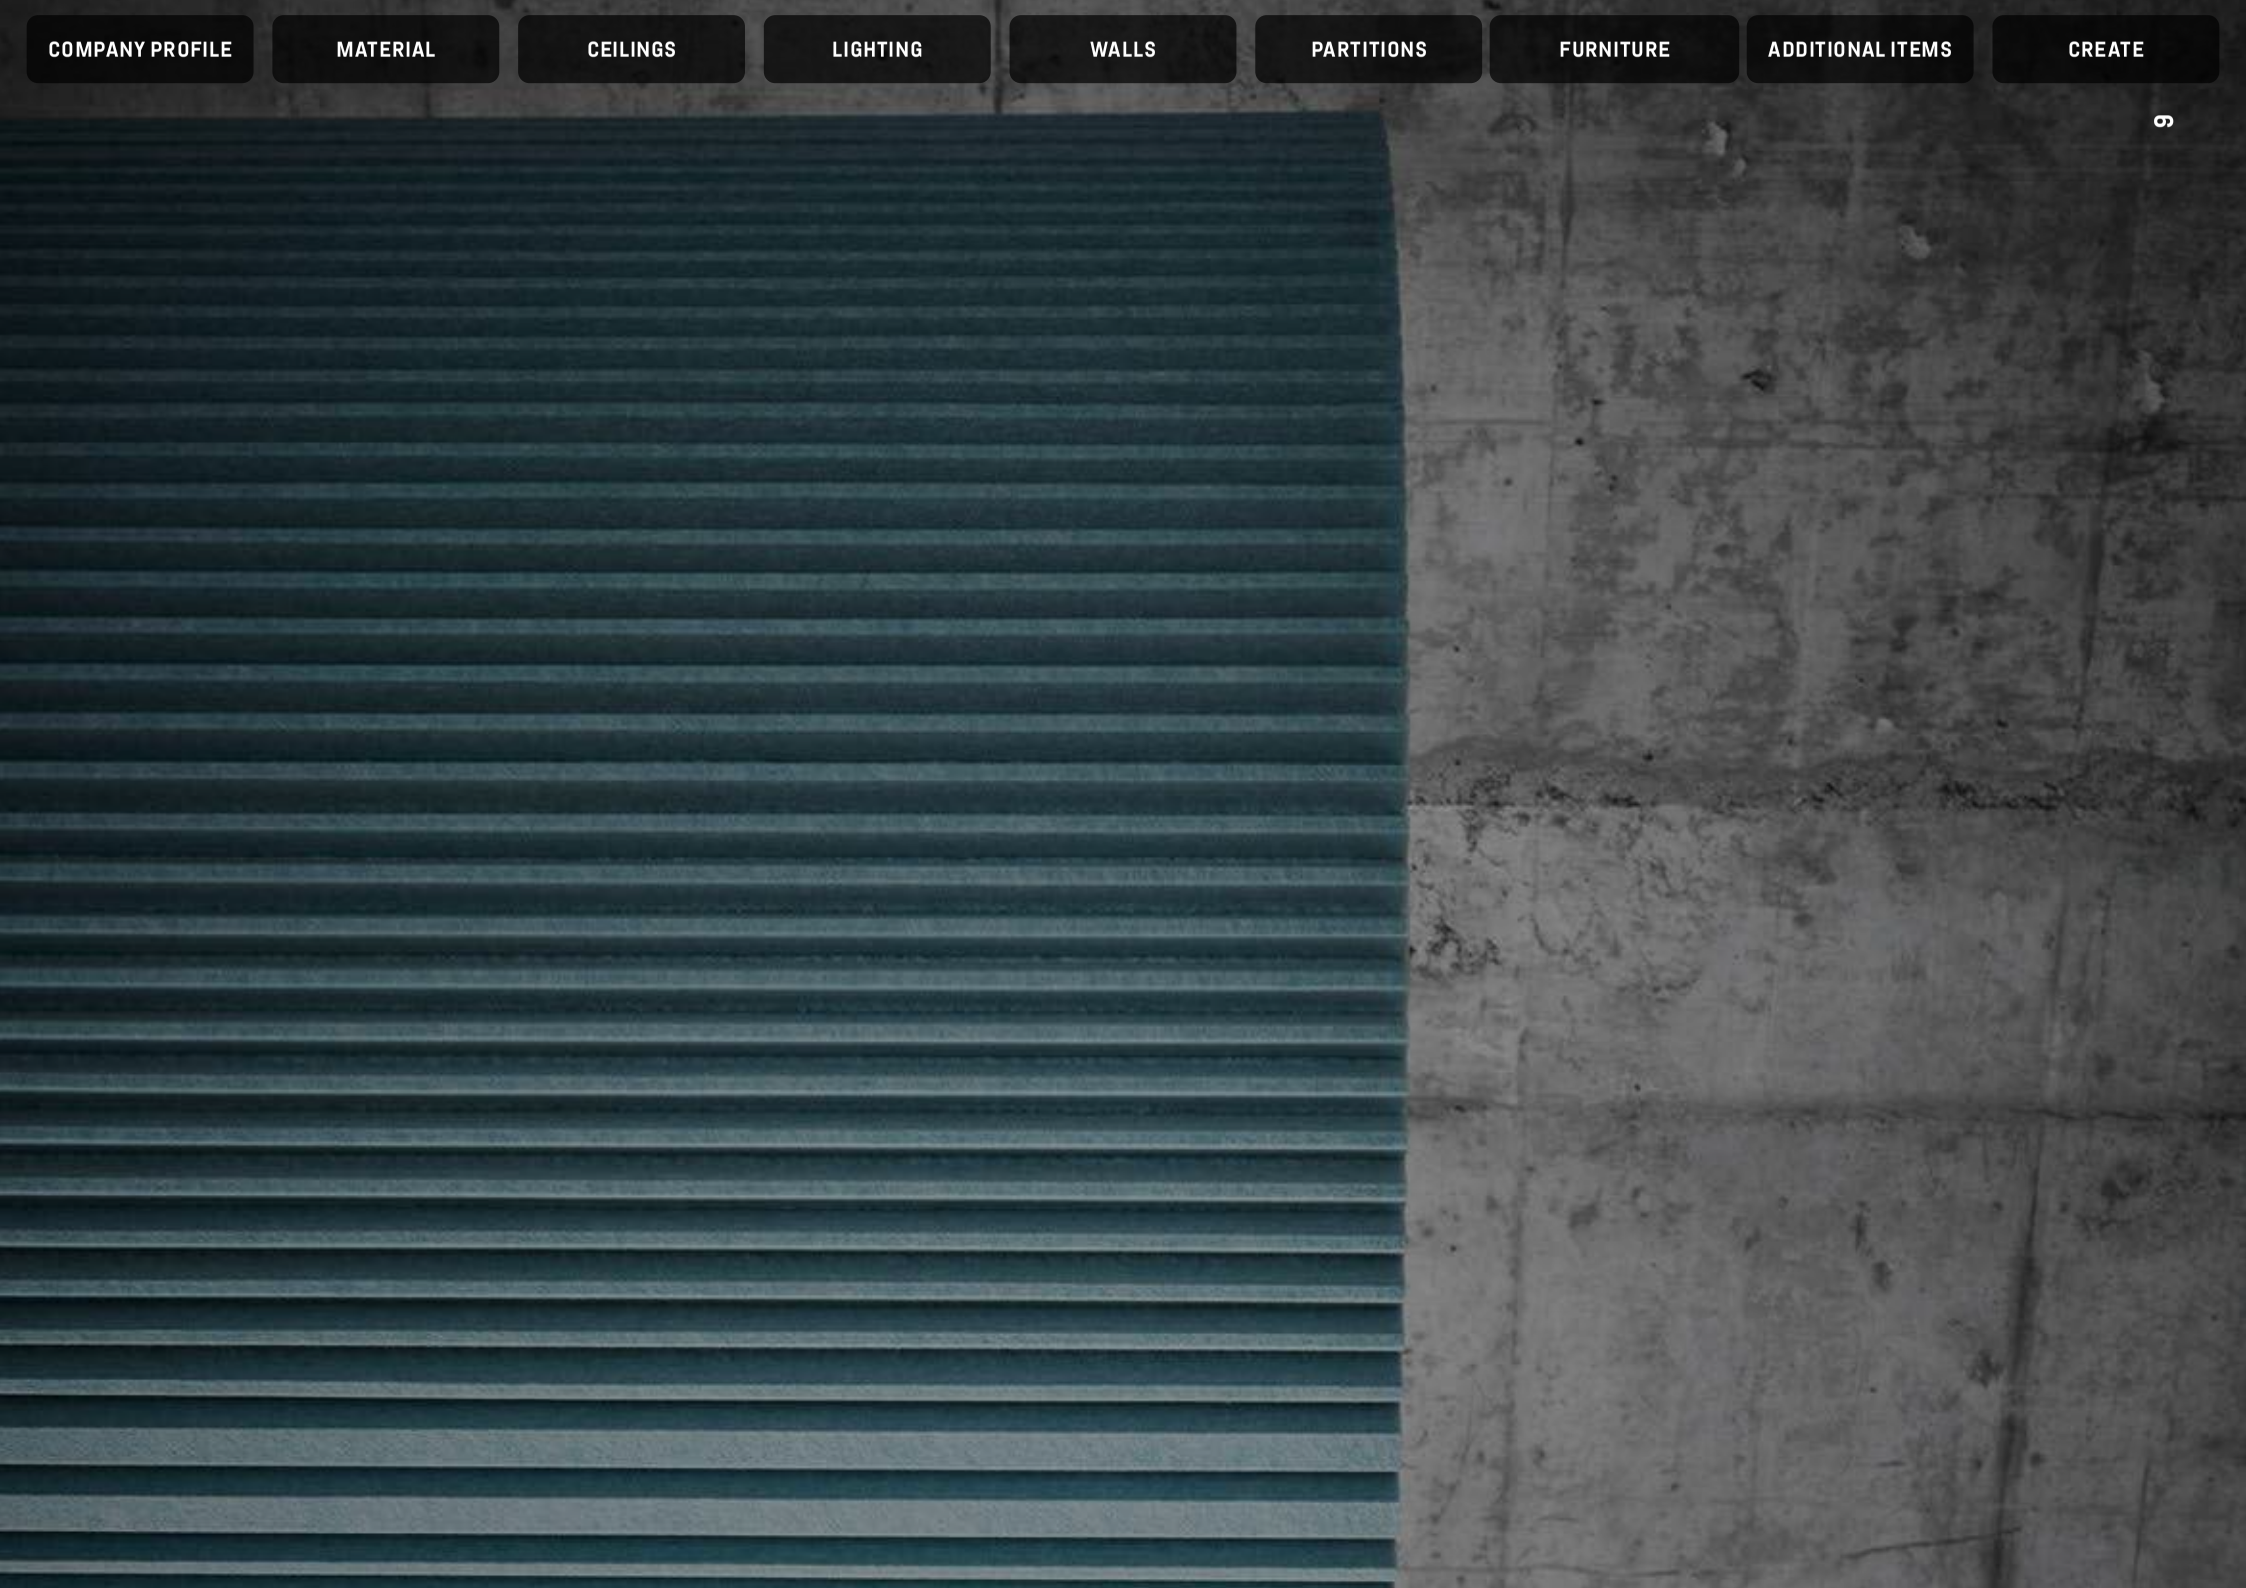
SUSTAINABILITY BY DESIGN

To noticeably improve well-being and room quality, we create high-performance sound absorbers for architecture, gastronomy, creative industries, open office spaces and your home. Our ready-made products are designed for you in Kriens and have the highest standards of design and simplicity.

More ecological, more robust and more flexible in use than any other comparable product: all our products are based on the use of durable high-tech felt made from 100% PET. It was our upmost goal to ensure that the ECHO**JAZZ** products contain the highest possible proportion of recycled PET material and that the result is deceptively close to the beauty and properties of traditional wool.

Our product is for your project: We take care of individual and tailor-made solutions that address a wide range of projects and offer a large range of smart standard products.

And after the project is before the project: Through our stewardship programme, we can recycle 100% of used ECHO**JAZZ** products.



ACOUSTICS AND ENVIRONMENT

At ECHO**JAZZ**, we combine sustainability with the simplicity of design of highest and most vanguard standards. In order not to burden our nature, only the cycle comes into question for us: recycled raw materials, recyclable products, zero waste.

From disposable plastic to high-quality end products for the design industry: for our products we use 100% PET with a minimum of 50% recycled PET. Compared to the production of virgin PET, the use of recycled PET saves up to 84% of the energy. Individual products are complemented with recycled and recyclable steel

Closed loop: ECHO**JAZZ** is the only manufacturer to offer a take-back programme for all products. This means that all products can be returned for recycling at the end of their life cycle.

100% Zero Waste: We generate raw material for new products from used products and the residual material created during production.

On to the emission-free future: ECHO**JAZZ** products are already processed locally in Kriens, and we aim to have as many raw materials as possible manufactured as close to our site as possible.

HIGH PERFORMANCE

The world is changing at breakneck speed: space and tranquillity are becoming rare commodities. Whether in a creative open office, in a simple waiting room or in trendy restaurant concepts - people should feel comfortable in all rooms. We offer solutions that improve heavily frequented and acoustically stressed rooms: noticeably, audibly, sustainably.

Design without compromise: The time of carpet wallpaper and thick curtains in dim conference rooms is over. We will contain acoustic disturbance elements in every room without restricting modern design visions and architecture.

Sustainability without compromise: The construction industry is one of the biggest waste generators on our planet. This must change. We start with a product that is 100% recyclable. We achieve the UN Sustainable Development Goals (SDGs) for responsible consumption and production.

Unlimited inspiration: It is in the hands of the creative industries to reinvent flawed materials, products and business models, to model sustainability and inspire people. Let›s get started!

SOUND-ABSORBING

The open and compressed felt structure is 40% thinner than comparable high-performance absorbers.

ROBUST

Very dimensionally stable, tear-resistant and cleanable without residues.

REGULATING

Pleasant indoor climate thanks to balancing temperature and humidity.

EASY TO PROCESS

Individually cut on the CNC cutting plotter, easily customisable on site.

FIRE SAFETY

European fire protection classification: B-s1/s2, d0, hardly any smoke development and no burning dripping.

MOLD-FREE

Because the fibre does not absorb water, the EchoBoard® dries very well.

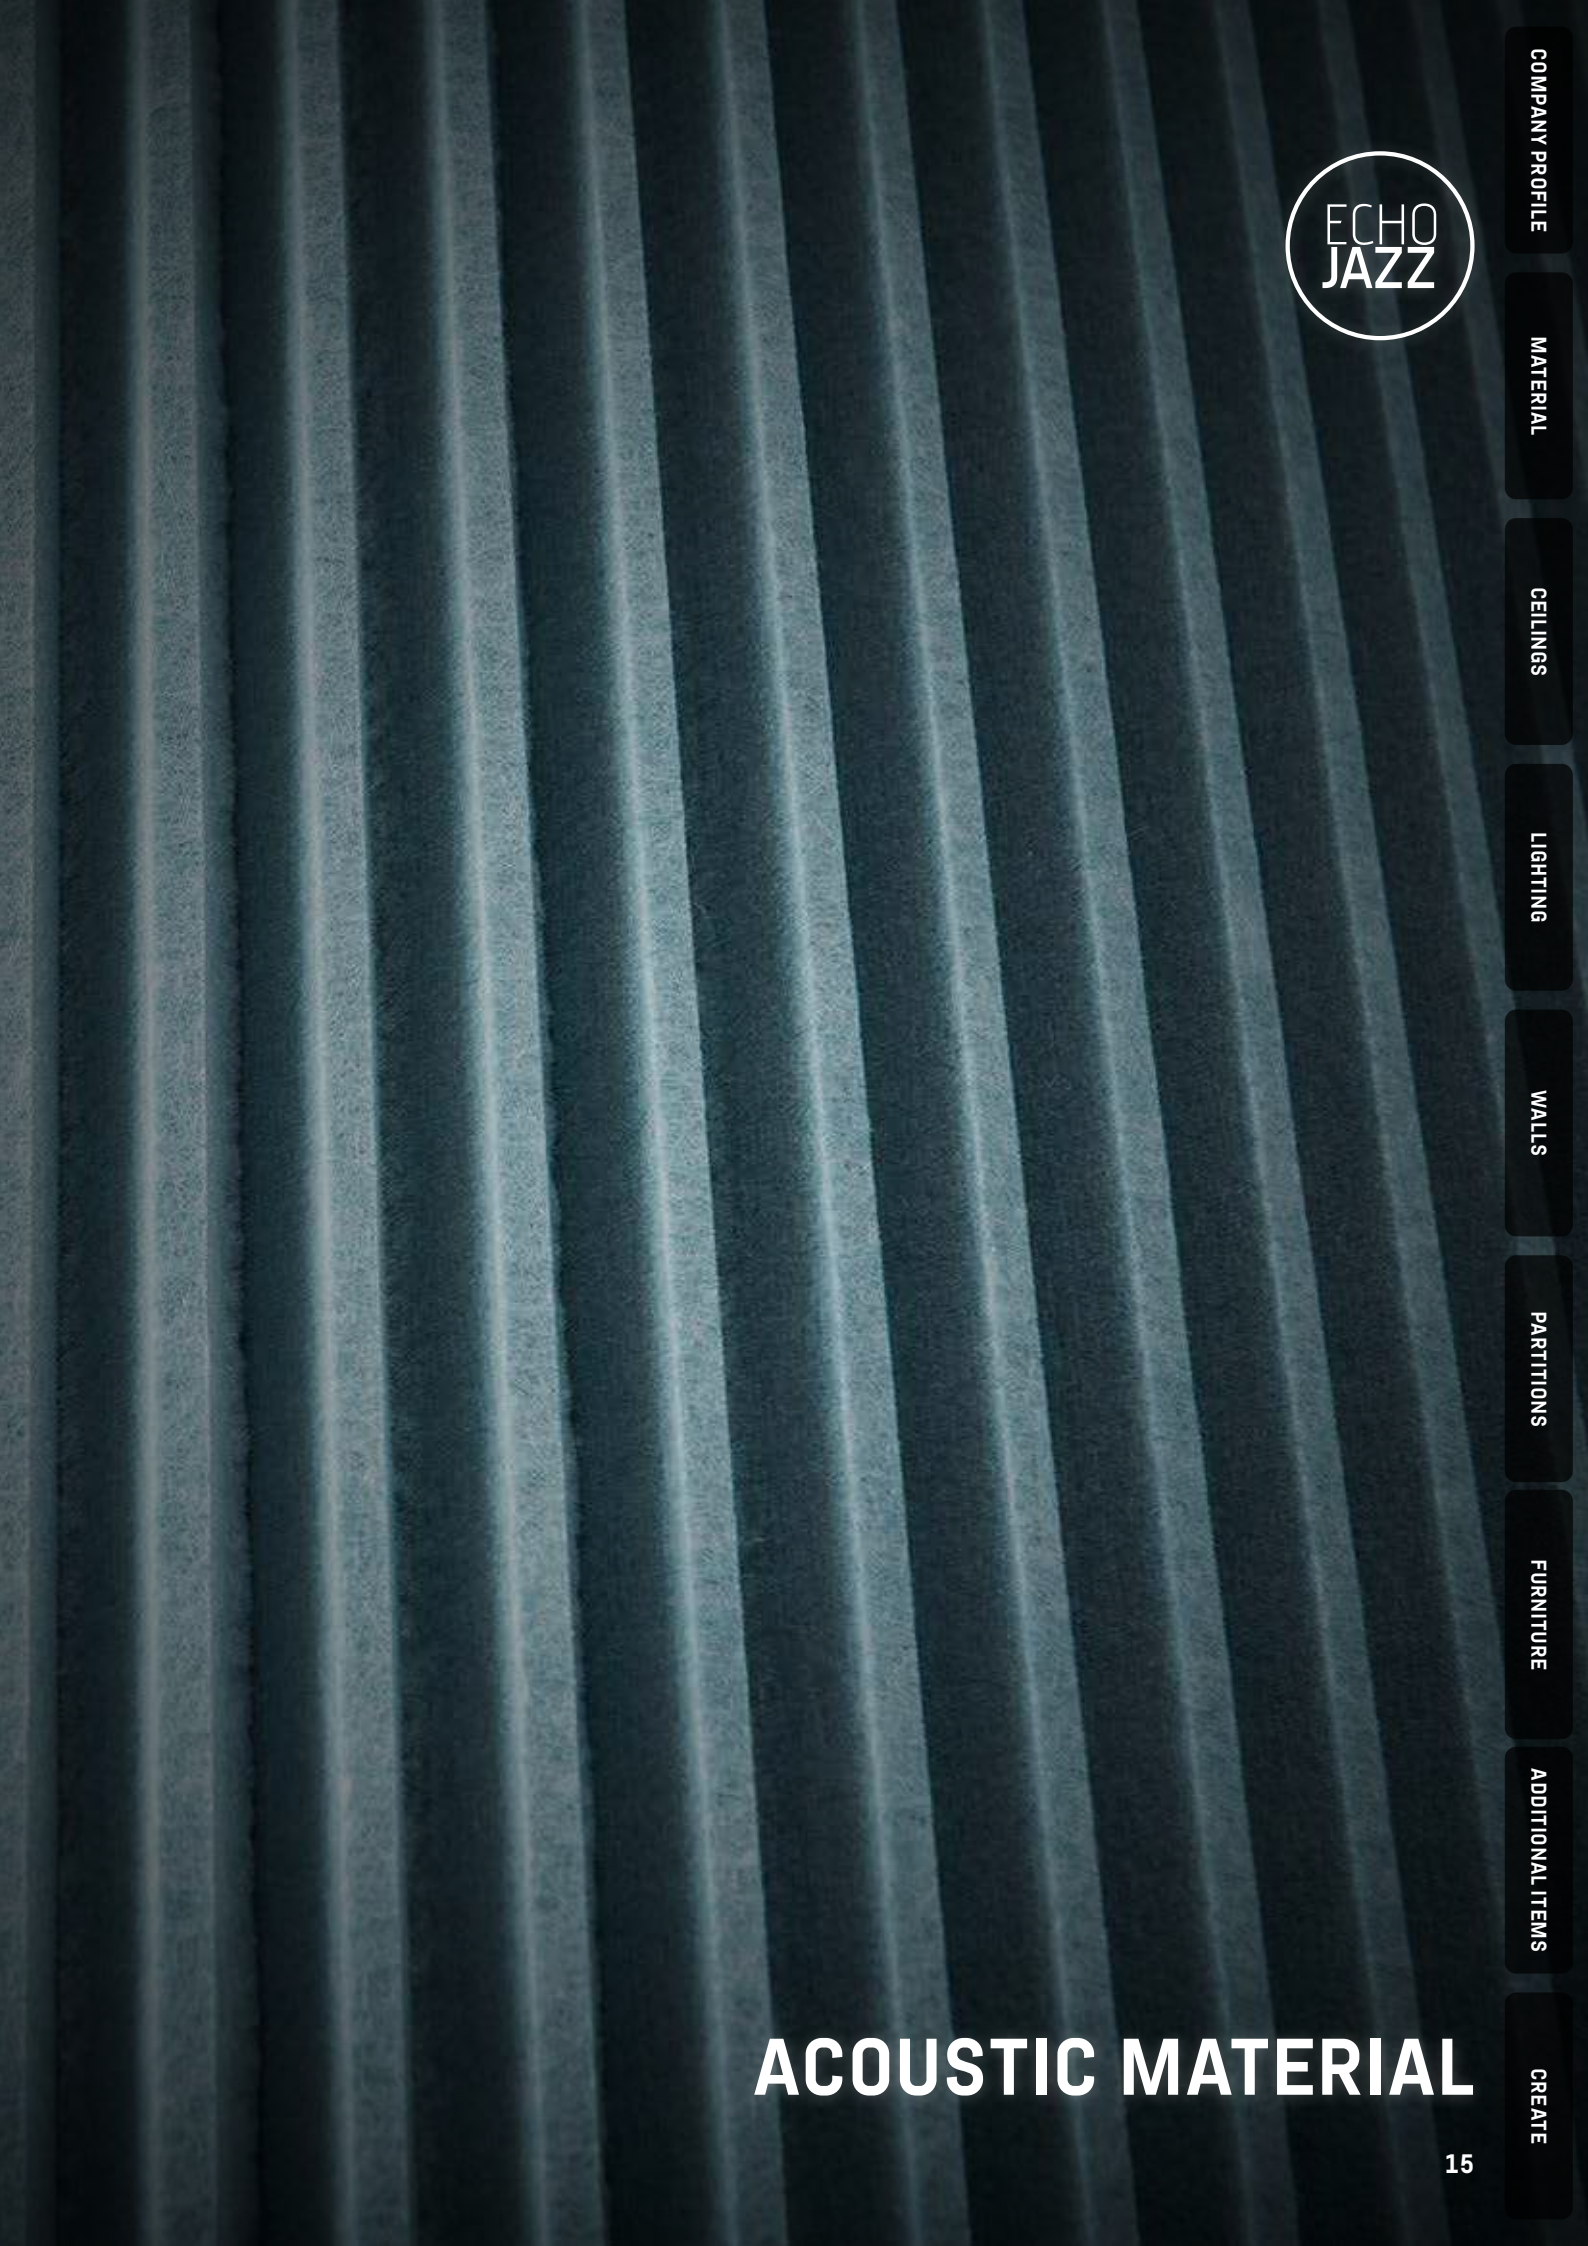
EMISSION-FREE

Does not emit hazardous fibres or paint particles.

LIGHTFASTNESS

The fibres are dyed in the liquid state and do not fade.

The robust and easy-care basic elements EchoBoard® and EchoCoustic® can be used for a large number of individual design ideas and allow creative wishes regarding shapes, colours, perforation and areas of application.

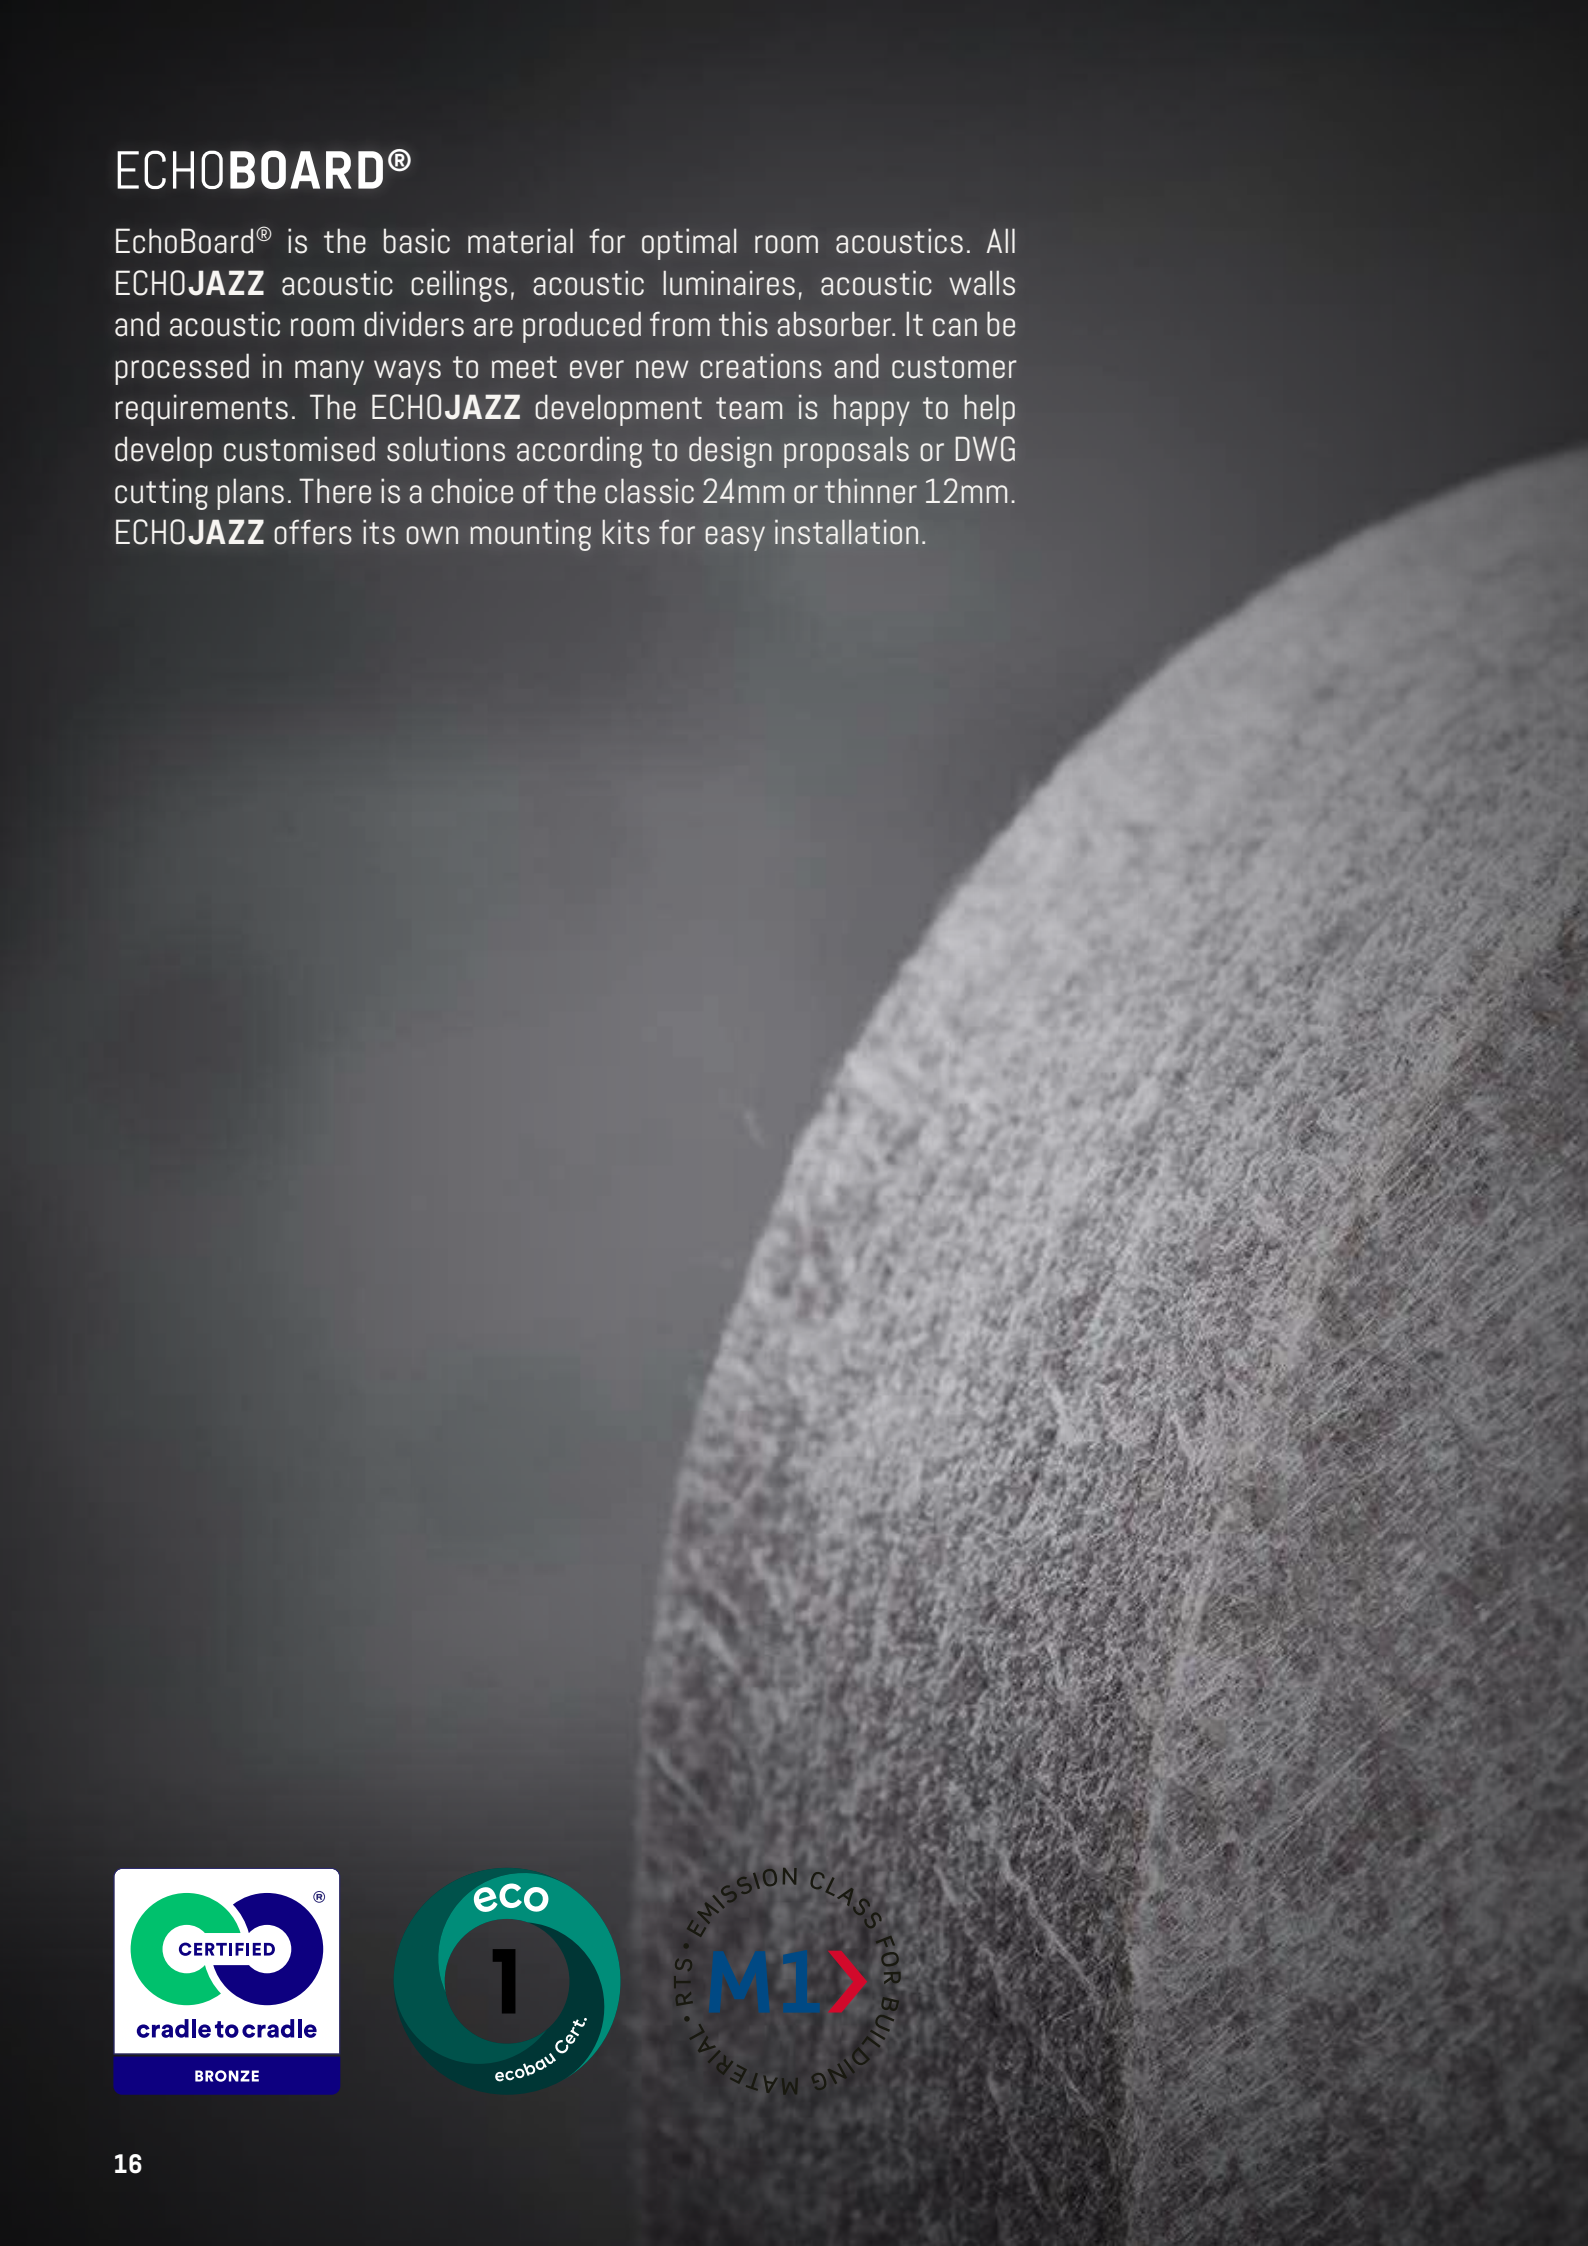


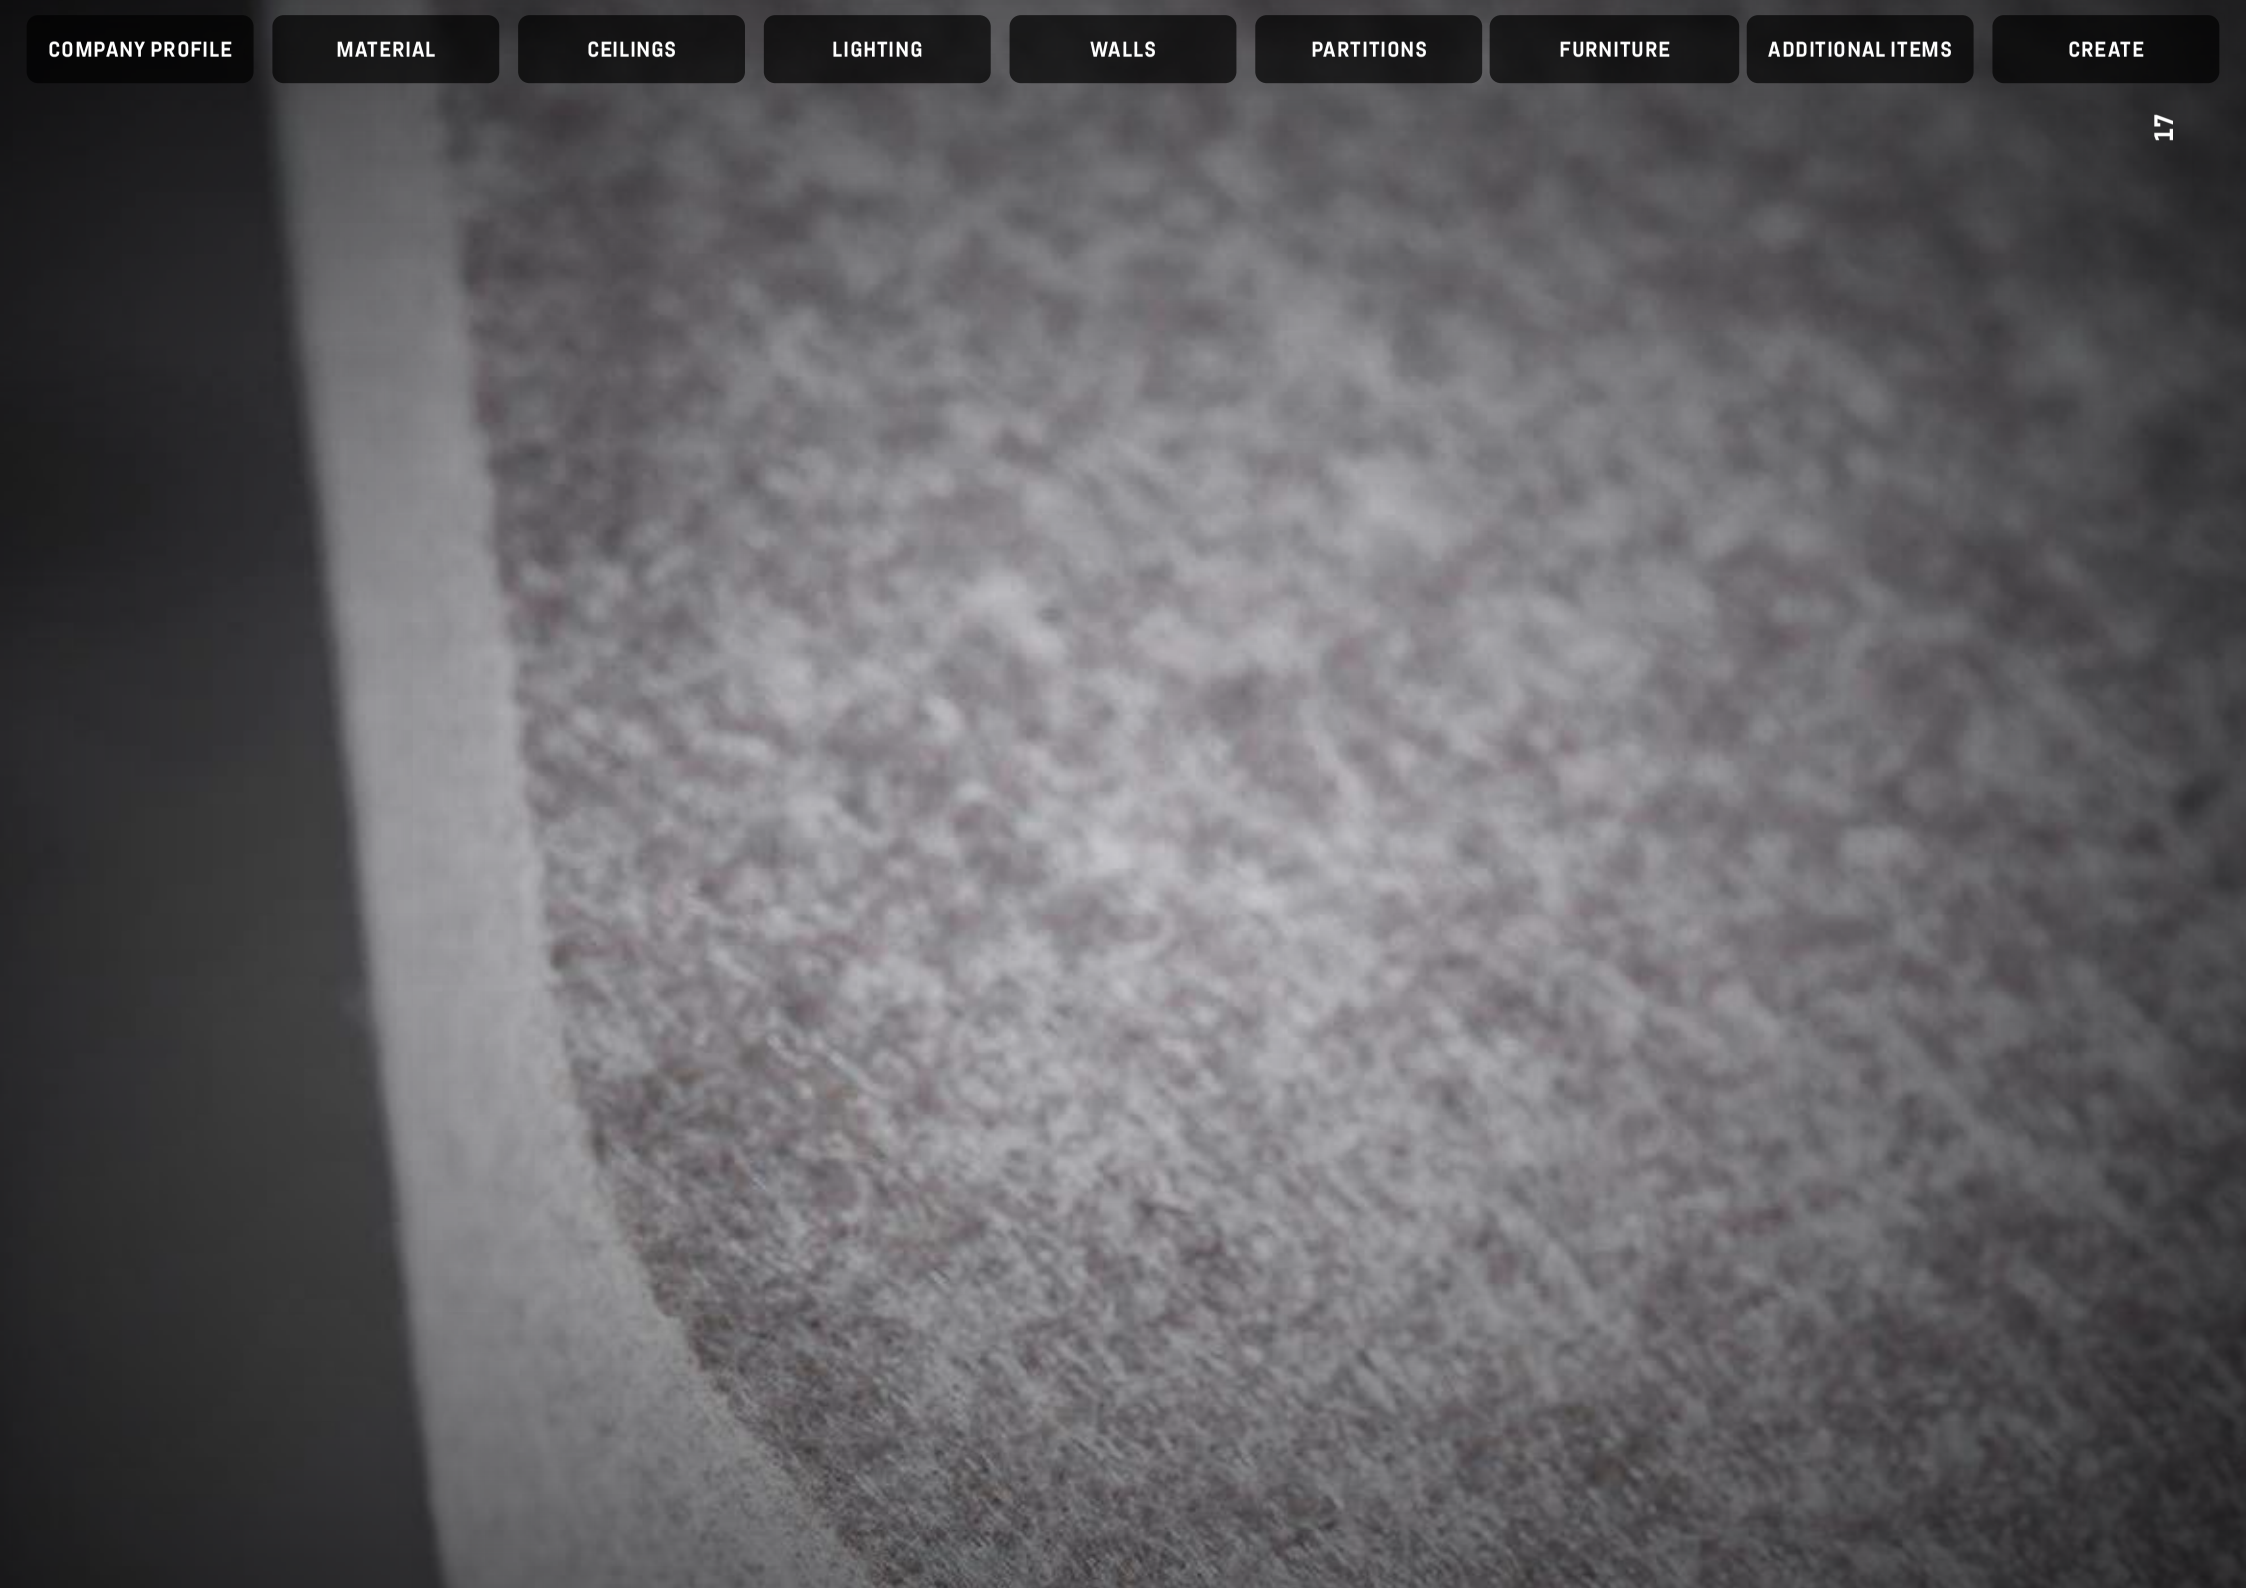
ECHO JAZZ

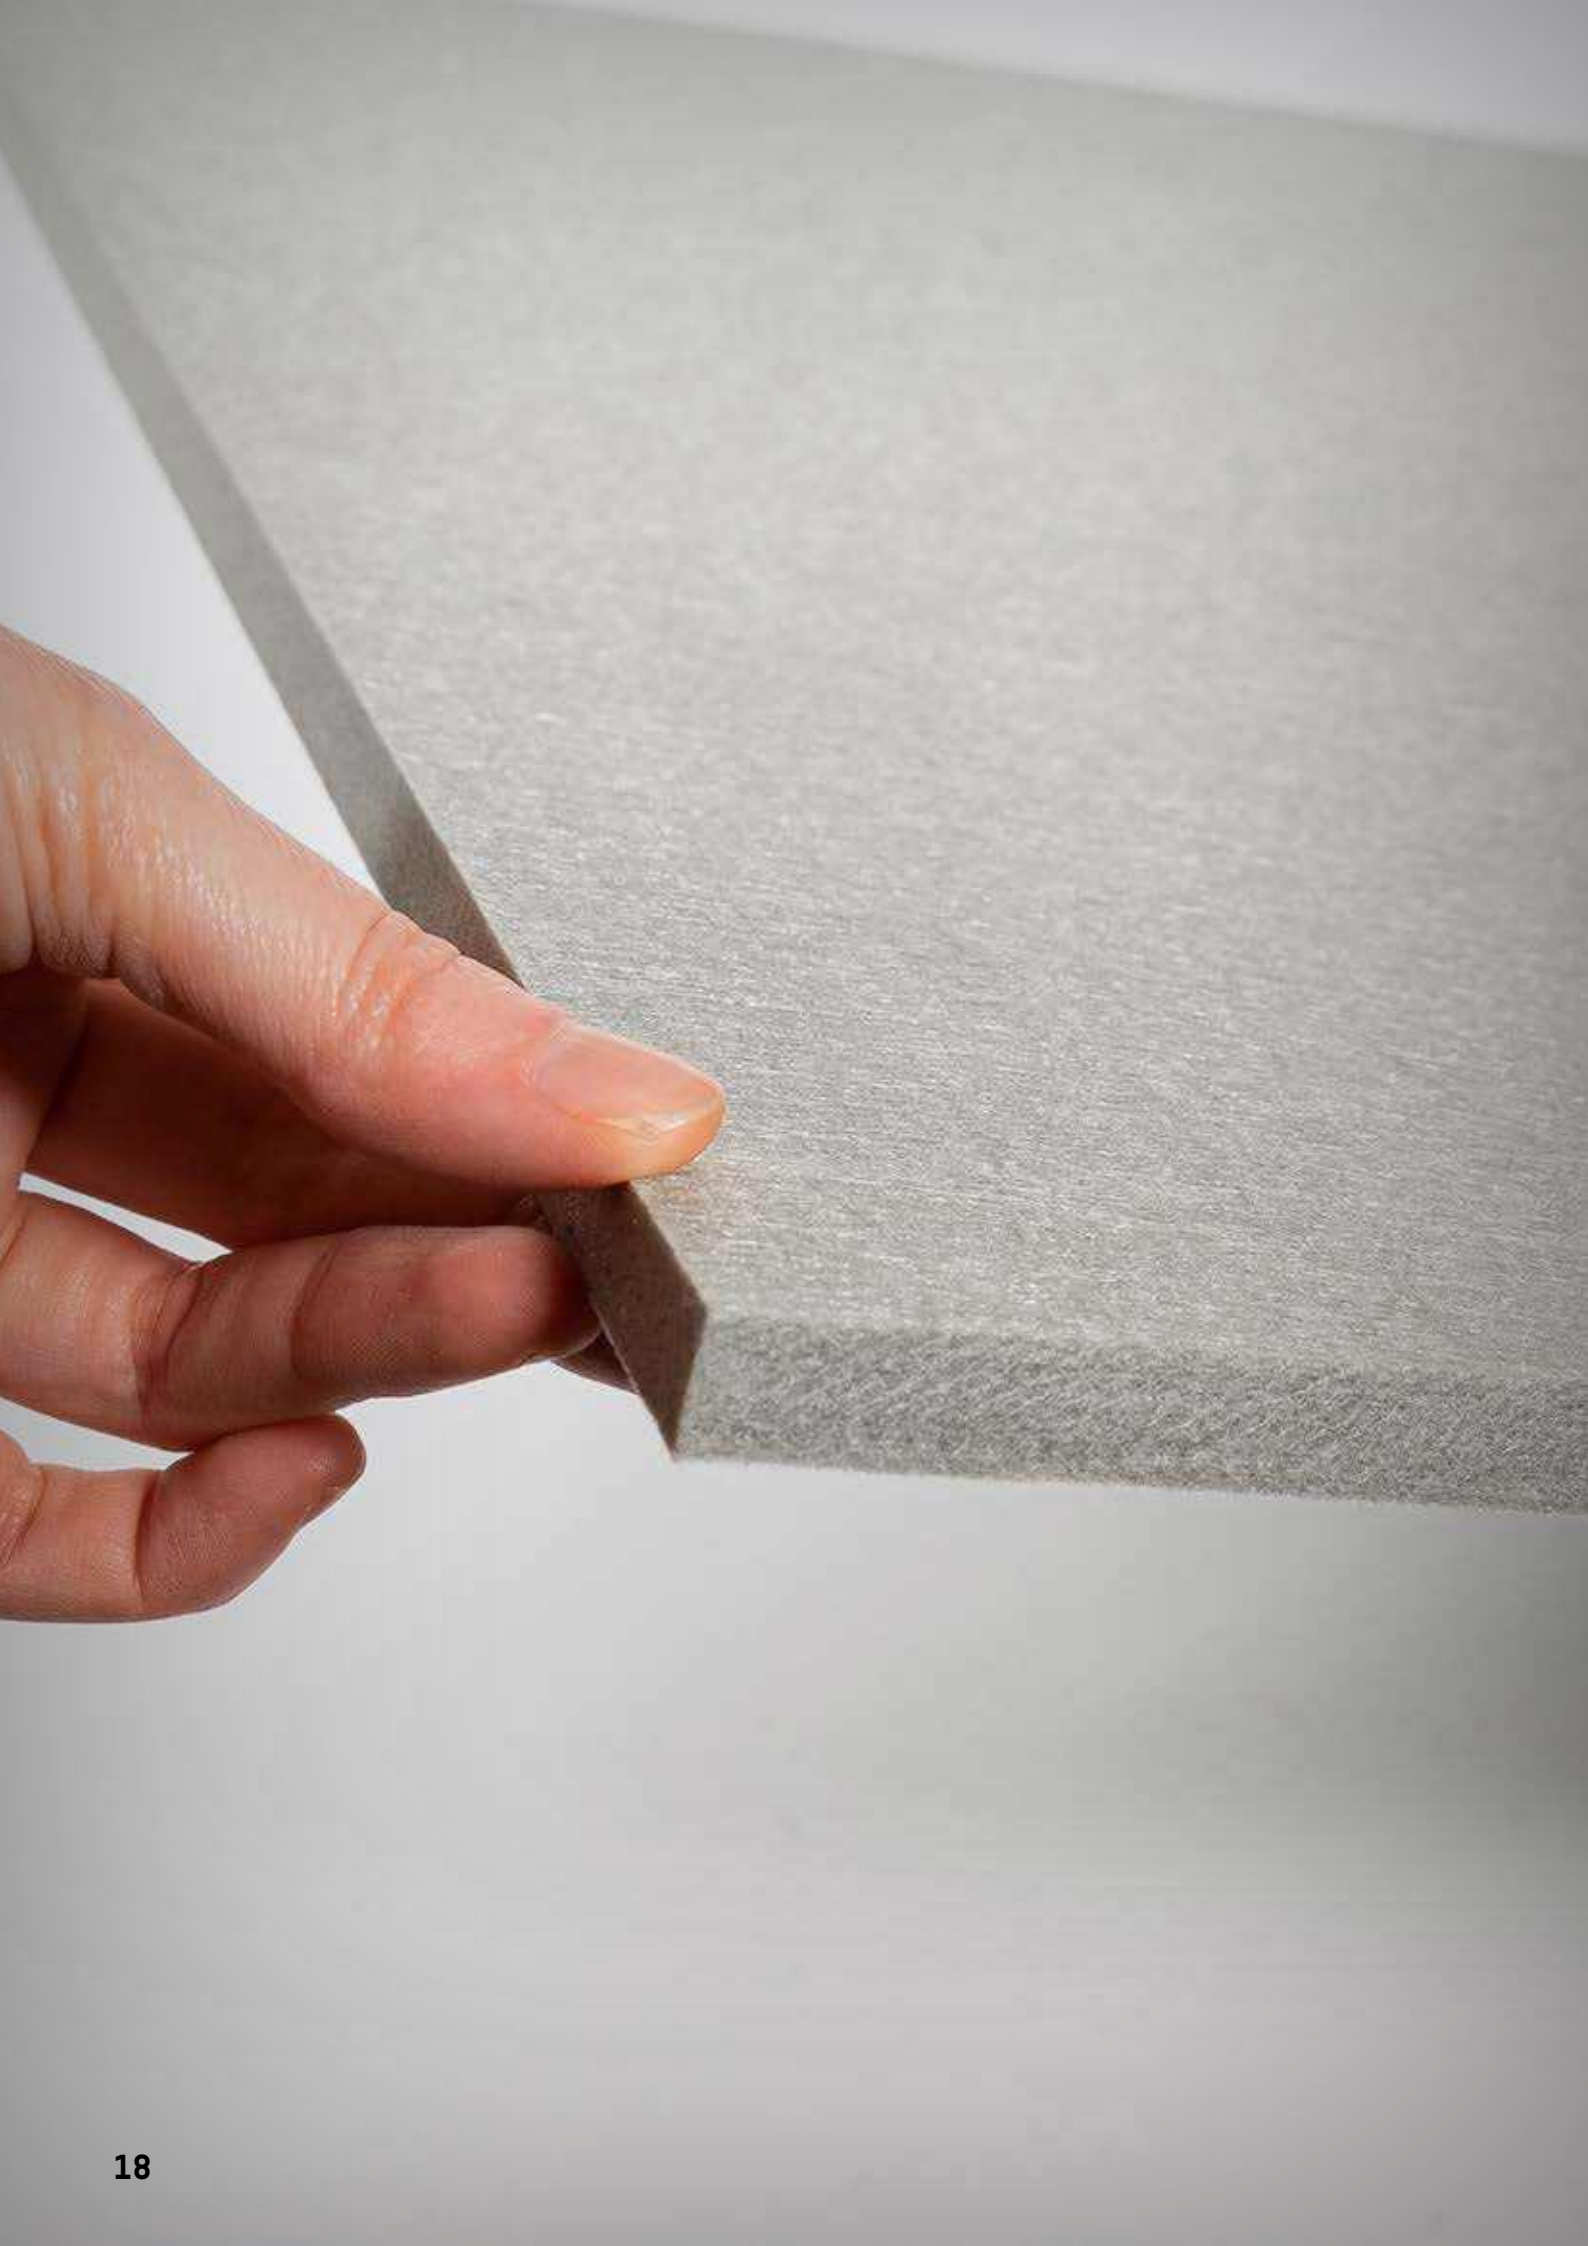
ACOUSTIC MATERIAL

ECHO**BOARD®**

EchoBoard® is the basic material for optimal room acoustics. All ECHO**JAZZ** acoustic ceilings, acoustic luminaires, acoustic walls and acoustic room dividers are produced from this absorber. It can be processed in many ways to meet ever new creations and customer requirements. The ECHO**JAZZ** development team is happy to help develop customised solutions according to design proposals or DWG cutting plans. There is a choice of the classic 24mm or thinner 12mm. ECHO**JAZZ** offers its own mounting kits for easy installation.







ECHO**BOARD® 12MM**

EchoBoard® 12mm is a high-quality sound absorber with an aw of up to 0.90 and a NRC of up to 0.85, which can be used for ceilings, walls, on tables or freely in space.
Absorption coefficient: aw 0.90, class A

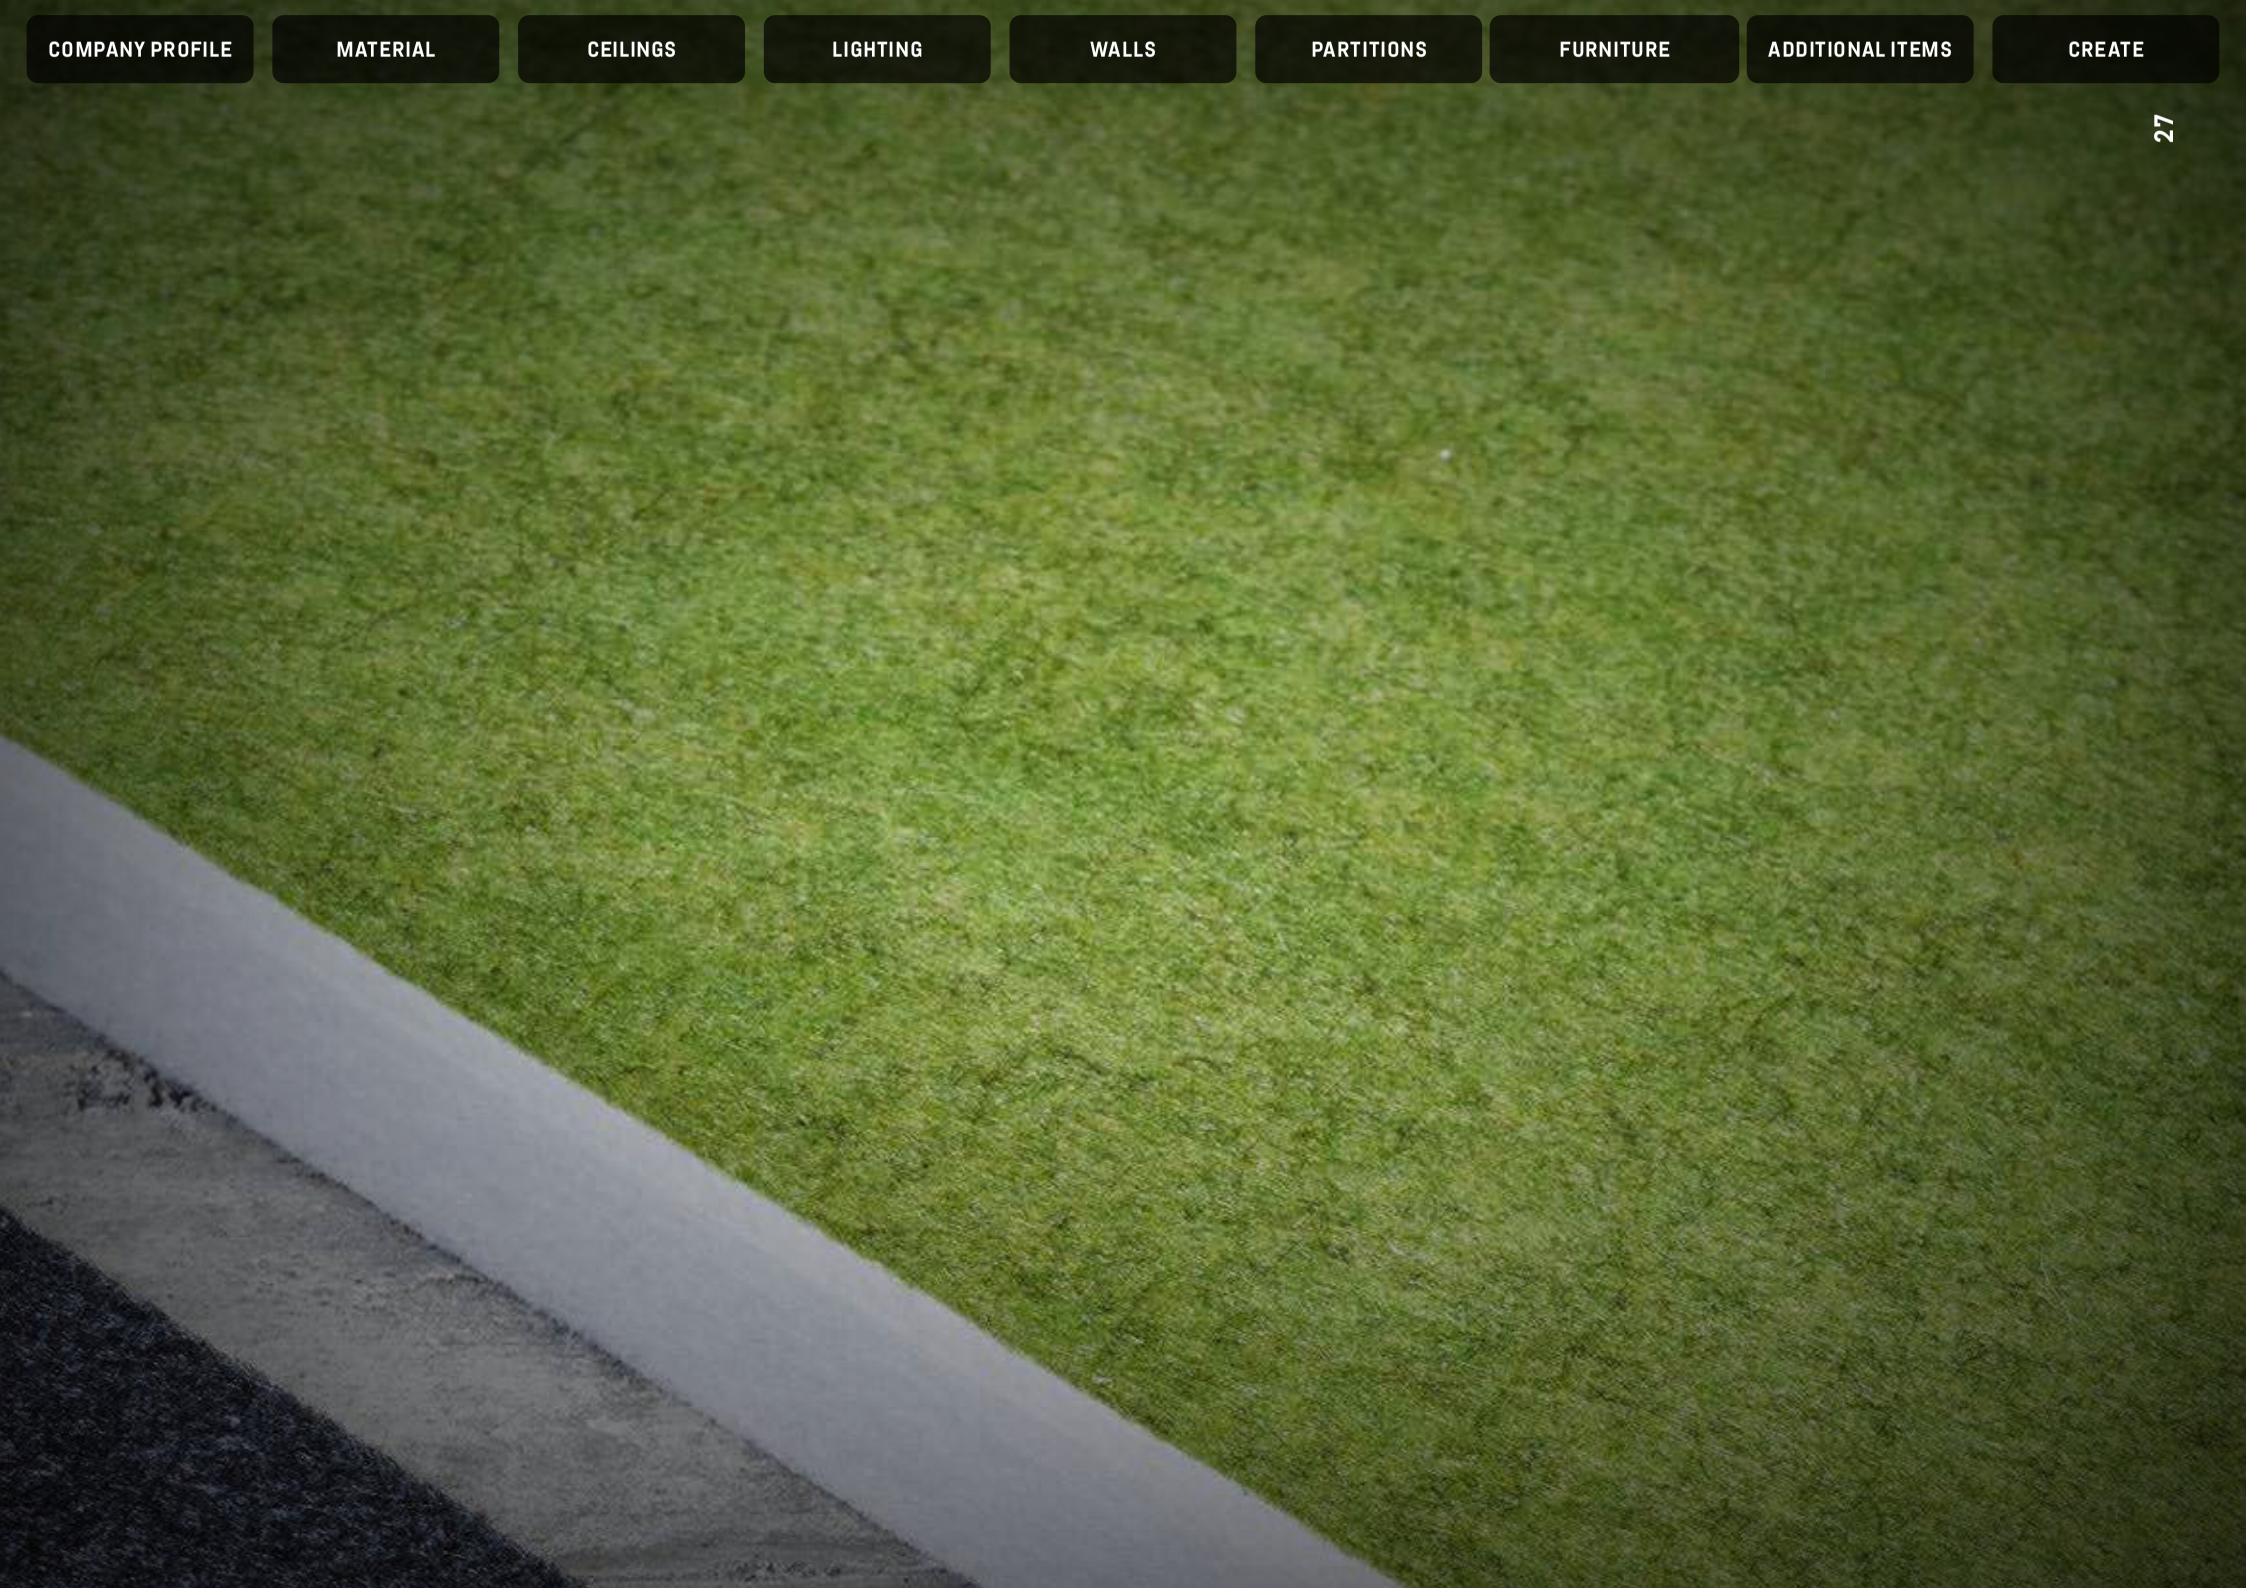
ECHO**COUSTIC®**

The special EchoCoustic® absorber is the ideal material for direct mounting on walls or ceilings without spacing or substructure. The 3-layer EchoCoustic® achieves an excellent absorption levels of aw 0.80 and NRW 0.85 with a thickness of only 25mm. EchoCoustic® can be easily applied with spray adhesive, the white core material remains intentionally visible or concealed by a profile frame. EchoCoustic® is available in 34 colours, as an additional design element a two-colour effect can be created by spacing the panels.



ECHO**COUSTIC® 25MM**

EchoCoustic® 25mm is a high quality sound absorber with an aw of up to 0.90 and a NRC of up to 0.90, which can be mounted on walls and ceilings without spacing.
Absorption coefficient: aw 0.90, class A

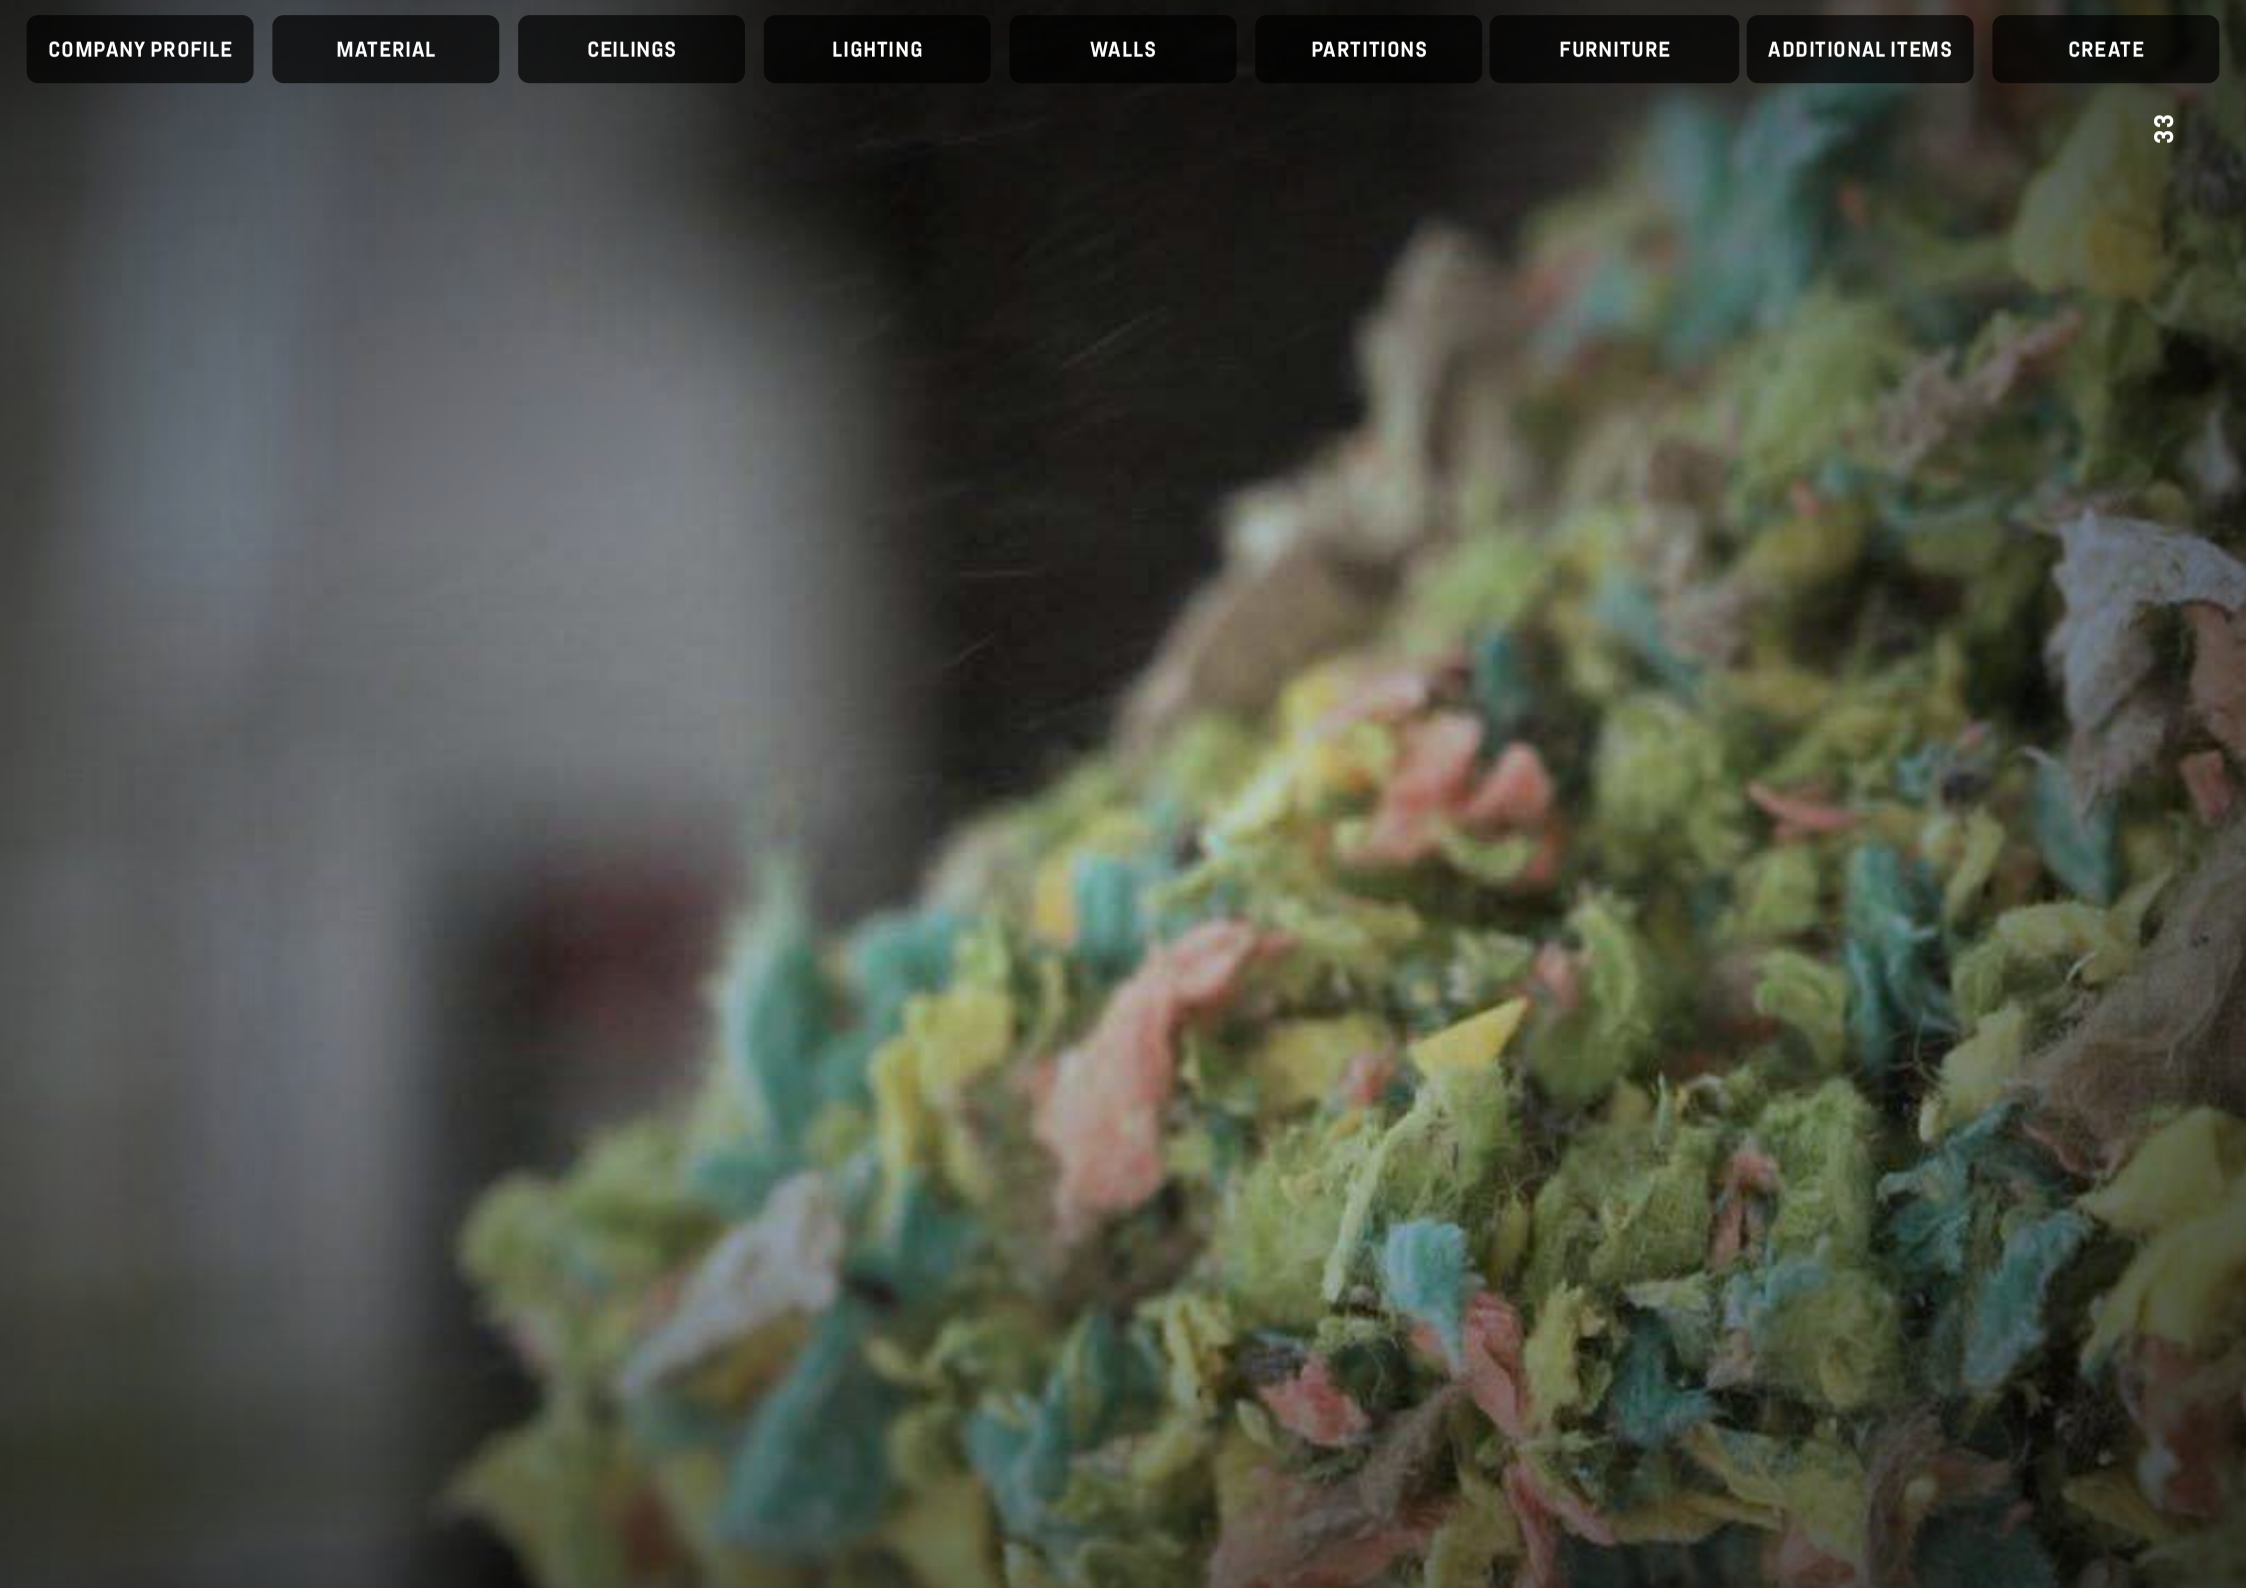
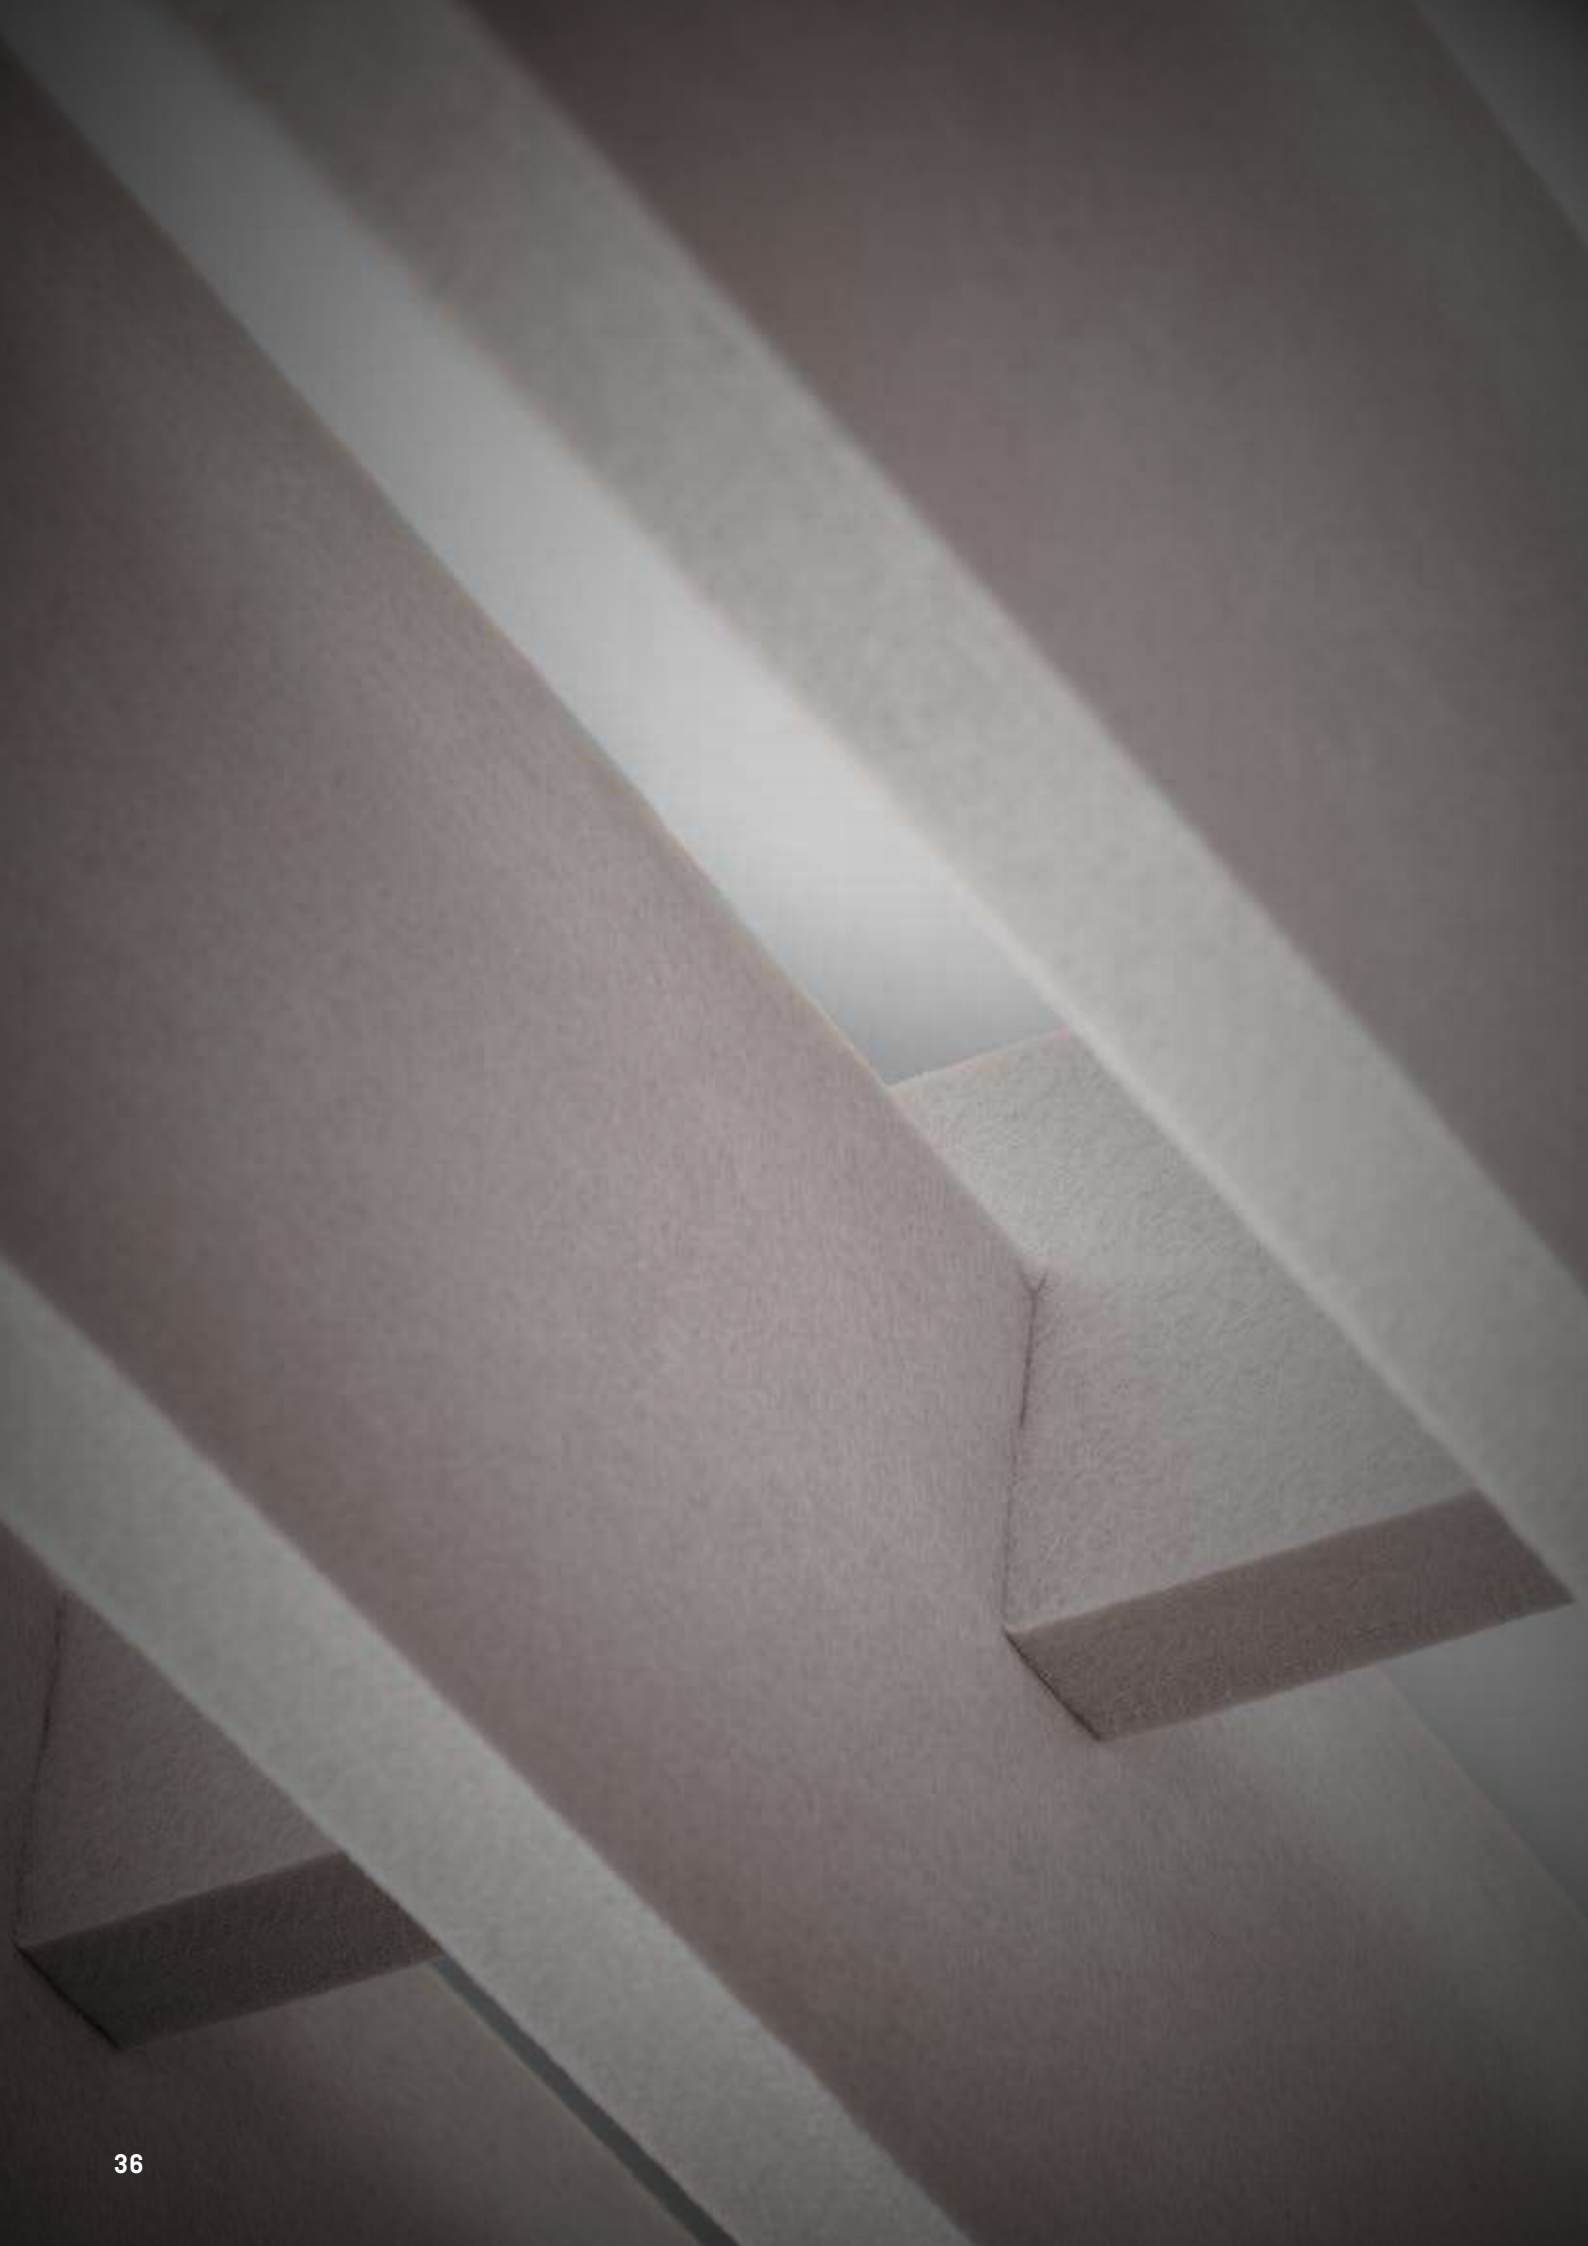
ECHO**FLAKES®**

With the Zero Waste goal, ECHO**JAZZ** products are taken back and shredded together with offcuts into EchoFlakes®. Filled with these flakes, the EchoTower® increases the acoustic well-being and closes the material cycle of the ECHO**JAZZ** products.



Customised high-performance sound absorbers for a noticeable improvement in well-being and room quality. ECHO**JAZZ** products are made from recycled PET bottles. 100% Swiss design, 100% zero waste.

ACOUSTIC PRODUCTS



ECHO JAZZ

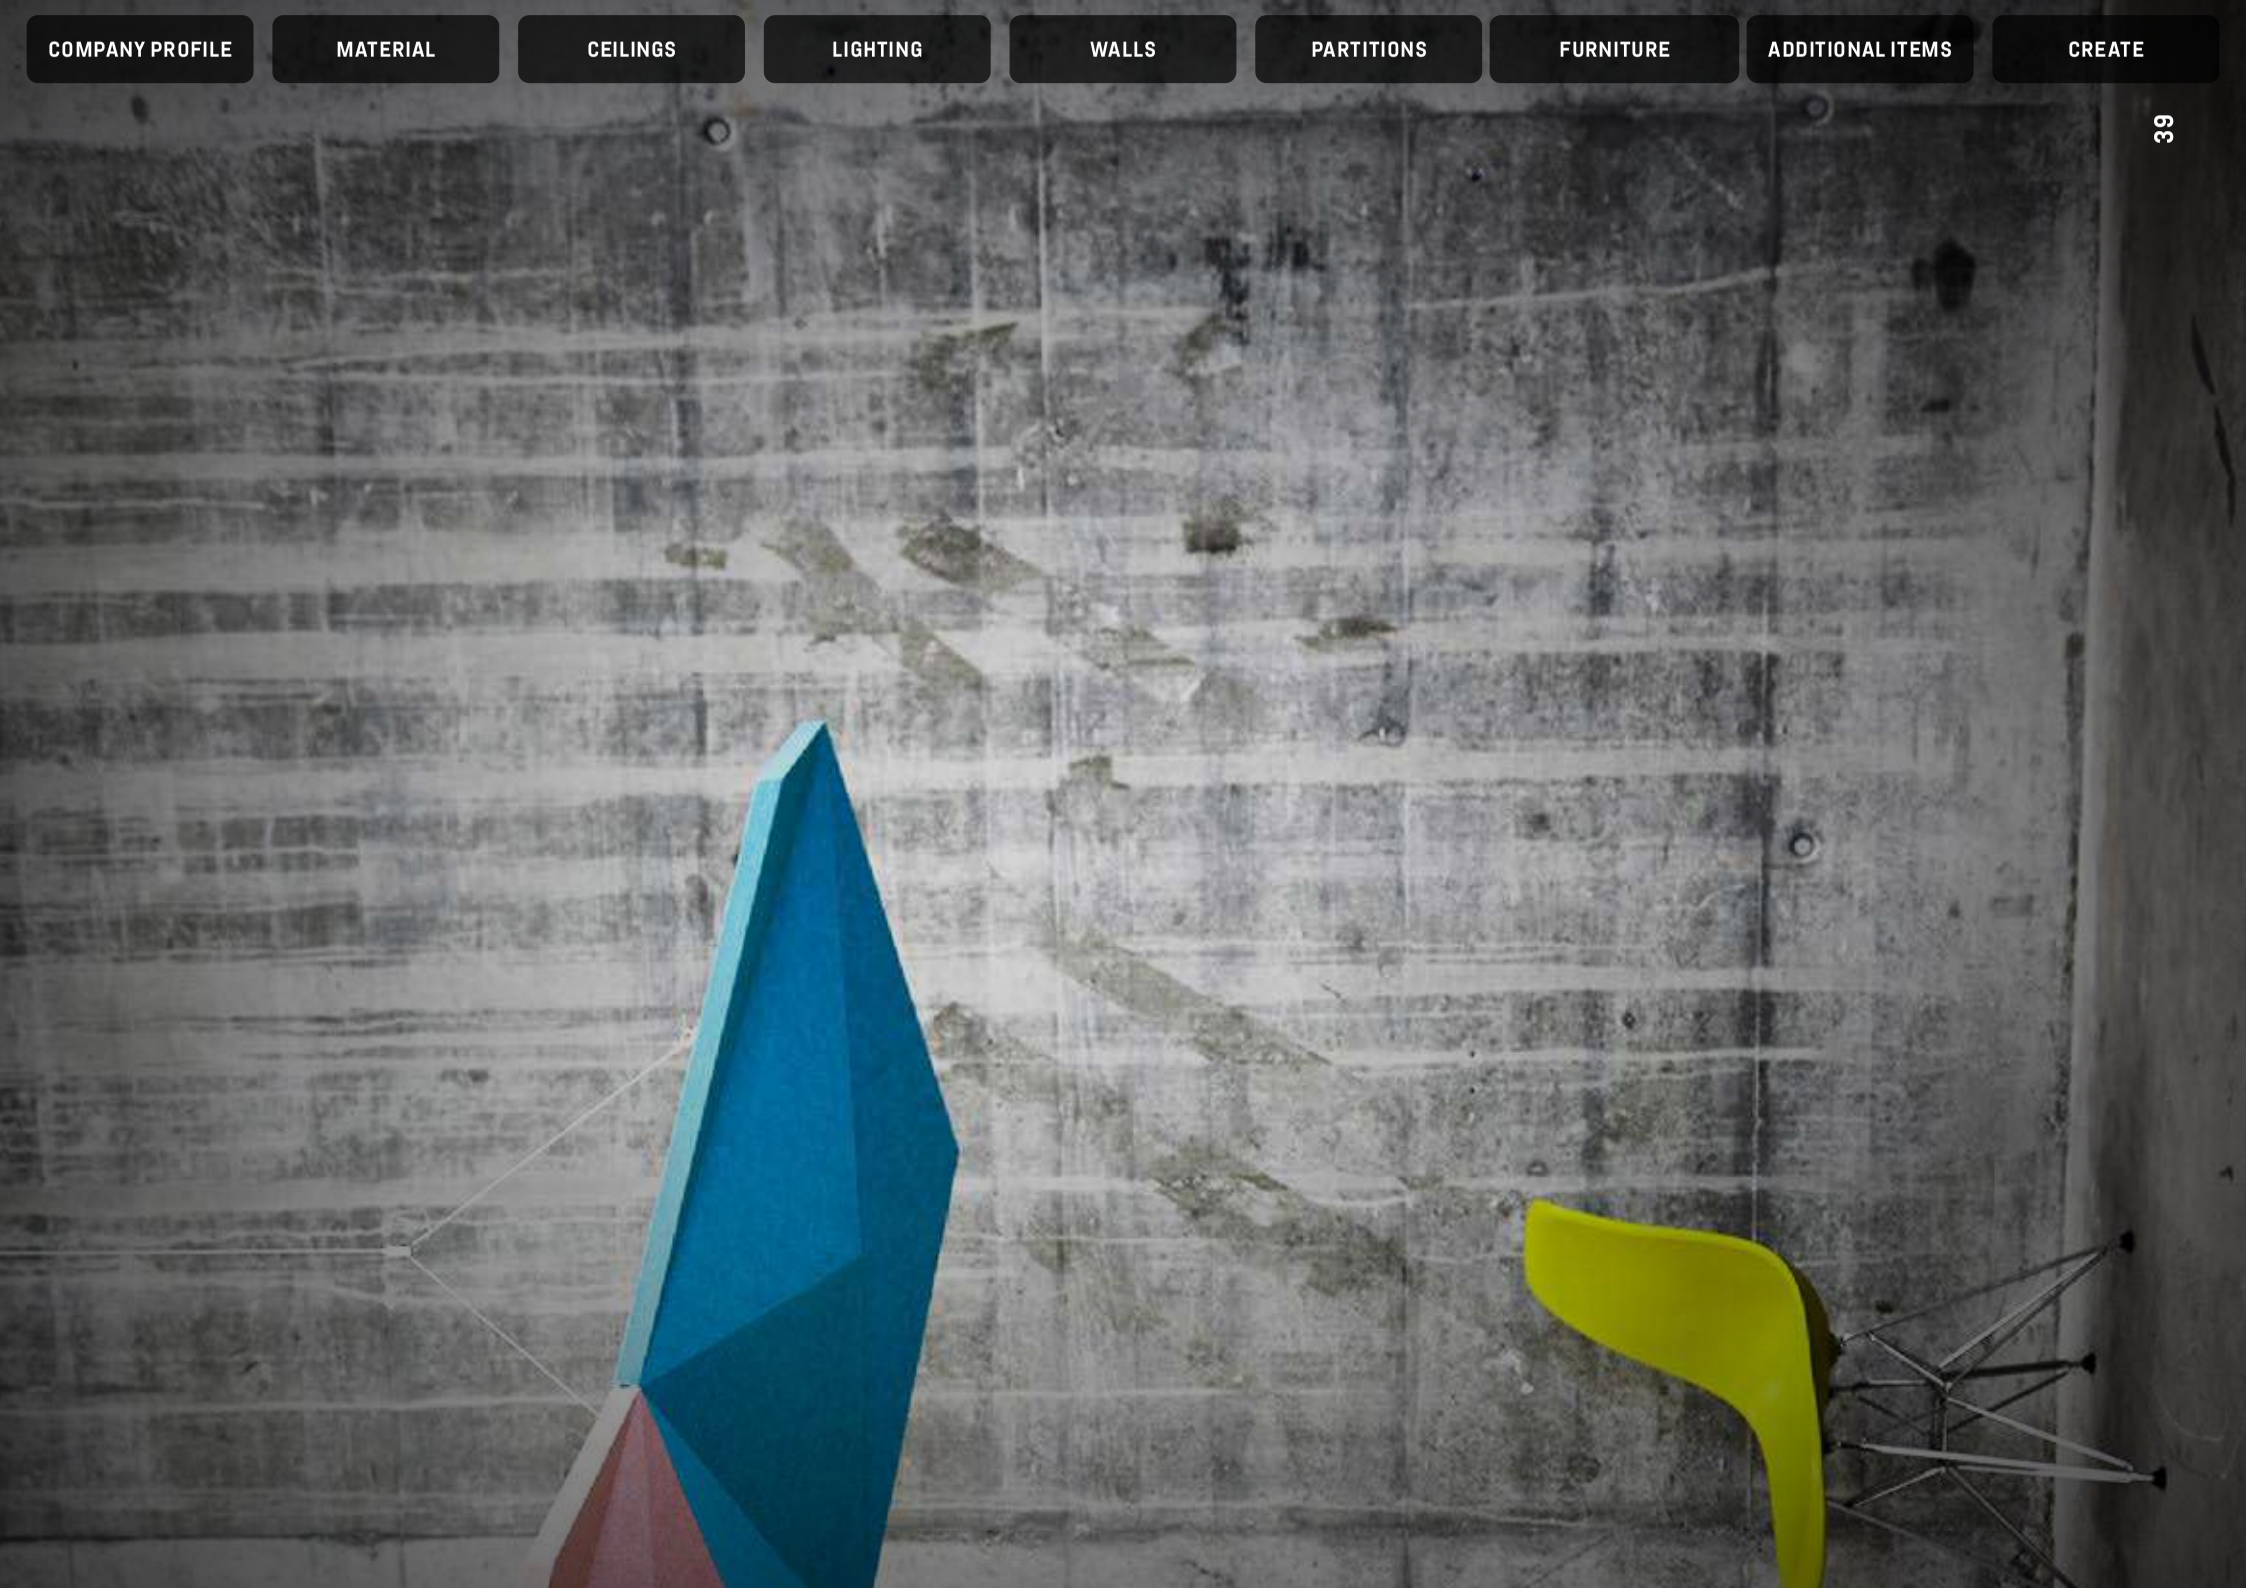
ACOUSTIC-CEILINGS

Ceilings of rooms often offer the most space for optimising room acoustics. ECHO**JAZZ** acoustic ceilings allow sound absorption for the highest demands, are adapted to the millimetre and can be optimally integrated into any room architecture.

ECHO**ORBIT®** / ECHO**LED® ORBIT**

The EchoOrbit® ceiling sail is the perfect solution to acoustical calm noisy rooms. Three-dimensional diamond facets dampen the noise level and act as a diffuser for sound waves. Additional elements can be added seamlessly thanks to the hexagonal shape, allowing for stunning ceiling designs with spectacular arrangements and colour combinations. Installation is efficient thanks to only one height-adjustable suspension per element and supplied fasteners.

Say goodbye to unwanted noise and immerse yourself in a heavenly, futuristic silence with EchoOrbit®.



ECHO**ORBIT® 24MM /** ECHO**LED® 24MM ORBIT**

Acoustic absorber for ceilings with or without light with textile surface made from 100% PET. EchoOrbit® and EchoLED® ORBIT is suspended with safety hooks.
Please specify suspension type when ordering.

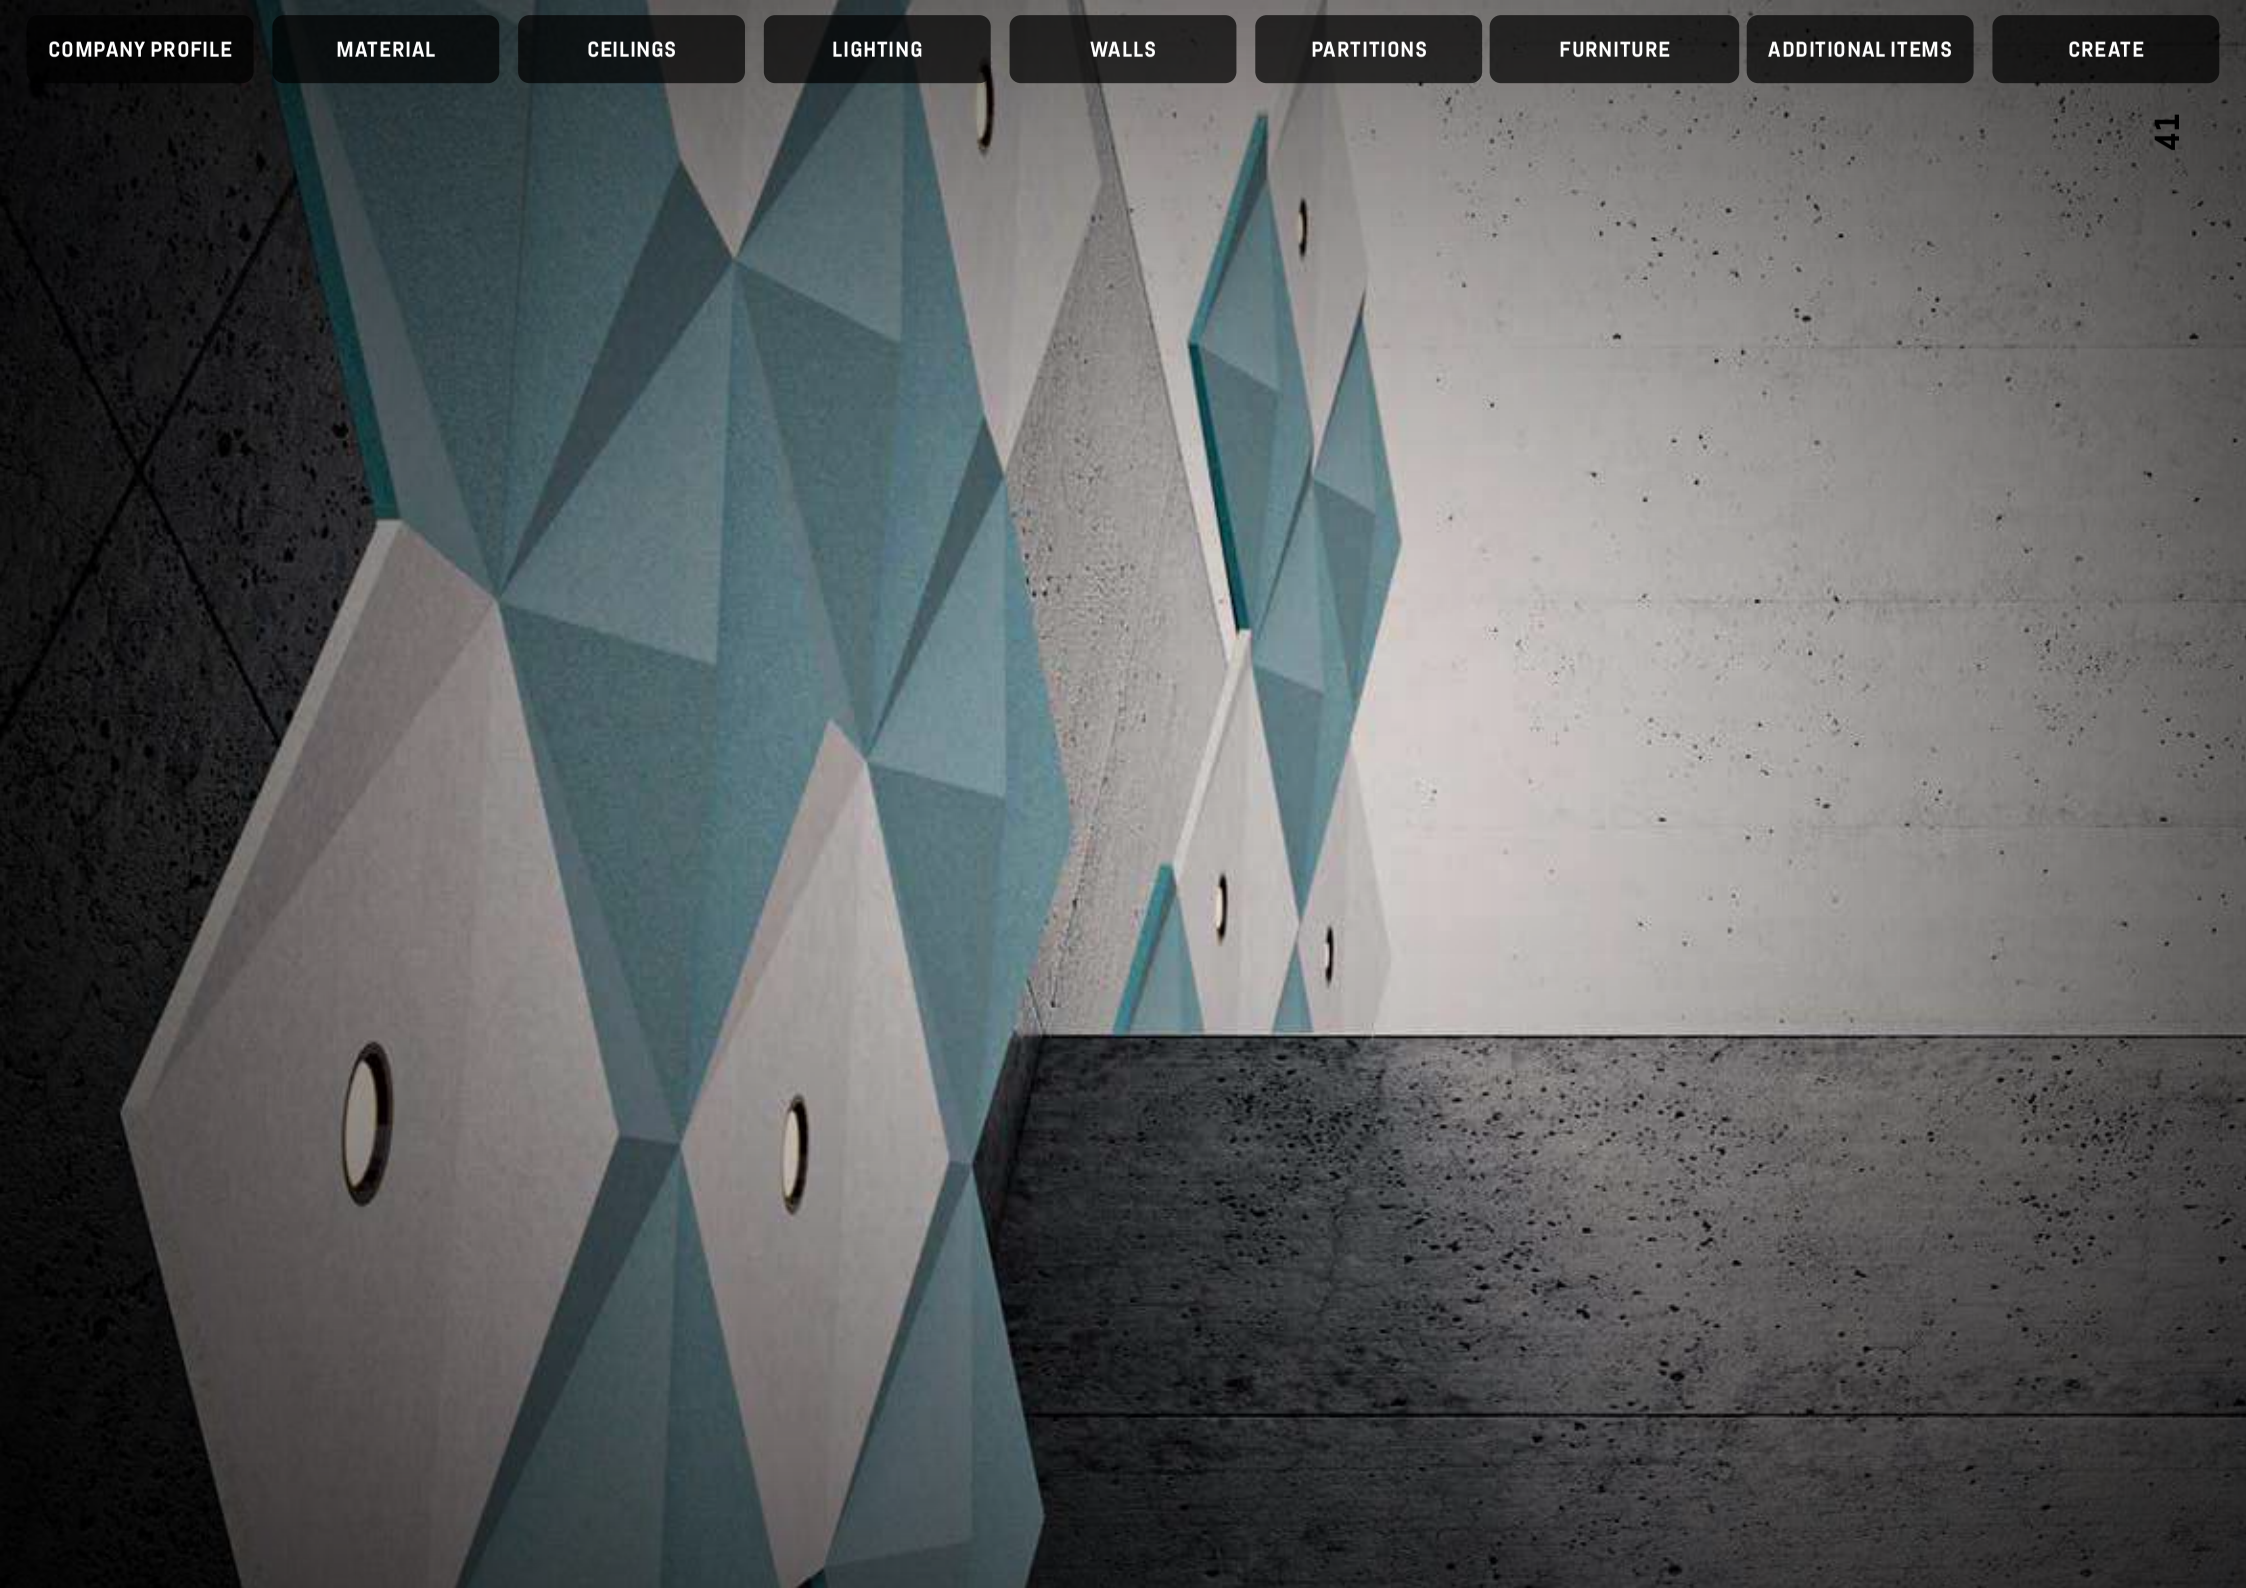
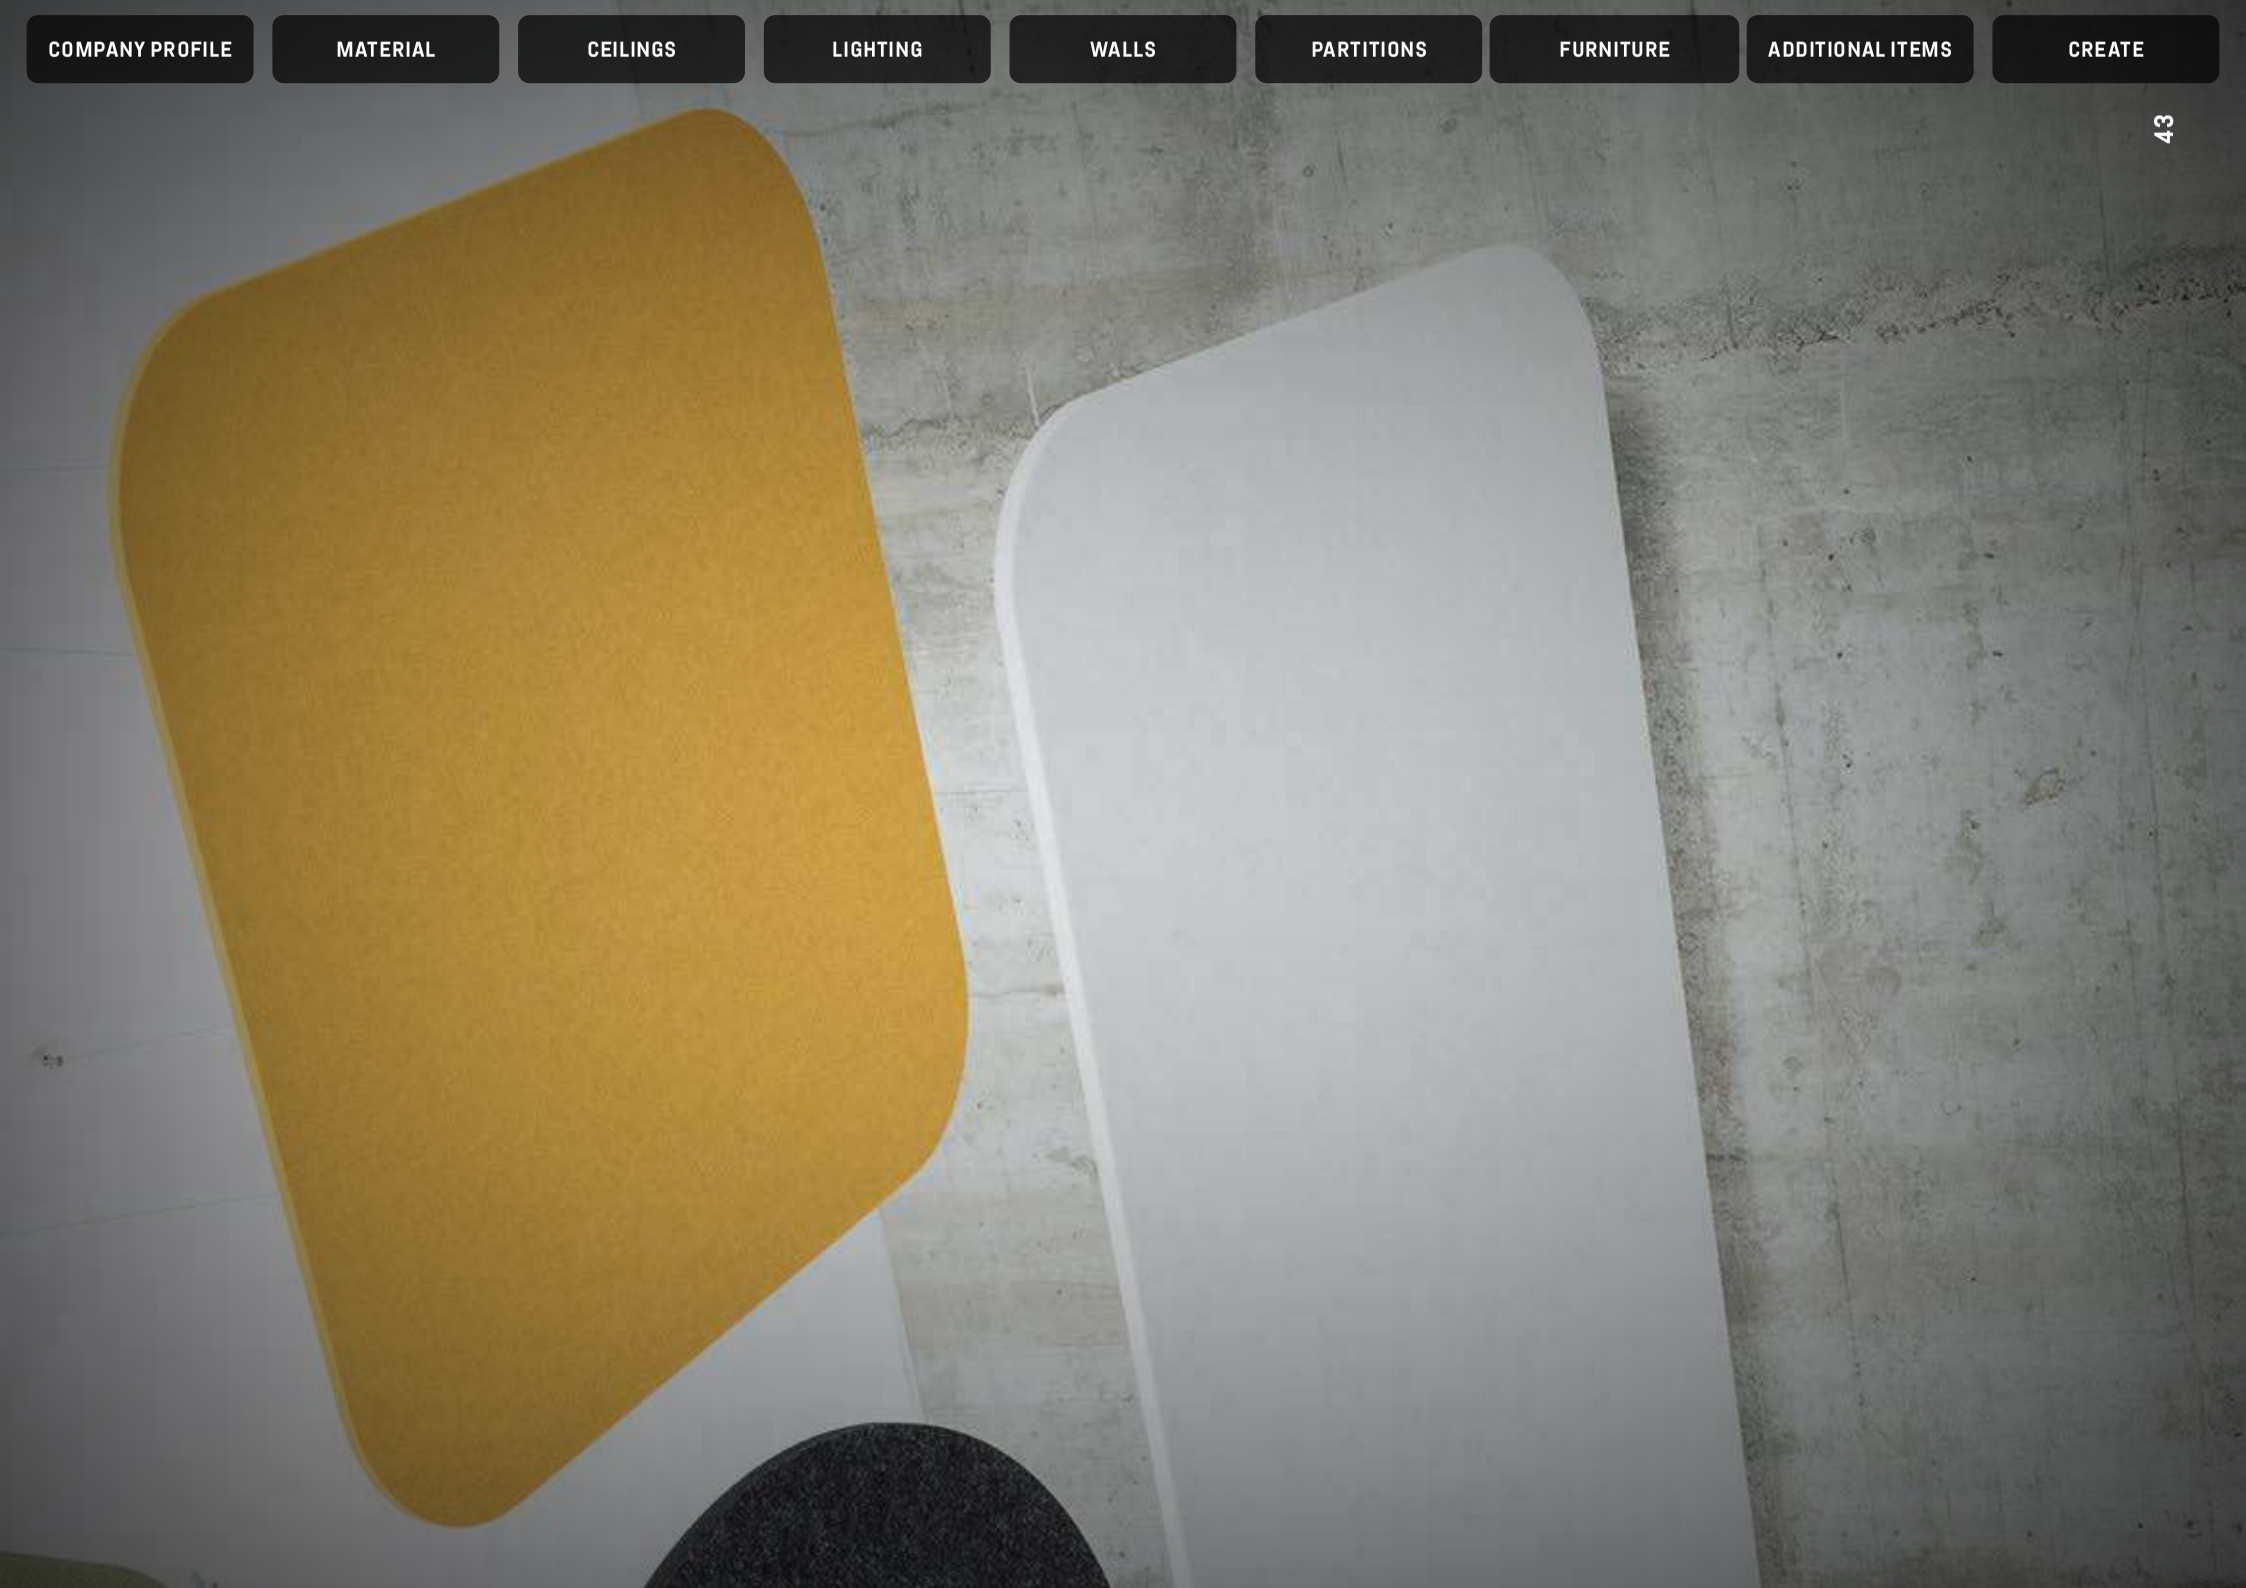
SAFETY HOOK



ECHO**SAIL®**

Acoustic sails are the key to defining room design and improving acoustics over large areas without affecting the layout of the room. The lightweight and maintenance-free elements can be cut to any shape and angle. The EchoSail® is screwed directly and suspended horizontally up to a length of 1000 mm; larger panels are suspended with frames and safety hooks.



ECHO**SAIL® 12MM**

Acoustic sails in various shapes and surface designs incl. suspension system up to 1500mm. The EchoSail® is suspended directly with screws up to a length of 1000mm. For all shapes over 1000mm long, the EchoSail® is suspended with a frame and safety hooks. The frame is white as standard and can be supplied in other colours to order.
Absorption coefficient: aw 0.90, class A
Edge finish: 90°, corner radius 200mm

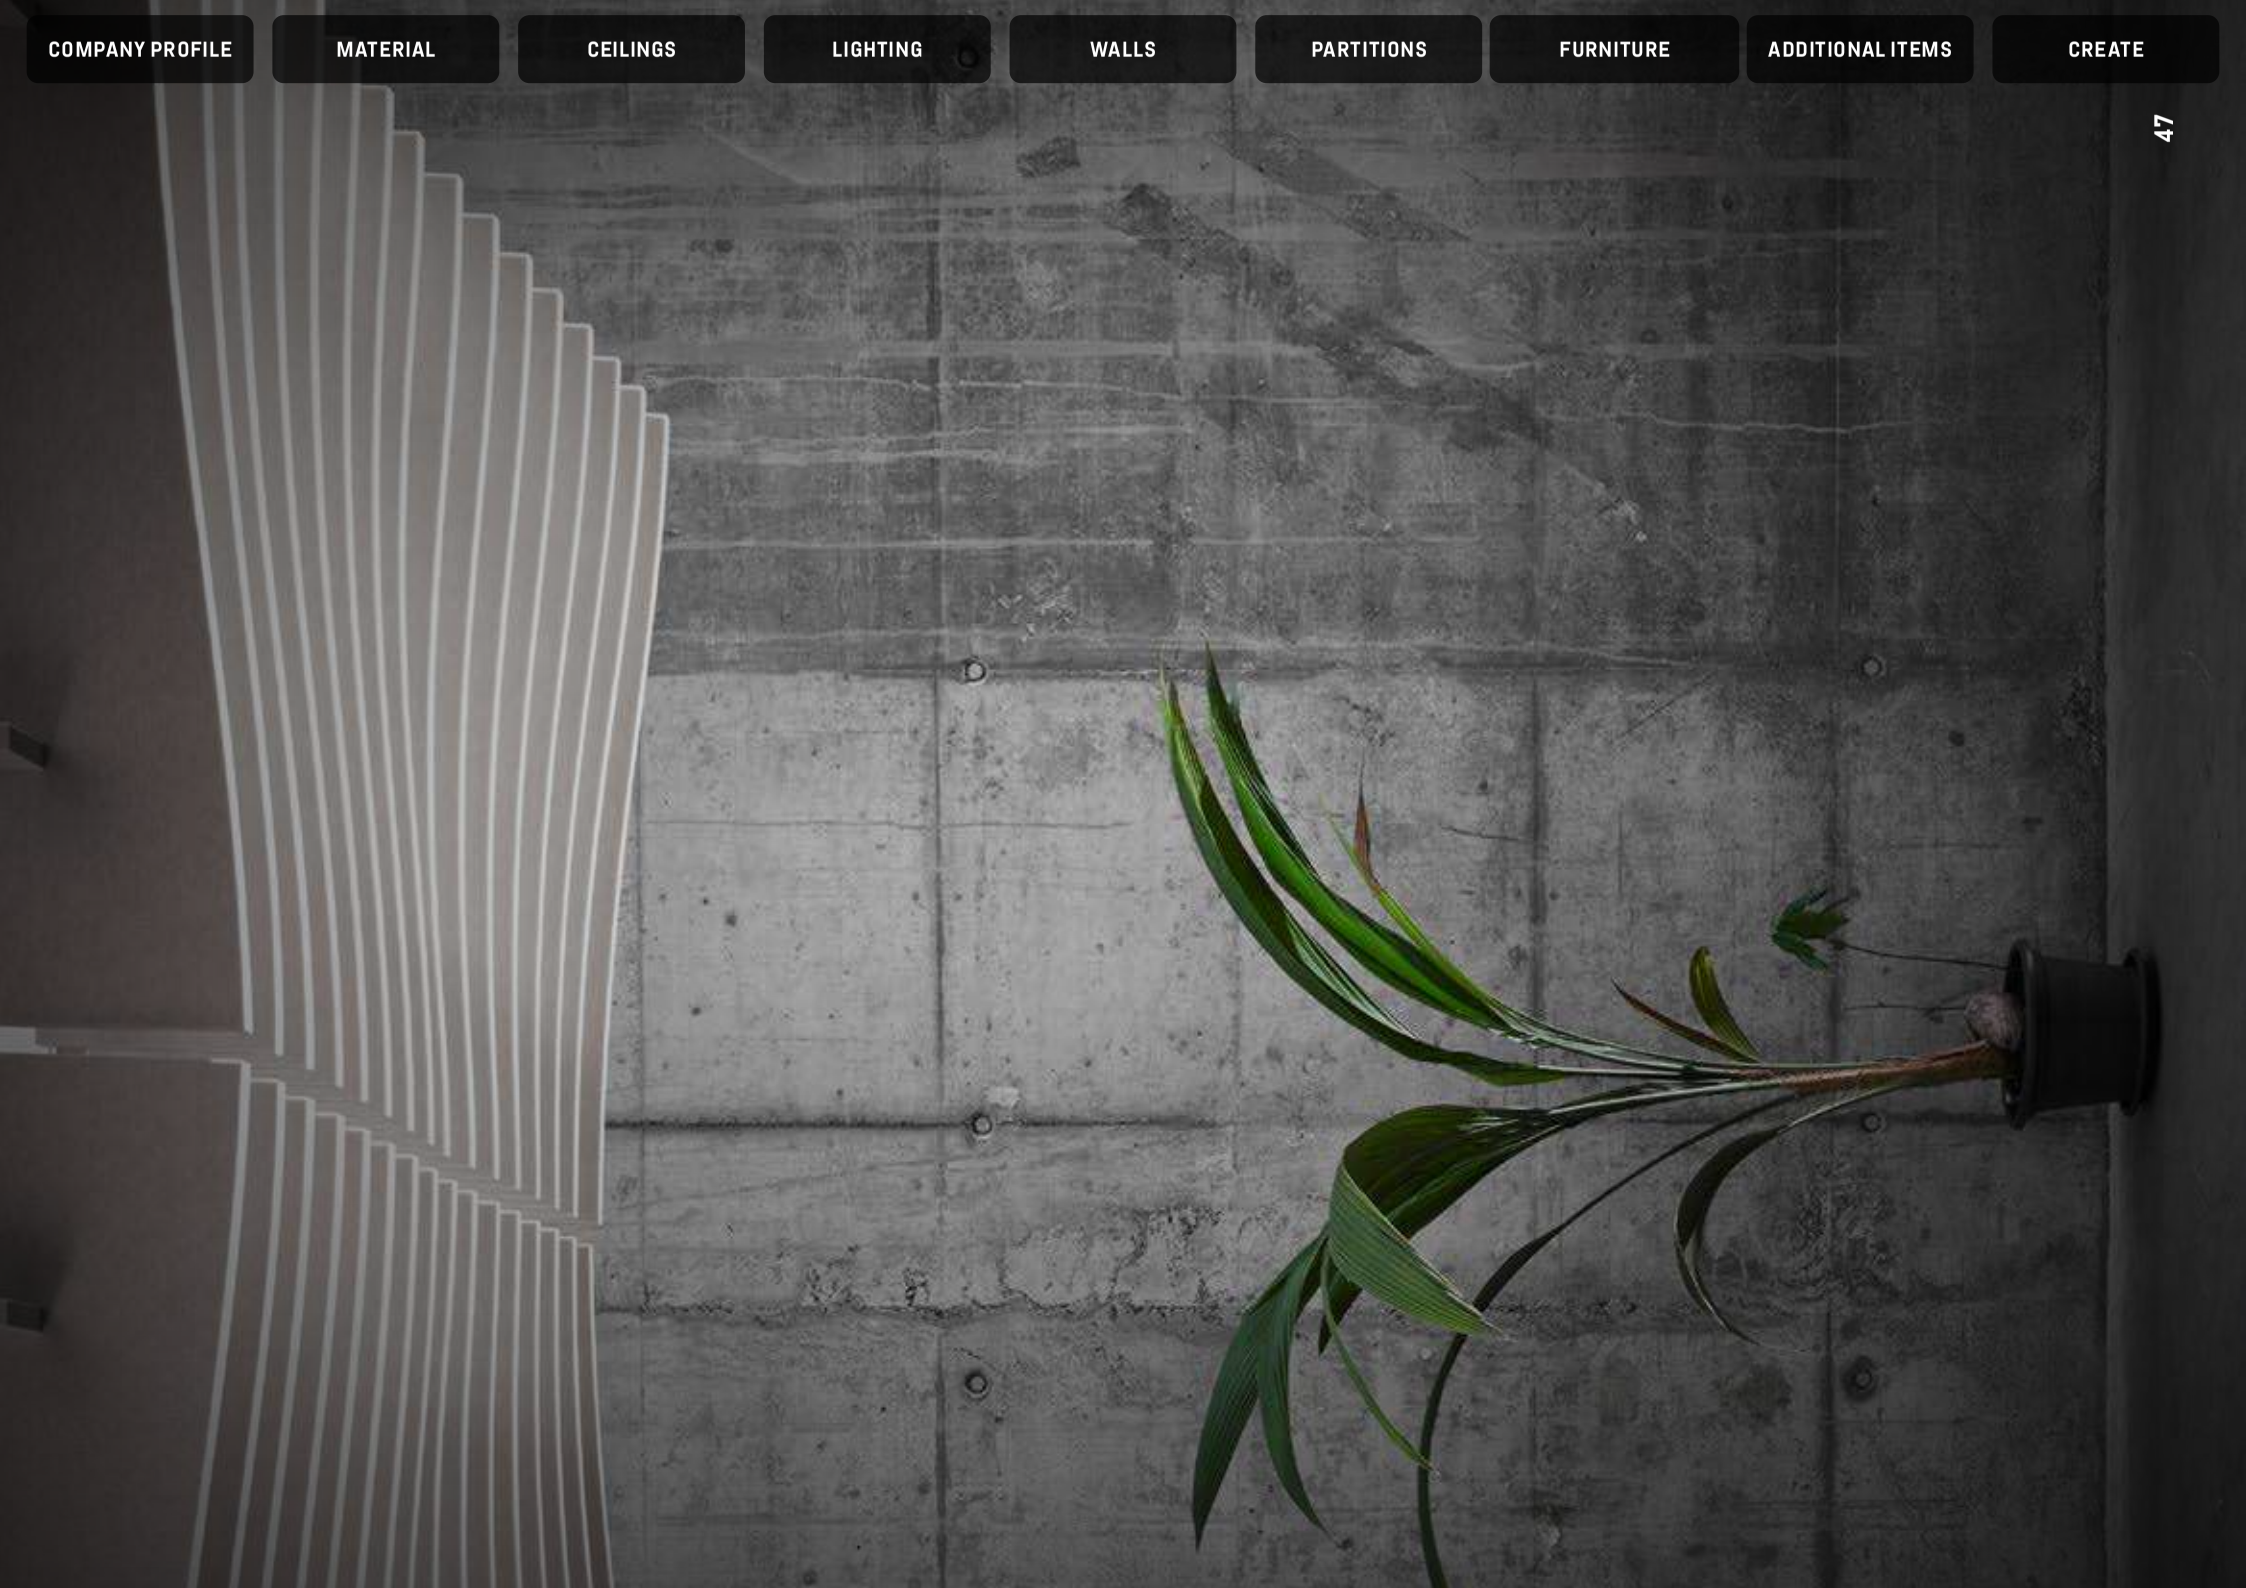
ECHO**BAFFLE®**

EchoBaffles® suspended vertically from the ceiling combine efficient acoustic well-being and striking design in open ceilings.It is visibly different from conventional ceilings. The open ceiling concepts also ensure the integration of the building structures in terms of climate technology while optimising the room acoustics at the same time. The inlays are plugged together on site and hooked into the grid ceiling without tools. The very light grid inlays can be easily removed, allowing easy access for maintenance of the building services.

The high acoustic performance of EchoBaffles® effectively dampens sound and "audibly" upgrades rooms with high noise levels. As a customised solution with individual design, the acoustic ceiling becomes a special eye-catcher and lends the room a lot of dynamism.

EchoBaffle® allows ceilings ranging from understated simplicity to dramatic sculptural shapes. The creations of the ECHO**JAZZ** designers are only a starting point, we are happy to work out individual designs on customer request. Complete reusability after use guaranteed – zero waste!



ECHO**BAFFLE® 12MM**

Acoustic baffles consisting of baffle blades incl. substructure and suspension.
Absorption coefficient: aw 0.45
When ordering custom designed EchoBaffle® ceilings additional specifications are needed. (Page 199)
You can always find the latest designs on our website: www.echo**jazz**.com/echobaffle.
EchoBoard® 12mm colours are available depending on stock.
Individual EchoBaffle® solutions available on request!

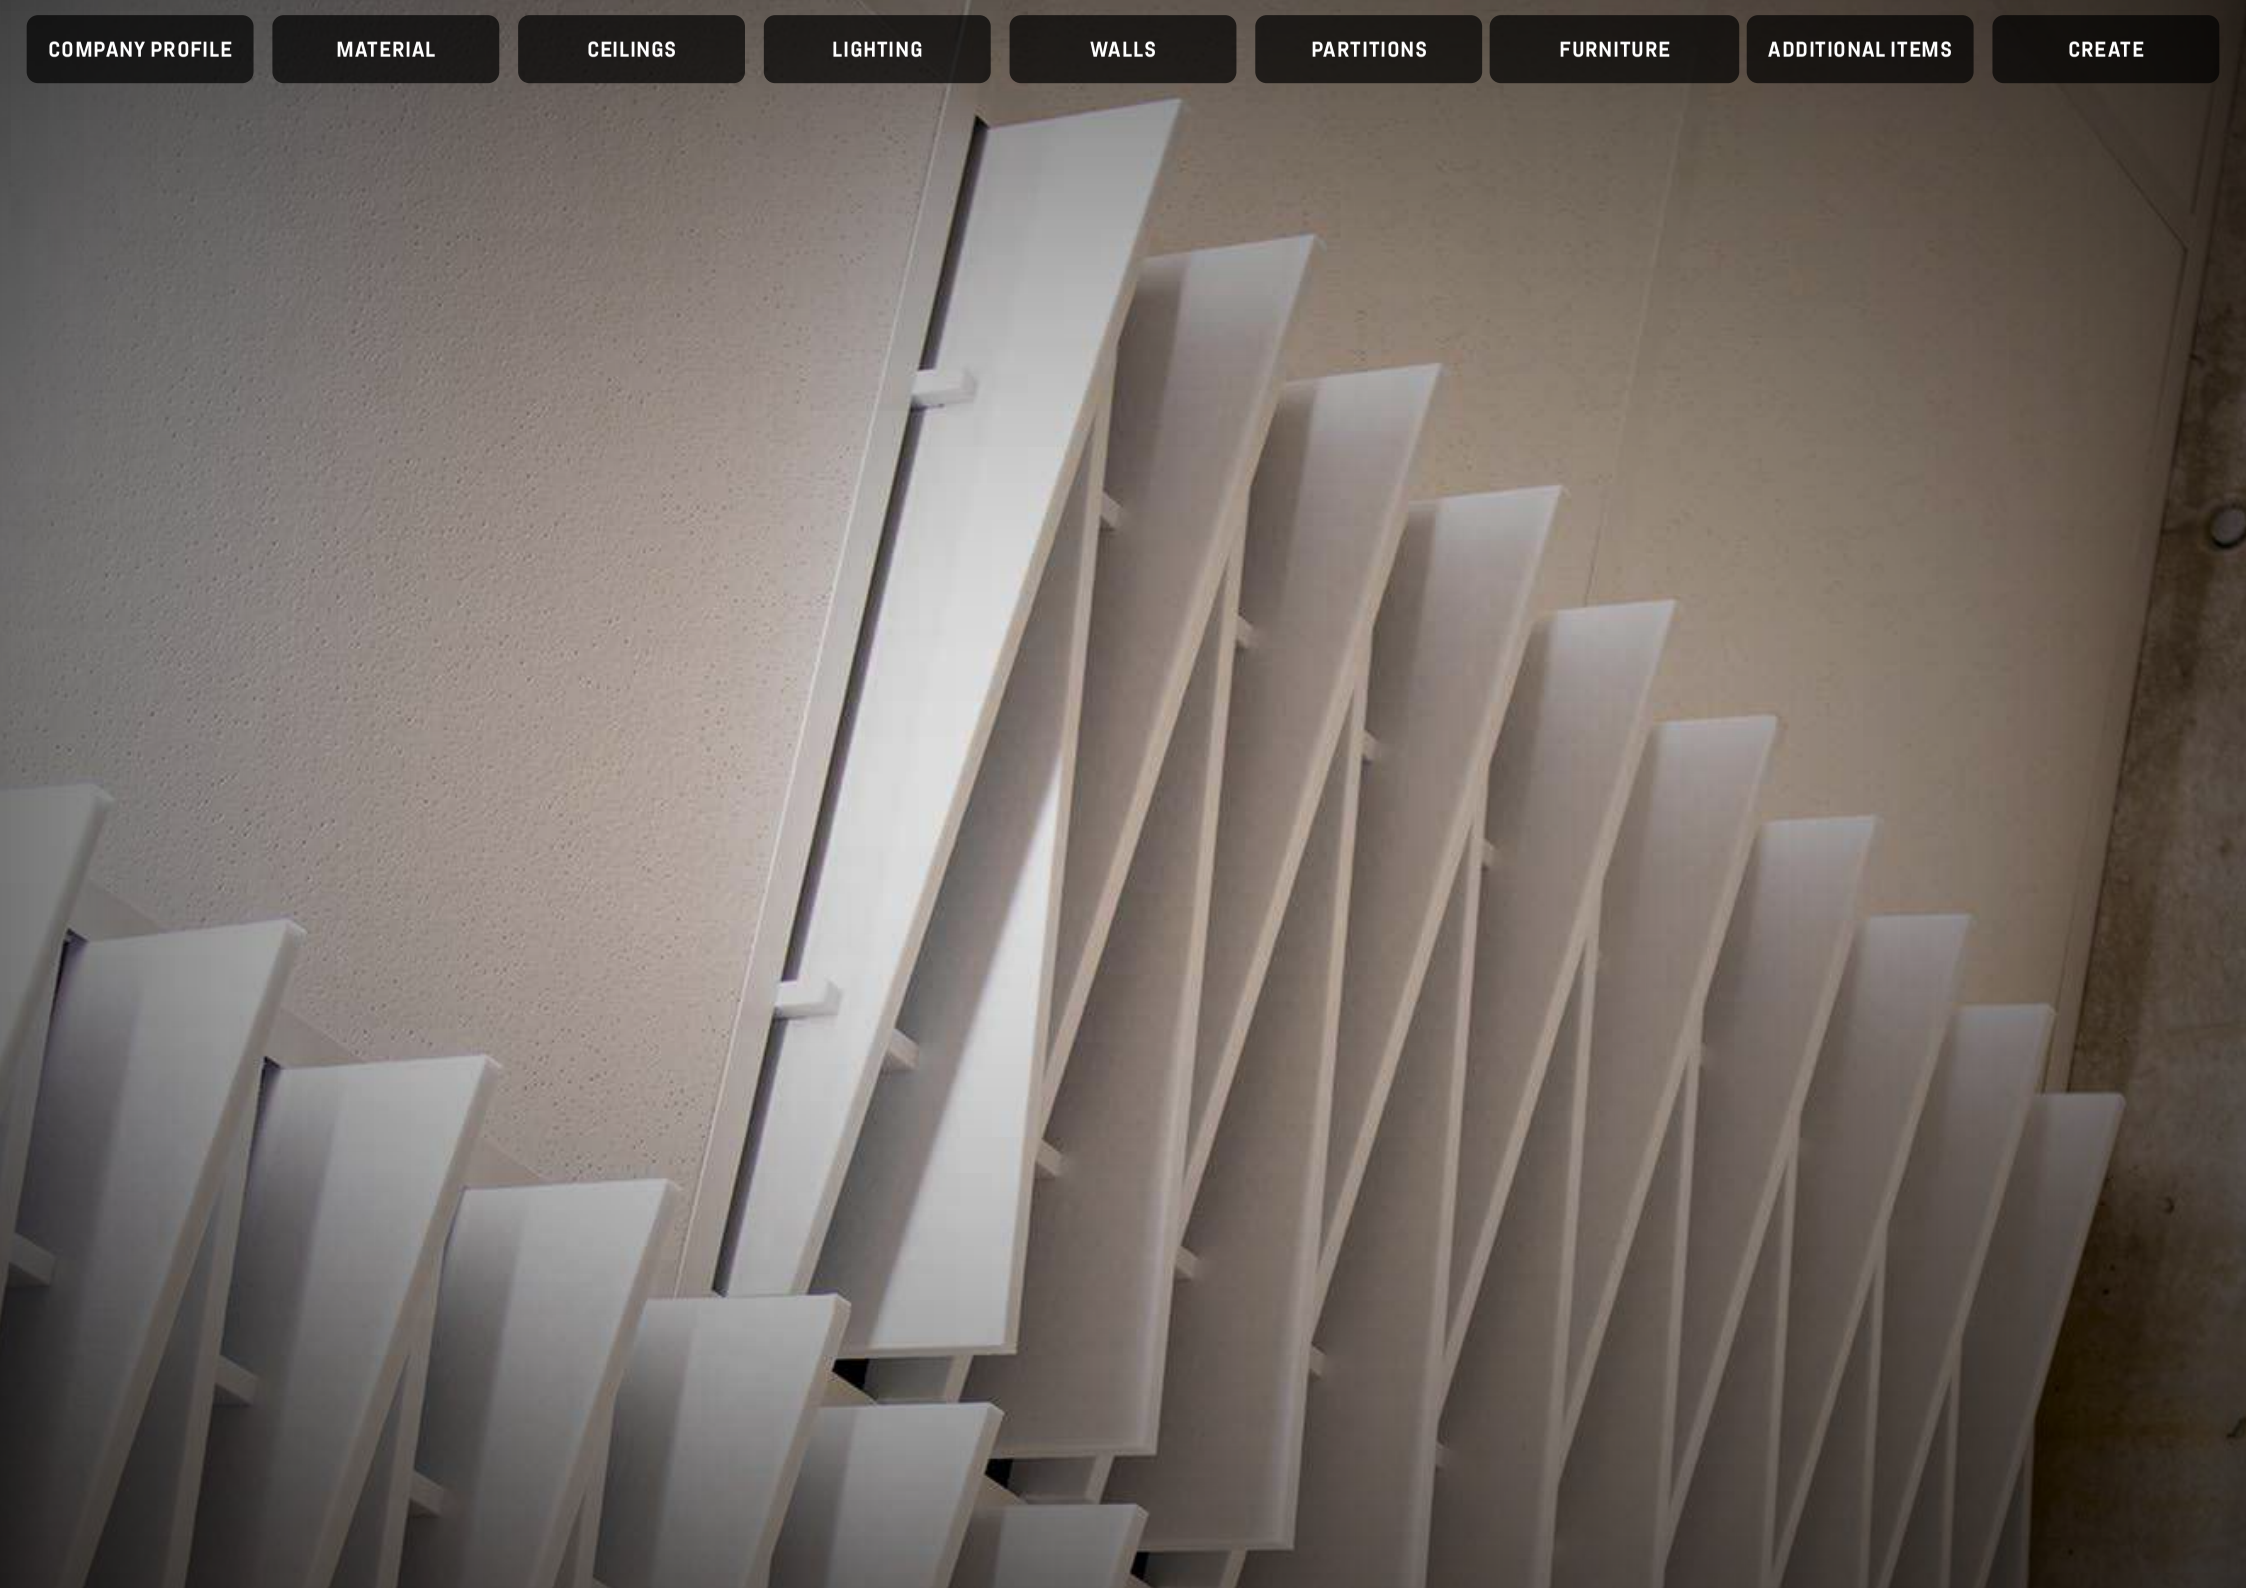
ECHO**GRID®**

EchoGrid® is a new inlay for grid ceilings. It's an innovative concept for grid ceilings that is visibly different from conventional ceilings. The high acoustic performance noticeably and audibly upgrades heavily frequented rooms. The inlays are plugged together on site and hooked into the grid ceiling without tools. The very light grid inlays can be easily removed, allowing easy access for maintenance of the building services. Complete reusability after use guaranteed - zero waste!

EchoGrid® allows ceilings ranging from understated simplicity to dramatic sculptural shapes. The creations of the ECHO**JAZZ** designers are only a starting point, we are happy to work out individual designs on customer request.



ECHO**GRID® 12MM**

High-performance acoustic inlay for ceiling grids with textile surface made of 100% PET.
Absorption coefficient: aw 0.30 - 0.90, class A.
Suitable for grid sizes 625x625mm & 1250x625mm with profile width 24mm
Minimum distance between ceiling and grid: 200mm
Individual EchoGrid® solutions on request!

ECHO JAZZ

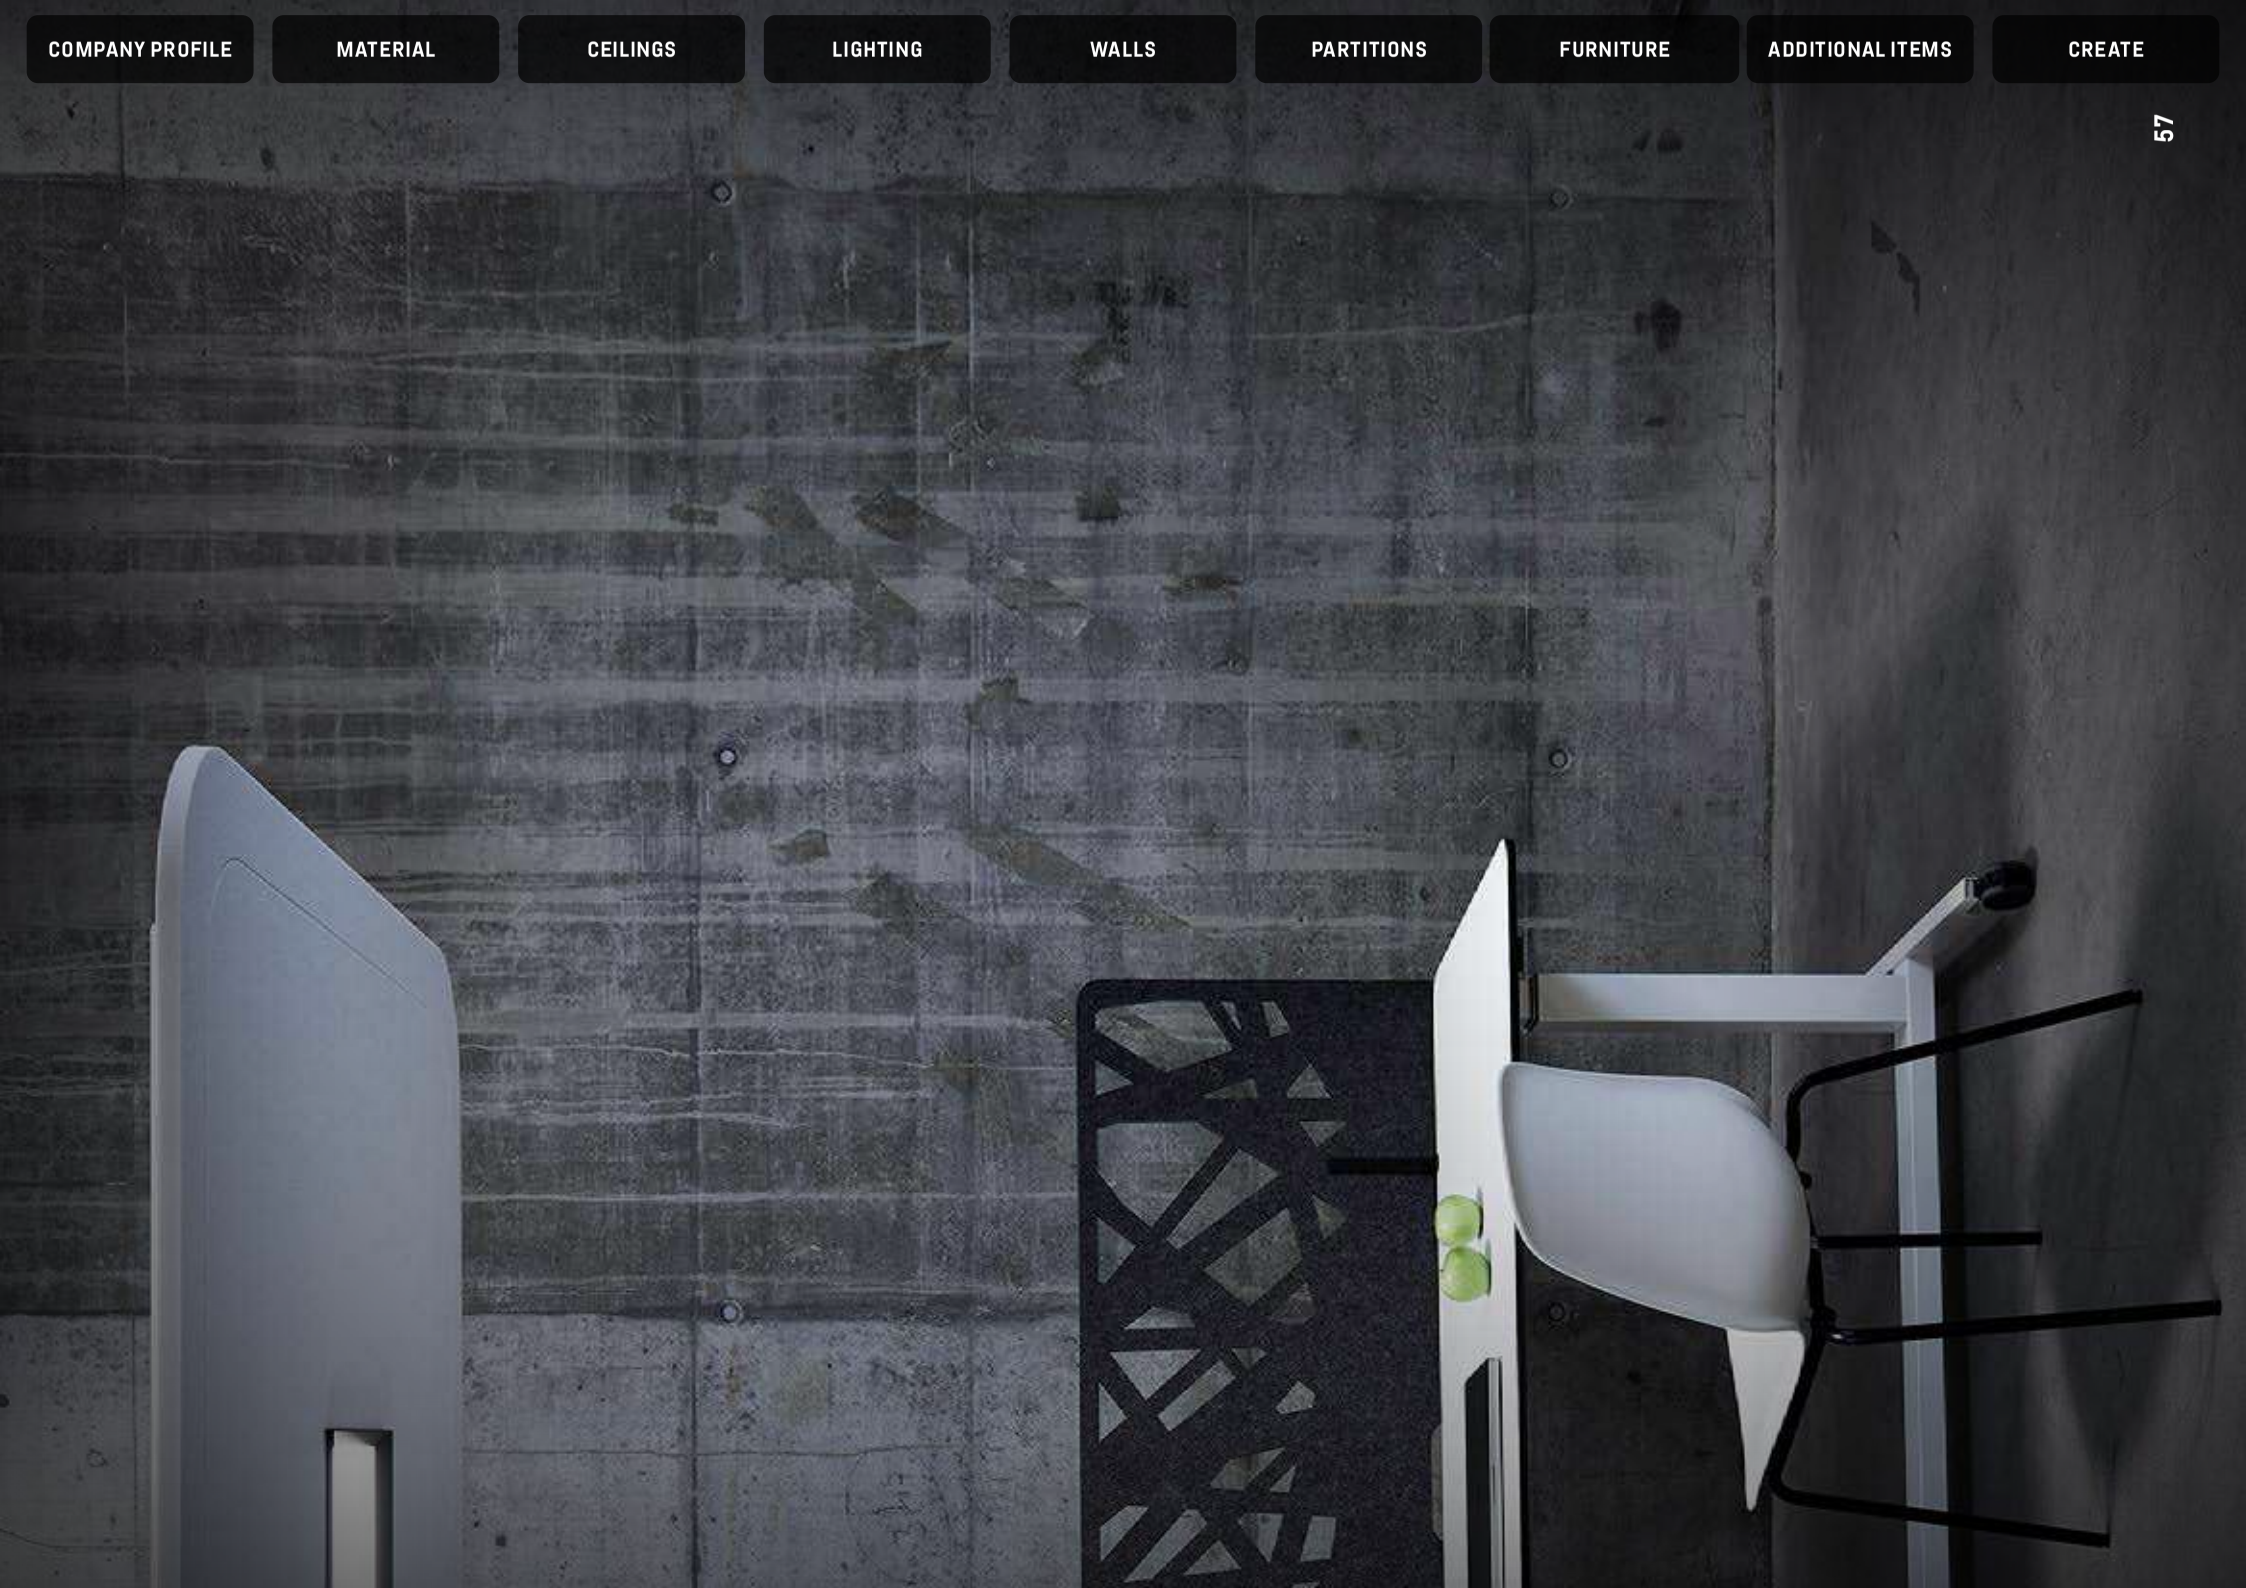
ACOUSTIC-LIGHTING

Lighting and room acoustics in one: sound-absorbing acoustic luminaires allow individual room design with maximum effect. The ECHO**JAZZ** range includes minimalist integrations with ceiling canopies as well as stand-alone luminaires with a striking design.

ECHO**LED® SITAS**

For maximum comfort at the workplace, EchoLED® SITAS has a luminous field integrated into a high-performance acoustic absorber. The recessed light with microprismatic cover sits in the centre of the acoustic sail. It is produced tailor-made by ECHO**JAZZ** with a large range of shapes and sizes available in our 21 colours.

Thanks to the many options, the acoustic light can be optimally integrated into a design concept. The combination of light quality, functionality and acoustic well-being ensures optimum ergonomics for employees.



ECHO**LED® 24MM SITAS**

Acoustic sail with fully integrated direct lighting with DALI dimming mode incl. substructure and suspension. The EchoLED® SITAS luminaire is suspended using a frame and safety hooks. The frame is white as standard and can be supplied in other colours to order. Supplied without plug.
Absorption coefficient: aw 1.00, class A
Edge processing: 90°, corner radii 200mm
Available on request in ON/OFF only, without DALI dimming mode.
Light source in 3000K available on request. The standard illuminant is supplied with a light colour of 4000K. (Tech. info: Page 201)

ECHO**AMBIENT® COCOON**

The EchoAmbient® COCOON lifestyle ceiling lights give every room a unique ambience. Not only acoustically, but above all through beautiful light and shadow effects. The fan-like slats of the COCOON model give the luminaire a futuristic shape. Almost two square metres of the class A acoustic absorber ensure very efficient sound absorption.

The EchoAmbient® enables interior designers to improve acoustics at the same time as they are creating the lighting concept. The E27 socket offers full flexibility in the choice of light source. The lamp with its cocoon-shaped design is available in 21 expressive colours.

ECHO**AMBIENT® CONE**

The EchoAmbient® CONE lifestyle ceiling lights give every room a unique ambience. Not only acoustically, but above all through beautiful light and shadow effects. Behind the new design of the lampshades is the new development from ECHO**JAZZ** - the Stretch-Cut. This special cutting pattern not only creates the perforations, but also transforms our EchoBoard® into a stretchable acoustic material.

The E27 socket allows for maximum compatibility in bulb selection The lamps shown here have a conical shape and are currently available in 3 sizes and 21 expressive colours. In combination with different frame elements, a variety of other shapes and sizes can also be designed. EchoAmbient® lamps allow planners and architects to give free rein to their creativity when it comes to acoustic lighting design. Challenge us!

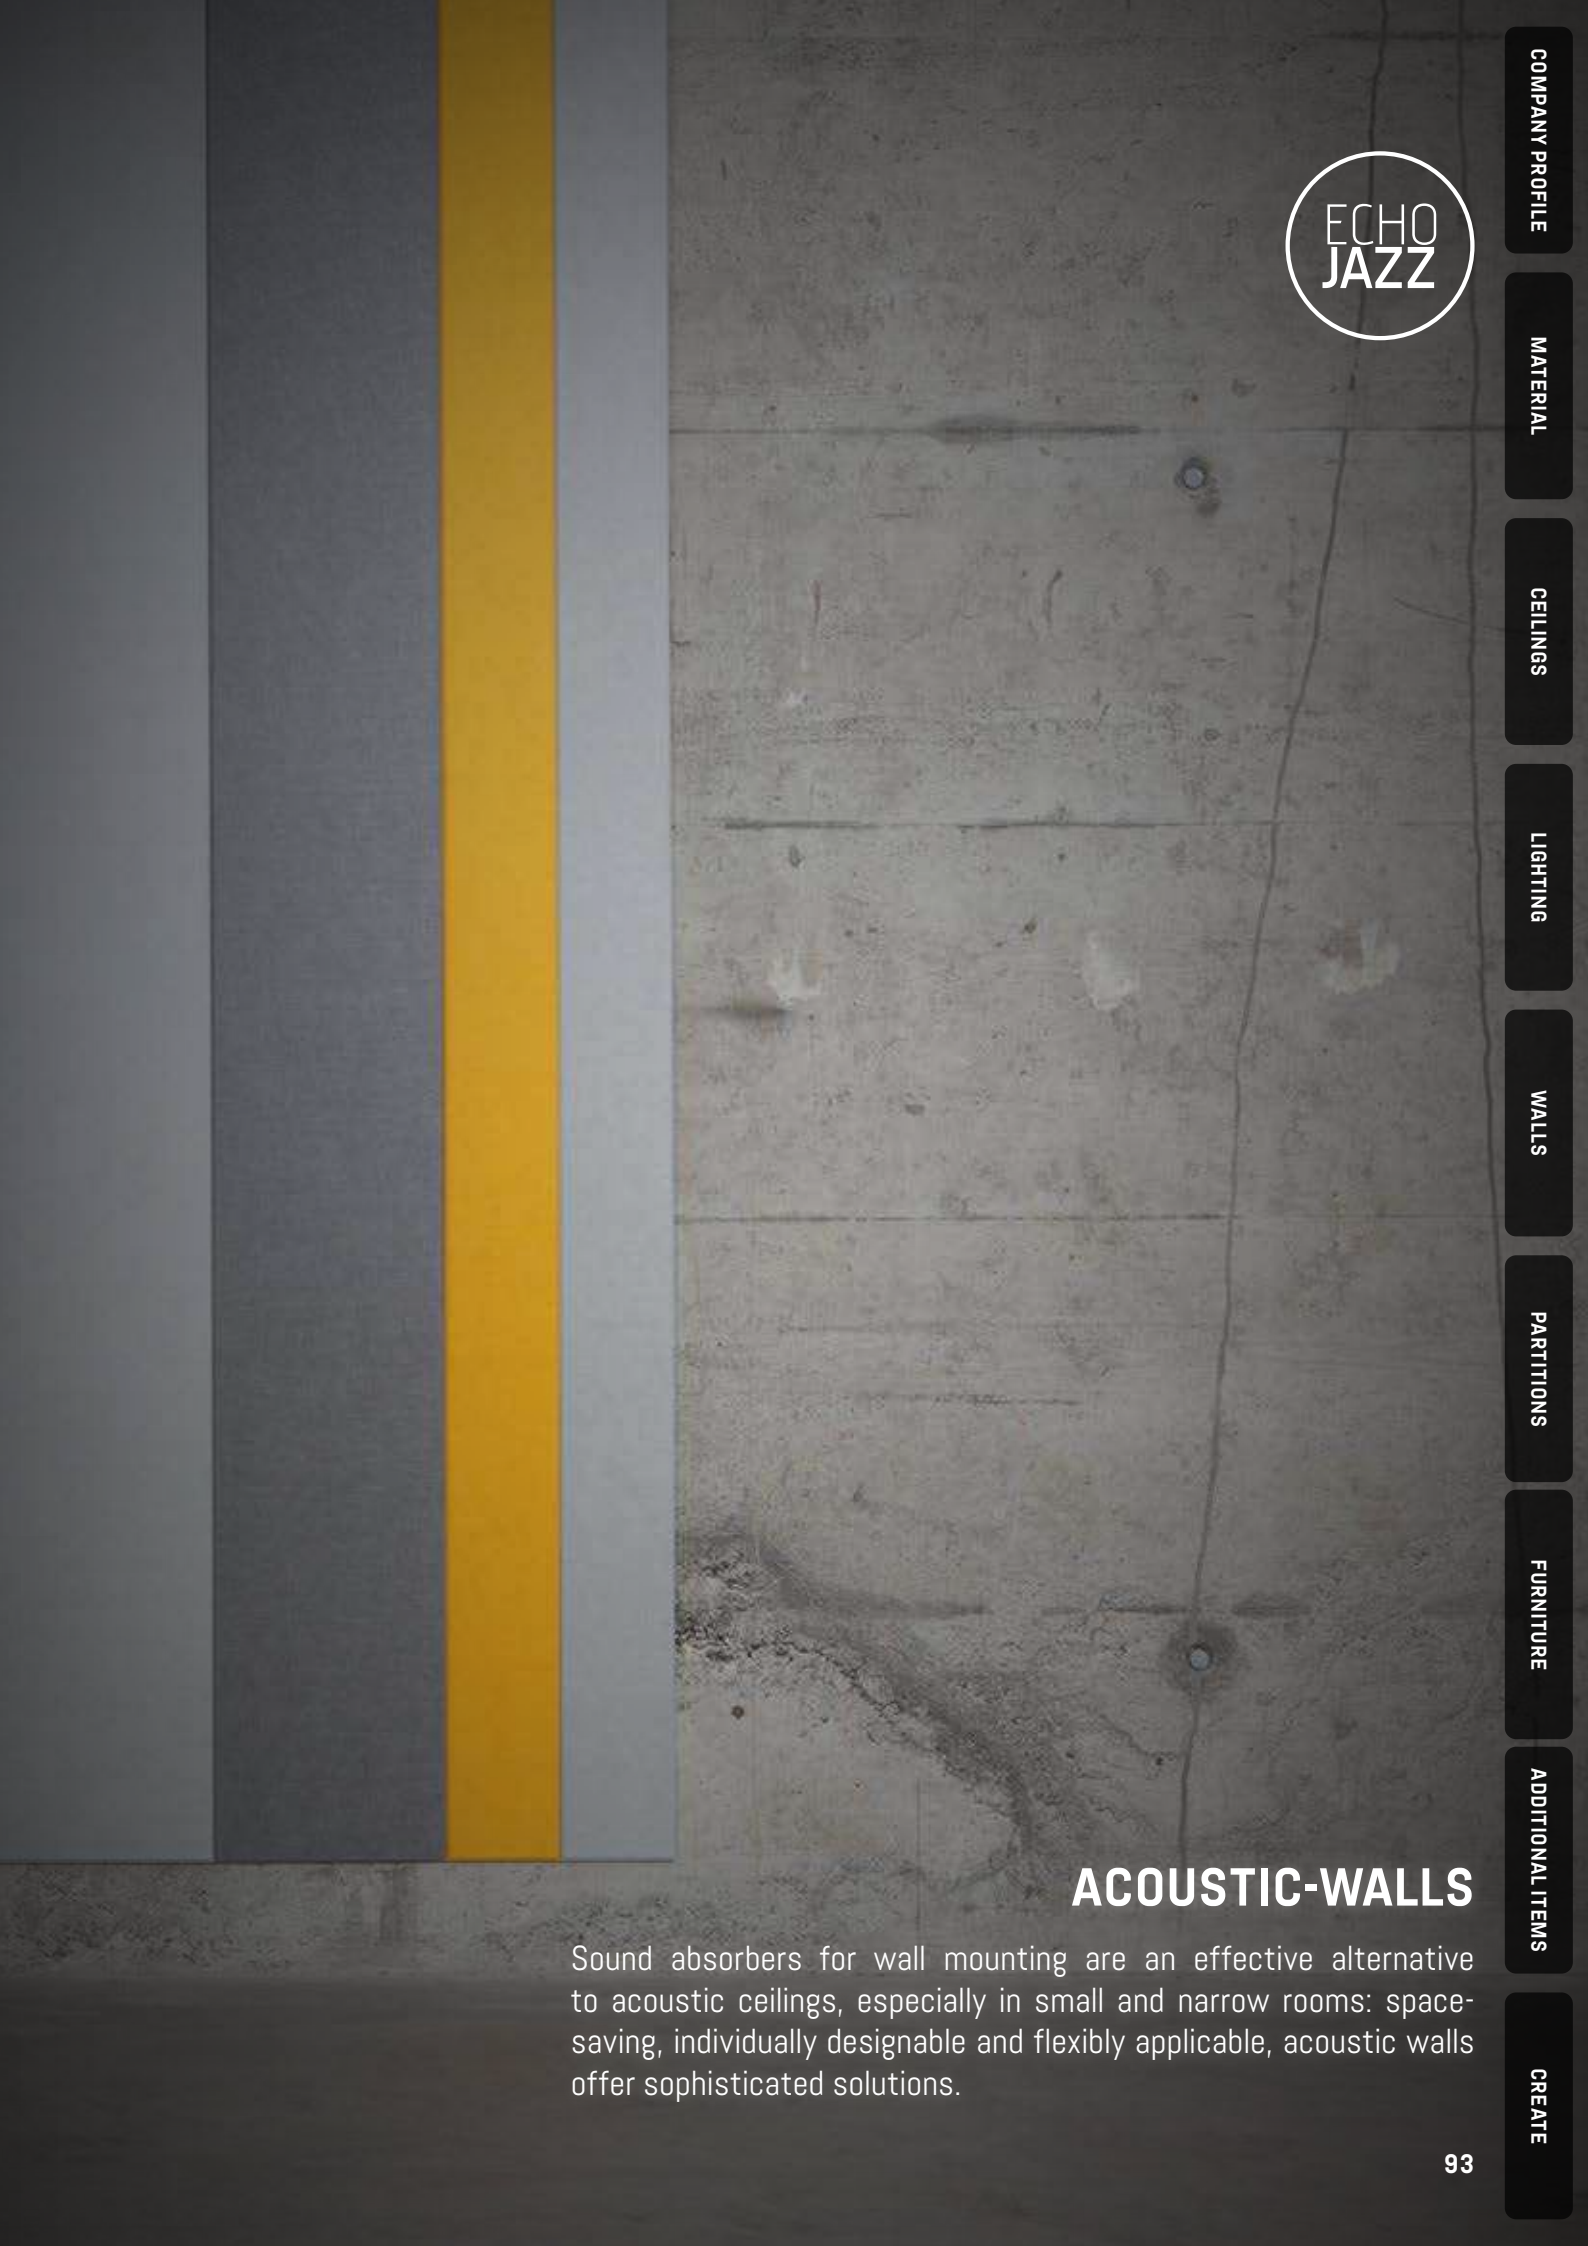
DIRECTLY SCREWED



ACOUSTIC-WALLS

Sound absorbers for wall mounting are an effective alternative to acoustic ceilings, especially in small and narrow rooms: space-saving, individually designable and flexibly applicable, acoustic walls offer sophisticated solutions.

ECHO**BAFFLE® WALL**

EchoBaffle® WALL is a new type of wall absorber with three-dimensional slats that come to life as you walk by. EchoBaffle® WALL opens up a new field for acoustic wall design. With changing viewing angles, three-dimensional shapes become visible and disappear again, particularly effective on long walls or corridors.

The EchoBaffles® impress with their simple installation using a tool-free plug-in system. The open structure leaves room for building technology such as sensors, switches or sockets. In addition, individual EchoBaffles® can be removed very easily if required. Discover the new wall solution, which we offer in four designs up to 2.80 metres high.

ECHO**FIELD® ORNAMENT**

EchoField® ORNAMENT is the perfect solution for a striking and practical wall design. The wall panel can be customised with individual perforations for an impressive look. Alternatively, the ornament can also be designed as a three-dimensional pattern with raised or lowered areas.

With its magnetic substructure, it offers versatile application possibilities and is ideal for covering uneven and fragmented walls. Thanks to the wall spacing, improved sound absorption is achieved, which positively influences the room acoustics. The quick-release system ensures easy access to areas behind it, such as facility services.

The EchoFiel® ORNAMENT wall panel is made recycled PET, which not only makes it environmentally friendly, but also gives it excellent durability and longevity. Design your interiors with EchoField® wall panels exactly as you want them, even with your own design

ECHO**FIELD®**

The EchoField® panels are fixed with a cavity to the wall and provide optimal acoustic performance especially in small and narrow rooms. They are an alternative to EchoSail® ceiling sails, with which they share dimensions and shapes. They are mounted using a powder-coated metal frame that is simply plugged in and suspended using a wall profile.

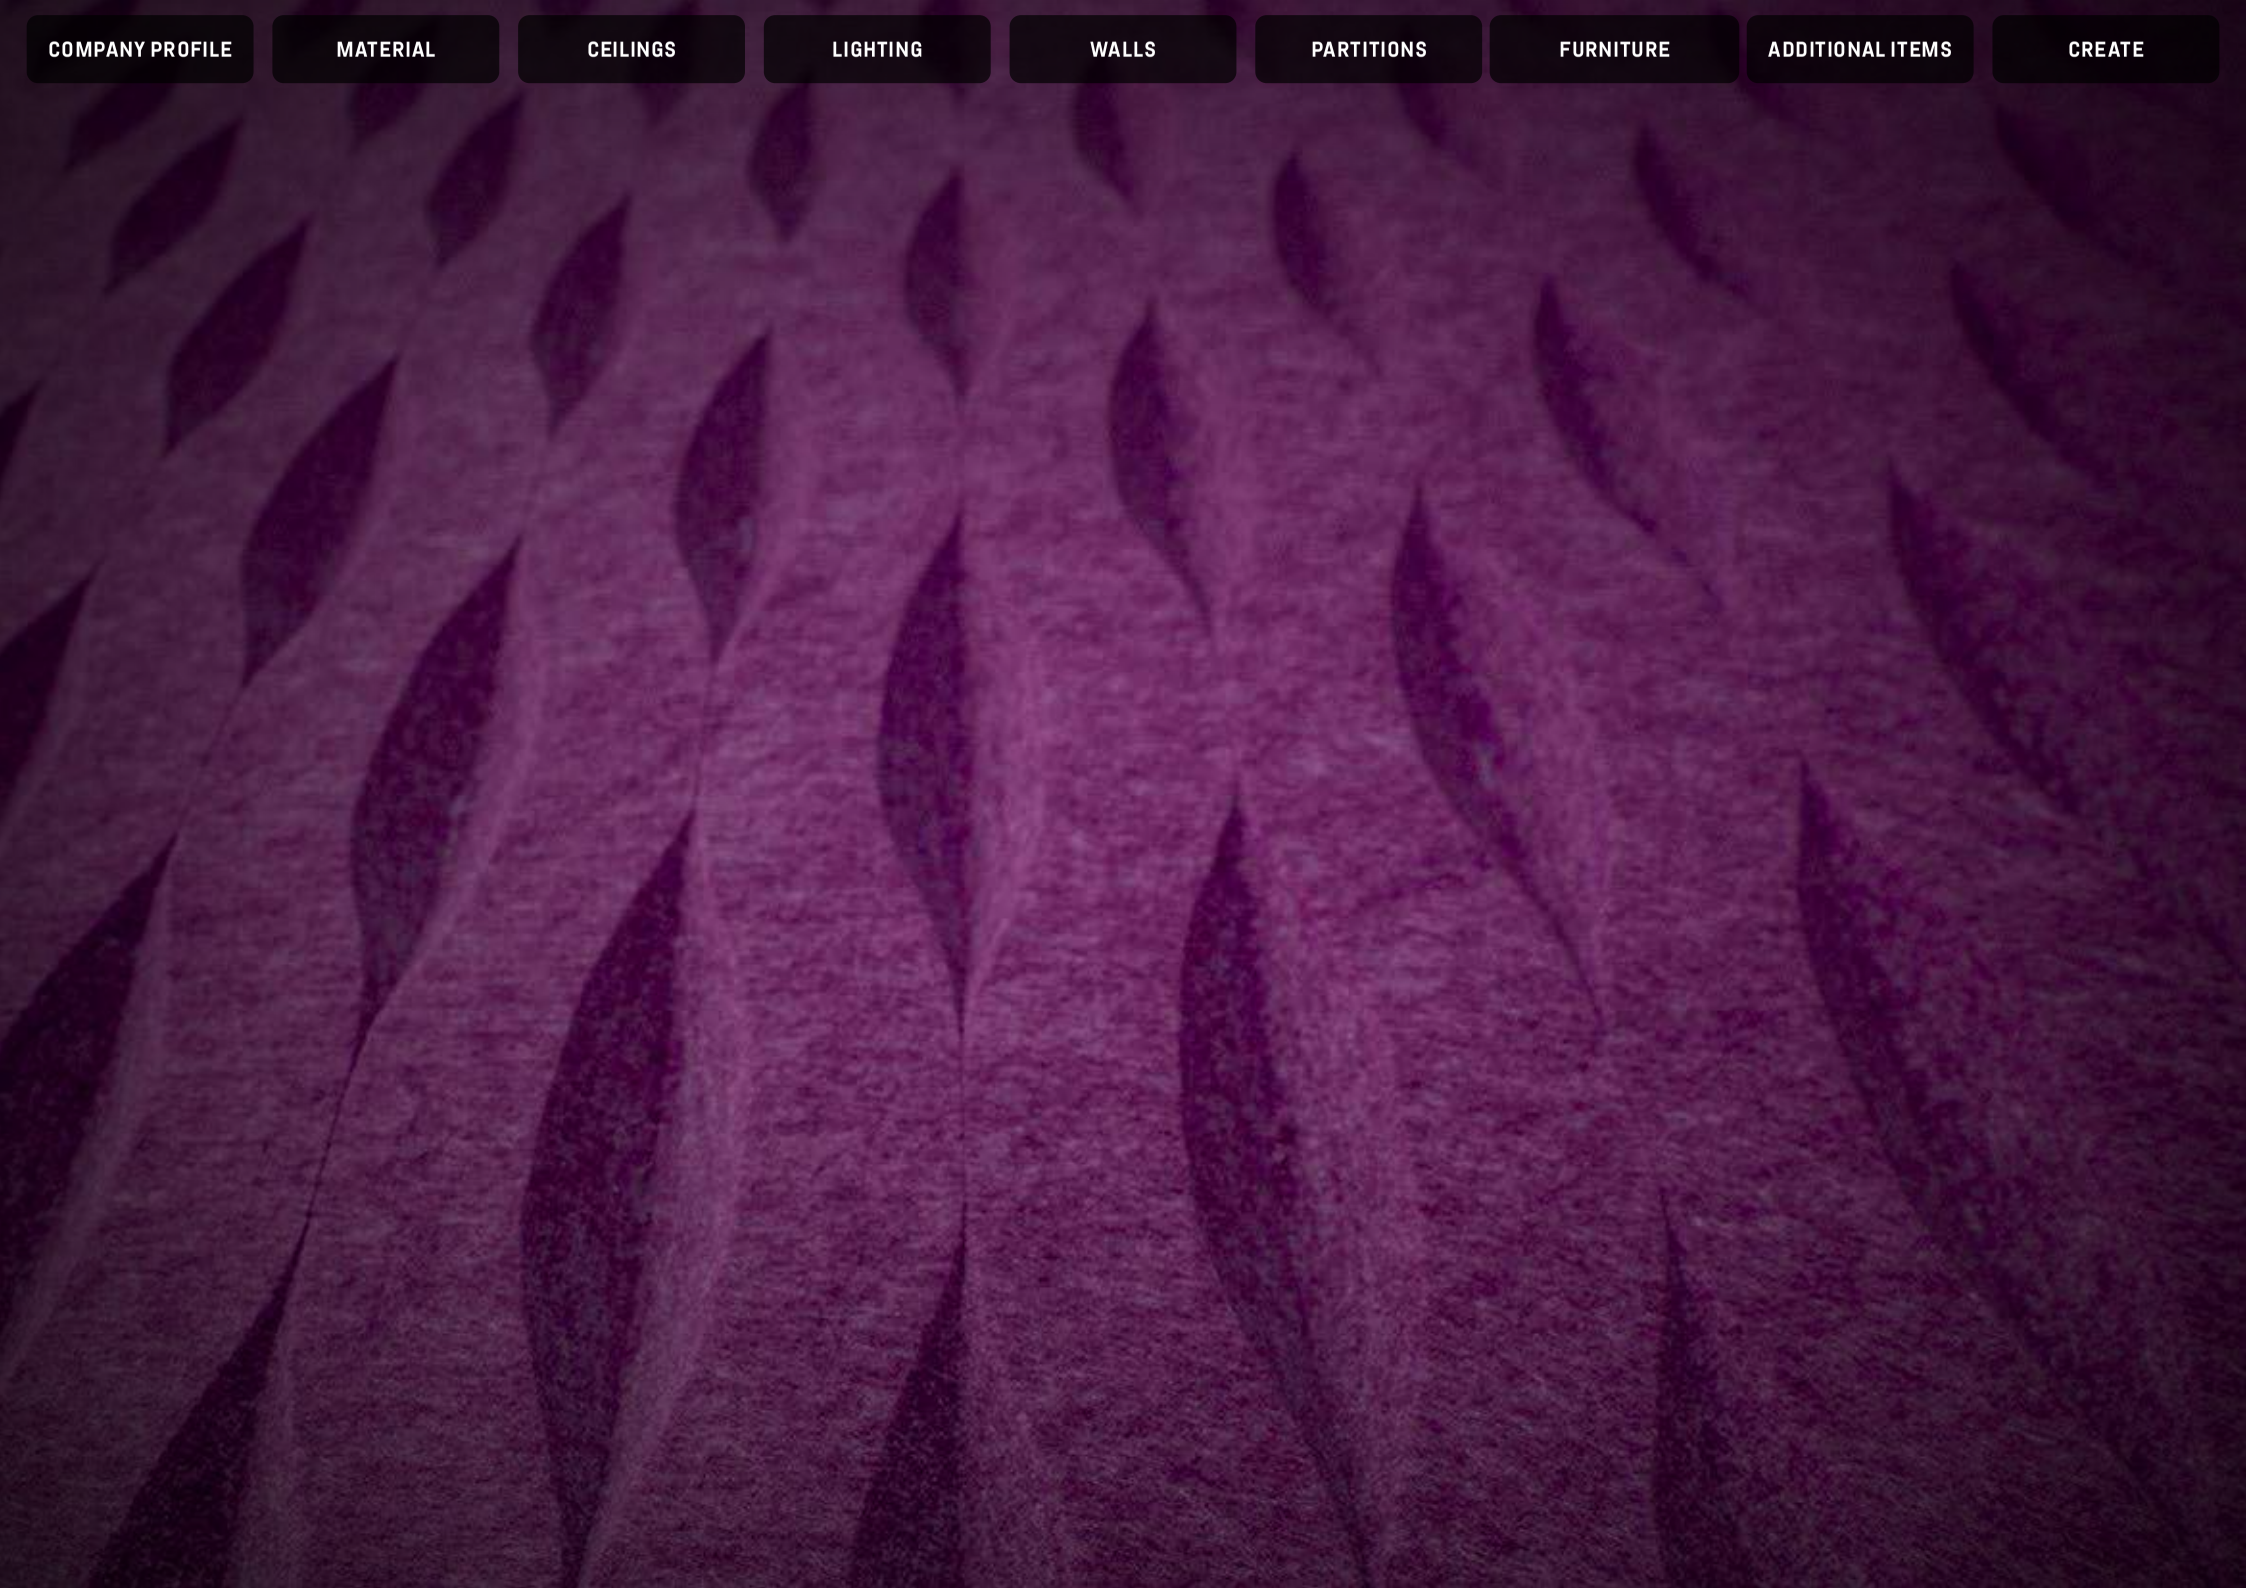
ECHO**MONOC®**

EchoMonoc® is suitable for large-area wall applications without visible joints. For improved acoustic performance, it is recommended to use the 24mm thick option. ECHO**JAZZ** absorbers made of recycled PET are extremely robust and suitable for regular cleaning and disinfection. Installation is quick and easy with EchoGlue® adhesive contact spray.

Indented carvings break up the monochrome surface. This finishing method creates an indented structure that gives each room its own character.



ECHO**MONOC® 12MM**

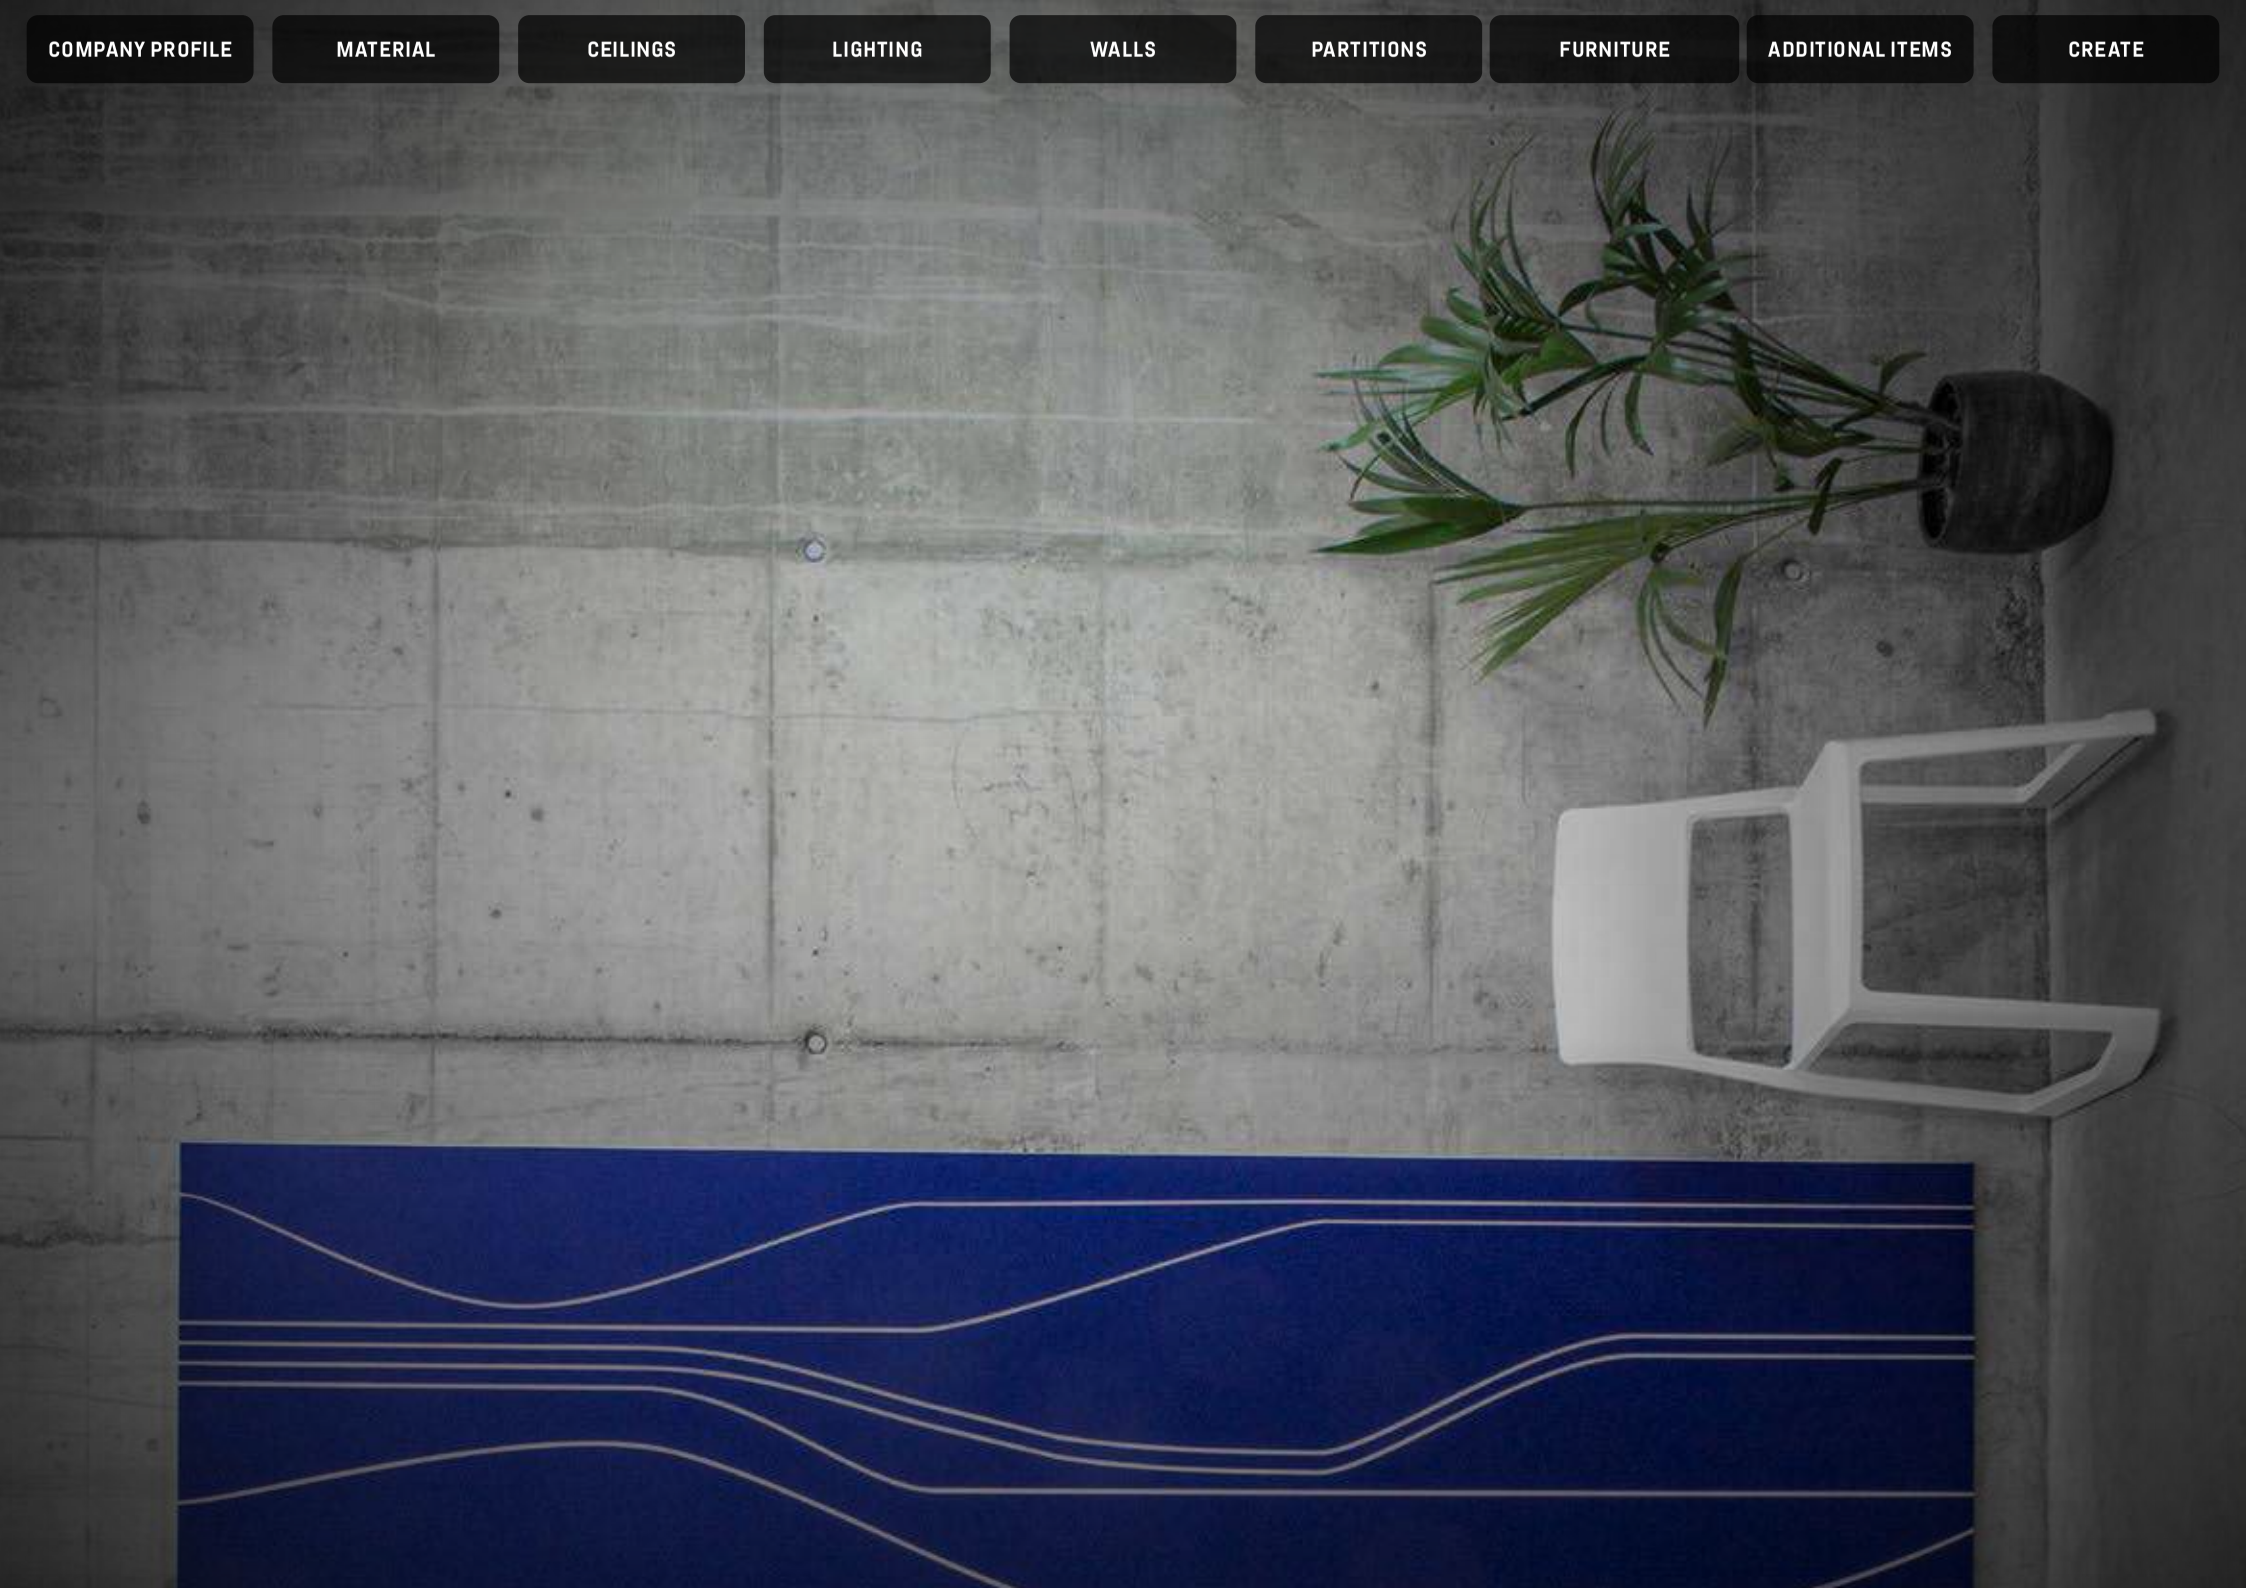
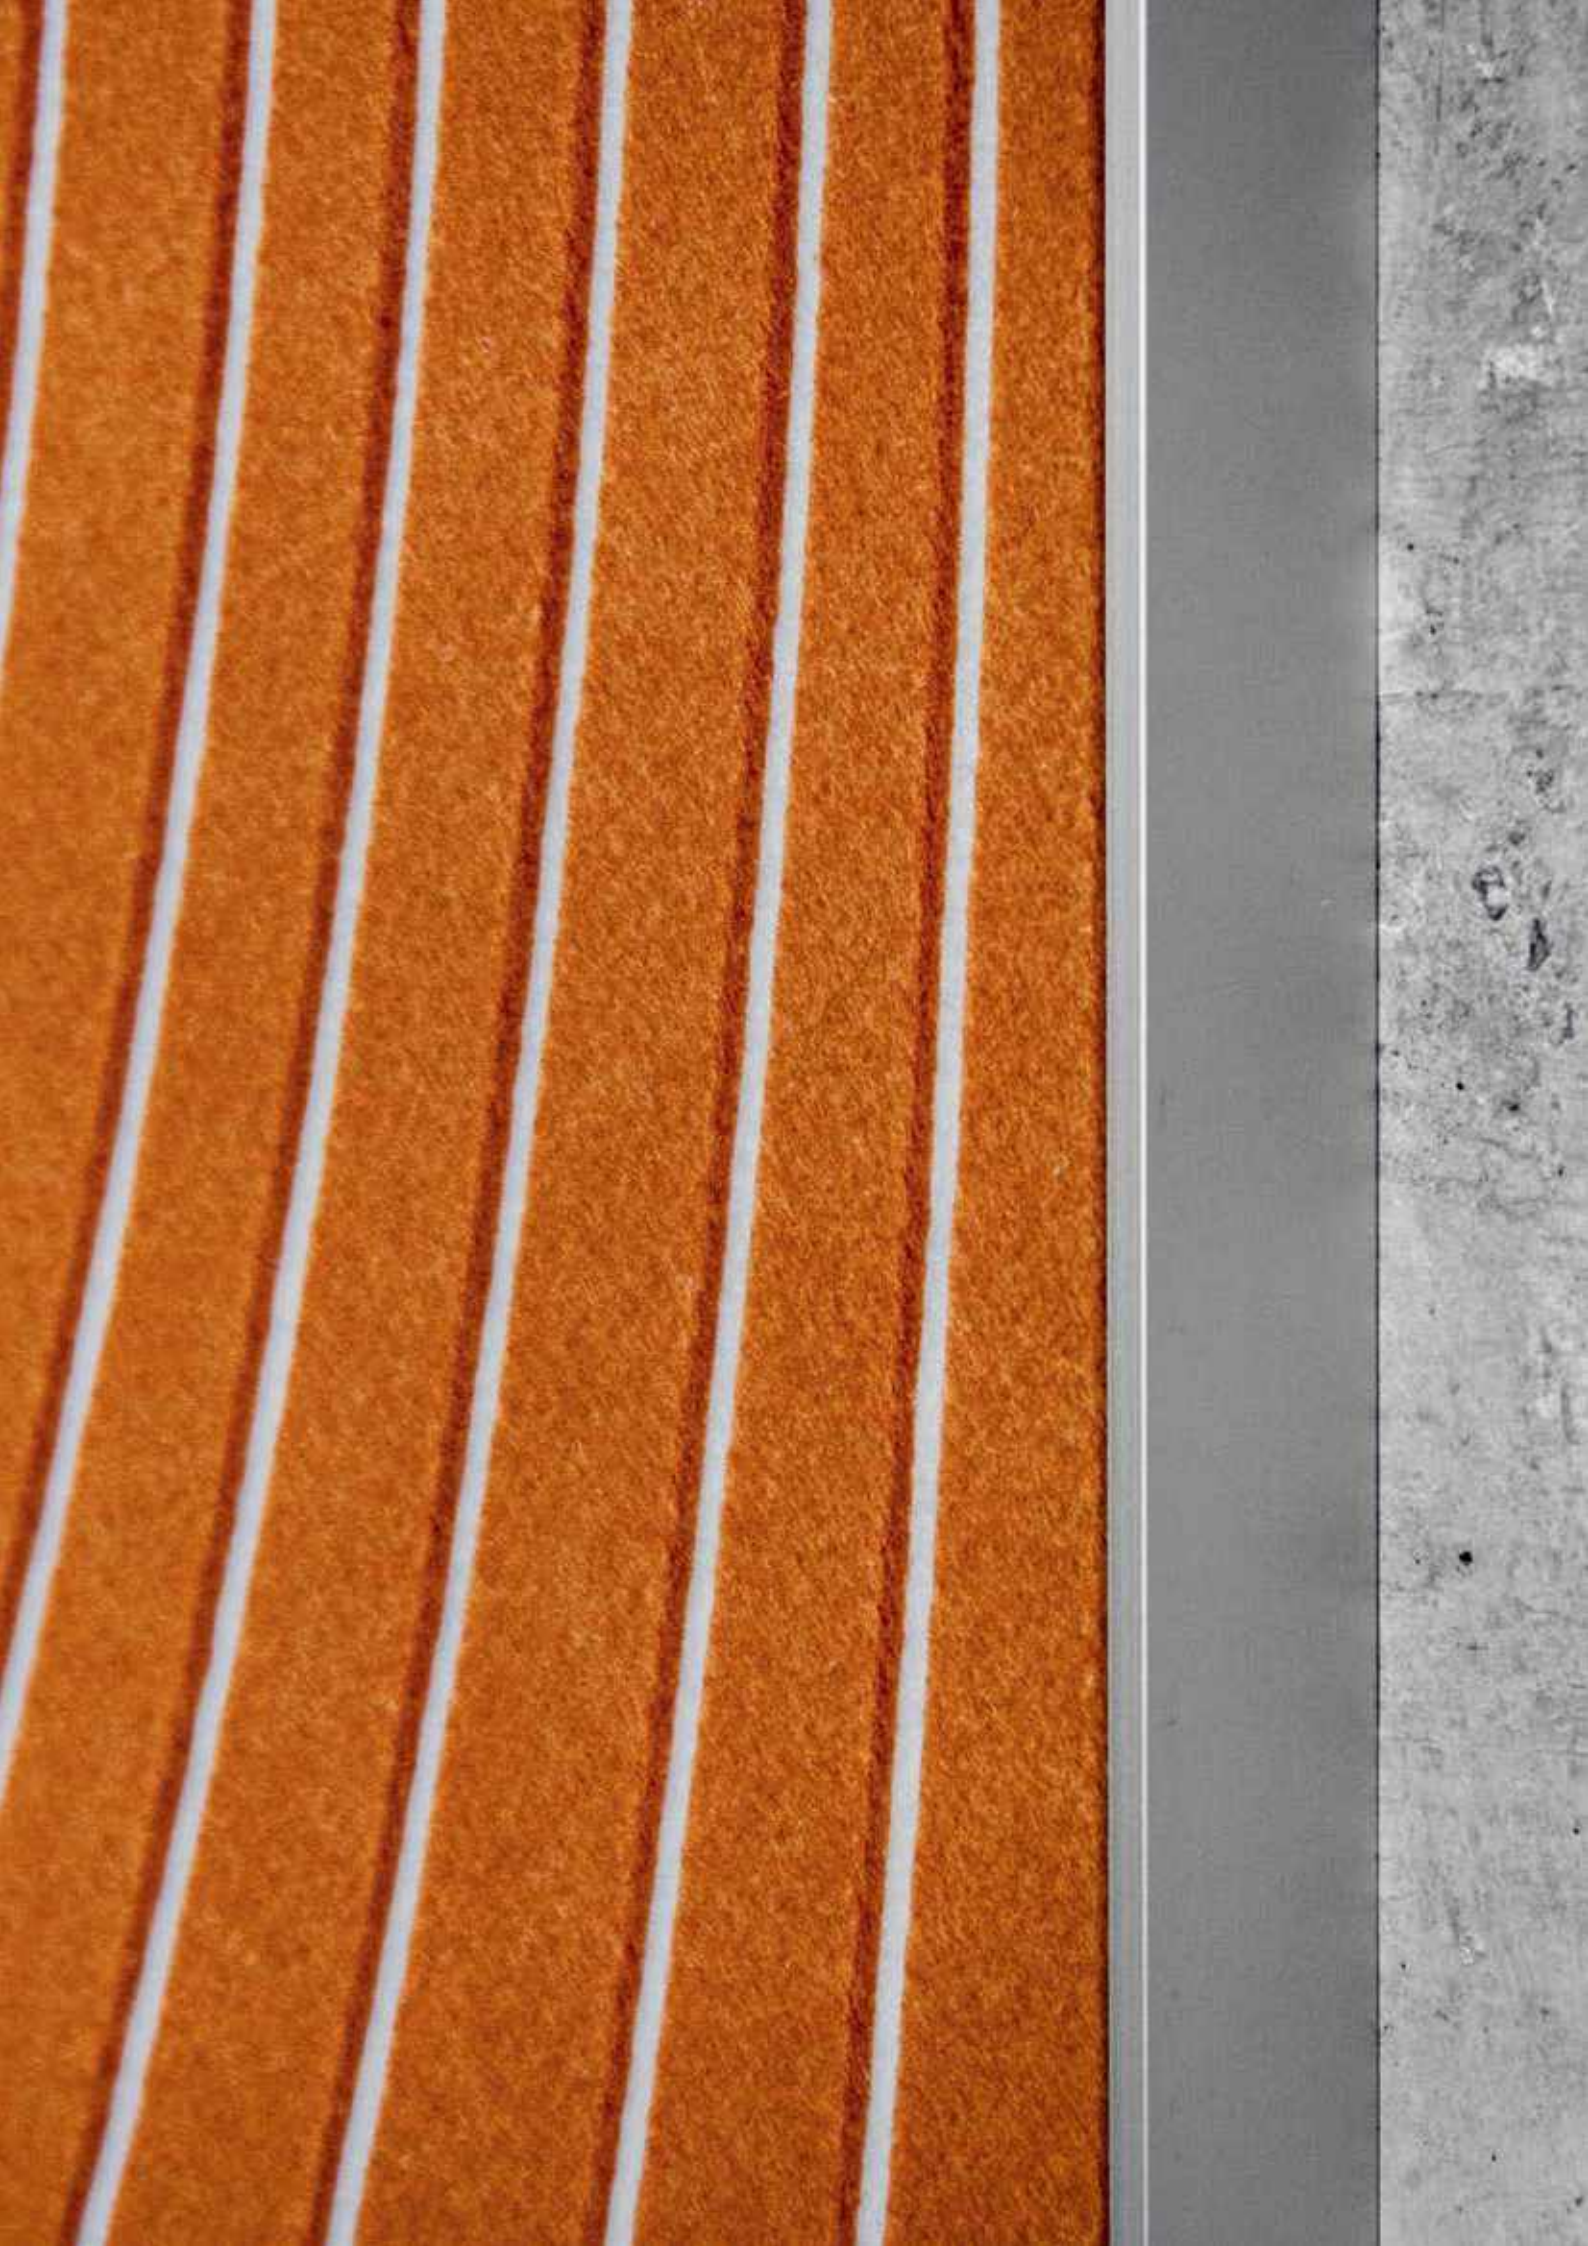
ECHO**COUSTIC® ACCENT**

EchoCoustic® with V-shaped cuts makes the white high-performance absorption layer visible. This creates special line designs and thus accentuates in the truest sense of the word. The special EchoCoustic® absorber is the ideal material for direct application to walls or ceilings without spacing or substructure. With its three layers, it achieves an excellent absorption coefficient of aw 0.80 and NRC 0.85 with a thickness of only 25mm. The absorber made of recycled PET is extremely robust and suitable for regular cleaning and disinfection. Installation is quick and easy with EchoGlue® contact spray adhesive.

The design of large-area acoustic walls takes on a new dimension. The high-contrast recesses allow for spectacular patterns, from existing designs to completely customised creations.





ECHO**COUSTIC® 25MM ACCENT**

Acoustic wall panels with bevelling. Installation by means of EchoGlue® spray adhesive (included).

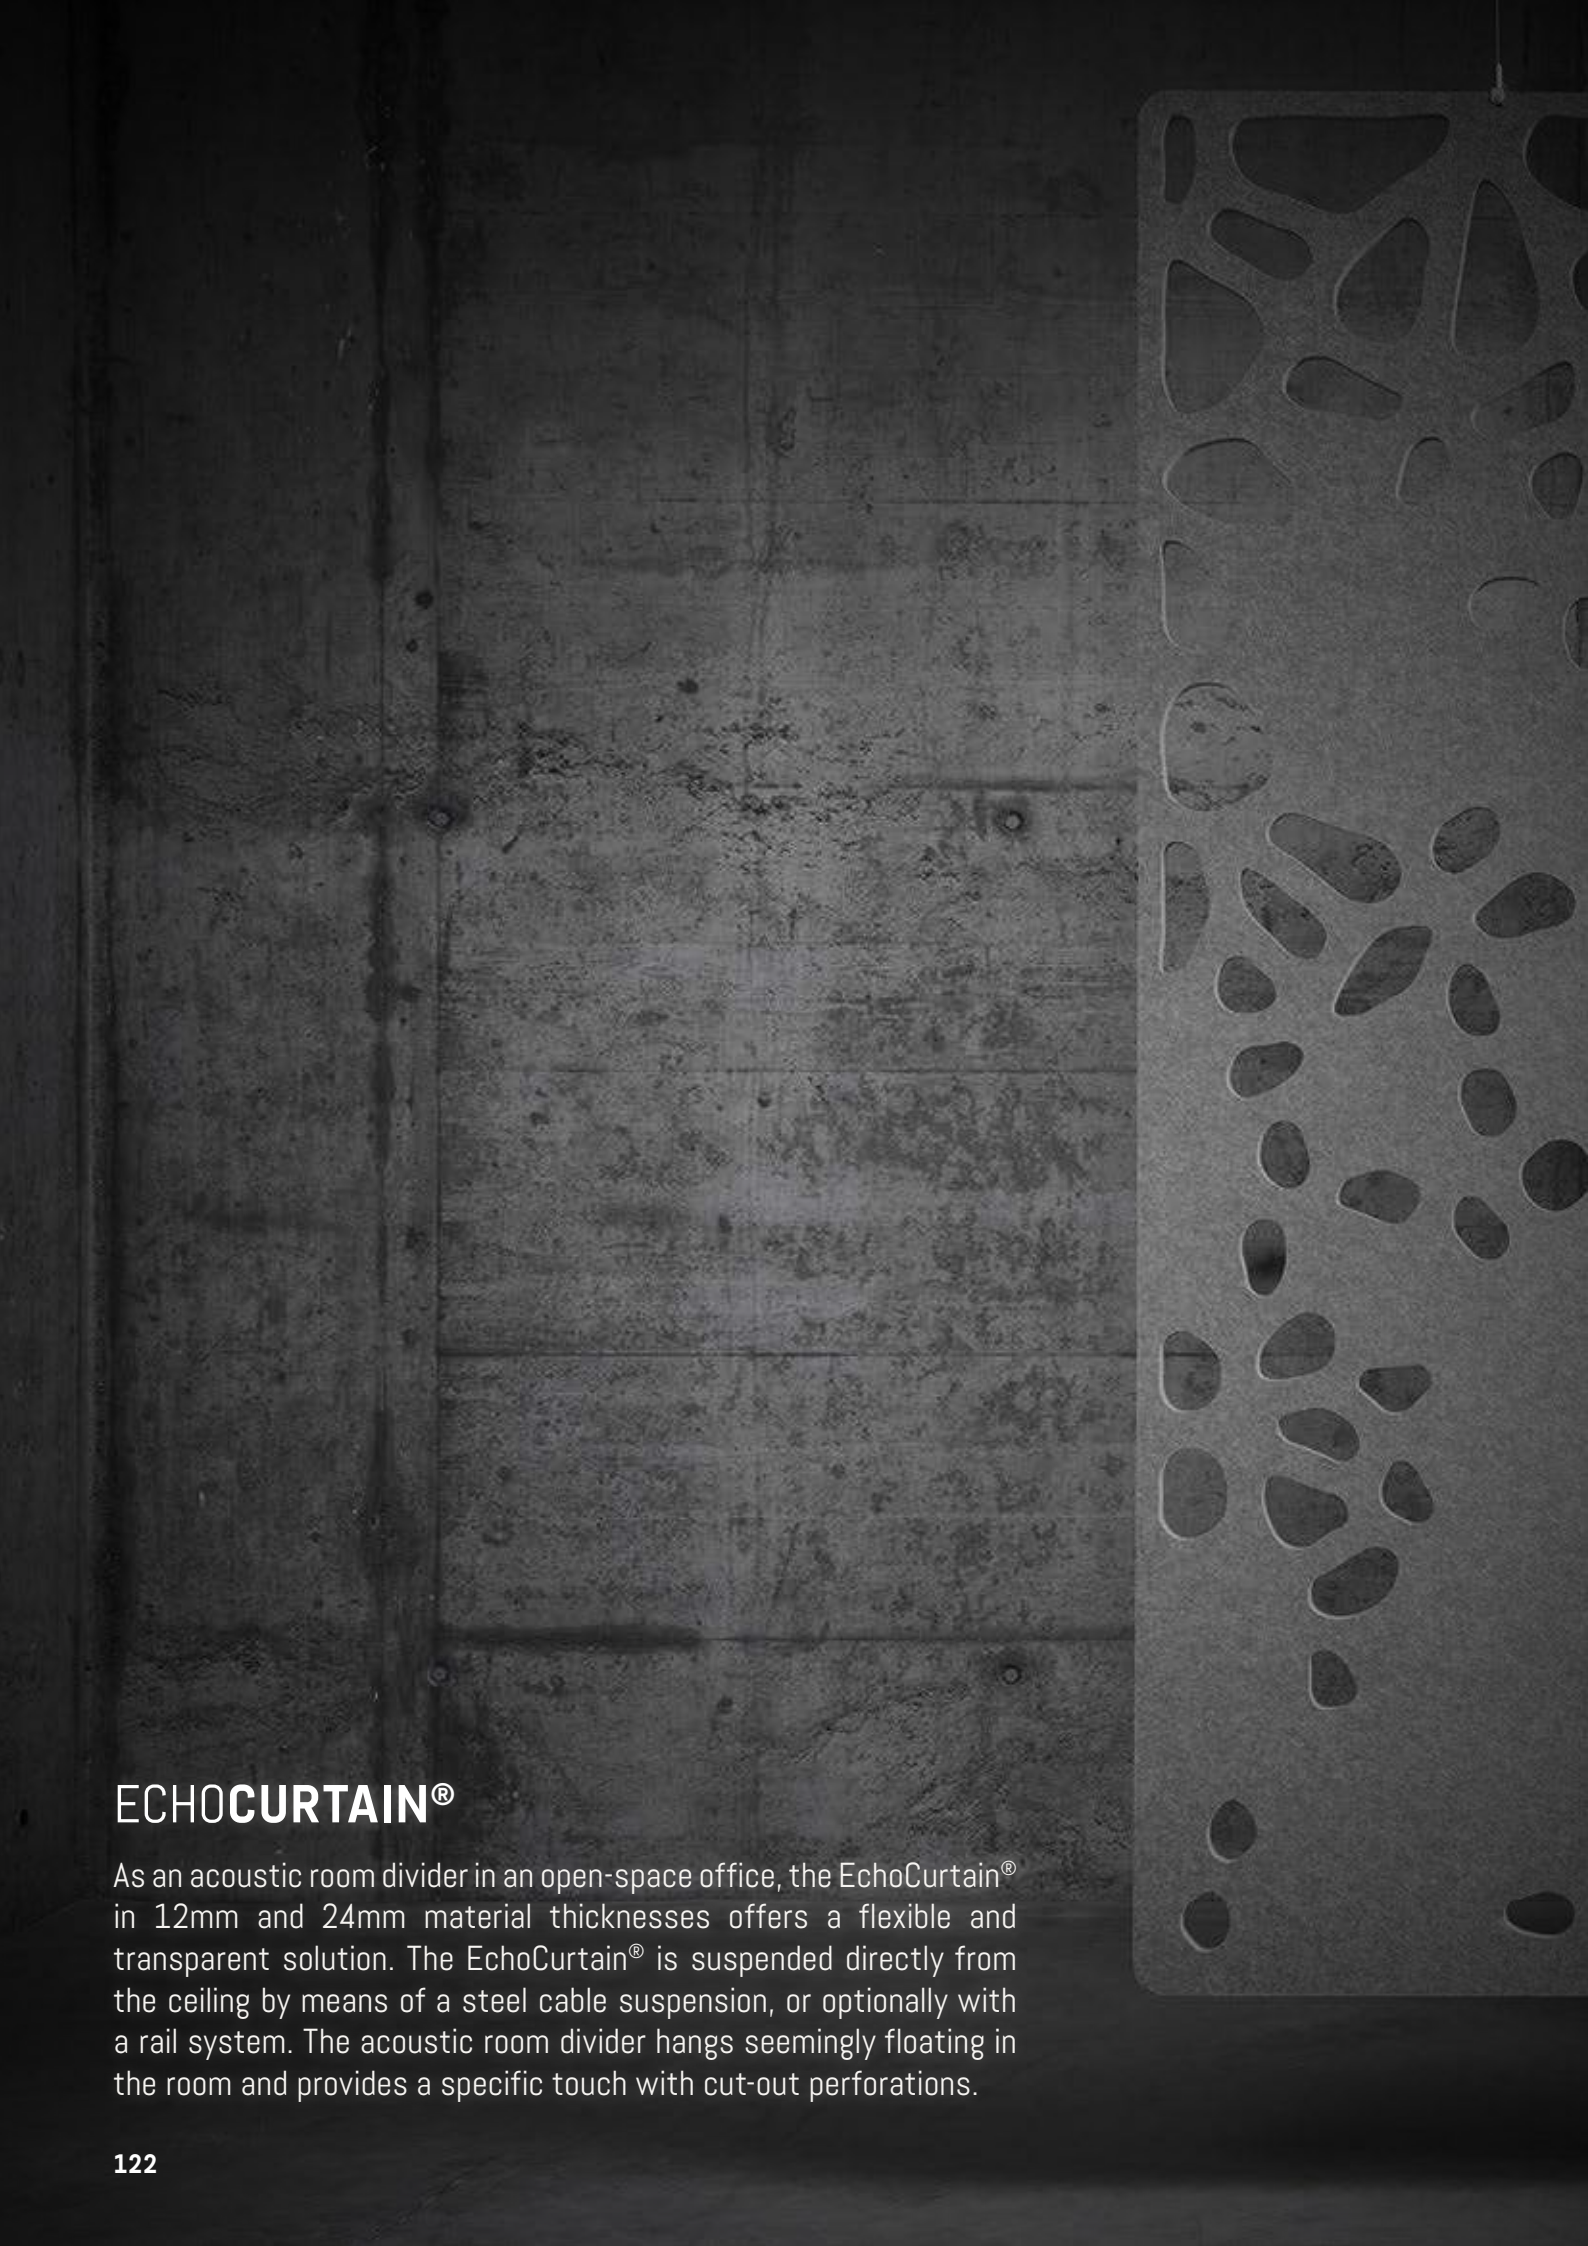
ACOUSTIC-PARTITIONS

Partition walls with sound insulation make it easy to divide rooms and optimise room acoustics in offices as well as in all other living and working environments. Available as mobile or permanently installed elements, they offer countless possibilities for room design.



ECHO**CURTAIN®**

As an acoustic room divider in an open-space office, the EchoCurtain® in 12mm and 24mm material thicknesses offers a flexible and transparent solution. The EchoCurtain® is suspended directly from the ceiling by means of a steel cable suspension, or optionally with a rail system. The acoustic room divider hangs seemingly floating in the room and provides a specific touch with cut-out perforations.

ECHO**TORRENT®**

The EchoTorrent® acoustic partitions were specially developed for high rooms with a ceiling height of up to four metres, whereby the high-performance acoustic absorbers can be positioned at individual heights. The clamping elements are firmly screwed to the ceiling and floor. The acoustic elements are clamped to the connecting cables.

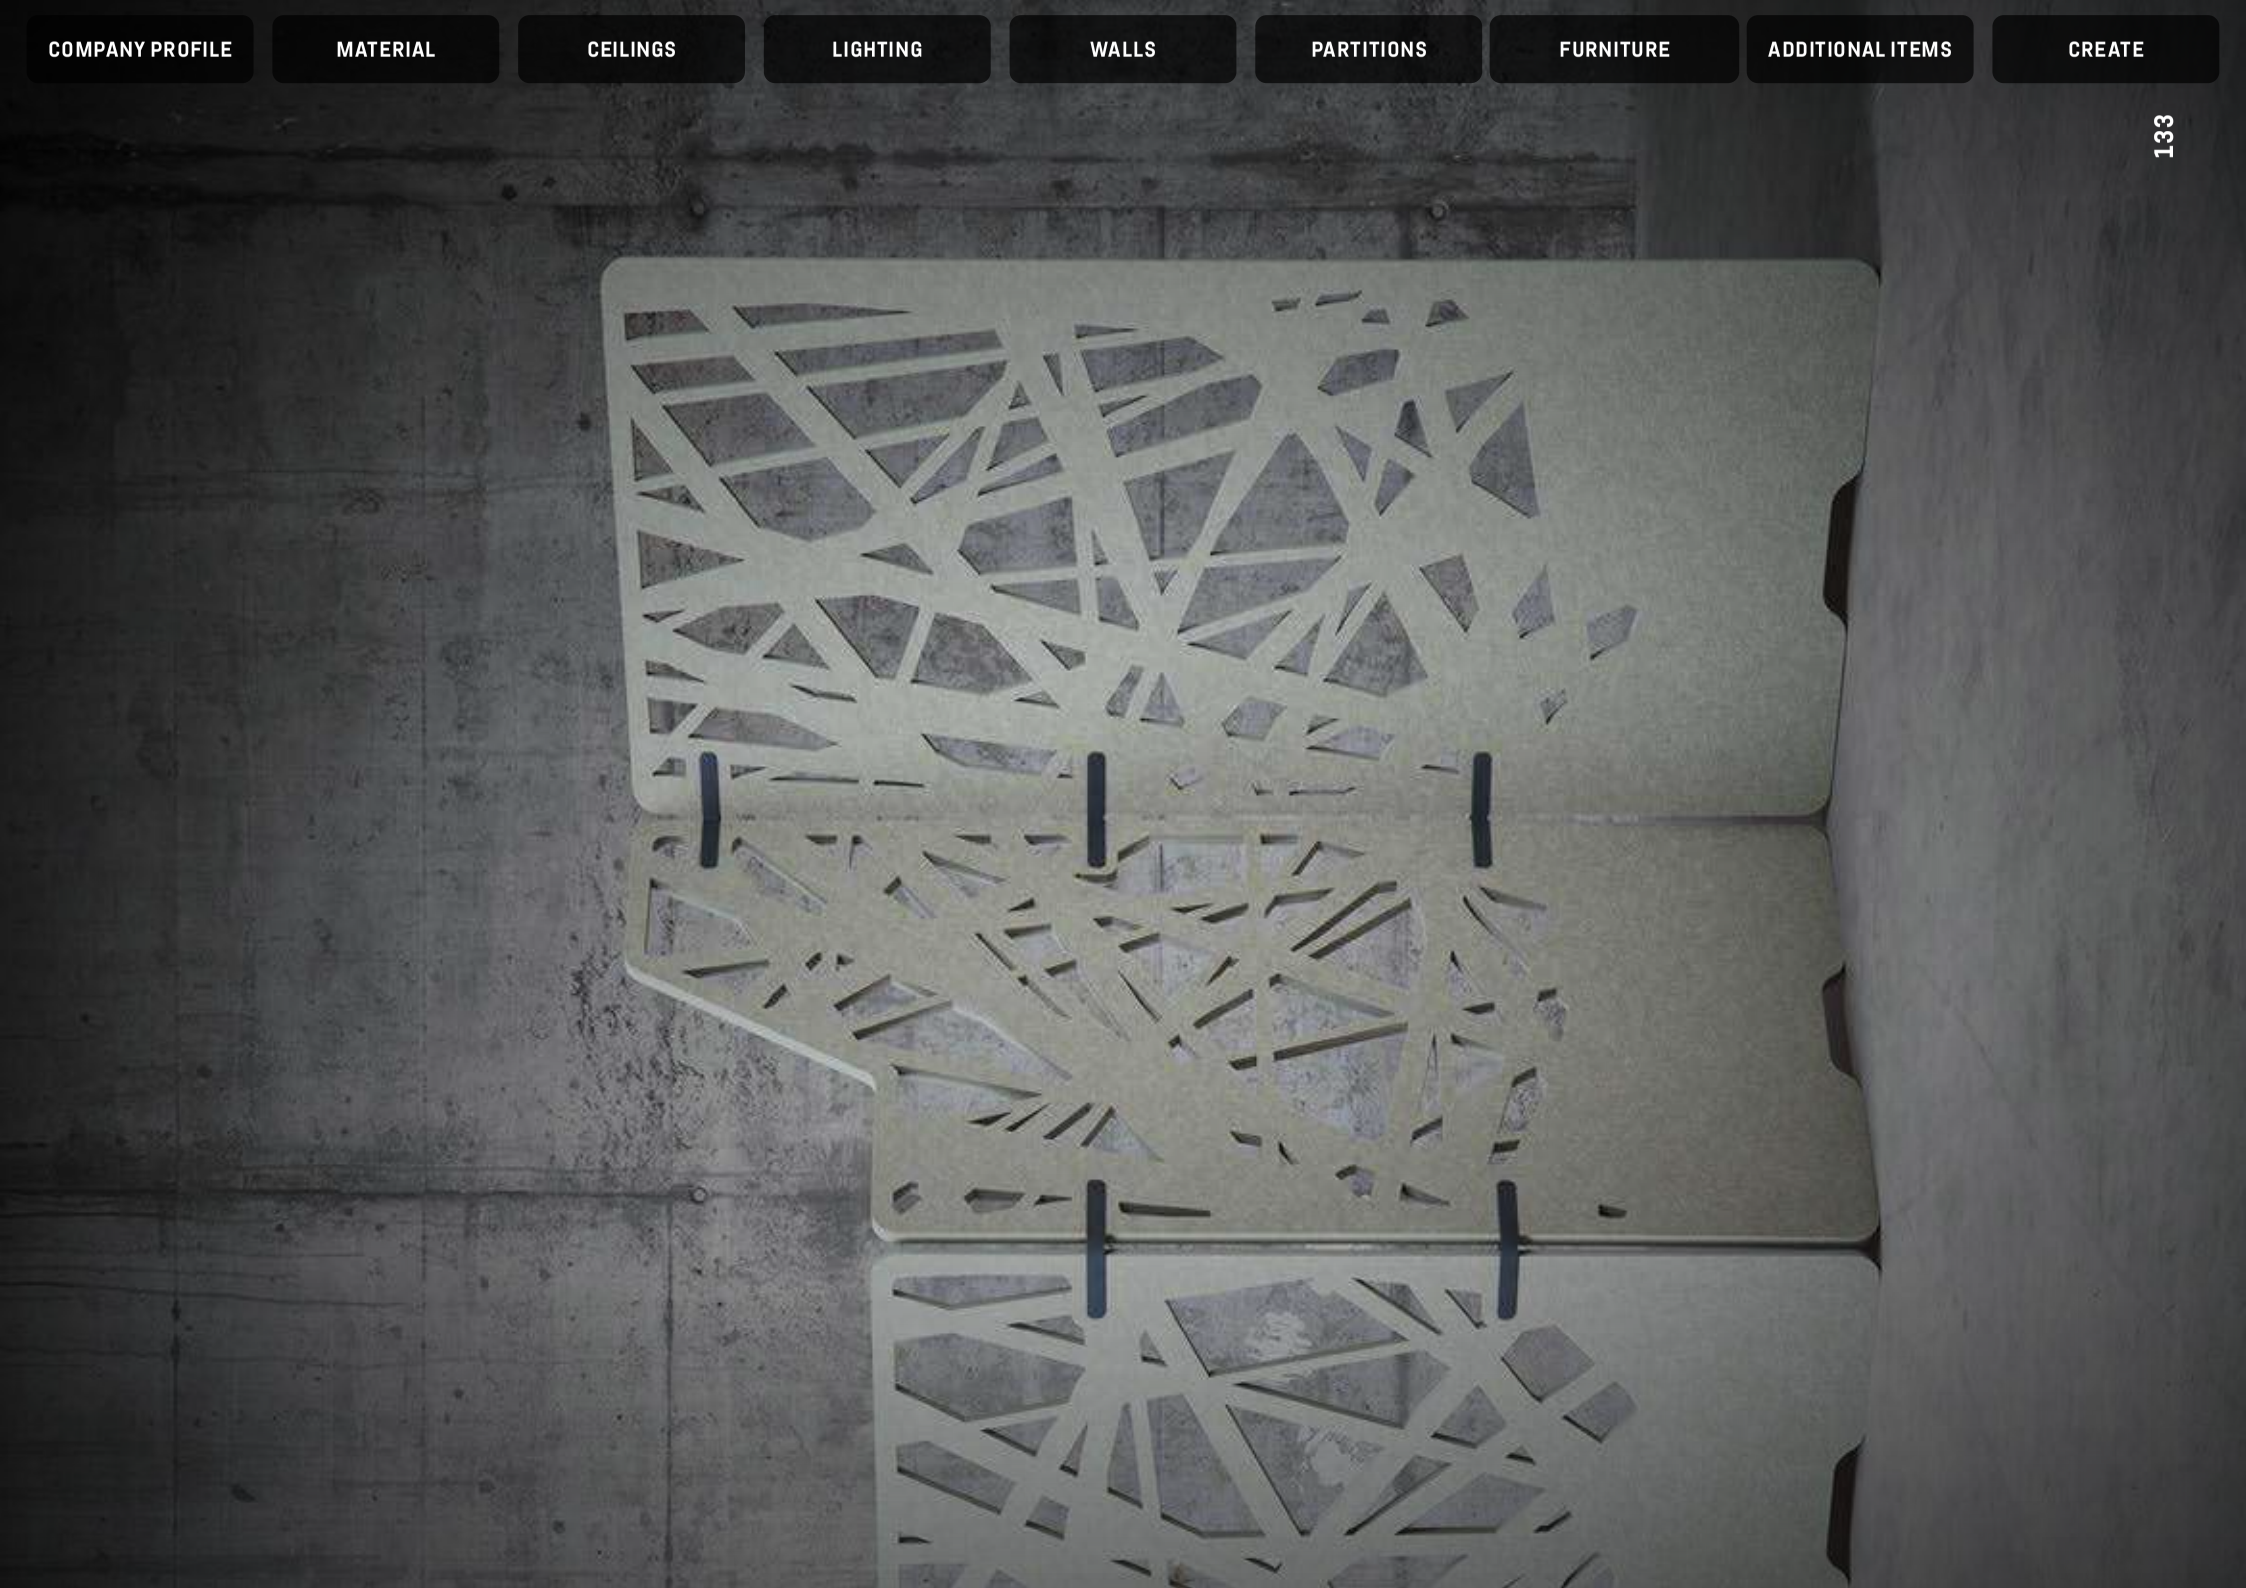
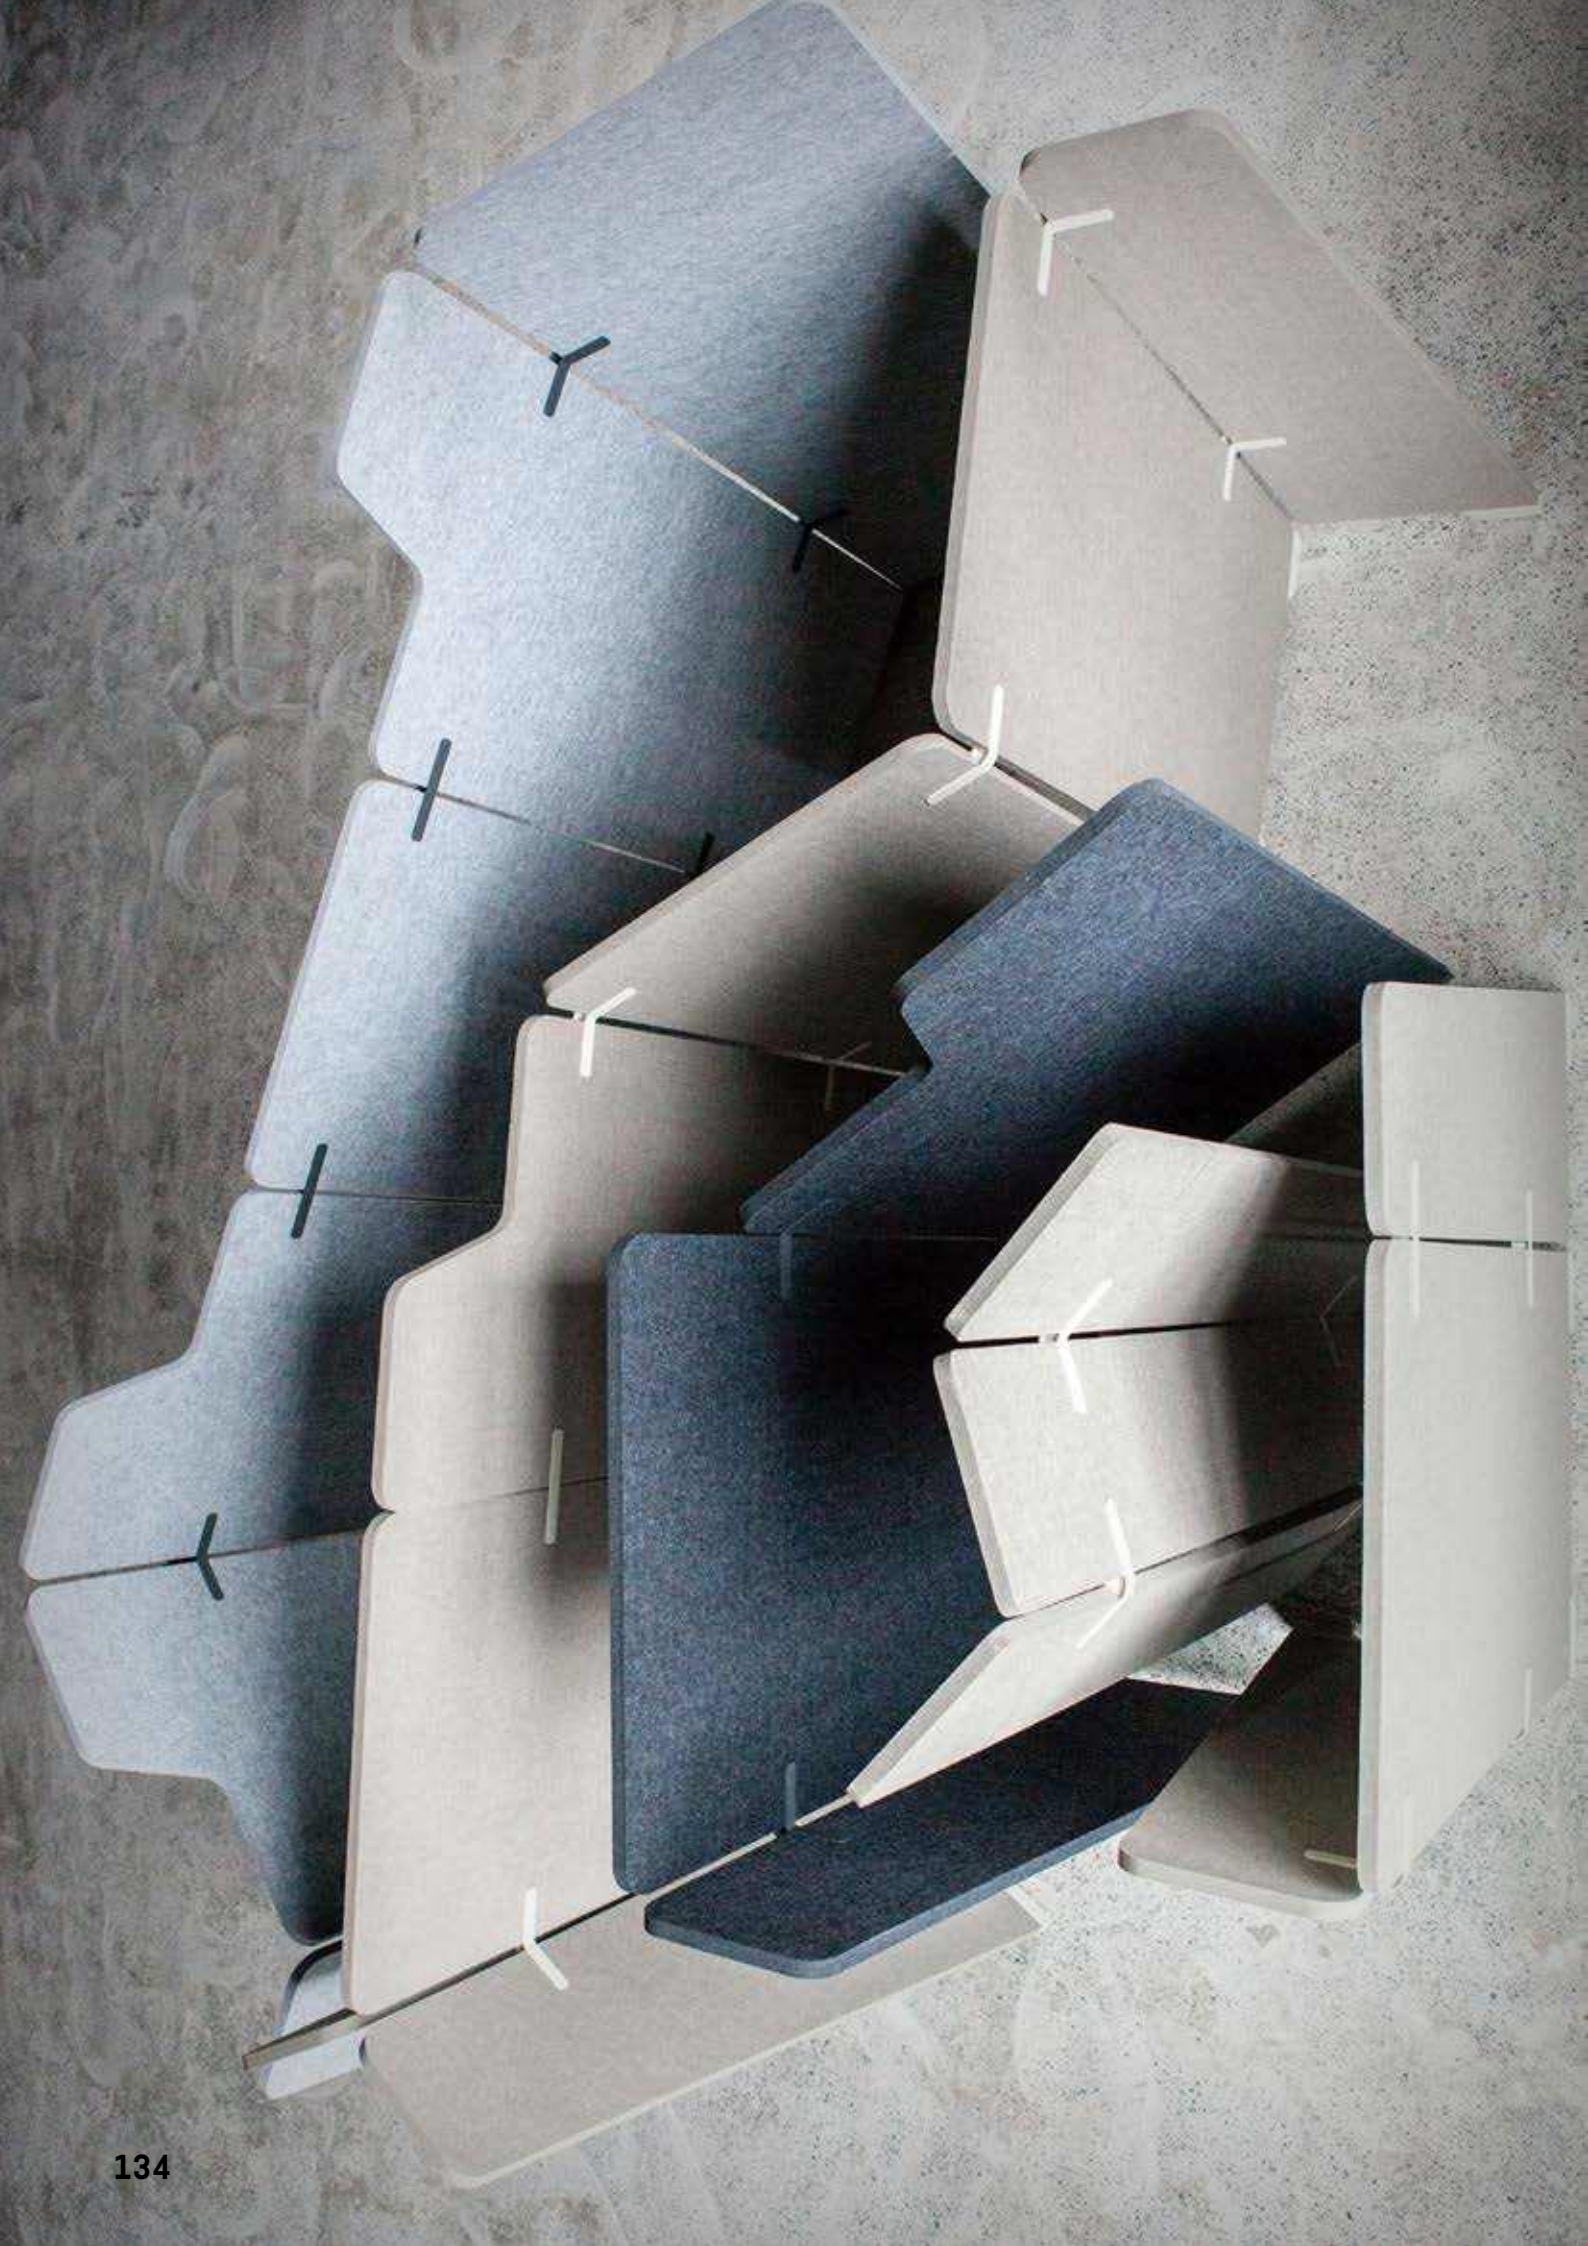
ECHO**COVE® ECO**

Thanks to a plug-in system, the EchoCove® ECO and PALING movable walls offer endless combination possibilities. They can be assembled and reconfigured without tools. The high density of the lightweight material of these acoustic partitions allows for a frameless construction. The perforations create the desired degree of permeability and attention with sophisticated details.





ECHO**COVE® 24MM ECO 79**

Frameless acoustic partition for installation on the floor (tool-free) excl. EchoCove® JOINER connectors.
Absorption coefficient: aw 1.00, class A
Special dimensions and designs on request.
Please specify the joiner type when ordering. (Page 205)
This product is available with our perforations. (Page 223)

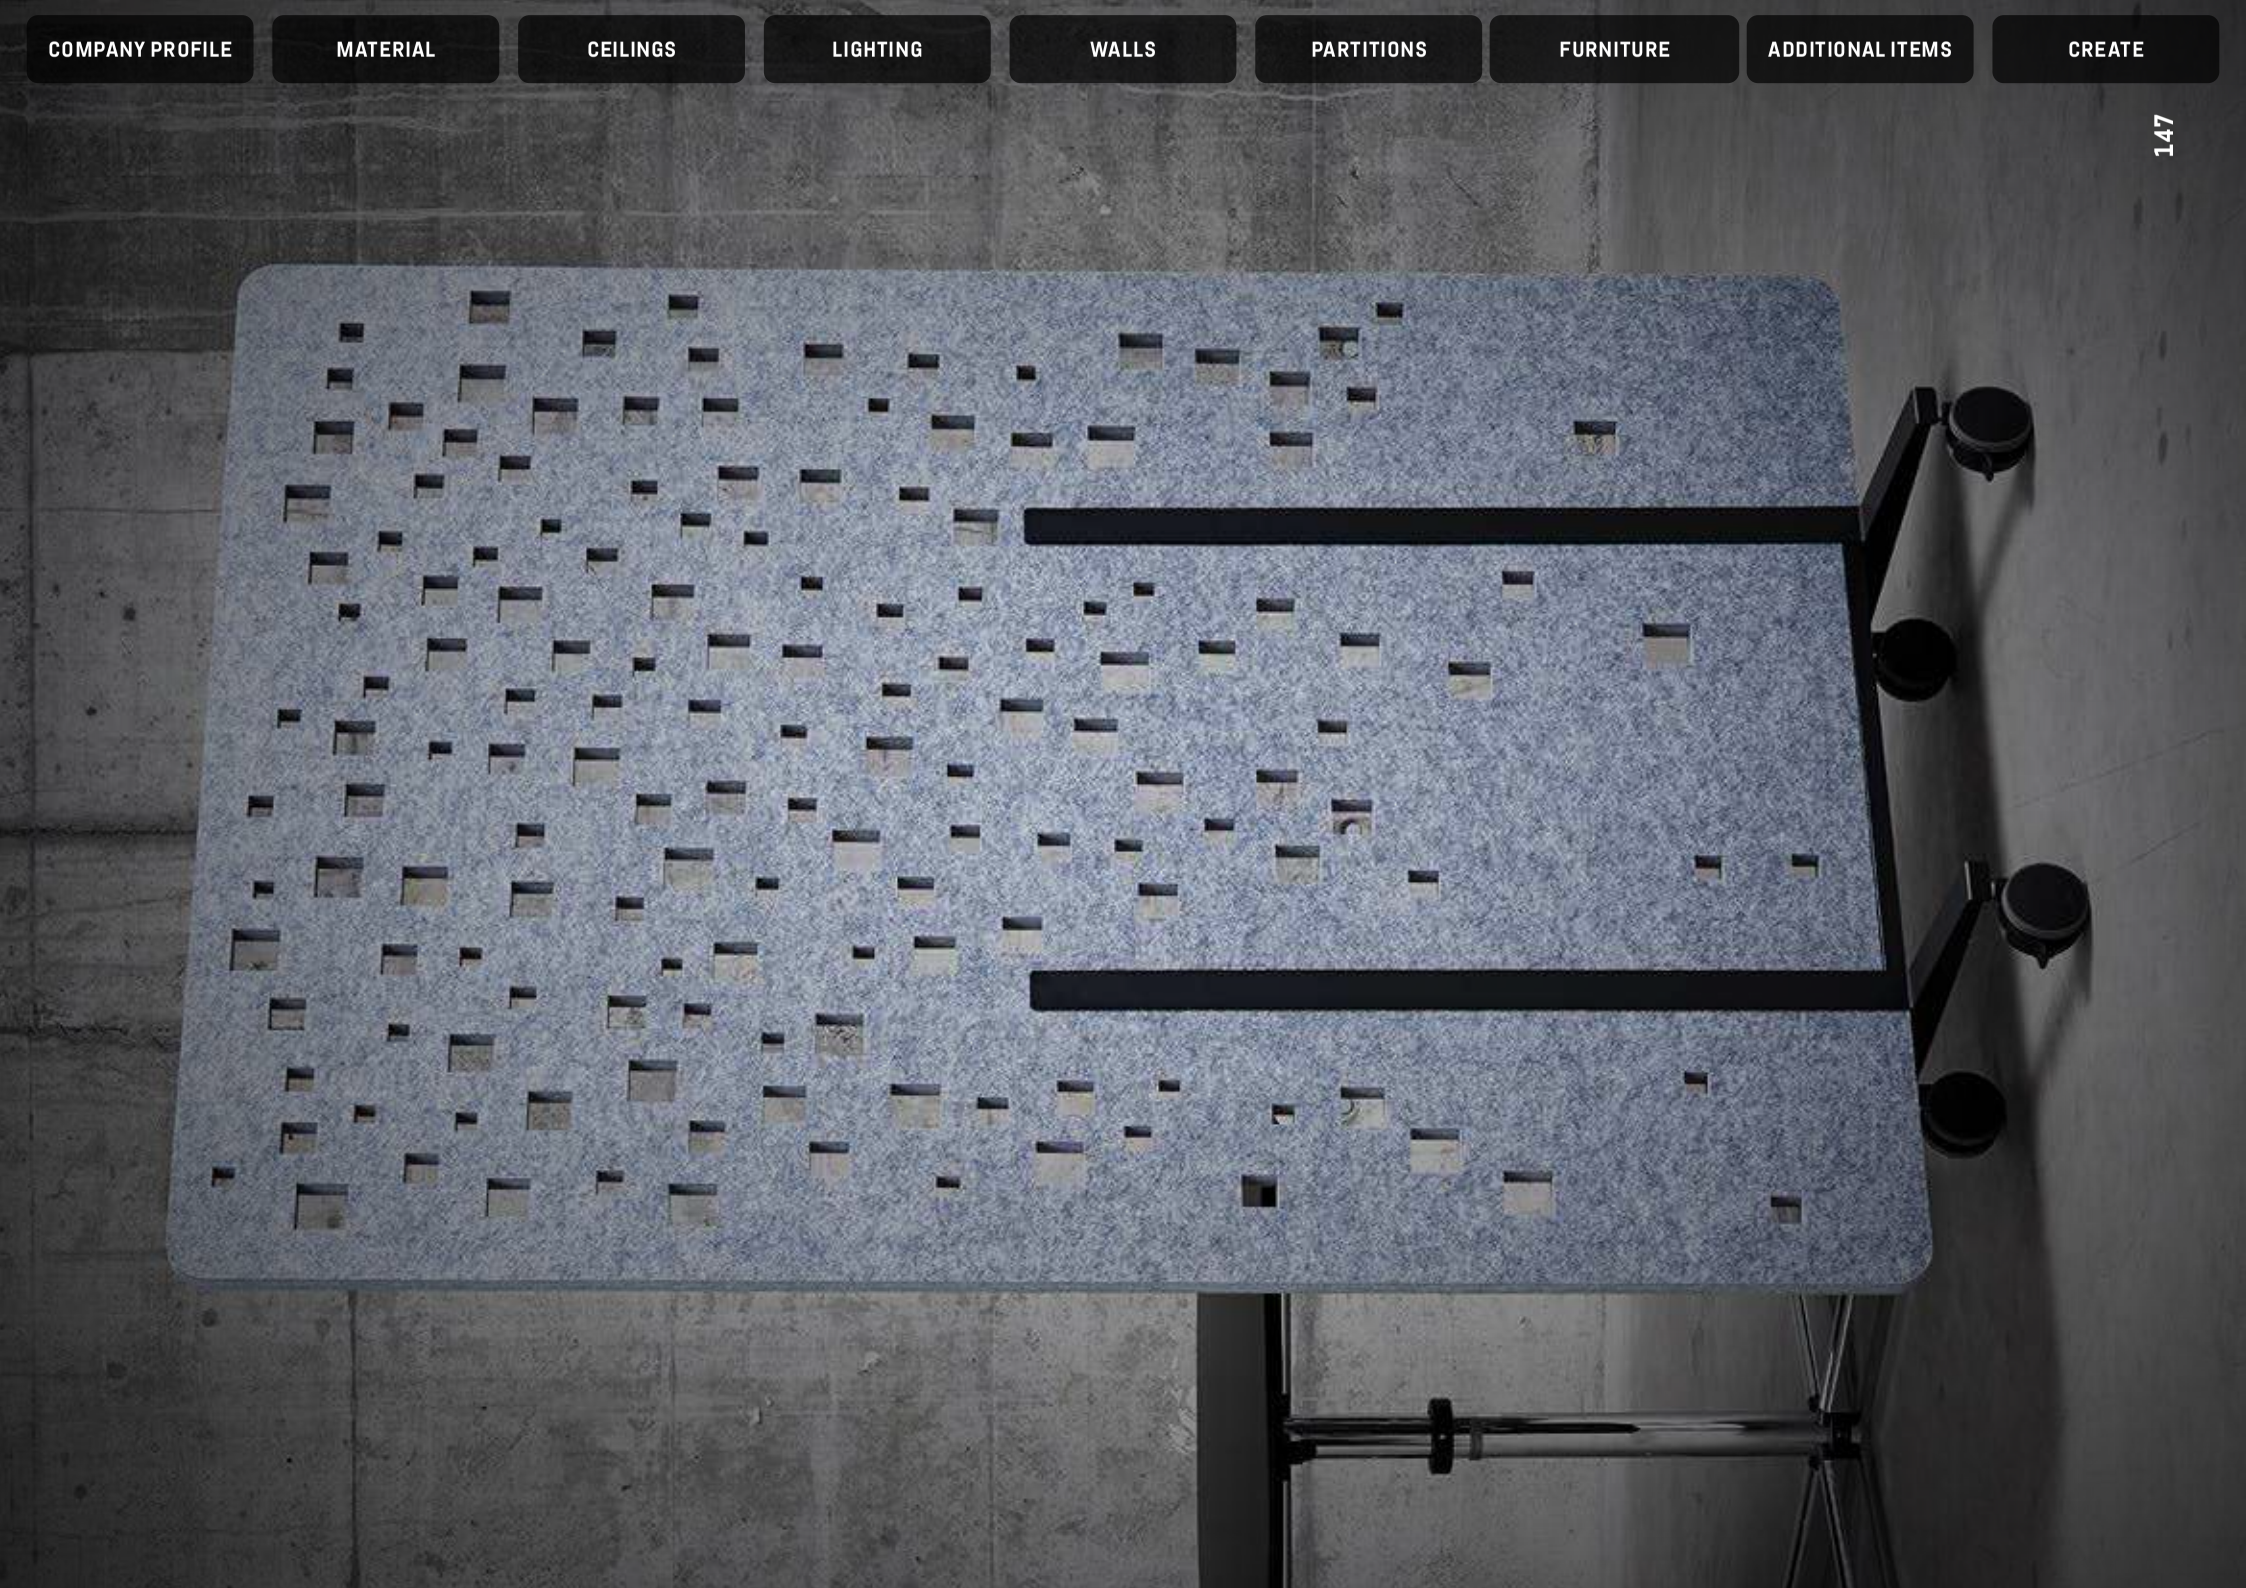
ECHO**COVE® MOVE**

Movable partitions allow open-plan offices to be temporarily separated and acoustically insulated. The lightweight EchoCove® MOVE solution offers a wide range of products that come in sizes up to 180cm x 180cm and in many colours. Thanks to the high-quality steel base and the castors with stoppers, the acoustic panels can be easily moved around the room and safely parked.



ECHO**COVE® 24MM MOVE**

Frameless acoustic movable wall with high-quality base frame with castors incl. stoppers, deep matt powder-coated (no tools required).
Absorption coefficient: aw 1.00, class A
Colour of base: Black RAL9005

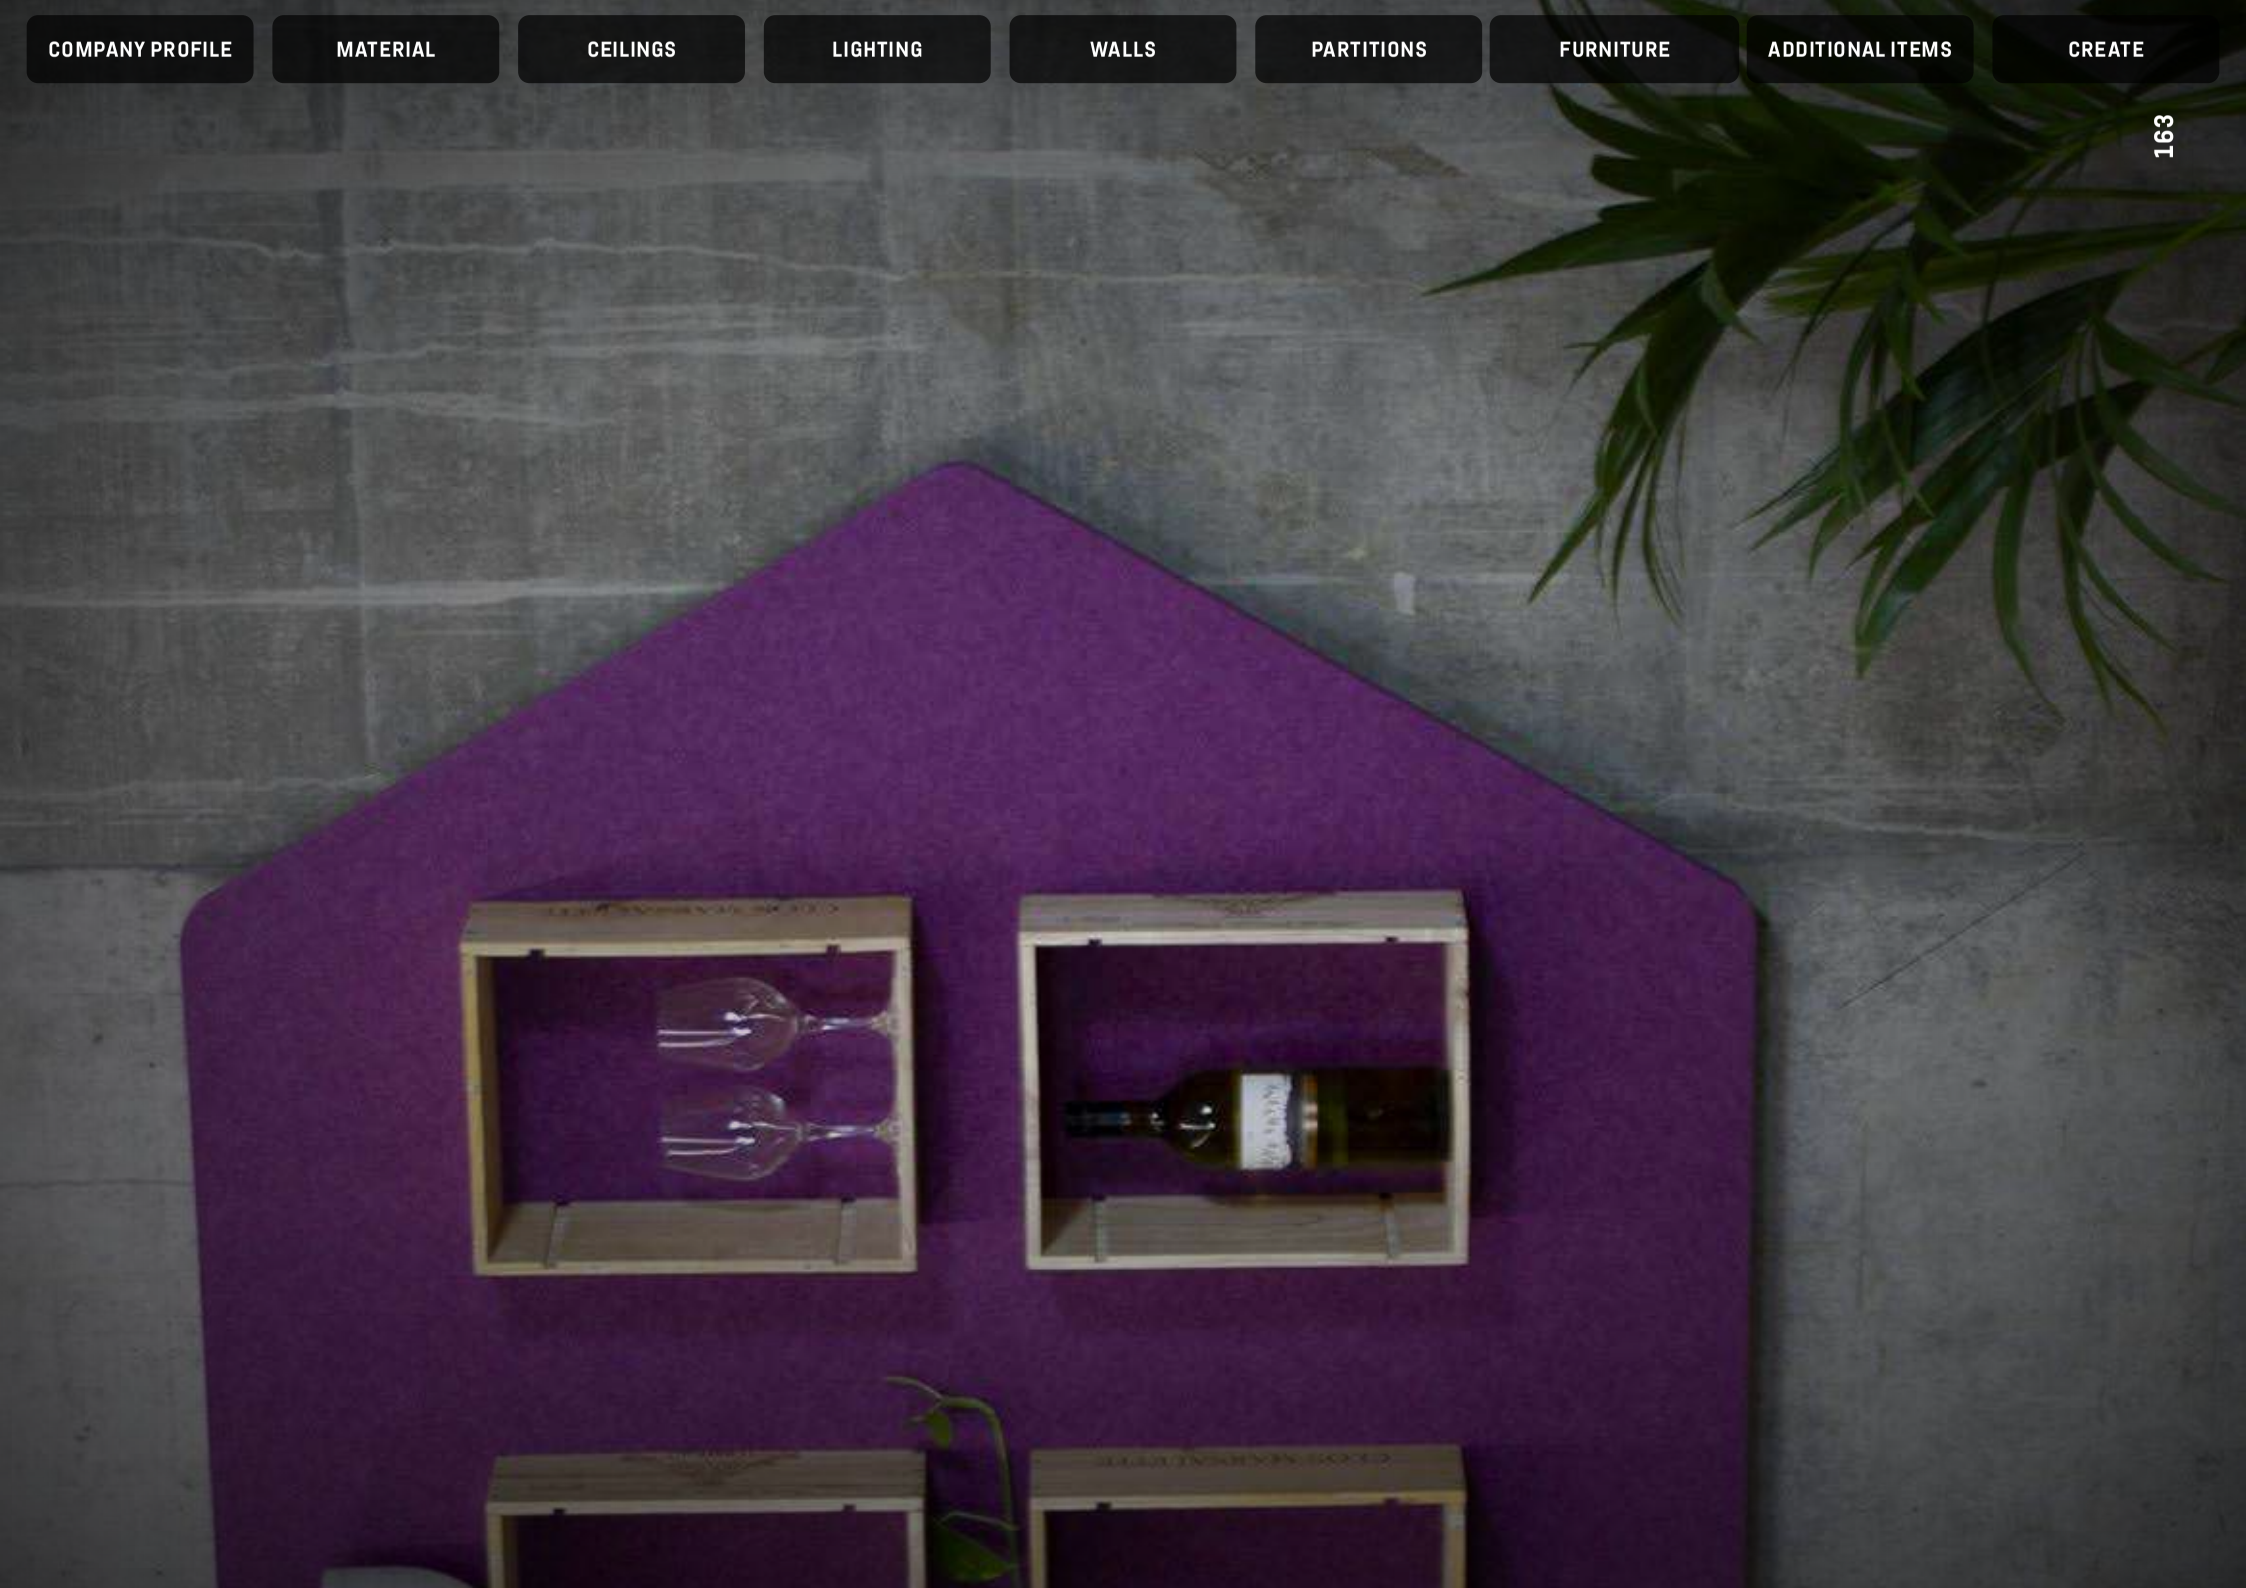
ACOUSTIC-FURNITURE

Design and function combined in one: acoustic furniture are utility and design elements made of EchoBoard® for improving the sound environment in rooms of all kinds.

ECHO**CRATE®**

EchoCrate® is the elegant acoustic solution for storage space in a small area. The EchoBoard® wall panel can be configured in any colour and shape and can be used in a wide variety of areas. The seemingly floating wall shelf is mounted on a powder-coated metal frame or a customised solution.

For the first time, the design combines two recycling concepts of beverage packaging, PET bottles and wine crates. Recycled PET was used to produce the decorative acoustic board and the practical shelves are made from upcycled wooden crates.



ECHO**CRATE® 24MM**

Acoustic panels in various shapes and surface designs combined with storage made out of wooden crates incl. wall suspension.
Absorption coefficient: aw 0.90, class A
Corner radius: 40mm
When ordering EchoCrate® RECTANGLE M & L items (ECR24REC079180- & ECR24REC120180-), please specify the type of suspension profile. (Page 211)

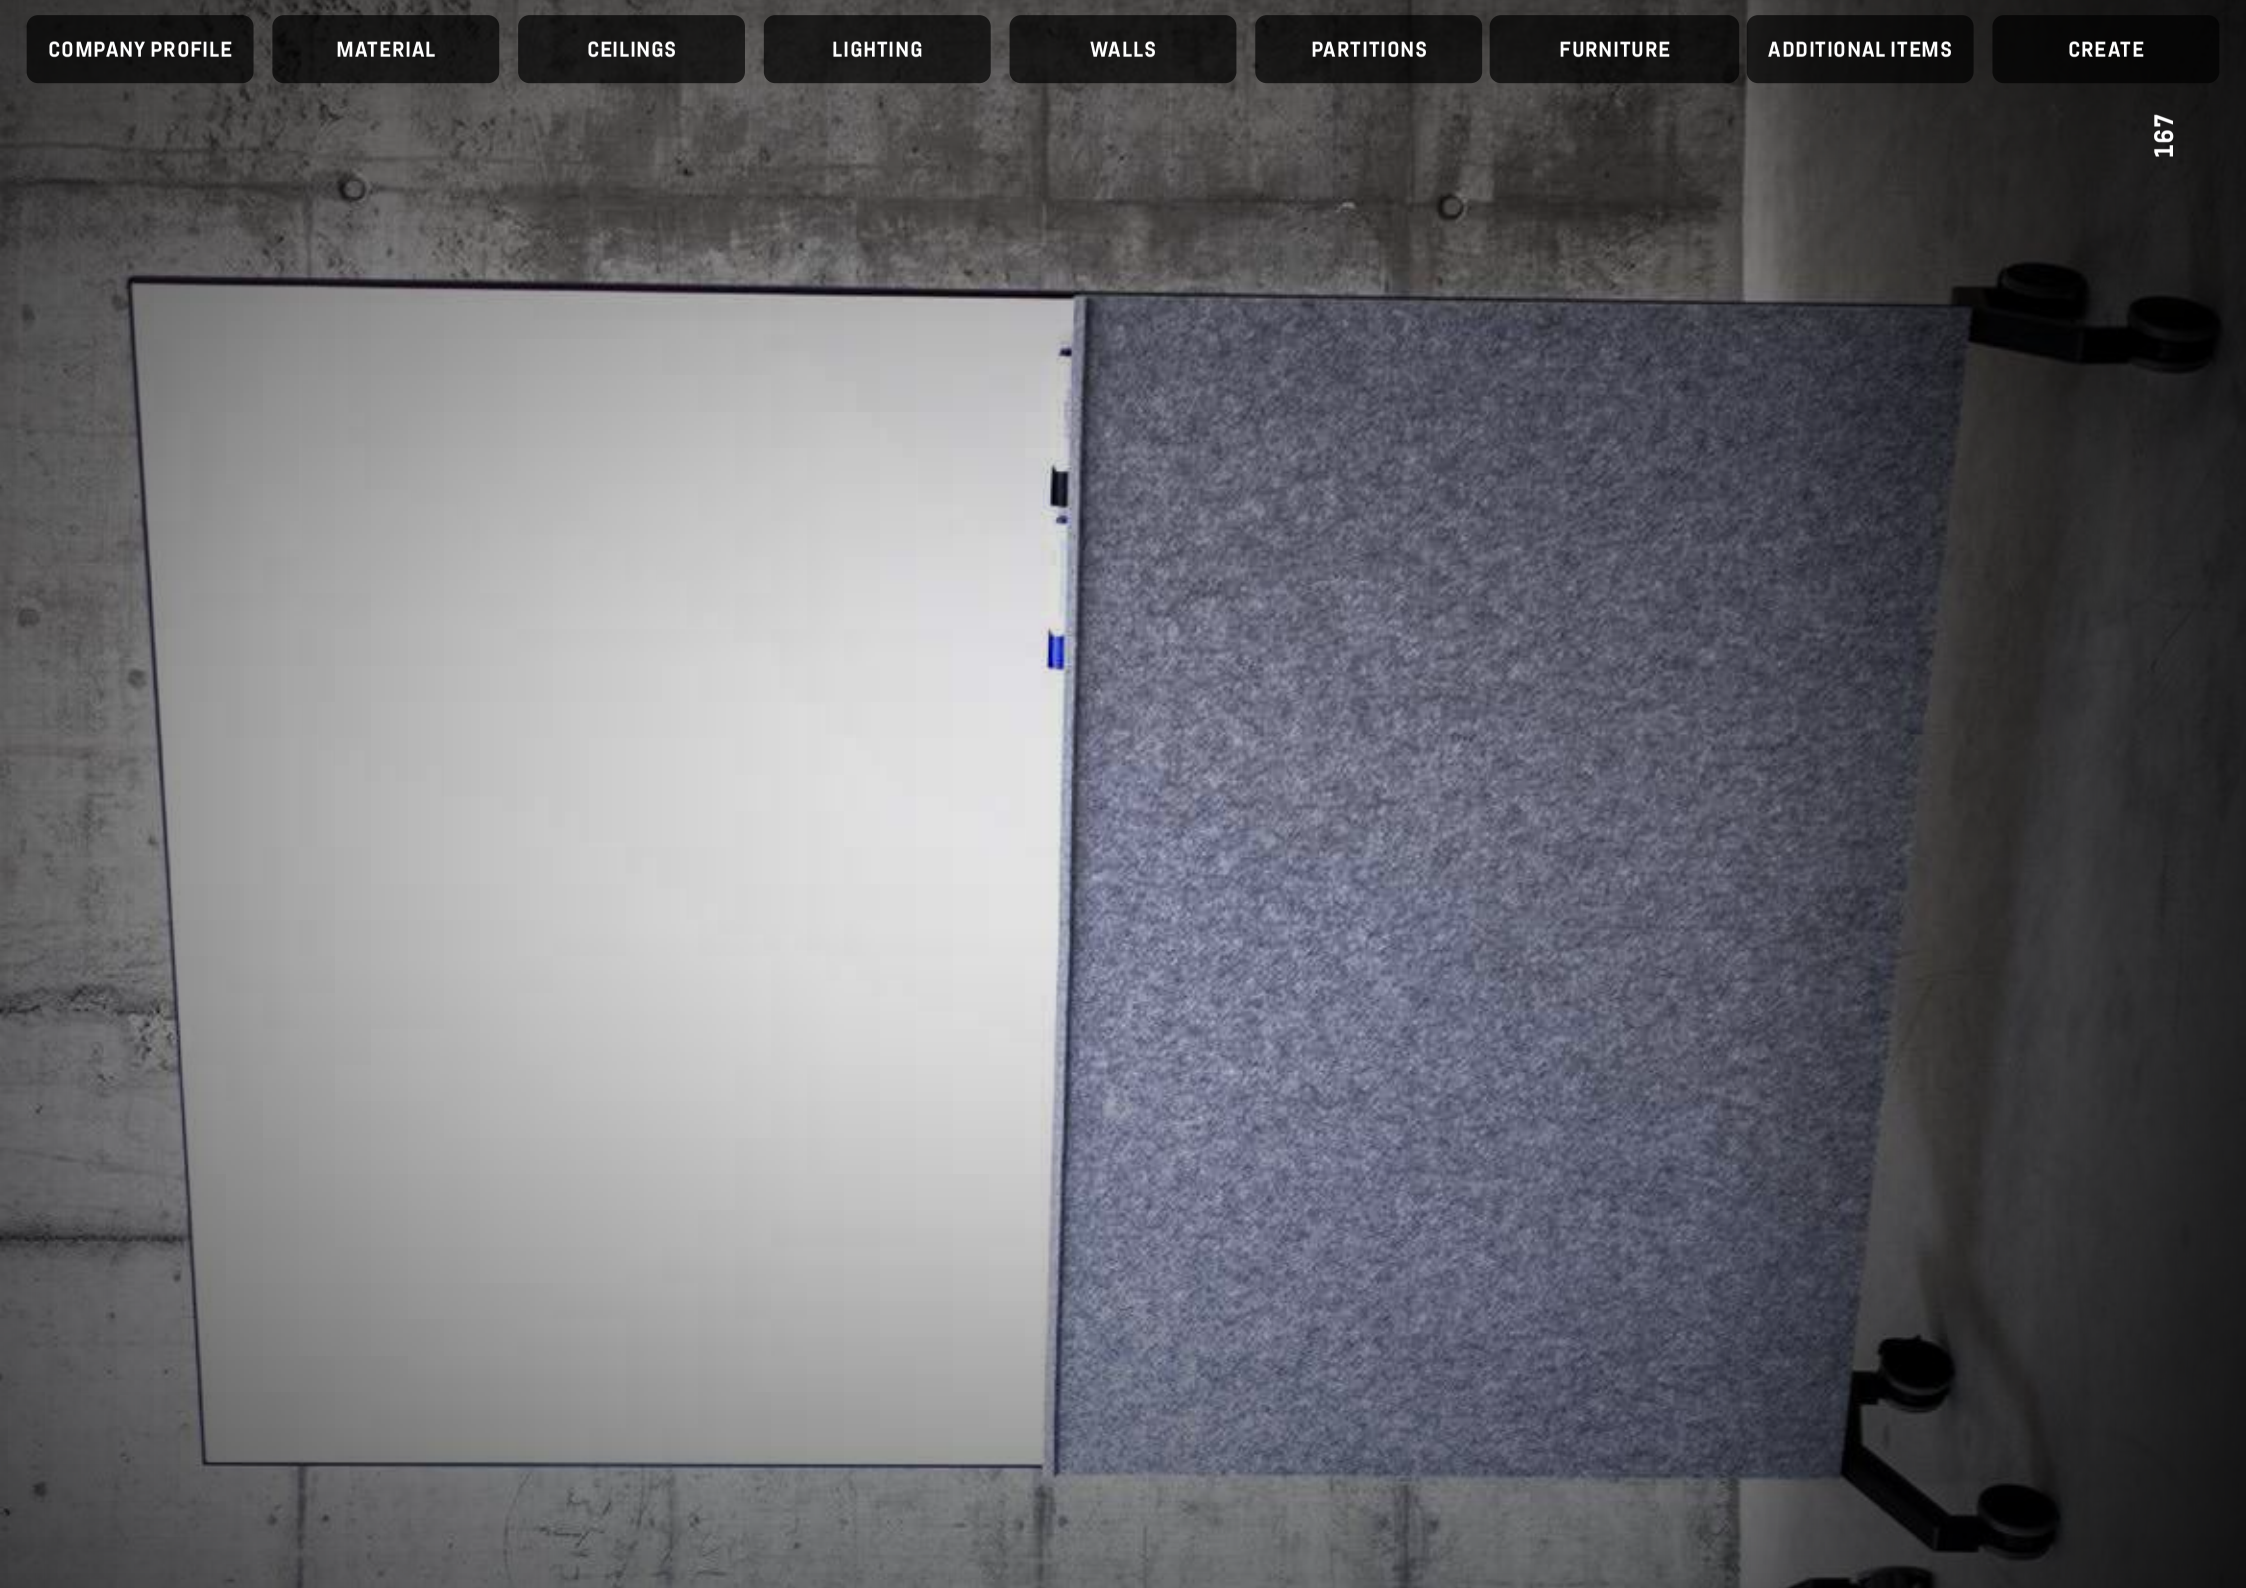
ECHO**NOTE®**

EchoNote® is a high-quality whiteboard with a pinboard on the back. It also serves as a functional, movable and sound-absorbing room divider. The magnetic board and the EchoBoard® acoustic panel are embedded in a minimalist frame made of powder-coated steel, the elegant feet are on castors.

EchoNote® cleverly adapts to the layout needs of offices, training rooms or meeting rooms. The large display area supports collaborative work



ECHO**NOTE® 12MM**

High-performance acoustic whiteboard consisting of a pin board with textile surface made of 100% PET and a classic whiteboard surface. Optionally available with cover plates.
Absorption coefficient: aw 0.30
This product is optionally available with our magnetic cover plates. (Page 213)

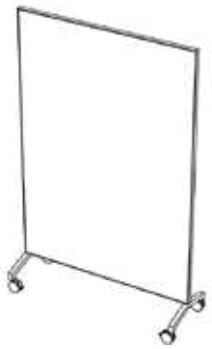
ECHO**NOTE® 12MM**



ECHO**TOWER® SQUARE**

The EchoTower® is the pioneering product in zero noise and zero waste for any space. The acoustic column is cut from a sheet of EchoBoard®, the high-performance absorber made from recycled PET bottles. But that's not all. With a Zero Waste goal, ECHO**JAZZ** products are taken back and shredded into EchoFlakes® along with offcuts. Filled with these flakes, the EchoTower® increases acoustic well-being and closes the material cycle. The EchoTower® requires no assembly. A base, with or without castors, made of powder-coated sheet steel is optional.

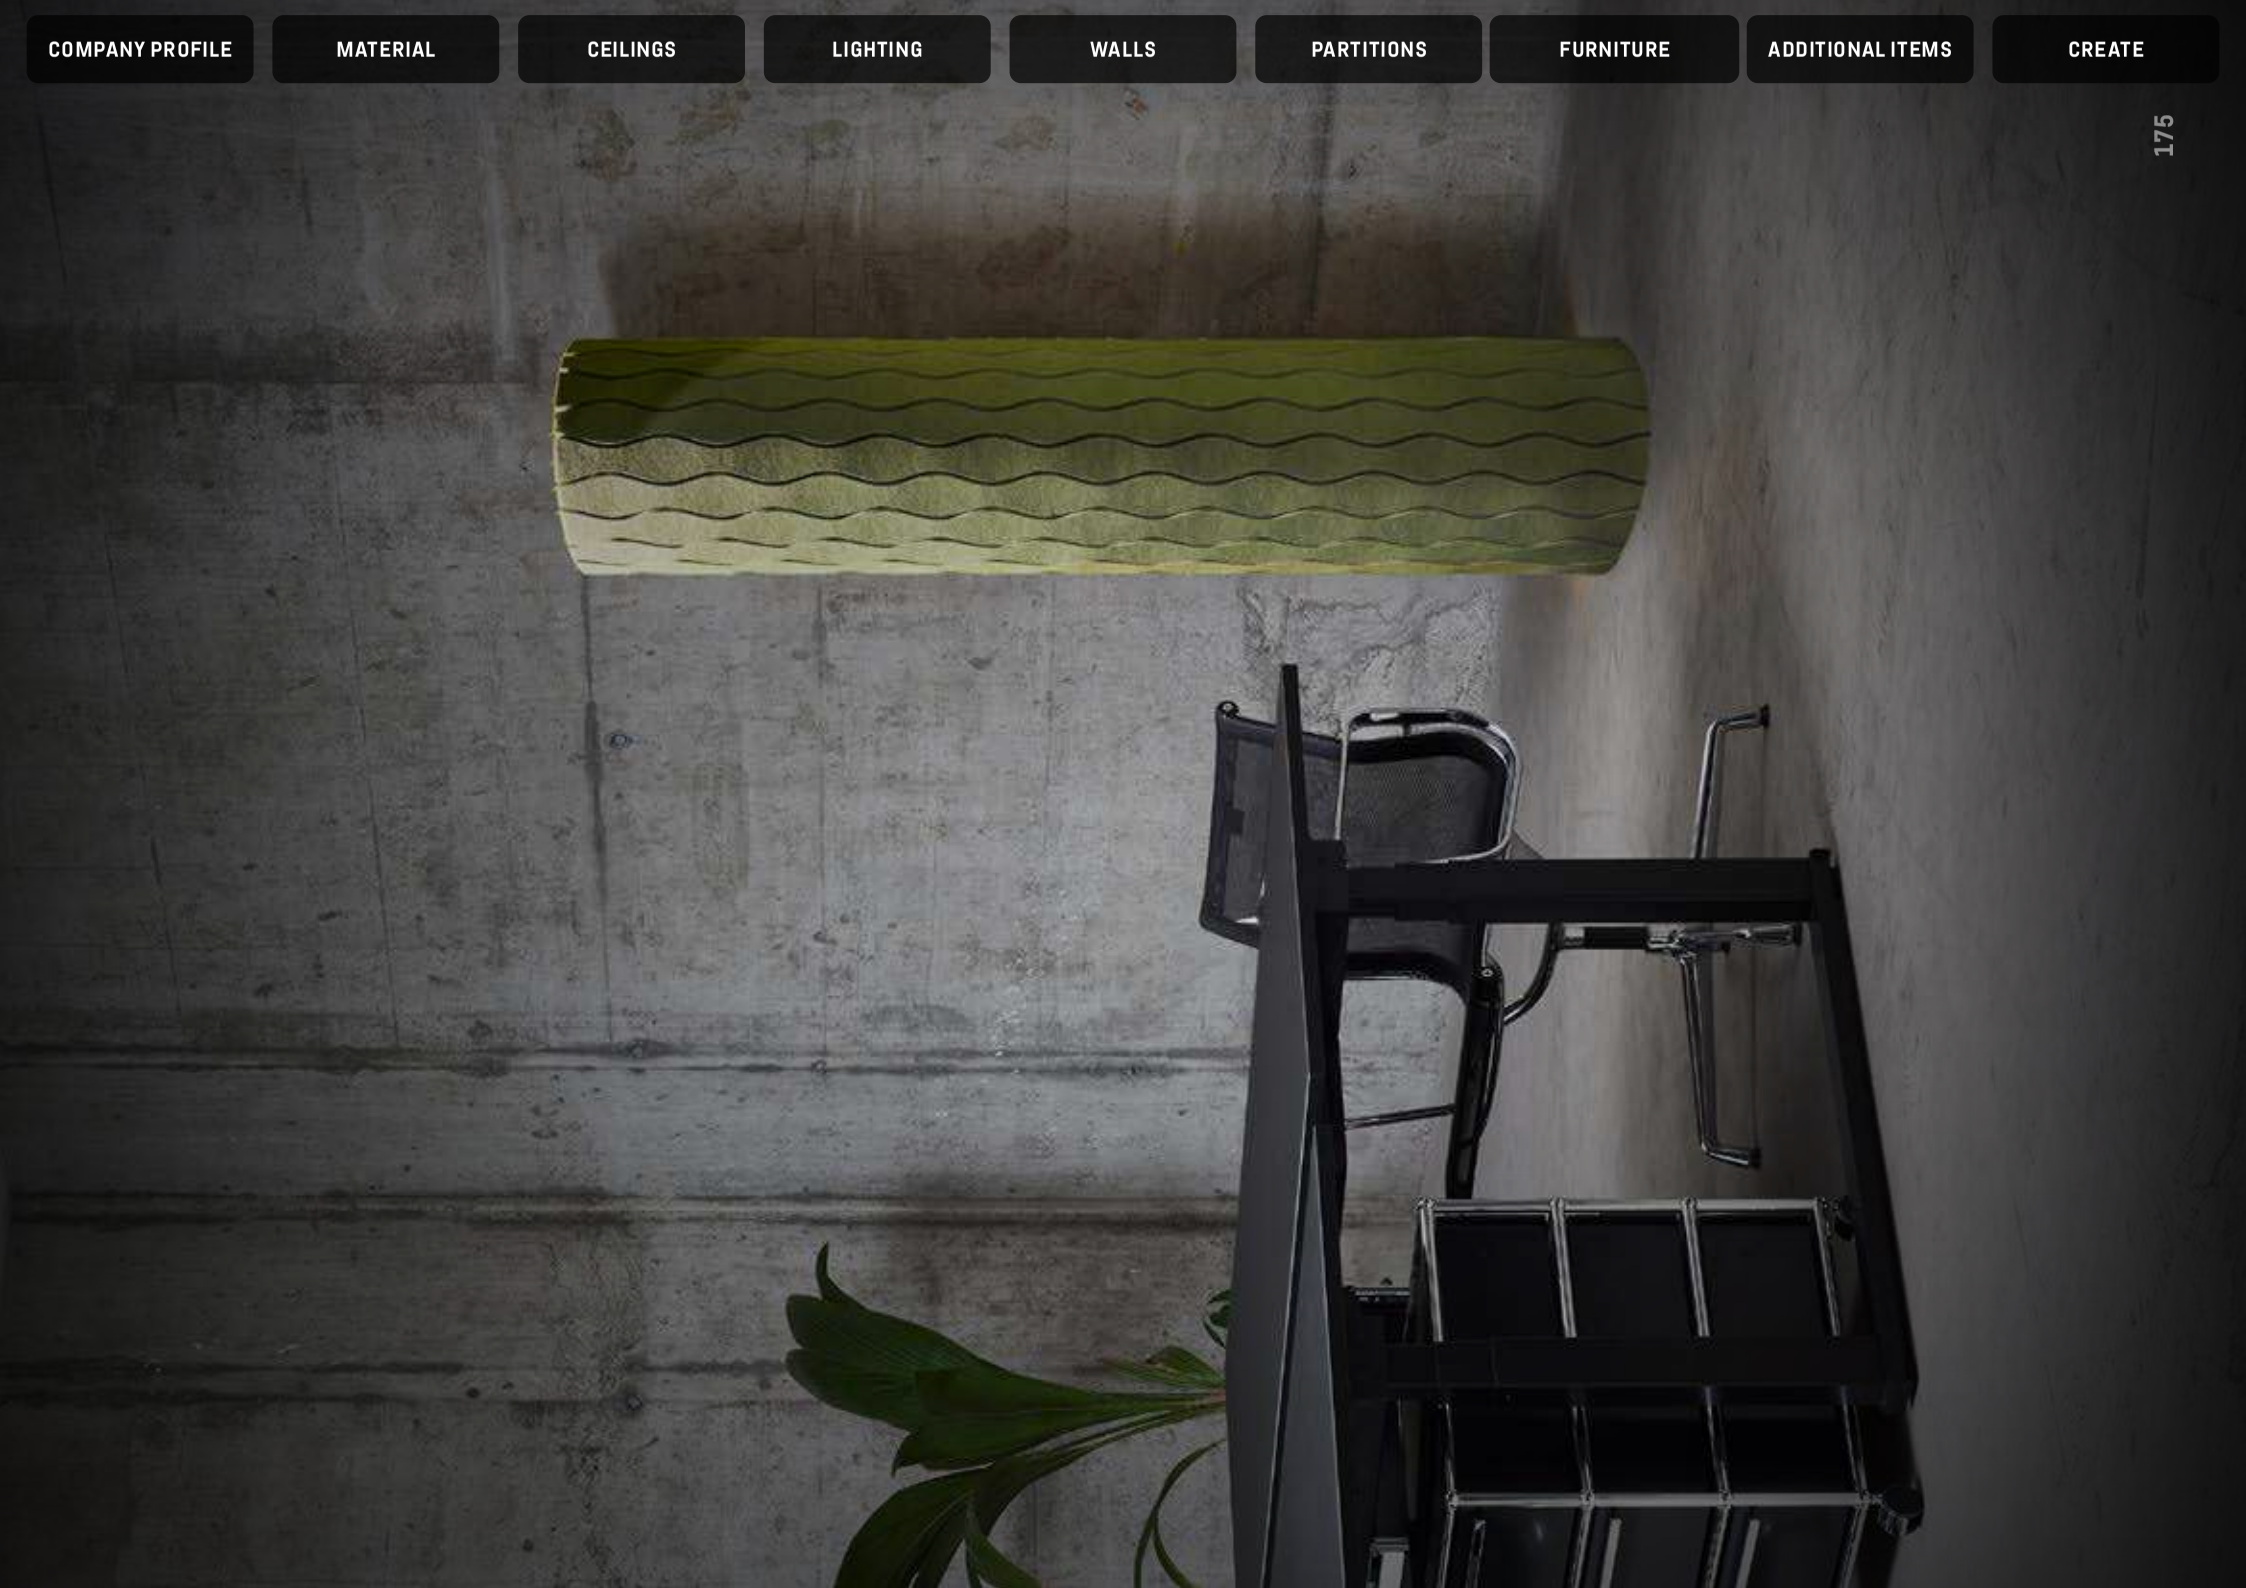
ECHO**TOWER® ROUND**

The EchoTower® is the leading product in zero noise and zero waste for every room. The acoustic column is cut from a single piece of EchoBoard®, the high-performance absorber made from recycled PET bottles. But that is not all, with a zero waste target, ECHO**JAZZ** products are taken back and shredded together with offcuts to produce EchoFlakes®. Filled with these flakes, the EchoTower® increases the acoustic comfort and closes the material cycle. The EchoTower® is freestanding. A stand base, with or without wheels, made of powder-coated steel is optional.

The acoustic column with relief structure is an eye-catcher that achieves outstanding absorption values and ensures well-being. The recyclable EchoTower® stands for sustainability by design without compromise - with more than 465 recycled PET bottles per tower.



ECHO**TOWER® 24MM ROUND**

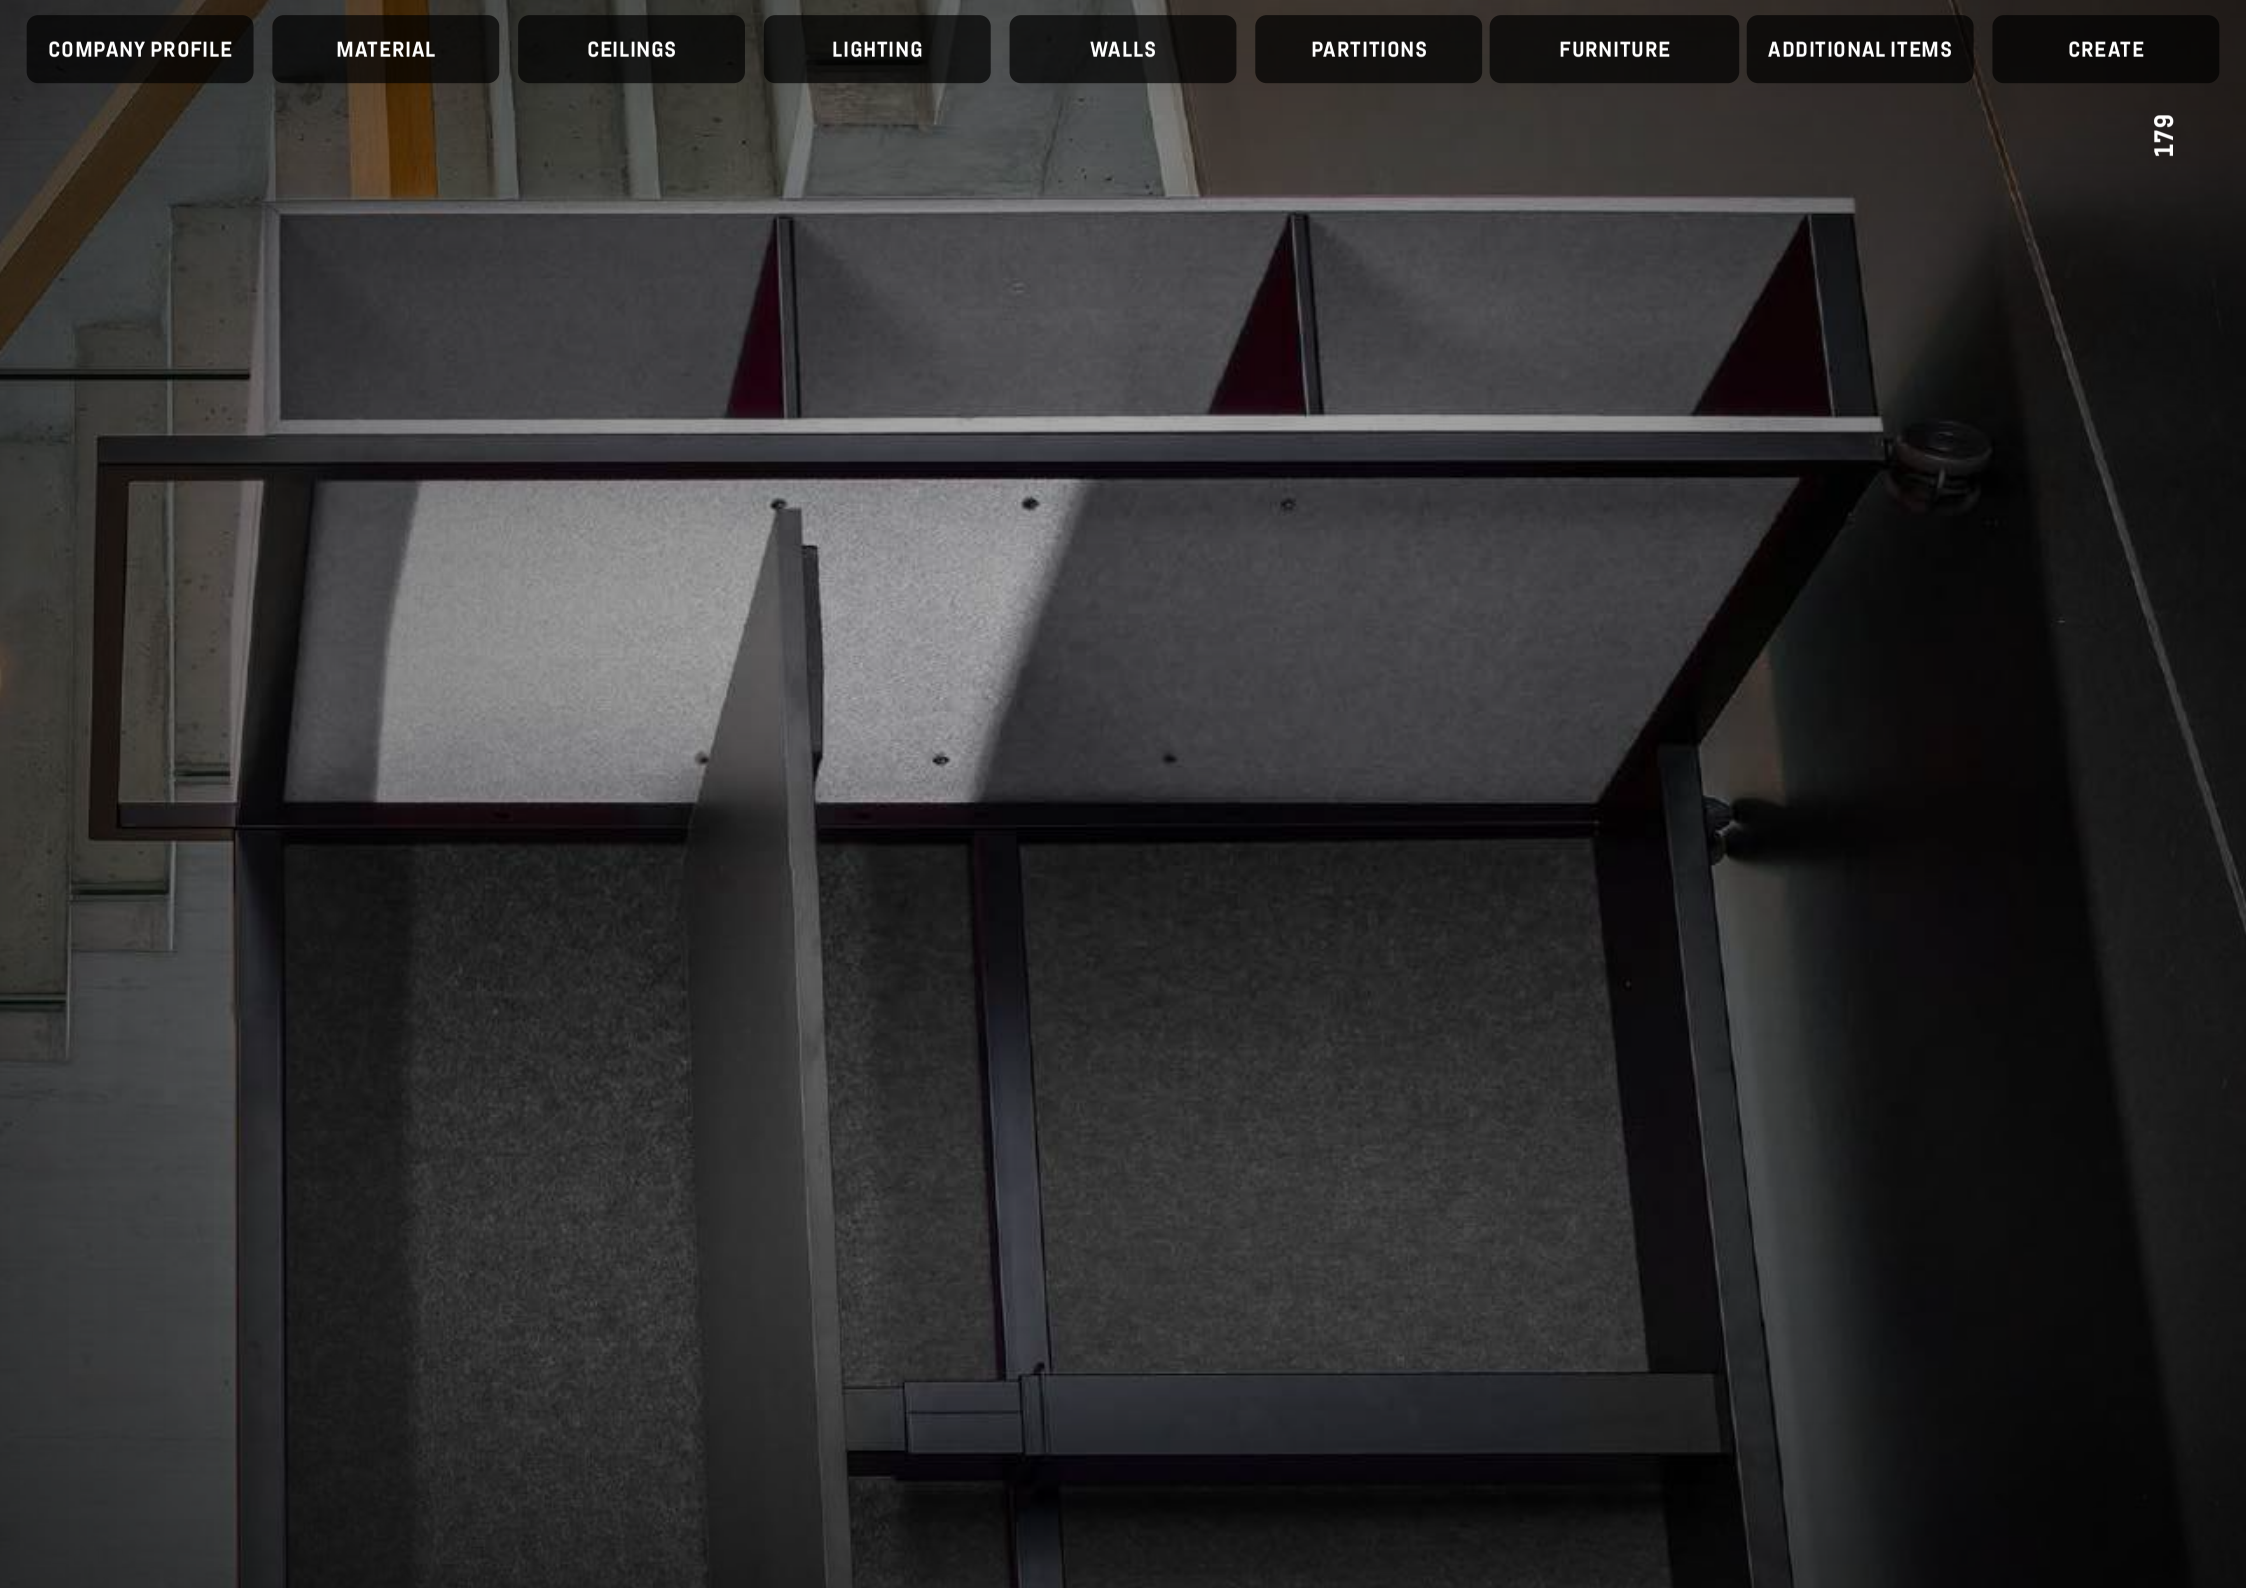
M**CART**

The **MCart** workstation offers the combination of personal focus space with mobile adaptability. Its compact dimensions make it suitable for working in an open office as well as a home office. The starting point for the design is an open steel frame. ECHO**JAZZ** panels define a semi-enclosed workspace with optimal sound insulation, simple body and colour accent. The acoustics in the overall space are also significantly improved. A gas lift column allows the height of the worktop to be adjusted from 70 to 112 cm in a matter of seconds. From standing to sitting and vice versa in real time.



MCART 12MM

Mobile acoustic workstation on wheels with integrated plug-in bar and hydraulically height-adjustable table top.
Absorption coefficient: aw 0.90, class A

ECHO**CARRY**

The EchoCarry is an office organiser for personal equipment. At the workplace, laptop, accessories, office materials and private things are always well tidied and easily at hand thanks to two storage positions. The integrated handle allows the toolbox to be quickly stored in a compartment or cupboard at the end of the working day.

The elegant office companion is made of the acoustic absorber EchoBoard® around a stable wooden board made of European birch. In use, it is very quiet and muffles ambient noise. The EchoCarry symbolises the focus on ergonomics in the modern mobile working environment.

ECHO**BOX®**

In the Open Office, telephone calls and video calls at the workplace can be disturbing. The sound-protected EchoBox® ensures privacy and less disruptive noise. A room within a room for short and focused conversations, while standing or sitting. Thanks to the integrated height-adjustable shelf, there is also room for documents or a laptop. The conversation booth can be assembled in no time without tools. Its 7 parts weigh only 42kg.

The EchoBox® is a Swiss product that resulted from an intensive development cooperation between SYMA Profile and Fastening Technology and ECHO**JAZZ** Acoustic Absorbers.

We build Acoustic Inspiration.

ECHO**BOX® 24MM**

Stand-alone quiet booth with height-adjustable table and fold-away chair.
